#### PREFACE.

The present work is a revised and enlarged edition of the Greek Grammar published in 1879, which was itself a revised and enlarged edition of the Elementary Greek Grammar of only 235 pages published in 1870. I trust that no one will infer from this repeated increase in the size of the book that I attribute ever increasing importance to the study of formal grammar in school. On the contrary, the growth of the book has come from a more decided opinion that the amount of grammar which should be learned by rote is exceedingly small compared with that which every real student of the Classics must learn in a very different way. When it was thought that a pupil must first learn his Latin and Greek Grammars and then learn to read Latin and Greek, it was essential to reduce a school grammar to its least possible dimensions. Now when a more sensible system leaves most of the details of grammar to be learned by the study of special points which arise in reading or writing, the case is entirely different; and few good teachers or good students are any longer grateful for a small grammar, which must soon be discarded as the horizon widens and new questions press for an answer. The forms of a language and the essential principles of its construction must be learned in the old-fashioned way, when the memory is vigorous and retentive; but, these once mastered, the true time to teach each principle of grammar is the moment when the pupil meets with it in his studies, and no grammar which is not thus practically illustrated ever becomes a living reality to the student, But it is not enough for a learner merely to meet each construction or form in isolated instances; for he may do this repeatedly, and yet know little of the general principle which the single example partially illustrates. Men saw apples fall and the moon and planets roll ages before the principle of gravitation was thought of. It is necessary.

therefore, not merely to bring the pupil face to face with the facts of a language by means of examples carefully selected to exhibit them, but also to refer him to a statement of the general principles which show the full meaning of the facts and their relation to other principles.1 In other words, systematic practice in reading and writing must be supplemented from the beginning by equally systematic reference to the grammar. Mechanics are not learned by merely observing the working of levers and pulleys, nor is chemistry by watching experiments on gases; although no one would undertake to teach either without such practical illustrations. It must always be remembered that grammatical study of this kind is an essential part of classical study; and no one must be deluded by the idea that if grammar is not learned by rote it is not to be learned at all. It cannot be too strongly emphasized, that there has been no change of opinion among classical scholars about the importance of grammar as a basis of all sound classical scholarship; the only change concerns the time and manner of studying grammar and the importance to be given to different parts of the subject.

What has been said about teaching by reference and by example applies especially to syntax, the chief principles of which have always seemed to me more profitable for a pupil in the earlier years of his classical studies than the details of vowel-changes and exceptional forms which are often thought more seasonable. The study of Greek syntax, properly pursued, gives the pupil an insight into the processes of thought and the manner of expression of a highly cultivated people; and while it stimulates his own powers of thought, it teaches him habits of more careful expression by making him familiar with many forms of statement more precise than those to which he is accustomed in his own language. The Greek syntax, as it was developed and refined by the Athenians, is a most important chapter in the history of thought, and even those whose classical studies are limited to the rudiments cannot afford to neglect it entirely. For these reasons the chief increase in the present work has been made in the department of Syntax.

<sup>&</sup>lt;sup>1</sup> These objects seem to me to be admirably attained in the First Lessons in Greek, prepared by my colleague, Professor John W. White, to be used in connection with this Grammar. A new edition of this work is now in press.

The additions made in Part I. are designed chiefly to make the principles of inflection and formation in Parts II. and III. intelligible. Beyond this it seems inexpedient for a general grammar to go. In Part II. the chief changes are in the sections on the Verb, a great part of which have been remodelled and rewritten. The paradigms and synopses of the verb are given in a new form. The nine tense systems are clearly distinguished in each synopsis, and also in the paradigms so far as is consistent with a proper distinction of the three voices. The verbs in  $\mu$  are now inflected in close connection with those in ω, and both conjugations are included in the subsequent treatment. The now established Attic forms of the pluperfect active are given in the paradigms. The old makeshift known as the "connecting-vowel" has been discarded, and with no misgivings. Thirteen years ago I wrote that I did not venture "to make the first attempt at a popular statement of the tense stems with the variable vowel attachment"; and I was confirmed in this opinion by the appearance of the Schulgrammatik of G. Curtius the year previous with the "Bindevocal" in its old position. Professor F. D. Allen has since shown us that the forms of the verb can be made perfectly intelligible without this time-honored fic-I have now adopted the familiar term "thematic vowel," in place of "variable vowel" which I used in 1879. to designate the o or e added to the verb stem to form the present stem of verbs in w. I have attempted to make the whole subject of tense stems and their inflection more clear to beginners, and at the same time to lay the venerable shade of the connecting-vowel, by the distinction of "simple and complex tense stems," which correspond generally to the two forms of inflection, the "simple" form (the miform) and the "common" form (that of verbs in ω). See 557-565. I use the term "verb stem" for the stem from which the chief tenses are formed, i.e. the single stem in the first class, the "strong" stem in the second class, and the simple stem in the other classes (except the anomalous eighth). Part III. is little changed, except by additions. In the Syntax I have attempted to introduce greater simplicity with greater detail into the treatment of the Article, the Adjectives, the Cases, and the Prepositions. In the Syntax of the Verb, the changes made in my new edition of the Greek Moods and Tenses have been adopted, so far as is possible in a school-book. The independent uses of

the moods are given before the dependent constructions, except in the case of wishes, where the independent optative can hardly be treated apart from the other constructions. The Potential Optative and Indicative are made more prominent as original constructions, instead of being treated merely as elliptical apodoses. The independent use of un in Homer to express fear with a desire to avert the object feared is recognized, and also the independent use of un and un ov in cautious assertions and negations with both subjunctive and indicative, which is common in Plato. The treatment of work is entirely new; and the distinction between the infinitive with wore un and the indicative with ωστε ου is explained. The use of πρίν with the infinitive and the finite moods is more accurately stated. distinction between the Infinitive with the Article and its simple constructions without the Article is more clearly drawn, and the whole treatment of the Infinitive is im-In the chapter on the Participle, the three classes are carefully marked, and the two uses of the Supplementary Participle in and out of oratio obliqua are distinguished. In Part V. the principal additions are the sections on dactylo-epitritic rhythins, with greater detail about other lyric verses, and the use of two complete strophes of Pindar to illustrate that poet's two most common metres. Catalogue of Verbs has been carefully revised, and somewhat enlarged, especially in the Homeric forms.

The quantity of long  $\alpha$ ,  $\iota$ , and  $\upsilon$  is marked in Parts I., II., and III., and wherever it is important in Part V., but not in the Syntax. The examples in the Syntax and in Part V. have been referred to their sources. One of the most radical changes is the use of 1691 new sections in place of the former 302. References can now be made to most paragraphs by a single number; and although special divisions are sometimes introduced to make the connection of paragraphs clearer, these will not interfere with references to the simple sections. The evil of a want of distinction between the main paragraphs and notes has been obviated by prefixing N. to sections which would ordinarily be marked as notes. I feel that a most humble apology is due to all teachers and students who have submitted to the unpardonable confusion of paragraphs, with their divisions, subdivisions, notes, and remarks, often with (a), (b), etc., in the old edition. This arrangement was thoughtlessly adopted to preserve the numbering of sections in the Syntax of the previous edition, to which many references had already been made; but this object was gained at far too great a cost. I regret that I can make no better amends than this to those who have suffered such an infliction. A complete table of Parallel References is given in pp. xxvi.-xxxv., to make references to the former edition available for the new sections.

I have introduced into the text a section (28) on the probable ancient pronunciation of Greek. While the sounds of most of the letters are well established, on many important points our knowledge is still very unsatisfactory. With our doubts about the sounds of  $\theta$ ,  $\phi$ ,  $\chi$ , and  $\zeta$ , of the double  $\epsilon \iota$  and  $\delta \upsilon$ , not to speak of  $\xi$  and  $\psi$ , and with our helplessness in expressing anything like the ancient force of the three accents or the full distinction of quantity, it is safe to say that no one could now pronounce a sentence of Greek so that it would have been intelligible to Demosthenes or Plato. I therefore look upon the question of Greek Pronunciation chiefly as it concerns the means of communication between modern scholars and between teachers and pupils. I see no prospect of uniformity here, unless at some future time scholars agree to unite on the modern Greek pronunciation, with all its objectionable features. As Athens becomes more and more a centre of civilization and art, her claim to decide the question of the pronunciation of her ancient language may sometime be too strong to resist. In the meantime. I see no reason for changing the system of pronunciation which I have followed and advocated more than thirty years, which adopts what is tolerably certain and practicable in the ancient pronunciation and leaves the rest to modern usage or to individual judgment. This has brought scholars in the United States nearer to uniformity than any other system without external authority is likely to bring them. In England the retention of the English

<sup>&</sup>lt;sup>1</sup> By this the consonants are sounded as in 28,3, except that  $\ell$  has the sound of z;  $\xi$  and  $\psi$  have the sounds of x (ks) and ps;  $\theta$ ,  $\phi$ , and  $\chi$  those of th in thin, ph in Philip, and hard German th in machen. The vowels are sounded as in 28,1, v being pronounced like French u or German i. The diphthongs follow 28,2; but vv always has the sound of vu in youth, and ei that of ei in height. I hold to this sound of ei to avoid another change from English, German, and American usage. If any change is desired, I should much prefer to adopt the sound of i (our i in machine), which ei has held more than 1900 years, rather than to attempt to catch any one of the sounds through which either genuine or spurious ei must have passed on its way to this (see 28, 2).

pronunciation of Greek with Latin accents has at least the advantage of local uniformity.

