## Preamble

Software for a large number of processes and algorithms used in climate research in models, analysis, and data treatment has been developed at MPI-M, and at collaboration partners since the inception of the institute. They are used for operational weather forecasting including data assimilation as well as for a wide range of research applications in the fields of climate simulation/projection and process studies, and processing of data with relevance for climate research and high-performance computing.

Software developed for and by MPI-M includes, but is not limited to:

- A The ICON<sup>1</sup> framework
- B MPI-ESM
- C ECHAM, MPI-OM, OPYC
- D Various model driver and data treatment scripts
- E Analysis software like the cdo<sup>2</sup>

and many more.

The scope of this agreement is to provide for consistent ownership of intellectual property rights in software components developed for and by MPI-M (non-exclusive inbound license to MPI-M).
