

# "Open Access off line" for Open Access

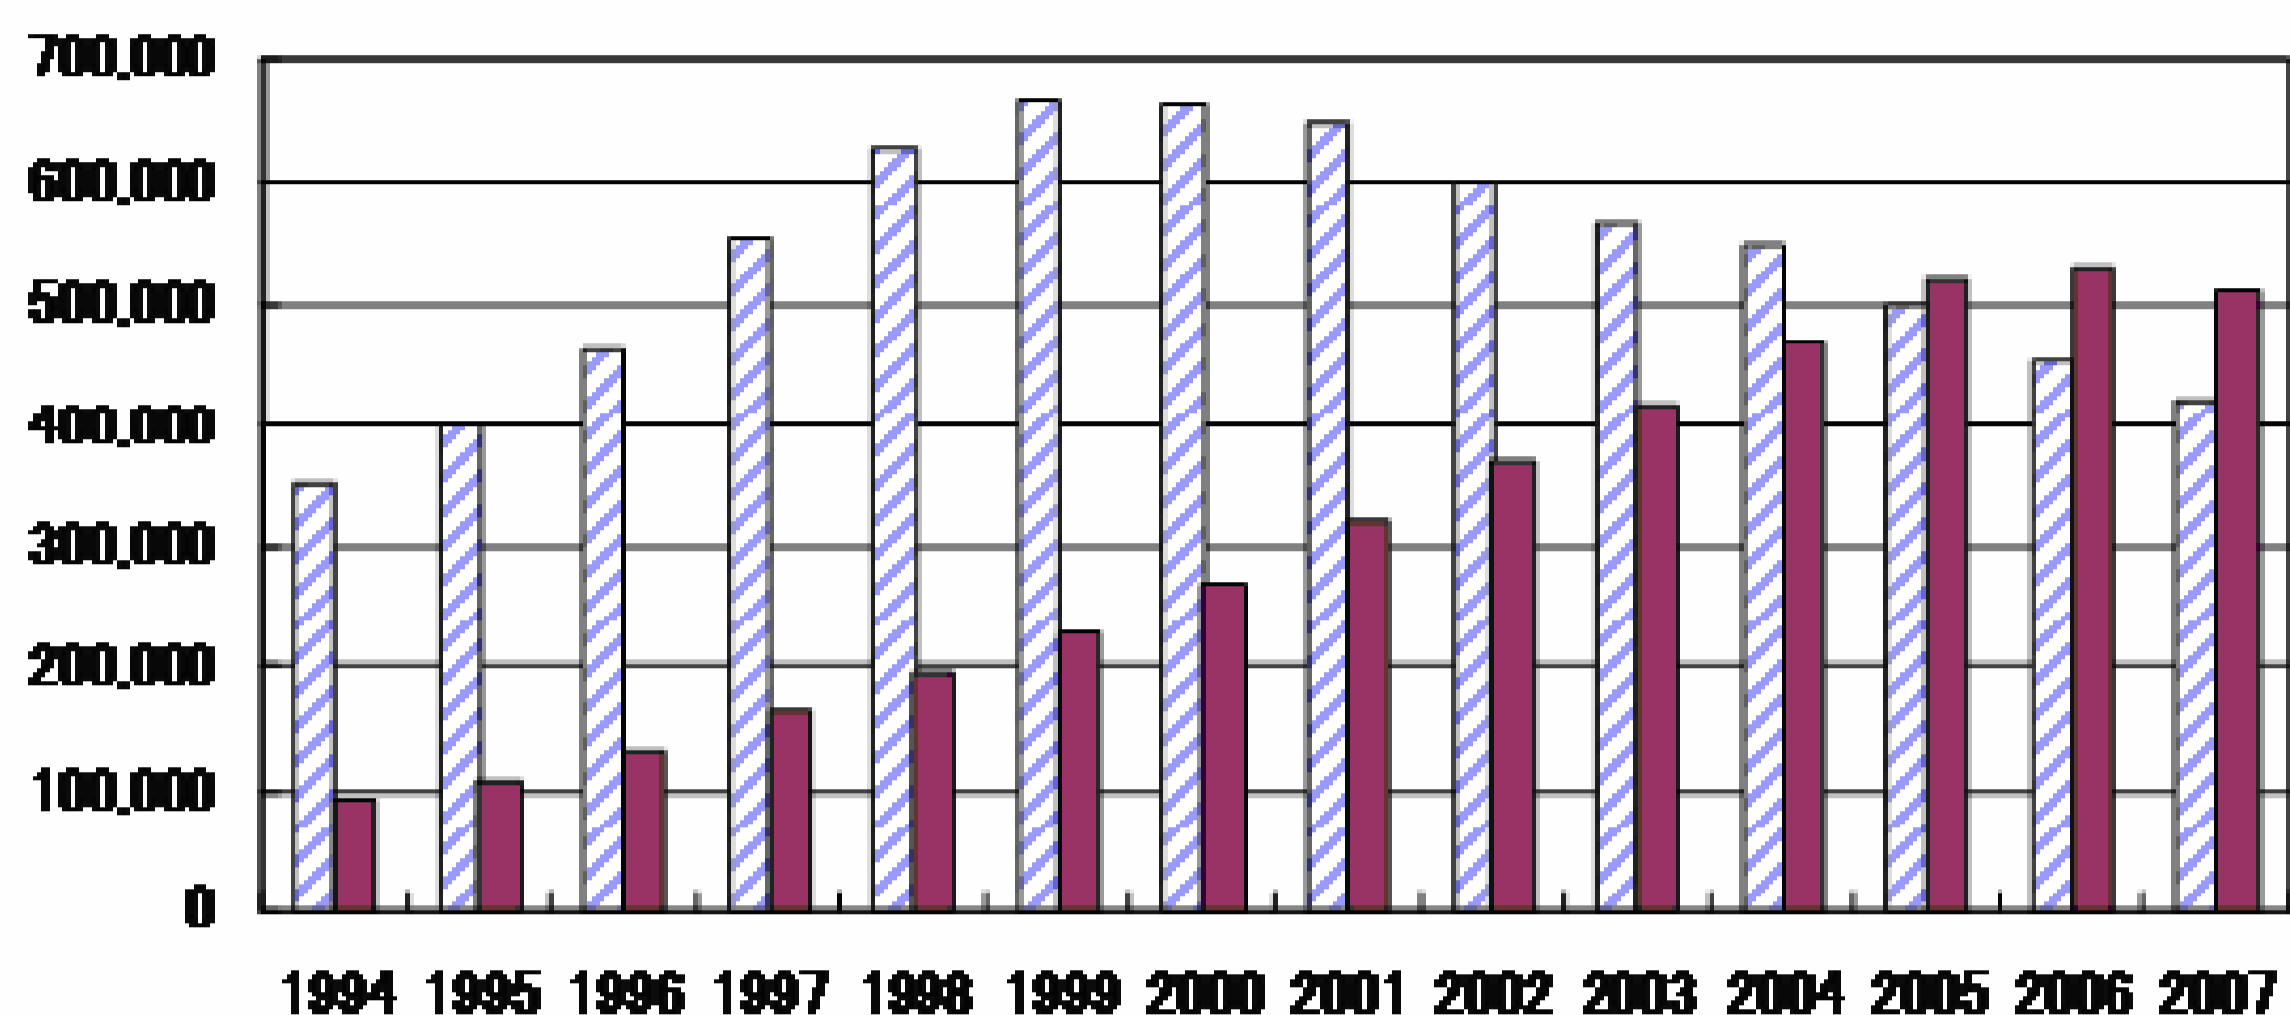

Integration of Institutional Repositories and the Interlibrary Document Delivery Service

IR cures ILL project <ircuresill@office.otaru-uc.ac.jp>

SUZUKI Masako – Otaru University of Commerce Library, Japan

SUGITA Shigeki – Hokkaido University Library, Japan

- The Interlibrary Document Delivery Service (ILDD) is getting replaced by Big Deals, Green and Gold OA.

**BLUE** : the number of ILDD transactions of international journal articles between the university libraries in Japan.

**(PURPLE** : for domestic journal articles in Japan.)

(Tutiya et al., Analysis provided by REFORM Project as of July, 2008)

Institutional Repository	Interlibrary Document Delivery
Once deposited, available forever	Copy again and again on requests
One click access	Offer and wait
Open access, of course!	35 JPY per a page in Japan which is nothing more than the copy and postal fee (NOT pay ILL/DD staffs)
Authors' action for readers	Interlibrary
Authors could know how frequently it's downloaded	Authors neglected!