Since the last edition was published, Allen's new edition of Hadley's Grammar has appeared and put all scholars under new obligations to both author and editor. The new edition of Monro's Homeric Grammar is of the greatest value to all students of Homer. Blass's new edition of the first quarter of Kühner is really a new work, abounding in valuable suggestions. From the German grammars of Koch and Kaegi I have gained many practical hints. I am also greatly indebted to many letters from teachers containing criticisms of the last edition and suggestions for making it more useful in schools, too many indeed to be acknowledged singly by name. Among them is one from which I have derived special help in the revision, a careful criticism of many parts of the book by Professor G. F. Nicolassen of Clarksville, Tennessee. Another of great value came to me without signature or address, so that I have been unable even to acknowledge it by letter. I must ask all who have thus favored me to accept this general expression of my thanks. Professor Herbert Weir Smyth of Bryn Mawr has done me the great service of reading the proofs of Parts I. and II. and aiding me by his valuable suggestions. His special knowledge of Greek morphology has been of the greatest use to me in a department in which without his aid I should often have been sorely perplexed amid conflicting views. All scholars are looking for the appearance of Professor Smyth's elaborate work on the Greek Dialects, now printing at the Clarendon Press, with great interest and hope.

## INTRODUCTION.

## THE GREEK LANGUAGE AND DIALECTS.

The Greek language is the language spoken by the Greek race. In the historic period, the people of this race called themselves by the name Hellenes, and their language Hellenic. We call them Greeks, from the Roman name Graeci. They were divided into Aeolians, Dorians, and Ionians. The Aeolians inhabited Aeolis (in Asia), Lesbos, Boeotia, and Thessaly; the Dorians inhabited Peloponnesus, Doris, Crete, some cities of Caria (in Asia), with the neighboring islands, many settlements in Southern Italy, which was known as Magna Graecia, and a large part of the coast of Sicily; the Ionians inhabited Ionia (in Asia), Attica, many islands in the Aegean Sea, a few towns in Sicily, and some other places.

In the early times of which the Homeric poems are a record (before 850 B.C.), there was no such division of the whole Greek race into Aeolians, Dorians, and Ionians as that which was recognized in historic times; nor was there any common name of the whole race, like the later name of Hellenes. The Homeric Hellenes were a small tribe in South-eastern Thessaly, of which Achilles was king; and the Greeks in general were called by Homer Achaeans, Argives, or Danaans.

The dialects of the Aeolians and the Dorians are known as the Aeolic and Doric dialects. These two dialects are much more closely allied to each other than either is to the Ionic. In the language of the Ionians we must distinguish the Old Ionic, the New Ionic, and the Attic dialects. The Old Ionic or Epic is the language of the Homeric poems, the oldest Greek literature. The New Ionic was the language of Ionia in the fifth century B.C., as it appears in Herodotus and Hippocrates. The Attic was the language of Athens during her period of literary eminence (from about 500 to 300 B.c.). In it were written the tragedies of Aeschylus, Sophocles, and Euripides, the comedies of Aristophanes, the histories of Thucydides and Xenophon, the orations of Demosthenes and the other orators of Athens, and the philosophical works of Plato.

The Attic dialect is the most cultivated and refined form of the Greek language. It is therefore made the basis of Greek Grammar, and the other dialects are usually treated, for convenience, as if their forms were merely variations of the Attic. This is a position, however, to which the Attic has no claim on the ground of age or primitive forms, in respect to which it holds a rank below the other dialects.

The literary and political importance of Athens caused her dialect gradually to supplant the others wherever Greek was spoken; but, in this very extension to regions widely separated, the Attic dialect itself was not a little modified by various local influences, and lost some of its

<sup>&</sup>lt;sup>1</sup> The name *Ionic* includes both the Old and the New Ionic, but not the Attic. When the Old and the New Ionic are to be distinguished in the present work, Ep. (for Epic) or Hom. (for Homeric) is used for the former, and Hdt. or Hd. (Herodotus) for the latter.

early purity. The universal Greek language which thus arose is called the Common Dialect. This begins with the Alexandrian period, the time of the literary eminence of Alexandria in Egypt, which dates from the accession of Ptolemy II. in 285 B.C. The Greek of the philosopher Aristotle lies on the border line between this and the purer Attic. The name Hellenistic is given to that form of the Common Dialect which was used by the Jews of Alexandria who made the Septuagint version of the Old Testament (283-135 B.c.) and by the writers of the New Testament, all of whom were Hellenists (i.e. foreigners who spoke Greek). Towards the end of the twelfth century A.D., the popular Greek then spoken in the Byzantine Roman Empire began to appear in literature by the side of the scholastic ancient Greek, which had ceased to be intelligible to the common people. This popular language, the earliest form of Modern Greek, was called Romaic ('Pwμαϊκή), as the people called themselves 'Ρωμαΐοι. The name Romaic is now little used; and the present language of the Greeks is called simply Έλληνική, while the kingdom of Greece is 'Edd's and the people are "Eddness. The literary Greek has been greatly purified during the last halfcentury by the expulsion of foreign words and the restoration of classic forms; and the same process has affected the spoken language, especially that of cultivated society in Athens, but to a far less extent. It is not too much to say, that the Greek of most of the books and newspapers now published in Athens could have been understood without difficulty by Demosthenes or Plato. The Greek language has thus an unbroken literary history, from Homer to the present day, of at least twenty-seven centuries.

The Greek is descended from the same original language with the Indian (i.e. Sanskrit), Persian, German, Slavonic, Celtic, and Italian languages, which together form the Indo-European (sometimes called the Aryan) family of languages. Greek is most closely connected with the Italian languages (including Latin), to which it bears a relation similar to the still closer relation between French and Spanish or Italian. This relation accounts for the striking analogies between Greek and Latin, which appear in both roots and terminations; and also for the less obvious analogies between Greek and the German element in English, which are seen in a few words like me, is, know, etc.

# PART I.

# LETTERS, SYLLABLES, AND ACCENTS.

## THE ALPHABET.

1. The Greek alphabet has twenty-four letters: -

For	ın.	Equivalent.		Name.	
A	а	$\mathbf{a}$		ἄλφα	Alpha
В	β	b		$eta\hat{\eta} au a$	Beta
$\Gamma$	γ	g		γάμμα	Gamma
Δ	δ	${\rm g}\atop{\rm d}$		δέλτα	Delta
E	$\epsilon$	e (short)	εĩ,	<b>ề</b> ψῖλόν	$Epsar{\imath}lon$
$\boldsymbol{Z}$	ζ	<b>z</b> .		ζῆτα	Zeta
H	η	e $(long)$		ήτα	Eta
Θ	$\theta$ $\vartheta$	h		$ heta\hat{\eta} au a$	Theta
1	ι	i		ι̂ῶτα	Iota
K	κ	k or hard c		κάππα	Kappa
Λ	λ	1		$\lambda \acute{a}(\mu) \beta \delta a$	Lambda
M	$\mu$	m		$\mu\hat{v}$	Mu
N	$\nu$	n		νΰ	Nu
Ξ	ξ	x	ξεî,	ξî	Xi
O	0	o (short)	οὖ,	ὃ μῖκρόν	$Om\bar{\imath}cron$
Π	$\pi$	p	πεῖ,	$\pi \hat{\iota}$	Pi
P	ρ	r		ρ <del>ံ</del>	$oldsymbol{R}{ho}$
Σ	σς	s		σίγμα	Sigma
$\mathbf{T}$	au	t		$ au a \hat{v}$	Tau
Υ	υ	(u) y	δ,	ῦ ψιλόν	$Up$ s $ar{\imath}lon$
Φ	φ	ph	$\phi \epsilon \hat{\iota}$ ,	$\phi \hat{\iota}$	Phi
X	χ	kh	$\chi \epsilon  ilde{\iota},$		Chi
Ψ	Ψ	$\mathbf{p}\mathbf{s}$	$\psi \epsilon \hat{\iota}$ ,		Psi
$\Omega$	ω	o(long)	ώ̈,	ὧ μέγα	$Omreve{e}ga$

<sup>2.</sup> N. At the end of a word the form s is used, elsewhere the form σ; thus, σύστασις.

- 3. N. Three letters belonging to the primitive Greek alphabet, Vau or Digamma (f), equivalent to V or W, Koppa (?), equivalent to Q, and Sanpi (B), a form of Sigma, are not in the ordinary written alphabet. They were used as numerals (384), Vau here having the form  $\mathcal{F}$ , which is used also as an abbreviation of  $\sigma\tau$ . Vau had not entirely disappeared in pronunciation when the Homeric poems were composed, and the metre of many verses in these is explained only by admitting its presence. Many forms also which seem irregular are explained only on the supposition that  $\mathcal{F}$  has been omitted (see 269).
- **4.** N. The Athenians of the best period used the names  $\epsilon \hat{l}$  for epsilon, of for omicron,  $\hat{v}$  for upsilon, and  $\hat{\omega}$  for omega; the present names for these letters being late. Some Greek grammarians used  $\hat{\epsilon} \psi \hat{l} \lambda \delta v \ (plain \ \epsilon)$  and  $\hat{v} \psi \hat{l} \lambda \delta v \ (plain \ \epsilon)$  and of their time had similar sounds.

