

Supplementary Figure 1. Fluorescence In Situ Hybridization (FISH) of an abdomen of an aposymbiotic *S. endius* female (a and b) vs. a WR female (c). The inset in a is the area presented in b in higher magnification. NC= nurse cells; G= germarium; E= egg. Note the red *Wolbachia* signal and green *Rickettsia* signal in the WR female, compared to the lack of signal in the aposymbiotic one (negative control).
