

Suppl. Fig. 3 The adaptor protein of the NOD like receptors NOD1 and NOD2, Rip2, does not play a significant role in the detection of *H. pylori* in BMMs.

A microarray comparing *H. pylori* (P12) infected (3 h, MOI50) wild type (wt), MyD88/Trif^{-/-} and MyD88/Trif/Rip2^{-/-} BMMs to mock infected was performed and all genes with a fold change of >10 fold in one of the respective macrophages are represented in a heat map. No significant differences can be observed comparing infected MyD88/Trif^{-/-} and MyD88/Trif/Rip2^{-/-} BMMs.