#### VOWELS AND DIPHTHONGS.

- 5. The vowels are  $\alpha$ ,  $\epsilon$ ,  $\eta$ ,  $\iota$ , o,  $\omega$ , and v. Of these,  $\epsilon$  and o are always short;  $\eta$  and  $\omega$  are always long;  $\alpha$ ,  $\iota$ , and v are long in some syllables and short in others, whence they are called doubtful yowels.
- 6. N. A,  $\epsilon$ ,  $\eta$ , o, and  $\omega$  from their pronunciation are called open vowels (a being the most open);  $\epsilon$  and  $\nu$  are called close vowels.
- 7 The diphthongs ( $\delta i \phi \theta o \gamma \gamma o \iota$ , double-sounding) are al, al,  $\epsilon \iota$ ,  $\epsilon \iota$ , ol, ol,  $\epsilon \iota$ ,  $\epsilon \iota$ , ol, ol,  $\epsilon \iota$ ,  $\epsilon \iota$ , ol, ol,  $\epsilon \iota$ , and the union of an open vowel with a close one. The long vowels  $(\bar{a}, \eta, \omega)$  with  $\iota$  form the (so called) improper diphthongs  $a, \eta, \omega$ . The Ionic dialect has also  $\omega \nu$ .
- 8. N. Besides the genuine  $\epsilon_i$  (=  $\epsilon + \iota$ ) and ov (=  $\epsilon + \nu$ ) there are the so-called spurious diphthongs  $\epsilon_i$  and ov, which arise from contraction ( $\epsilon_i$  from  $\epsilon_i$ , and ov from  $\epsilon_i$ , or oo) or from compensative lengthening (30); as in  $\ell nol\epsilon_i$  (for  $\ell nol\epsilon_i$ ),  $\lambda \ell \gamma \epsilon_i \nu$  (for  $\lambda \epsilon \gamma \epsilon_i \nu$ , 565, 4),  $\chi \rho \bar{\nu} \sigma o \bar{\nu} s$  (for  $\chi \rho \delta \sigma \epsilon_i s$ ),  $\delta \epsilon_i s$  (for  $\delta \epsilon_i \nu \tau_i$ , 79),  $\tau o \bar{\nu}$  and  $\tau o \bar{\nu} s$  (190). In the fourth century B.C. these came to be written like genuine  $\epsilon_i$  and ov; but in earlier times they were written E and O, even in inscriptions which used H and  $\Omega$  for  $\bar{\epsilon}$  and  $\bar{\sigma}$ . (See 27.)
- 9. N. The mark of diacresis ( $\delta_{ialpe\sigma is}$ , separation), a double dot, written over a vowel, shows that this does not form a diphthong with the preceding vowel; as in  $\pi_{\rho oil} = (\pi_{\rho oil} = \pi_{\rho oil})$ , to go forward, 'Appellons, son of Atreus (in Homer).
- 10. N. In  $\varphi$ ,  $\eta$ ,  $\varphi$ , the  $\iota$  is now written and printed below the first vowel, and is called *tota subscript*. But with capitals it is written in the line; as in THI  $K\Omega M\Omega I\Delta IAI$ ,  $\tau \hat{\eta} \kappa \omega \mu \varphi \delta l \varphi$ , and in  $\Omega \chi \epsilon \tau \phi$ ,  $\tilde{\varphi} \chi \epsilon \tau \phi$ . This  $\iota$  was written as an ordinary letter as long as it was pronounced,

that is, until the first century B.C., after which it was sometimes written (always in the line) and sometimes omitted. Our iota subscript is not older than the twelfth century A.D.

### BREATHINGS.

- 11. Every vowel or diphthong at the beginning of a word has either the rough breathing (\*) or the smooth breathing (\*). The rough breathing shows that the vowel is aspirated, i.e. that it is preceded by the sound h; the smooth breathing shows that the vowel is not aspirated. Thus  $\delta\rho\tilde{\omega}\nu$ , seeing, is pronounced  $h\tilde{\sigma}r\tilde{\sigma}n$ ; but  $\delta\rho\tilde{\omega}\nu$ , of mountains, is pronounced  $\tilde{\sigma}r\tilde{\sigma}n$ .
- 12. N. A diphthong takes the breathing, like the accent (109), upon its second vowel. But  $\tilde{q}$ ,  $\eta$ , and  $\tilde{\phi}$  (10) have both breathing and accent on the first vowel, even when the  $\iota$  is written in the line. Thus axera, edopairo, Axuor; but axero or Axero, ado or Axo,  $\tilde{\eta}$ deer or Hideer. On the other hand, the writing of didos ('Axdos) shows that  $\alpha$  and  $\iota$  do not form a diphthong.
- 13. N. The rough breathing was once denoted by H. When this was taken to denote  $\tilde{e}$  (which once was not distinguished from  $\tilde{e}$ ), half of it I was used for the rough breathing; and afterwards the other half I was used for the smooth breathing. From these fragments came the later signs 'and'.
  - 14. N. In Attic words, initial v is always aspirated.
- 15. At the beginning of a word  $\rho$  is written  $\dot{\rho}$ ; as in  $\dot{\rho}\dot{\eta}\tau\omega\rho$  (Latin rhetor), orator. In the middle of a word  $\rho\rho$  is sometimes written  $\dot{\rho}\dot{\rho}$ ; as  $\ddot{a}\dot{\rho}\dot{\rho}\eta\tau\sigma$ , unspeakable;  $\dot{\Pi}\dot{\nu}\dot{\rho}\dot{\rho}\sigma$ , Pyrrhus ( $\dot{\rho}\dot{\rho}=rrh$ ).

### CONSONANTS.

16. The simple consonants are divided into labials,  $\pi$ ,  $\beta$ ,  $\phi$ ,  $\mu$ ,

palatals,  $\kappa$ ,  $\gamma$ ,  $\chi$ , linguals,  $\tau$ ,  $\delta$ ,  $\theta$ ,  $\sigma$ ,  $\lambda$ ,  $\nu$ ,  $\rho$ .

17. Before  $\kappa$ ,  $\gamma$ ,  $\chi$ , or  $\xi$ , gamma ( $\gamma$ ) had a nasal sound, like that of n in anger or ink, and was represented by n in Latin; as  $\tilde{a}\gamma\gamma\epsilon\lambda\sigma$ , (Latin angelus), messenger;  $\tilde{a}\gamma\kappa\bar{\nu}\rho\alpha$ , (ancora), anchor;  $\sigma\phi'\gamma\xi$ , sphinx.

- 18. The double consonants are  $\xi$ ,  $\psi$ ,  $\zeta$ .  $\Xi$  is composed of  $\kappa$  and  $\sigma$ ;  $\psi$ , of  $\pi$  and  $\sigma$ . Z arises from a combination of  $\delta$  with a soft s sound; hence it has the effect of two consonants in lengthening a preceding vowel (99).
- 19. By another classification, the consonants are divided into semivowels and mutes.
- 20. The semivowels are  $\lambda$ ,  $\mu$ ,  $\nu$ ,  $\rho$ , and  $\sigma$ , with nasal  $\gamma$  (17). Of these  $\lambda$ ,  $\mu$ ,  $\nu$ , and  $\rho$  are liquids;

 $\mu$ ,  $\nu$ , and nasal  $\gamma$  (17) are nasals;  $\sigma$  is a spirant (or sibilant);  $\Gamma$  of the older alphabet (3) is also a spirant.

21. The mutes are of three orders:

smooth mutes  $\pi \kappa \tau$  middle mutes  $\beta \gamma \delta$  rough mutes  $\phi \chi \theta$ 

22. These mutes again correspond in the following

classes: —

labial mutes ( $\pi$ -mutes)  $\pi$   $\beta$   $\phi$  palatal mutes ( $\kappa$ -mutes)  $\kappa$   $\gamma$   $\chi$  lingual mutes ( $\tau$ -mutes)  $\tau$   $\delta$   $\theta$ 

- 23. N. Mutes of the same order are called co-ordinate; those of the same class are called cognate.
- 24. N. The smooth and rough mutes, with  $\sigma$ ,  $\xi$ , and  $\psi$ , are called surd (hushed sounds); the other consonants and the vowels are called sonant (sounding).
- 25. The only consonants which can end a Greek word are  $\nu$ ,  $\rho$ , and s. If others are left at the end in forming words, they are dropped.
- **26.** N. The only exceptions are  $\epsilon \kappa$  and  $o \dot{\nu} \kappa$  (or  $o \dot{\nu} \chi$ ), which have other forms,  $\dot{\epsilon} \xi$  and  $o \dot{\nu}$ . Final  $\xi$  and  $\psi$  ( $\kappa \sigma$  and  $\pi \sigma$ ) are no exceptions.
- 27. The Greek alphabet above described is the *Ionic*, used by the Asiatic Ionians from a very early period, but first introduced officially at Athens in 403 B.C. The Athenians had previously used an alphabet which had no separate signs for  $\tilde{e}, \tilde{o}, ks$ , or ps. In this E was used for  $\tilde{e}$  and  $\tilde{c}$  and also for the spurious  $\epsilon\iota$  (8); O for  $\tilde{o}$  and  $\tilde{o}$  and for spurious  $\epsilon\iota$  (8); H was still an aspirate (h); XZ stood for  $\Xi$ , and  $\Phi\Sigma$  for  $\Psi$ . Thus the Athenians of the time of Pericles wrote EAOXXEN TEI BOYEI KAI TOI  $\Delta$ EMOI for  $\tilde{\epsilon}\delta o \tilde{\epsilon} \iota \iota \tau \tilde{\rho} \beta o \nu \lambda \tilde{\rho} \kappa al \tau \tilde{\omega} \delta \eta \iota \iota \omega$ , TO  $\Phi\Sigma$ E $\Phi$ I $\Sigma$ MA TO  $\Delta$ EMO for  $\tau \delta \psi \eta \varphi \iota \sigma \iota \sigma \delta \delta \eta \iota \upsilon$ , HE $\Sigma$  for  $\eta s$ , —

HEI for  $\tilde{v}$ , — ILEMΠΕΝ for πέμπειν, — ΧΡΥΣΟΣ for χρυσοῦς, — ΤΟΥΤΟ for both τοῦτο and τούτον, — ΤΟΣ ΠΡΥΤΑΝΕΣ for τοὺς πρυτάνεις, — ΑΡΧΟΣΙ for ἄρχουσι, — ΔΕΟΣΟΝ for δεουσῶν, — ΗΟΠΟΣ for δπως, — ΠΟΙΕΝ for ποιεῖν, — ΤΡΕΣ for τρεῖς, — ΑΠΟ ΤΟ ΦΟΡΟ for ἀπὸ τοῦ φόρον, — ΧΣΕΝΟΣ for ξένος or ξένους.

#### ANCIENT PRONUNCIATION.1

28. 1. (Vowels.) The long vowels  $\tilde{a}$ ,  $\eta$ ,  $\tilde{i}$ , and  $\omega$  were pronounced at the best period much like a in father, e in fite (French  $\tilde{e}$  or  $\tilde{e}$ ), i in machine, and o in tone. Originally v had the sound of Latin u (our u in prune), but before the fourth century B.C. it had come to that of French u or German  $\tilde{u}$ . The short vowels had the same sounds as the long vowels, but shortened or less prolonged: this is hard to express in English, as our short a, e, i, and o, in pan, pen, pit, and pot, have sounds of a different nature from those of  $\tilde{a}$ ,  $\tilde{e}$ ,  $\tilde{i}$ , and  $\tilde{o}$ , given above. We have an approach to  $\tilde{a}$ ,  $\tilde{e}$ ,  $\tilde{i}$ , and  $\tilde{o}$  in the second a in grand-father, French  $\tilde{e}$  in real, i in verity, and o in monastic, renovate.