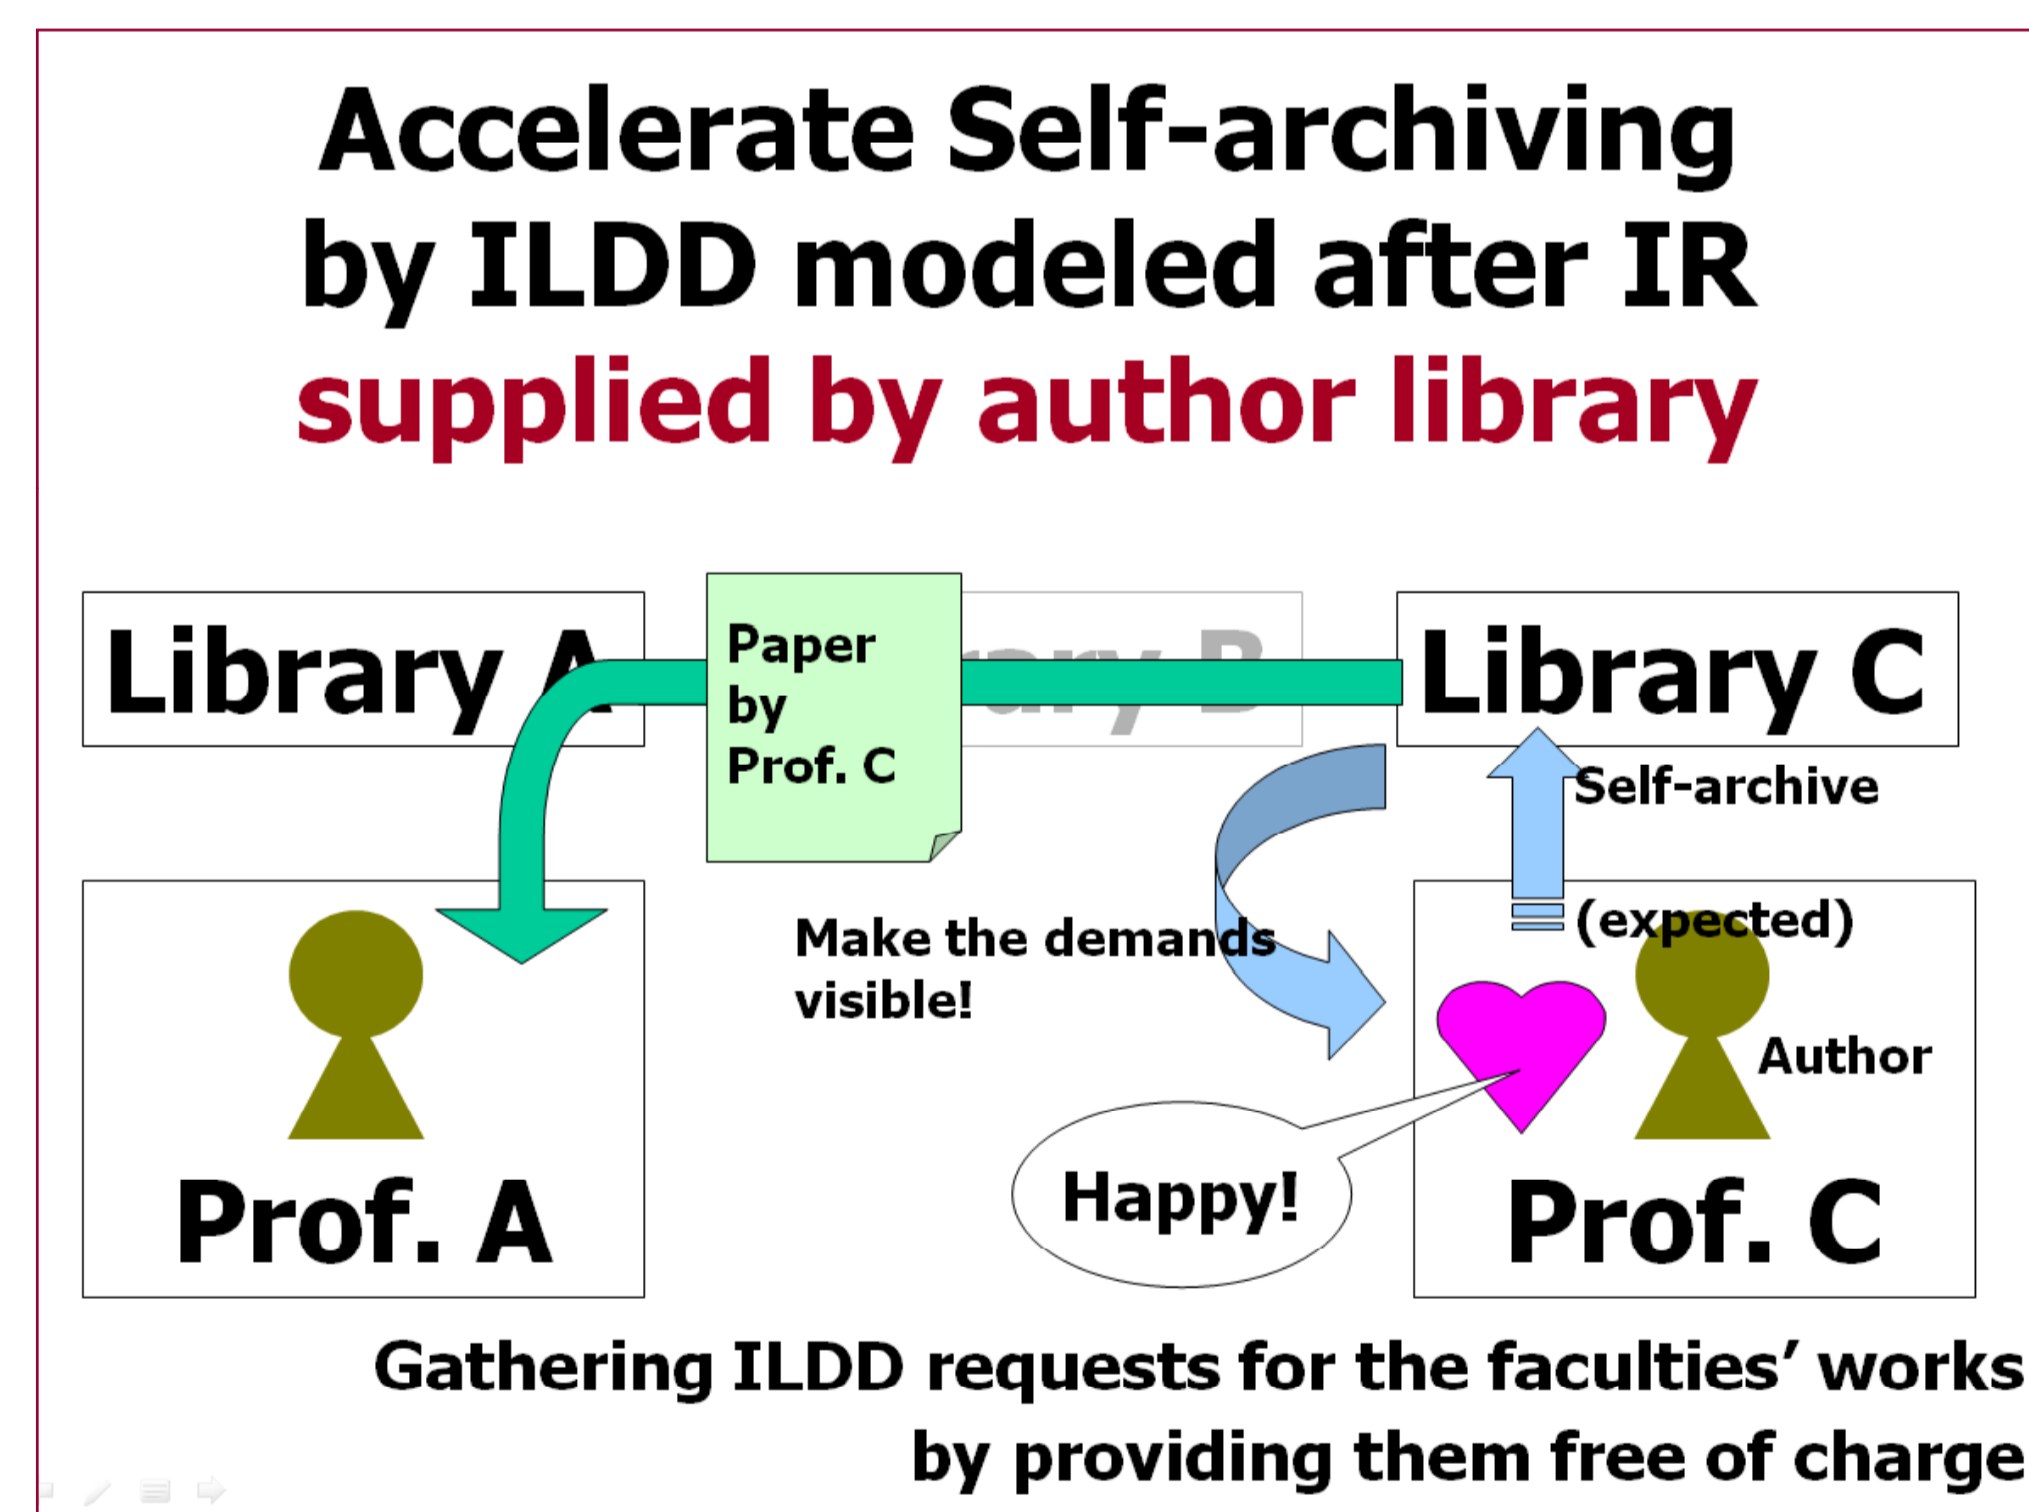

- However, there still remain demands anyway. Who, what and how to do?
- A case of Otaru University of Commerce (OUC).

- An ILDD request comes and the library copies and sends it.

**If it is OUC author's paper,**

- The library asks the author to deposit it to OUC repository.
- The paper is self-archived and will never be requested via ILDD.

