

# PubMan Migration<sup>°</sup>

# Before starting the migration process – which aspects should be considered?

Does your institute plan to re-use its PubMan-data?
 If so, where und how shall this be implemented?

Which source the data shall be fetched from?
 Crucial criterion is the best data quality.

Which kind of publication-workflow will be practiced?

**Standard Workflow** 

 Do you need certain functionalities that currently aren't provided by PubMan? (e.g. new interfaces, export-/ import-formats, citation styles, genre types etc.)

- Which starting date shall be chosen for migration?
- Which period of time needs to be scheduled?

#### The starting date depends on:

- the question, if there are new functionalities that need to be implemented at first.
- future dates that may affect the resources at your institute; e.g.
   Fachbeirat, yearbook or operations concerning the ITinfrastructure etc.
- the schedule of the MPDL.

The **period of time** depends on:

- the data-quality.
- the resources available at the institute for the support of the migration process.
- the resources/capacities of the MPDL.

## The Essential Concepts of Migration