2. (Diphthongs.) We may assume that the diphthongs originally had the sounds of their two vowels, pronounced as one syllable. Our at in aisle, cu in feud, of in oil, ni in grift, will give some idea of a, cv, a, and vv; and ou in house of av. Likewise the genuine a must have been pronounced originally as a+c, somewhat like a in rein (cf. Hom. Appeading, Attic Appelding); and ov was a compound of a and a. But in the majority of cases a and ov are written for simple sounds, represented by the Athenians of the best period by a and a (see 8 and 27). We do not know how these sounds were related to ordinary a and a on one side and to a and ov on the other; but after the beginning of the fourth century a. C. they appear to have agreed substantially with a and av, since a and av or are written for both alike. In a the sound of a appears to have prevailed more and more, so that by the first century a. C. it had the sound of a. On the other hand, av became (and still remains) a simple sound, like av in youth.

The diphthongs  $\tilde{\varrho}$ ,  $\eta$ , and  $\varphi$  were probably always pronounced with the chief force on the first vowel, so that the gradually disappeared (see 10). The rare  $\eta \nu$  and  $\omega \nu$  probably had the sounds of  $\eta$  and  $\omega$  with an

additional sound of v.

3. (Consonants.) Probably  $\beta$ ,  $\delta$ ,  $\kappa$ ,  $\lambda$ ,  $\mu$ ,  $\nu$ ,  $\pi$ , and  $\rho$  were sounded as b, d, k, l, m, n, p, and r in English. Ordinary  $\gamma$  was always hard, like g in go; for nasal  $\gamma$ , see 17. T was always like t in tin or to;  $\sigma$  was generally (perhaps always) like s in so. Z is called a compound of  $\delta$  and  $\sigma$ ; but opinions differ whether it was  $\delta\sigma$  or  $\sigma\delta$ , but the ancient testimony scems to point to  $\sigma\delta$ . In late Greek,  $\zeta$  came to the sound of English z, which it still keeps.  $\Xi$  represents  $\kappa\sigma$ , and  $\psi$  represents  $\pi\sigma$ , although the older Athenians felt an aspirate in both, as they wrote  $\chi\sigma$  for  $\xi$  and  $\phi\sigma$  for  $\psi$ . The rough consonants  $\theta$ ,  $\chi$ , and  $\phi$  in the best period were  $\tau$ ,  $\kappa$ , and  $\pi$  followed by h, so that  $\xi \cdot p d a$  was  $\xi \cdot r \cdot \tau d$ ,  $\xi \cdot q d \eta \mu \mu$  was  $\xi \cdot r \cdot \tau d$ , and  $\xi \cdot r \cdot d d \eta \mu d u$  was  $\xi \cdot r \cdot d d \eta u$ ,  $\xi \cdot d u$  was  $\xi \cdot r \cdot d u$ , etc. We cannot represent these rough mutes in English; our nearest approach is in words like hothouse, blockhead, and uphill, but here the h is not in the same syllable with the mute. In later Greek  $\theta$  and  $\phi$  came to the modern pronunciation of th (in thin) and f, and  $\chi$  to that resembling German ch in machen.

<sup>1</sup> For practical remarks on pronunciation, see the Preface.

#### CHANGES OF VOWELS.

29. (Lengthening.) Short vowels are often lengthened in the formation and the inflection of words. Here the following changes generally take place:—

ă	becomes	n (ā	after	ε, ι	, 0	r ρ)	
€	46	η,			ĭ	becomes	ī,
0	"	ω.			ŭ	"	ũ.

Thus  $\tau$   $\bar{\iota}$ μ $\dot{\omega}$  (stem  $\tau$   $\bar{\iota}$ μ $\dot{\omega}$ -), fut.  $\tau$   $\bar{\iota}$ μ $\dot{\tau}$ σ $\dot{\omega}$ ; έ $\dot{\omega}$ - $\dot{\omega}$ , fut. έ $\dot{\omega}$ - $\dot{\omega}$ ;  $\tau$   $\dot{\omega}$ - $\dot{\omega}$ - $\dot{\omega}$ -(stem  $\theta$ ε-); δί-δω- $\dot{\omega}$ -(stem  $\theta$ ο-);  $\dot{\omega}$ - $\dot{\omega}$ 

30. (Compensative Lengthening.) 1. When one or more consonants are dropped for euphony (especially before  $\sigma$ ), a preceding short vowel is very often lengthened to make up for the omission. Here

Thus  $\mu$ έλᾶς for  $\mu$ έλανς (78), ἰστάς for ἰσταντς (79), θείς for θεντς (79), δούς for δοντς, λύουσι for λύοντσι, ἔκρῖνα for ἐκρινσα, δεικνύς for δεικνυντς (79). Here  $\epsilon$ l and ou are the spurious diphthongs (8).

- 2. In the first agrist of liquid verbs (672),  $\check{a}$  is lengthened to  $\eta$  (or  $\bar{a}$ ) when  $\sigma$  is dropped; as  $\check{\epsilon}\phi\eta\nu a$  for  $\check{\epsilon}\phi a\nu$ - $\sigma a$ , from  $\phi a\acute{\nu}\nu \omega$  ( $\phi a\nu$ -), cf.  $\check{\epsilon}\sigma\tau\epsilon\lambda$ - $\sigma a$ ,  $\check{\epsilon}\sigma\tau\epsilon\lambda a$ , from  $\sigma\tau\acute{\epsilon}\lambda\lambda\omega$  ( $\sigma\tau\epsilon\lambda$ -).
- 31. (Strong and Weak Forms.) In some formations and inflections there is an interchange in the root of  $\epsilon\iota$ ,  $\epsilon\iota$ , and  $\iota$ , of  $\epsilon\iota$ , (sometimes  $\epsilon\iota$ ,) and  $\iota$ , and of  $\eta$ , (rarely  $\epsilon\iota$ ) and  $\iota$ . The long vowels and diphthongs in such cases are called strong forms, and the short vowels weak forms.

Thus  $\lambda \epsilon i\pi - \omega$ ,  $\lambda \epsilon - \lambda o i\pi - a$ ,  $\epsilon - \lambda i\pi - ov$ ;  $\phi \epsilon i\gamma - \omega$ ,  $\pi \epsilon - \phi \epsilon v\gamma - a$ ,  $\epsilon - \phi v\gamma - ov$ ;  $\tau i \kappa - \omega$ ,  $\tau \epsilon - \tau i \kappa - a$ ,  $\epsilon - \tau i \kappa - a$ ,

32. An interchange of the short vowels ă, ε, and o takes place in certain forms; as in the tenses of τρέπ-ω, τέτροφ-α, έ-τράπ-ην, and in the noun τρόπ-ος, from stem τρεπ-. (See 643, 645, and 831.)

33. (Exchange of Quantity.) An exchange of quantity sometimes takes place between a long vowel and a succeeding short one; as in epic νάός, temple, and Attic νεώς; epic βασιλῆος, βασιλῆα, king, Attic βασιλέως, βασιλέᾶ; epic μετήορος, in the air, Attic μετέωρος; Μενέλᾶος, Attic Μενέλεως (200).

#### EUPHONY OF VOWELS.

## COLLISION OF VOWELS. - HIATUS.

34. A succession of two vowel sounds, not forming a diphthong, was generally displeasing to the Athenians. In the middle of a word this could be avoided by contraction (35-41). Between two words, where it is called hiatus, it could be avoided by crasis (42-46), by elision (48-54) or aphaeresis (55), or by adding a movable consonant (56-63) to the former word.

#### CONTRACTION OF VOWELS.

- 35. Two successive vowels, or a vowel and a diphthong, may be united by contraction in a single long vowel or a diphthong;  $\phi\iota\lambda\epsilon\omega$ ,  $\phi\iota\lambda\omega$ ;  $\phi\iota\lambda\epsilon\epsilon$ ,  $\phi\iota\lambda\epsilon\iota$ ;  $\tau\iota\mu\alpha\epsilon$ ,  $\tau\iota\mu\bar{\alpha}$ . It seldom takes place unless the former vowel is open (6).
- 36. The regular use of contraction is one of the characteristics of the Attic dialect. It follows these general principles:—
- 37. I. Two vowels which can form a diphthong (7) simply unite in one syllable; as τείχει, τείχει; γέραι, γέραι; βάιστος, βάστος.
- 38. II. When the two vowels cannot form a diphthong,—
- 1. Two like vowels (i.e. two  $\alpha$ -sounds, two  $\epsilon$ -sounds, or two  $\alpha$ -sounds, without regard to quantity) unite to form the common long  $(\bar{\alpha}, \eta, \text{ or } \omega)$ . But  $\epsilon \epsilon$  gives  $\epsilon \iota$  (8), and oo gives ov (8). E.g.

Μνά $\bar{a}$ , μν $\bar{a}$  (184); φιλέητε, φιλήτε; δηλόω, δηλ $\bar{\omega}$ ; — but ἐφίλεε, ἐφίλει; πλόος, πλοῦς.

2. When an o-sound precedes or follows an a- or an e-sound, the two become  $\omega$ . But of and to give ov (8). E.g.

Δηλόητε, δηλῶτε; φιλέωσι, φιλῶσι; τῖμάομεν, τῖμῶμεν; τῖμάωμεν τῖμῶμεν; — but νόε, νοῦ; γένεος, γένους.

3. When an a-sound precedes or follows an e-sound, the first (in order) prevails, and we have  $\bar{a}$  or  $\eta$ . E.g.

Ετίμαε, ετίμα; τιμάητε, τιμάτε; τείχεα, τείχη; Έρμεας, Έρμης.

