Obenaus , Martin Both , Burkhard Niewoehner, Frank N. Single, Michael Briese, Thomas Boerner, Peter Gass, John Nick P. Rawlins, Georg Köhr , David M. Bannerman  & Rolf Sprengel 

Correction to: *Communications Biology* <https://doi.org/10.1038/s42003-020-01538-4>, published online 8 January 2021.

The original version of this Article contained an error in the variant mentioned in the following text from the “Introduction”: “Notably, a similar  $\text{Mg}^{2+}$  block attenuating point mutation (c.1841A>G, p.Asn615Ser) at the identical position of the GluN2A subunit was found in two unrelated young female patients who suffered from epileptic seizures...”. The correct variant is (c.1845C>A, p.Asn615Lys).

The original version of this Article also contained an error in the mutation mentioned in the following text from the “Results” section “Generation of GluNA (N615S)-expressing mice”: “By classical gene-targeted replacement<sup>28</sup> we inserted the c.1841A>G mutation at the homologous position in exon 10...”. The correct position of this mutation is c.1844A>G.

Both errors have been corrected in the HTML and PDF versions of the Article.
