SCOAP³ - Background

- Community-wide initiative
- LHC (Large Hadron Collider) experiments currently running
- Small community (30000 scientists)
- Long OA tradition (arXiv)
- Few HEP (High Energy Physics) journals (10)

➔ ~100 % Green OA without mandate

HEP Scientists Search Habits

Gentil-Beccot *et al.* arxiv:0804.2701

Aim of SCOAP³

- Convert entire HEP literature to OA in partnership with publishers
- Preserve quality standards (peer-review)
- Re-direct money spent on subscription to SCOAP³
- Transparent transformation of OA
- Wide distribution (e.g. IR of HEP institutions)

➔ approx. 10 Mio € as a budget envelope

SCOAP³ Fair-Share Model

J. Krause *et al.* CERN-OPEN-2007-014

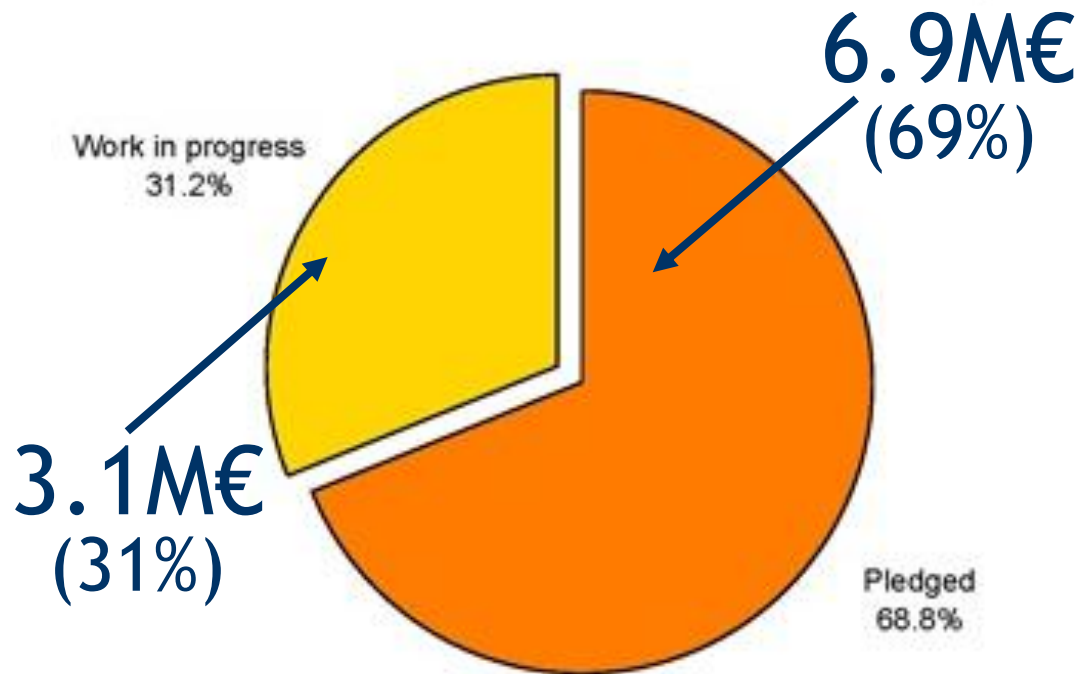

Cern Scientific Information Service

Current Status

- SCOAP³ Working Party Report published
- Solicit and collect expressions of interest of potential funding partners
- Funding partners identify country-by-country schemes to re-direct journal subscriptions to SCOAP³

→ 69% of the SCOAP3 budget envelope pledged by libraries, consortia and funders worldwide

Intense conversations with Brazil,
Russia, China, India and Japan !

Next steps

- Geopolitical distribution of partnerships
- Send a tender to publishers and
 - determine final budget;
 - enlist remaining partners
- Establish an international Governing Board
- Formal agreement to establish SCOAP³

➔ Goal: sending out tender as soon as possible

SCOAP³ Call for tender

Request price-per-article for peer-review & OA

- OA conditions
 - Irreversible OA
 - Author rights (also for figures and tables)
 - Push into repositories (full text and metadata)
- Financial conditions:
 - Unbundling of journal packages
 - Reduction of subscription prices
 - No double payment

➔ Transparency and competition

Max Planck and SCOAP³

Berlin Declaration (2003) claims

"...free, irrevocable, worldwide, right of access to, and a license to copy, use, distribute, transmit and display the work publicly and to make and distribute derivative works, in any digital medium for any responsible purpose..."