4. A vowel disappears by absorption before a diphthong beginning with the same vowel, and  $\epsilon$  is always absorbed before of. In other cases, a simple vowel followed by a diphthong is contracted with the first vowel of the diphthong; and a following  $\iota$  remains as iota subscript, but a following v disappears. E.g.

Μνάαι, μναῖ; μνάᾳ, μνᾳ; φιλέει, φιλεῖ; φιλέη, φιλή; δηλόοι, δηλοῖ; νόῳ, νῷ; δηλόου, δηλοῦ; φιλέοι, φιλοῦ; χρῦσεοι, χρῦσοῦ; τιμάει, τῖμᾳ; τῖμάρ, τῖμᾳ; τῖμάου, τῖμᾳ; τῖμάου, τῖμῶ; φιλέου, φιλοῦ; λύεαι, λύη (39, 3); λύηαι, λύη; μεμνήοιο, μεμνῷο.

- **39.** Exceptions. 1. In contracts of the first and second declensions, every short vowel before a, or before a long vowel or a diphthong, is absorbed. But in the singular of the first declension  $\epsilon \bar{a}$  is contracted regularly to  $\eta$  (after a vowel or  $\rho$ , to  $\bar{a}$ ). (See 184.)
- 2. In the third declension  $\epsilon a$  becomes  $\bar{a}$  after  $\epsilon$ , and  $\bar{a}$  or  $\eta$  after  $\epsilon$  or  $\nu$ . (See 229, 267, and 315.)
- 3. In the second person singular of the passive and middle,  $\epsilon \alpha \iota$  (for  $\epsilon \sigma \alpha \iota$ ) gives the common Attic form in  $\epsilon \iota$  as well as the regular contract form in  $\eta$ ; as  $\lambda \tilde{\nu}_{\ell} \alpha \iota$ ,  $\lambda \tilde{\nu}_{\eta}$  or  $\lambda \tilde{\nu}_{\ell} \iota$ . (See 565, 6.)

4. In verbs in οω, οει gives οι, as δηλόεις, δηλοίς; οι is found

also in the subjunctive for on, as δηλόη, δηλοί.

- 5. The spurious diphthong ει is contracted like simple ε; as πλακόεις, πλακοῦς, cake. Thus infinitives in αειν and οειν lose ι in the contracted forms; as τιμάειν, τιμᾶν; δηλόειν, δηλοῦν. (See 761.)
- **40.** 1. The close vowel  $\iota$  is contracted with a following  $\iota$  in the Ionic dative singular of nouns in  $\iota$ s (see 255); and  $\upsilon$  is contracted with  $\iota$  or  $\iota$  in a few forms of nouns in  $\upsilon$ s (see 257 and 258).
- 2. In some classes of nouns and adjectives of the third declension, contraction is confined to certain cases; see 226-263. For exceptions in the contraction of verbs, see 496 and 497. See dialectic forms of verbs in  $a\omega$ ,  $\epsilon\omega$ , and  $a\omega$ , in 784-786.

CRASIS.

42. A vowel or diphthong at the end of a word may be contracted with one at the beginning of the following word. This occurs especially in poetry, and is called crasis ( $\kappa \rho \hat{a} \sigma i s$ , mixture). The coronis (') is placed over the contracted syllable. The first of the two words is generally an article, a relative ( $\tilde{a}$  or  $\tilde{a}$ ),  $\kappa a i$ ,  $\pi \rho i$ , or  $\tilde{a}$ .

- 43. Crasis generally follows the laws of contraction, with these modifications:—
- 1. A diphthong at the end of the first word drops its last vowel before crasis takes place.
- 2. The article loses its final vowel or diplithong in crasis before a; the particle τοί drops of before a; and καί drops at before all vowels and diphthongs except ε and ε. But we have κεί and κείς for καὶ εί and καὶ είς.
  - 44. The following are examples of crasis: -

Τὸ ὄνομα, τοῦνομα; τὰ ἀγαθά, τἄγαθά; τὸ ἐναντίον, τοῦναντίον; ὁ ἐκ, οὐκ; ὁ ἐπί, οὑπί; τὸ τμάτιον, θοἰμάτιον (93); ἃ ἄν, ἄν; καὶ ἄν, κᾶν; καὶ εἶτα, κἶτα; — ὁ ἀνήρ, ἀνήρ; οἱ ἀδελφοί, άδελφοί; τῷ ἀνδρί, τἀνδρί; τὸ αὐτό, ταὐτό; τοῦ αὐτοῦ, ταὐτοῦ; — τοι ἄν, τᾶν (μέντοι ἄν, μεντᾶν); τοι ἄρα, τᾶρα; — καὶ αὐτός, καὐτός; καὶ αὖτη, χαύτη (93); καὶ ἐστι, κᾶστι; καὶ εἰ, κεἰ; καὶ οὐ, κοὐ; καὶ οἱ, χοὶ; καὶ αἰ, χαί. So ἐγὼ οἶδα, ἐγῷδα; ὧ ἄνθρωπε, ὥνθρωπε; τῆ ἐπαρῆ, τήπαρῆ. Likewise we have προῦργου, helpful, for πρὸ ἔργου, ahead in work; cſ. φροῦδος for πρὸ ὁδοῦ (93).

- **45.** N. If the first word is an article or relative with the rough breathing, this breathing is retained on the contracted syllable, taking the place of the coronis; as in  $\tilde{a}v$ ,  $\tilde{a}v\tilde{\eta}\rho$ .
- 46. N. In crasis, ἔτερος, other, takes the form ἄτερος, whence ὅτερος (for ὁ ἔτερος), θὰτέρου (for τοῦ ἐτέρου), θὰτέρος, etc. (43,2; 93).

#### SYNIZESIS.

- 47. 1. In poetry, two successive vowels, not forming a diphthong, are sometimes united in pronunciation for the sake of the metre, although no contraction appears in writing. This is called synizesis ( $\sigma v \nu i \zeta \gamma \sigma \iota s$ , settling together). Thus,  $\theta \epsilon o \iota$  may make one syllable in poetry;  $\sigma \tau \dot{\eta} \theta \epsilon a$  or  $\chi \rho \bar{\nu} \sigma \dot{\epsilon} \phi$  may make two.
- 2. Synizesis may also take the place of crasis (42), when the first word ends in a long rowel or a diphthong, especially with  $\epsilon \pi \epsilon i$ , since,  $\mu \acute{\eta}$ , not,  $\mathring{\eta}$ , or,  $\mathring{\eta}$  (interrog.), and  $\epsilon \gamma \acute{\omega}$ , I. Thus,  $\epsilon \pi \epsilon i$  où may make two syllables,  $\mu \grave{\gamma}$   $\epsilon i \delta \epsilon \nu \omega$  may make three;  $\mu \grave{\gamma}$  où always makes one syllable in poetry.

#### ELISION.

48. A short final vowel may be dropped when the next word begins with a vowel. This is called *elision*. An apostrophe (') marks the omission. E.g.

- $\Delta$ ι' ἐμοῦ for διὰ ἐμοῦ; ἀντ' ἐκείνης for ἀντὶ ἐκείνης; λέγοιμ' ἄν for λέγοιμι ἄν; ἀλλ' εὐθύς for ἀλλὰ εὐθύς; ἐπ' ἀνθρώπῳ for ἐπὶ ἀνθρώπῳ. So ἐφ' ἐτέρῳ; νύχθ' ὅλην for νύκτα ὅλην (92).
- 49. Elision is especially frequent in ordinary prepositions, conjunctions, and adverbs; but it may also be used with short vowels at the end of nouns, adjectives, pronouns, and verbs.
  - 50. Elision never occurs in
- (a) the prepositions  $\pi\epsilon\rho i$  and  $\pi\rho i$ , except  $\pi\epsilon\rho i$  and Aeolic (rarely before i in Attic),
  - (b) the conjunction ore,
  - (c) monosyllables, except those ending in &,
- (d) the dative singular in  $\iota$  of the third declension and the dative plural in  $\sigma\iota$ , except in epic poetry,
  - (e) words ending in v.
- 51. N. The epic and comic poets sometimes elide  $\alpha i$  in the verbal endings  $\mu \alpha i$ ,  $\sigma \alpha i$ ,  $\tau \alpha i$ , and  $\sigma \theta \alpha i$  ( $\theta \alpha i$ ). So  $\alpha i$  in  $\delta \mu \alpha i$ , and rarely in  $\mu \alpha i$ .
- **52.** N. Elision is often neglected in prose, especially by certain writers (as Thucydides). Others (as Isocrates) are more strict in its use.
- 53. (Apocope.) The poets sometimes cut off a short vowel before a consonant. Thus in Homer we find  $\delta \nu$ , κάτ, and πάρ, for ἀνά, κατά, and παρά. Both in composition and alone, κάτ assimilates its τ to a following consonant and drops it before two consonants, and  $\nu$  in  $\delta \nu$  is subject to the changes of 78; as κάββαλε and κάκτανε, for κατέβαλε and κατέκτανε, but κατθανεῖν for καταθανεῖν (ii8, 1), κὰκ κορυφήν, κὰγ γόνον, κὰπ πεδίον; ἀμ-βάλλω, άλ-λέξαι, ἄμ πεδίον, ἄμ φόνον. So ὑβ-βάλλειν (once) for ὑπο-βάλλειν
- **54.** A short final vowel is generally elided also when it comes before a vowel in forming a compound word. Here no apostrophe is used. *E.g.*

'Απ-αιτέω (ἀπό and αἰτέω). δι έβαλον (διά and ἔβαλον). So ἀφαιρέω (ἀπό and αἰρέω, 92); δεχ-ήμερος (δέκα and ἡμέρα).

#### APHAERESIS.

55. In poetry, a short vowel at the beginning of a word is sometimes dropped after a long vowel or a diphthong, especially after μή, not, and η, or. This is called aphaeresis (ἀφαίρεσις, taking off). Thus, μὴ ἡώ for μὴ ἐγώ; ποῦ στιν for ποῦ ἐστιν; ἐγὼ φάνην for ἐγὼ ἐφάνην; ἡ μοῦ for ἡ ἐμοῦ.

