**S 1:** shows Niemeier et al 2013 results of the MPI-ESM ensemble splitted over land and ocean for the last decade of geoengineering minus the RCP4.5 (2015-2024) . TOA flux of net SW and LW flux under clear sky (cl) and all sky (a) conditions for ocean (left) and land (right) only. Given are results for SULF (red) and SALT (blue)

**S 1:** Values of mean and extreme indices averaged globally and annually for each of ensemble members of the three models SALT 2040s and SULF 2040s

	SALT 2040s						SULF 2040s