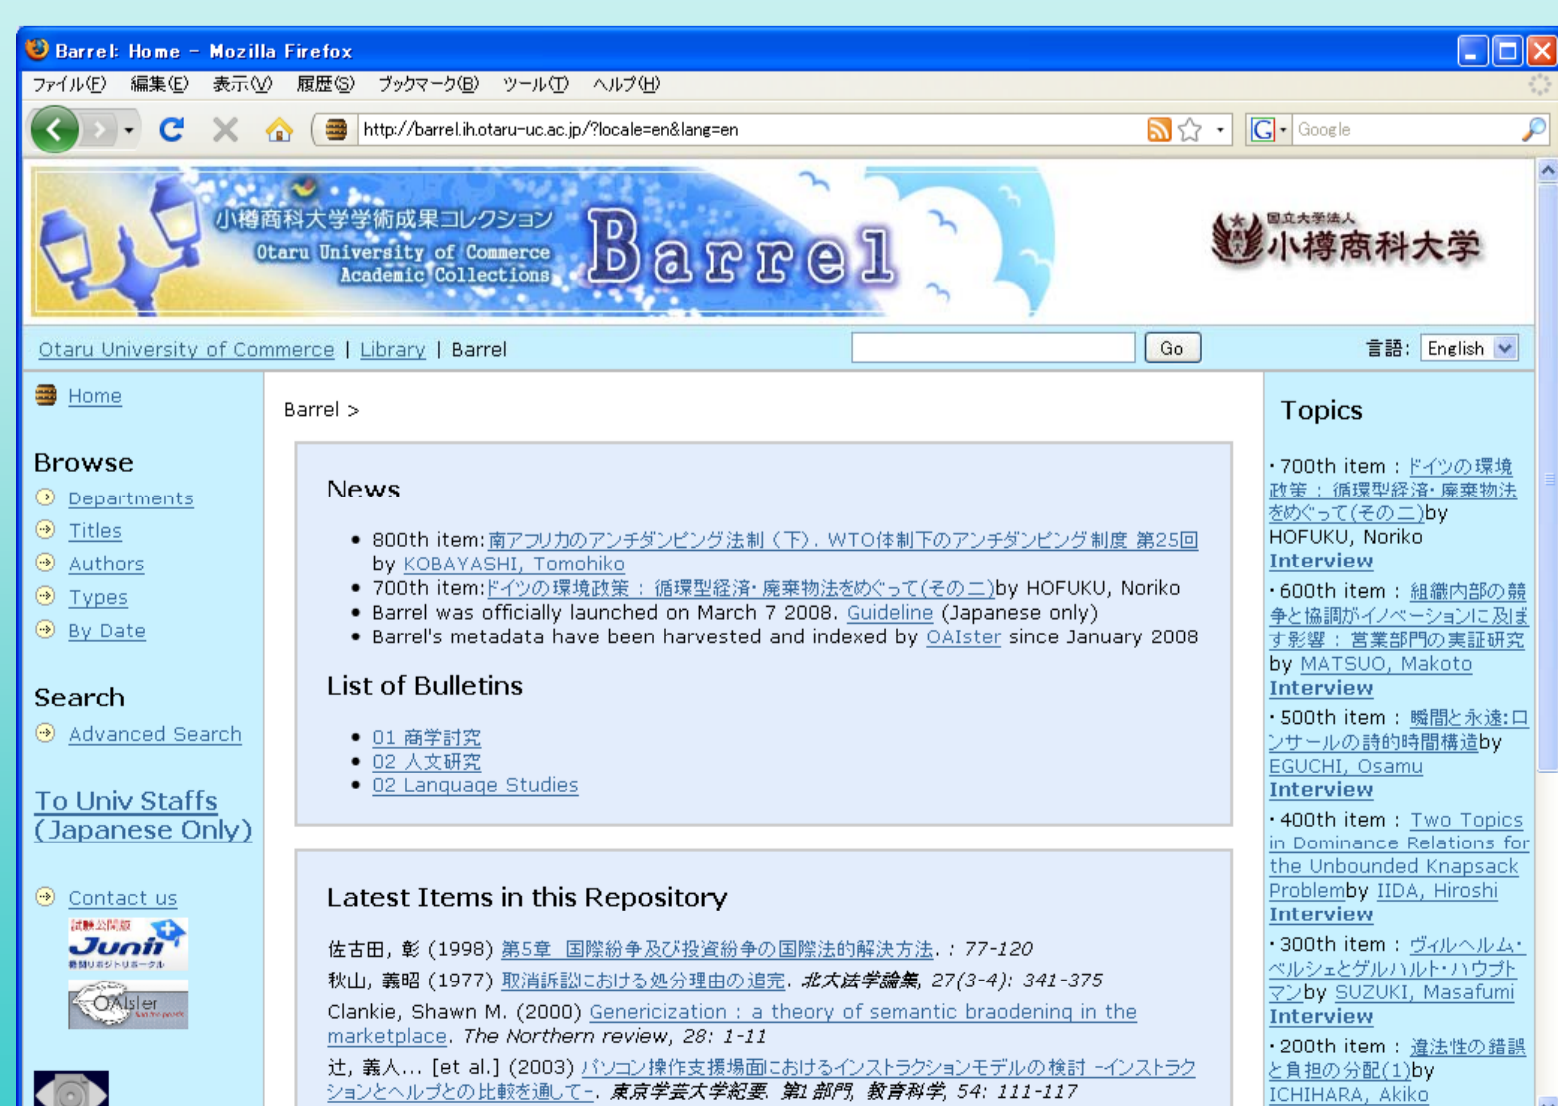

**To accelerate the attempt, OUC undertakes ILDD requests for OUC author's papers at no charge.**

- More IR stuff increased, more the ILDD decreased !!

## Otaru University of Commerce Academic Collections "Barrel"

<http://barrel.i.h.otaru-uc.ac.jp>

Features for getting populated:

- Notifying the researchers the ILDD demands and ask self- archiving (described in this poster).
- Notifying the authors how often their papers are downloaded by monthly e-mail reports.
- Proxy editing of the UR Researcher Tools for busy researchers.
- Commending every 100<sup>th</sup> paper with author interview.