#### MOVABLE CONSONANTS.

56. Most words ending in  $-\sigma\iota$  (including  $-\xi\iota$  and  $-\psi\iota$ ), and all verbs of the third person ending in  $\epsilon$ , generally add  $\nu$ 

when the next word begins with a vowel. This is called  $\nu$  movable. E.g.

Πασι δίδωσι ταῦτα; but πασιν έδωκεν ἐκεῖνα. So δίδωσί μοι; but δίδωσιν ἐμοί.

- 57. N. 'Εστί takes ν movable, like third persons in σι.
- 58. N. The third person singular of the pluperfect active in  $-\epsilon \iota$  has  $\nu$  movable; as  $\ddot{\eta} \delta \epsilon \iota(\nu)$ , he knew. But contracted imperfects in  $-\epsilon \iota$  (for  $-\epsilon \epsilon$ ), as  $\dot{\epsilon} \phi \dot{\iota} \lambda \epsilon \iota$ , never take  $\nu$  in Attic.
- 59. N. The epic  $\kappa \epsilon$  (for  $\tilde{a}\nu$ ) is generally  $\kappa \epsilon \nu$  before a vowel, and the poetic  $\nu \dot{\nu} \nu$  (enclitic) has an epic form  $\nu \dot{\nu}$ . Many adverbs in  $-\theta \epsilon \nu$  (as  $\pi \rho \dot{\nu} \sigma \theta \epsilon \nu$ ) have poetic forms in  $-\theta \epsilon$ .
- 60. N. N movable may be added at the end of a sentence or of a line of poetry. It may be added even before a consonant in poetry, to make position (99).
- 61. N. Words which may have ν movable are not clided in prose, except ἐστί.
- **62.** Oὐ, not, becomes οὖκ before a smooth vowel, and οὖχ before a rough vowel; as οὖ θέλω, οὖκ αὖτός, οὖχ οὖτος. Μή inserts κ in μηκ-έτι, no longer, by the analogy of οὖκ-έτι.
- **63.** Οὖτως, thus, ἐξ (ἐκς), from, and some other words may drop s before a consonant; as οὖτως ἔχει, οὖτω δοκεῖ, ἐξ ἄστεως, ἐκ πύλεως.

### METATHESIS AND SYNCOPE.

- **64.** 1. Metathesis is the transposition of a short vowel and a liquid in a word; as in κράτος and κάρτος, strength; θάρτος and θράσος, courage.
- 2. The vowel is often lengthened; as in  $\beta \dot{\epsilon} \beta \lambda \eta$ - $\kappa a$  (from stem  $\beta \check{a} \lambda$ -),  $\tau \dot{\epsilon} \tau \mu \eta$ - $\kappa a$  (from stem  $\tau \epsilon \mu$ -),  $\theta \rho \dot{\omega} \sigma \kappa \omega$  (from stem  $\theta o \rho$ -). (See 649.)
- . **65.** Syncope is the dropping of a short vowel between two consonants; as in πατέρος, πατρός (274); πτήσομαι for πετήσομαι (650).
- **66.** N. (a) When μ is brought before ρ or λ by syncope or metathesis, it is strengthened by inserting β; as μεσημβρία, midday, for μεσημ(ε)ρια (μέσος and ἡμέρα); μέμβλωκα, epic perfect of βλώσκω, go, from stem μολ., μλο., μλω (636), με-μλω-κα, μέ-μβλω-κα. Thus the vulgar chinley (for chinney) generally becomes chinhley.

(b) At the beginning of a word such a  $\mu$  is dropped before  $\beta$ ;

as in  $\beta \rho \rho \tau \dot{\phi}s$ , mortal, from stem  $\mu \rho \rho$ ,  $\mu \rho \sigma$  (cf. Lat. morior, die),  $\mu \beta \rho \rho \tau \sigma s$ ,  $\beta \rho \rho \tau \dot{\phi}s$  (but the  $\mu$  appears in composition, as in  $\tilde{a}$ - $\mu \beta \rho \rho \tau \sigma s$ , immortal). So  $\beta \lambda \dot{\iota} \tau \tau \omega$ , take honey, from stem  $\mu \epsilon \lambda \iota \tau$ - of  $\mu \dot{\epsilon} \lambda \iota$ , honey (cf. Latin mel), by syncope  $\mu \lambda \iota \tau$ -,  $\mu \beta \lambda \iota \tau$ -,  $\beta \lambda \iota \tau$ -,  $\beta \lambda \dot{\iota} \tau \tau \omega$  (582).

67. N. So  $\delta$  is inserted after  $\nu$  in the oblique cases of  $\delta\nu\eta\rho$ , man (277), when the  $\nu$  is brought by syncope before  $\rho$ ; as  $\delta\nu\epsilon\rho\rho\sigma$ 

(άν-ρος), άνδρύς.

#### CHANGES OF CONSONANTS.

DOUBLING OF CONSONANTS.

- 68. 1. A rough mute (21) is never doubled; but  $\pi\phi$ ,  $\kappa\chi$ , and  $\tau\theta$  are always written for  $\phi\phi$ ,  $\chi\chi$ , and  $\theta\theta$ . Thus  $\Sigma\alpha\pi\phi\dot{\omega}$ ,  $B\acute{\alpha}\kappa\chi\sigma$ ,  $\kappa\alpha\tau\theta\alpha\nu\epsilon\hat{\iota}\nu$ , not  $\Sigma\alpha\phi\dot{\omega}$ ,  $B\acute{\alpha}\chi\chi\sigma$ ,  $\kappa\alpha\theta\theta\alpha\nu\epsilon\hat{\iota}\nu$  (53). So in Latin, Sappho, Bacchus.
- 2. A middle mute is never doubled in Attic Greek. In  $\gamma\gamma$  the first  $\gamma$  is always nasal (17).
- 3. The later Attic has  $\tau\tau$  for the earlier  $\sigma\sigma$  in certain forms; as  $\pi\rho\acute{a}\tau\tau\omega$  for  $\pi\rho\acute{a}\sigma\sigma\omega$ ,  $\ell\lambda\acute{a}\tau\tau\omega\nu$  for  $\ell\lambda\acute{a}\sigma\sigma\omega\nu$ ;  $\theta\acute{a}\lambda\alpha\tau\tau\alpha$  for  $\theta\acute{a}\lambda\alpha\sigma\sigma\alpha$ . Also  $\tau\tau$  (not for  $\sigma\sigma$ ) and even  $\tau\theta$  occur in a few other words; as  $\Lambda\tau\iota\kappa\acute{o}s$ ,  $\Lambda\tau\theta\acute{s}s$ ,  $\Lambda ttic$ . See also 72.
- 69. Initial  $\rho$  is doubled when a vowel precedes it in forming a compound word; as in  $d\nu a\rho\rho l\pi\tau\omega$  ( $d\nu d$  and  $\dot{\rho}l\pi\tau\omega$ ). So after the syllabic augment; as in  $\ell\rho\rho\bar{l}\pi\tau\sigma\nu$  (imperfect of  $\dot{\rho}l\pi\tau\omega$ ). But after a diphthong it remains single; as in  $\epsilon\bar{\nu}\rho\sigma\sigma$ ,  $\epsilon\bar{\nu}\rho\sigma\nu$ s.

## EUPHONIC CHANGES OF CONSONANTS.

- 70. The following rules (71-95)apply chiefly to changes made in the final consonant of a stem in adding the endings, especially in forming and inflecting the tenses of verbs and cases of nouns, and to those made in forming compounds:—
- 71. (Mutes before other Mutes.) Before a τ-mute (22), a π-mute or a κ-mute is made coördinate (23), and another τ-mute becomes σ. E.g.

Τέτριπται (for τετριβ-ται), δέδεκται (for δεδεχ-ται), πλεχθηναι (for πλεκ-θηναι), ἐλείφθην (for ἐλειπ-θην), γράβδην (for γραφ-δην). Πέπεισται (πεπειθ-ται), ἐπείσθην (ἐπειθ-θην), ἤσται (ήδ-ται), ἴστε (ίδ-τε), χαριέστερος (χαριετ-τερος).

72. N. Έκ, from, in composition retains  $\kappa$  unchanged; as in  $\ell\kappa$ -κρένω,  $\ell\kappa$ -δρομή,  $\ell\kappa$ -θεσις. For  $\tau\tau$  and  $\tau\theta$ , see 68, 3.

- 73. N. No combinations of different mutes, except those included in 68 and in 71 (those in which the second is  $\tau$ ,  $\delta$ , or  $\theta$ ), are allowed in Greek. When any such arise, the first mute is dropped; as in  $\pi \epsilon \pi \epsilon \iota \kappa \alpha$  (for  $\pi \epsilon \pi \epsilon \iota \theta \kappa \alpha$ ). When  $\gamma$  stands before  $\kappa$ ,  $\gamma$ , or  $\chi$ , as in  $\sigma \iota \gamma \gamma \chi \epsilon \omega$  ( $\sigma \iota \gamma \nu$  and  $\chi \epsilon \omega$ ), it is not a mute but a nasal (20).
- 74. (Mutes before  $\Sigma$ .) No mute can stand before  $\sigma$  except  $\pi$  and  $\kappa$ . A  $\pi$ -mute with  $\sigma$  forms  $\psi$ , a  $\kappa$ -mute forms  $\xi$ , and a  $\tau$ -mute is dropped. E.g.

Τρίψω (for τρῖβ-σω), γράψω (for γραφ-σω), λέξω (for λεγ-σω), πείσω (for πειθ-σω), ἄσω (for ἀδ-σω), σώμασι (for σωματ-σι), ἐλπίσι (for ἐλπιδ-σι). So φλέψ (for φλεβ-ς), ἐλπίς (for ἐλπιδ-ς), νύξ (for νυκτ-ς). So χαρίεσι (for χαριετ-σι, 331). See examples under 209, 1.

75. (Mutes before M.) Before  $\mu$ , a  $\pi$ -mute becomes  $\mu$ , and a  $\kappa$ -mute becomes  $\gamma$ . E.q.

Λέλειμμαι (for λελειπ-μαι), τέτρ $\bar{\iota}$ μμαι (for τετρ $\bar{\iota}$ β-μαι), γέγραμμαι (for γεγραφ-μαι), πέπλεγμαι (for πεπλεκ-μαι), τέτευγμαι (for τετευχ-μαι).

**76.** N. But  $\kappa\mu$  can stand when they come together by metathesis (64); as in  $\kappa\ell$ - $\kappa\mu\eta$ - $\kappa\alpha$  ( $\kappa\dot{\alpha}\mu$ - $\nu\omega$ ). Both  $\kappa$  and  $\chi$  may stand before  $\mu$  in the formation of nonns; as in  $d\kappa\mu\dot{\eta}$ , edge,  $d\kappa\mu\dot{\omega}\nu$ , anvil,  $ai\chi\mu\dot{\eta}$ , spearpoint,  $\delta\rho\alpha\chi\mu\dot{\eta}$ , drachma.

'Ex here also remains unchanged, as in ἐκ-μανθάνω (cf. 72).

- 77. N. When  $\gamma\gamma\mu$  or  $\mu\mu\mu$  would thus arise, they are shortened to  $\gamma\mu$  or  $\mu\mu$ ; as έλέγχω, έλήλεγ- $\mu$ aι (for έληλεγχ- $\mu$ aι, έληλεγγ- $\mu$ aι); κάμπτω, κέκαμμαι (for κεκαμπ- $\mu$ aι, κεκαμμ- $\mu$ aι); πέμπω, πέπεμμαι (for πεπεμπ- $\mu$ aι, πεπεμμ- $\mu$ aι. (See 489, 3.)
- 78. (N before other Consonants.) 1. Before a  $\pi$ -mute  $\nu$  becomes  $\mu$ ; before a  $\kappa$ -mute it becomes masal  $\gamma$  (17); before a  $\tau$ -mute it is unchanged. E.g.

Ἐμπίπτω (for ἐν-πιπτω), συμβαίνω (for συν-βαινω), ἐμφανής (for ἐν-φανης); συγχέω (for συν-χεω), συγγενής (for συν-γενης); ἐν-τρέπω.

- 2. Before another liquid  $\nu$  is changed to that liquid. E.g. Έλλείπω (for εν-λειπω), εμμένω (for εν-μενω), συρρέω (for συν-ρεω), σύλλογος (for συν-λογος).
- 3. N before  $\sigma$  is generally dropped and the preceding vowel is lengthened (30),  $\alpha$  to  $\tilde{a}$ ,  $\epsilon$  to  $\epsilon\iota$ , o to  $\epsilon\upsilon$ . E.g.

Μέλας (for μελαν-ς), είς (for έν-ς), λύουσι (for λύο-νσι): see 210, 2; 556, 5. So λύουσα (for λύοντ-ια, λύον-σα), λυθείσα (for λυθεντ-ια, λυθεν-σα), πάσα (for παντ-ια, πάν-σα): see 84, 2.

79. The combinations  $\nu\tau$ ,  $\nu\delta$ ,  $\nu\theta$ , when they occur before

or in inflections, are always dropped, and the preceding vowel is lengthened, as above (78, 3). E.g.

Πασι (for παντ-σι), γίγας (for γιγαντς), δεικνύς (for δεικνυντς), λέουσι (for λεοντ-σι), τιθείσι (for τιθεντ-σι), τιθείς (for τιθεντ-ς), δούς (for δοντ-ς), σπείσω (for σπενδ-σω), πείσομαι (for πενθ-συμαι).

For nominatives in  $\omega \nu$  (for  $o\nu \tau$ -), see 209, 3 (cf. 212, 1).

- 80. N. N standing alone before or of the dative plural is dropped without lengthening the vowel; as δαίμοσι (for δαιμον-σι).
- 81. N. The preposition  $\epsilon_{\nu}$  is not changed before  $\rho$  or  $\sigma$ ; as ενράπτω, ένσπονδος, ένστρέφω.

Div becomes ovo-before o and a vowel, but ov-before o and a

consonant or before ζ; as σύσ-σιτος, σύστημα, σύζυγος.

- 82. N. Παν and πάλιν may retain ν in composition before σ or change it to σ; as πάν-σοφος οι πάσσοφος, παλίν-σκιος, παλίσσυτος.
- 83. Most verbs in vw have o for v before wat in the perfect middle (648); as φαίνω, πέφασ-μαι (for πεφαν-μαι); and the v reappears before  $\tau$  and  $\theta$ , as in  $\pi \epsilon \phi a \nu - \tau a \iota$ ,  $\pi \epsilon \phi a \nu - \theta \epsilon$ . (See 489, 2; 700.)
- 84. (Changes before i.) The following changes occur when (representing an original i) follows the final consonant of a stem.
- 1. Palatals  $(\kappa, \gamma, \chi)$  and sometimes  $\tau$  and  $\theta$  with such an  $\iota$  become σσ (later Attic ττ); as φυλάσσ-ω (stem φυλακ-) for φυλακ-ι-ω; ήσσων, worse, for ήκ-ι-ων (361, 2); τάσσ-ω (ταγ-), for ταγ-ι-ω (580); ταράσσ-ω (ταραχ-), for ταραχ-ι-ω; κορύσσ-ω (κορυθ-), for κορυθ-ι-ω; Κρήσσα, for Κρητ-ια.

Thus is formed the feminine in εσσα of adjectives in eis, from a

stem in ετ-, ετ-ια becoming εσσα (331, 2).

- 2. No with this  $\iota$  becomes  $\nu\sigma$  in the feminine of participles and adjectives (331, 2; 337, 1), in which v is regularly dropped with lengthening of the preceding vowel (78, 3); as παντ-, παντ-ια, πάνσα (Thessalian and Cretan), πασα; λύοντ-, λύοντ-ια, λύον-σα, λύουσα.
- 3.  $\Delta$  (sometimes  $\gamma$  or  $\gamma\gamma$ ) with  $\iota$  forms  $\zeta$ ; as  $\phi\rho\acute{a}\zeta$ - $\omega$  ( $\phi\rho\acute{a}\delta$ -), for φραδι-ω (585); κομίζ-ω (κομιδ), for κομιδιω; κράζω (κραγ-), for κραγ-ι-ω (589); μέζων (lon.) οτ μείζων (comp. of μέγας, grent), for  $\mu\epsilon\gamma$ - $\iota$ - $\omega\nu$  (361, 4).
- 4. A with  $\iota$  forms  $\lambda\lambda$ ; as  $\sigma\tau\dot{\epsilon}\lambda\lambda$ - $\omega$  ( $\sigma\tau\dot{\epsilon}\lambda$ -), for  $\sigma\tau\dot{\epsilon}\lambda$ - $\iota$ - $\omega$ ; άλλο-μαι (άλ-), leap, for άλ-ι-ομαι (cf. Lat. salio); άλλος, other, for άλ-ι-os (cf. Lat. alius). (See 593.)
- 5. After av or ap the i is transposed, and is then contracted with a to at; as  $\phi \alpha i \nu \omega$  ( $\phi \alpha \nu$ -), for  $\phi \alpha \nu \iota \omega$ ;  $\chi \alpha i \rho \omega$  ( $\chi \alpha \rho$ -), for χαρι-ω; μέλαιν-α (μελαν-), fem. of μέλας (326), for μελαν-ι-α.

- 6. After  $\epsilon \nu$ ,  $\epsilon \rho$ ,  $\iota \nu$ ,  $\iota \rho$ ,  $\nu \nu$ , or  $\nu \rho$ , the  $\iota$  disappears, and the preceding  $\epsilon$ ,  $\iota$ , or  $\nu$  is lengthened ( $\epsilon$  to  $\epsilon \iota$ ); as  $\tau \epsilon \iota \nu \cdot \omega$  ( $\tau \epsilon \nu \cdot \nu$ ), for  $\tau \epsilon \nu \cdot \iota \cdot \omega$ ;  $\chi \epsilon \iota \rho \omega \nu$  (stem  $\chi \epsilon \rho \cdot \nu$ ), worse, for  $\chi \epsilon \rho \cdot \iota \cdot \omega \nu$ ;  $\kappa \epsilon \iota \rho \cdot \omega \nu$  ( $\kappa \epsilon \rho \cdot \nu$ ), for  $\kappa \epsilon \rho \cdot \iota \cdot \omega \nu$ ; oirtipu (oirtip.), for oirtip- $\iota \cdot \omega$ ; divipu (dirup.), for dirup- $\iota \cdot \omega \nu$ ; oirtipu (oirtip.), for oirtip- $\iota \cdot \omega \nu$ ; oirtipu, saving, saving, saving, stem our  $\iota \rho \cdot \nu$ , for our  $\iota \rho \cdot \iota \cdot \omega$ . (See 594 and 596.)
- **85.** (Omission of  $\Sigma$  and F.) Many forms are explained by the omission of an original spirant (s or F), which is seen sometimes in earlier forms in Greek and sometimes in kindred languages.

**86.** ( $\Sigma$ .) At the beginning of a word, an original s sometimes appears as the rough breathing. E.g.

Ίστημι, place, for σιστημι, Lat. sisto; ημισυς, half. cf. Lat. semi; ἔζομαι, sit (from root έδ- σεδ-), Lat. sed-eo; έπτά, seven, Lat. septem.

- 87. N. In some words both  $\sigma$  and f have disappeared; as  $\delta s$ , his, for  $\sigma f \circ s$ , suus;  $\eta \delta \circ s$ , sweet (from root  $\delta \delta \circ s$  for  $\sigma f \circ s$ ), Lat. suuvis.
  - 88. In some inflections,  $\sigma$  is dropped between two vowels.
- 1. Thus, in stems of nouns, εσ- and ασ- drop σ before a vowel of the ending; as γένος, race (stem γενεσ-), gen. γένε-ος for γενεσ-ος. (See 226.)
- 2. The middle endings σαι and σο often drop σ (565, 6); as λūε-σαι, λύε-αι, λύη οτ λύει (39,3); ε-λῦε-σο, ελύεο, ελύου; but σ is retained in such μι- forms as τστα-σαι and τστα-σο. (See also 664.)
- 89. In the first acrist active and middle of liquid verbs, σ is generally dropped before a or  $a\mu\eta\nu$ ; as φαίνω (φαν-), acr. ἔφην α for ἐφανσ-α, ἐφην-άμην for ἐφανσ-αμην. So ὀκέλλω (ὀκέλ-), acr. ὥκειλ-α for ὧκελσ-α; but poetic κέλλω has ἔκελσ-α. (See 672.)
- **90.** (F.) Some of the cases in which the omission of vau (or digamma) appears in inflections are these:—
- 1. In the augment of certain verbs; as 2 aor. είδον, saw, from root ριδ (Lat. vid-eo), for ε-ριδον, ε-ιδον, είδον: see also the examples in 539.
- In verbs in εω of the Second Class (574), where ευ became ε<sub>Γ</sub> and finally ε; as ρέ-ω, flow (stem ρευ-, ρε<sub>Γ</sub>-), fut. ρεύ-σο-μωι. See also 601.
- 3. In certain nonns of the third declension, where final v of the stem becomes f, which is dropped; as  $va\hat{v}s$  (vav-), gen. va- $\acute{o}s$  for  $v\tilde{a}v$ -os,  $v\tilde{a}f$ -os (269); see  $\beta a\sigma v\lambda \epsilon \acute{o}s$  (265). See also 256.
- **91.** The Aeolic and Doric retained f long after it disappeared in Ionic and Attic. The following are a few of the many words in which its former presence is known:—

βοῦς, ox (Lat. bov-is), ἔαρ, spring (Lat. ver), δῖος, divine (divus), ἔργον, work (Germ. werk), ἐσθής, garment (Lat. vestis), ἔσπερος, evening (vesper), τς, strength (vis), κλητς (Dor. κλατς), key (clavis), oἰς, sheep (ovis), οἰκος house (vicus), οἰνος, wine (vinum), σκαιός, left (scaevus).

92. (Changes in Aspirates.) When a smooth mute  $(\pi, \kappa, \tau)$  is brought before a rough vowel (either by elision or in forming a compound), it is itself made rough. E.g.

'Αφίημι (for ἀπ-ίημι), καθαιρέω (for κατ-αίρεω), ἀφ' ὧν (for ἀπὸ ὧν), νύχθ' ὅλην (for νύκτα ὅλην, 48; 71).

- 93. N. So in crasis (see examples in 44). Here the rough breathing may affect even a consonant not immediately preceding it; as in φρούδος, gone, from πρὸ ὁδοῦ; φρουρός, watchman (προ-όρος).
- 94. N. The Ionic generally does not observe this principle in writing, but has (for example) ἀπ' οῦ, ἀπίημ (from ἀπό and ἔημ).
- 95. The Greeks generally avoided two rough consonants in successive syllables. Thus
- 1. In reduplications (521) an initial rough mute is always made smooth. E.g.

Πέφϋκα (for φεφϋκα), perfect of φύω; κέχηνα (for χεχηνα), perf. of χάσκω; τέθηλα (for θεθηλα), perf. of θάλλω. So in τί-θημι (for θεθημι), 794, 2.

2. The ending  $\theta_i$  of the first agrist imperative passive becomes  $\tau_i$  after  $\theta_{\eta}$  of the tense stem (757, 1). E.g.

Λύθητι (for  $\lambda \nu \theta \eta - \theta \iota$ ), φάνθητι (for  $\phi a \nu \theta \eta - \theta \iota$ ); but 2 aor.  $\phi \acute{a} \nu \eta - \theta \iota$  (757, 2).

- 3. In the agrist passive  $\epsilon \tau \epsilon \theta \eta \nu$  from  $\tau \theta \eta \mu$  ( $\theta \epsilon$ -), and in  $\epsilon \tau \nu \theta \eta \nu$  from  $\theta \nu \omega$  ( $\theta \nu$ -)  $\theta \epsilon$  and  $\theta \nu$  become  $\tau \epsilon$  and  $\tau \nu$  before  $\theta \eta \nu$ .
- 4. A similar change occurs in  $\delta\mu\pi$ - $\epsilon\chi\omega$  (for  $\delta\mu\phi$ - $\epsilon\chi\omega$ ) and  $\delta\mu\pi$ - $\epsilon\chi\omega$  (for  $\delta\mu\phi$ - $\epsilon\chi\omega$ ), clothe, and in  $\epsilon\kappa\epsilon$ - $\chi\epsilon\iota\rho$ ia ( $\xi\chi\omega$  and  $\chi\epsilon\iota\rho$ ), truce. So an initial aspirate is lost in  $\xi\chi\omega$  (stem  $\xi\chi$  for  $\sigma\epsilon\chi$ -, 539), but reappears in fut.  $\xi\xi\omega$ .
- 5. There is a transfer of the aspirate in a few verbs which are supposed to have had originally two rough consonants in the stem; as  $\tau\rho\epsilon\phi\omega$  (stem  $\tau\rho\epsilon\phi$  for  $\theta\rho\epsilon\phi$ -), nourish, fut.  $\theta\rho\epsilon\psi\omega$  (662);  $\tau\rho\epsilon\chi\omega$  ( $\tau\rho\epsilon\chi$  for  $\theta\rho\epsilon\chi$ -), run, fut.  $\theta\rho\epsilon\xi\omega\mu\alpha$ ;  $\epsilon\tau\delta\phi\eta\nu$ , from  $\theta\delta\pi\tau\omega$  ( $\tau\alpha\phi$  for  $\theta\alpha\phi$ -), bury; see also  $\theta\rho\nu\pi\tau\omega$ ,  $\tau\delta\phi\omega$ , and stem  $\theta\alpha\pi$ -, in the Catalogue of Verbs. So in  $\theta\rho\nu\xi$  (225), hair, gen.  $\tau\rho\iota\chi$  (stem  $\tau\rho\iota\chi$  for  $\theta\rho\iota\chi$ -); and in  $\tau\alpha\chi\nu$ s, swift, comparative  $\theta\delta\sigma\sigma\omega\nu$  for  $\theta\alpha\chi$ - $\iota\omega\nu$  (84, 1). Here

the first aspirate reappears whenever the second is lost by any euphonic change.

In some forms of these verbs both rough consonants appear; as  $\dot{\epsilon}$ - $\theta \rho \dot{\epsilon} \phi$ - $\theta \eta \nu$ ,  $\theta \rho \dot{\epsilon} \phi$ - $\theta \dot{\eta} \nu a$ ,  $\tau \dot{\epsilon}$ - $\theta \rho \dot{\alpha} \phi$ - $\theta u$ ,  $\tau \dot{\epsilon}$ - $\theta u \dot{\phi}$ - $\theta u \dot{\phi$ 

#### SYLLABLES.

96. A Greek word has as many syllables as it has separate vowels or diphthongs. The syllable next to the last is called the *penult* (paen-ultima, *almost last*); the one before the penult is called the *antepenult*.

97. The following rules, based on ancient tradition, are now generally observed in dividing syllables at the end of a line:—

 Single consonants, combinations of consonants which can begin a word (which may be seen from the Lexicon), and mutes followed by μ or ν, are placed at the beginning of a syllable. Other combinations of consonants are divided. Thus, ἔ-χω, ἐ-γώ, ἐ-σπέ-ρα, νέ-κταρ, ἀ-κμή, δε-σμός, μι-κρόν, πρά-γμα-τος, πράσ-σω, ἐλ-πίς, ἔν-δον, ἄρ-μα-τα.

2. Compound words are divided into their original parts; but when the final vowel of a preposition has been elided in composition, the compound is sometimes divided like a simple word: thus  $\pi\rho\sigma\sigma\dot{a}\gamma\omega$  (from  $\pi\rho\dot{o}s$  and  $\ddot{a}\gamma\omega$ ); but  $\pi a - \rho\dot{a}-\gamma\omega$  or  $\pi a \rho - \dot{a}\gamma\omega$  (from  $\pi a \rho \dot{a}$  and  $\ddot{a}\gamma\omega$ ).

QUANTITY OF SYLLABLES.

- 98. A syllable is long by nature (φύσει) when it has a long vowel or a diphthong; as in τ̄ιμή, κτείνω.
- 99. 1. A syllable is long by position ( $\theta \epsilon \sigma \epsilon \iota$ ) when its vowel is followed by two consonants or a double consonant; as in  $i\sigma \tau a\nu \tau \epsilon \varsigma$ ,  $\tau \rho a\pi \epsilon \zeta a$ ,  $\delta \rho \tau \nu \xi$ .

The length of the vowel itself is not affected by position.
 Thus a was sounded as long in πράσσω, πράγμι, and πράξις, but

as short in τάσσω, τάγμα, and τάξις.

3. One or both of the consonants which make position may be in the next word; thus the second syllable in οὐτός φησιν and in κατὰ στόμα is long by position.

100. When a vowel short by nature is followed by a mute and a liquid, the syllable is common (i.e. it may be either long or short); as in  $\tau \acute{\epsilon} \kappa \nu o \nu$ ,  $\rlap{v} \pi \nu o \varsigma$ ,  $\rlap{v} \beta \rho \iota \varsigma$ . But in Attic poetry such a syllable is generally short; in other poetry it is generally long.

- 101. N. A middle mute  $(\beta, \gamma, \delta)$  before  $\mu$  or  $\nu$ , and generally before  $\lambda$ , lengthens a preceding vowel; as in  $\delta \gamma \nu \hat{\omega}_{S}$ ,  $\beta i \beta \lambda \hat{\omega}_{V}$ ,  $\delta \hat{\omega}_{S}$ ,  $\delta \hat{\omega}_{S}$
- 102. N. To allow a preceding vowel to be short, the mute and the liquid must be in the same word, or in the same part of a compound. Thus  $\epsilon$  in  $\hat{\epsilon}\kappa$  is long when a liquid follows, either in composition or in the next word; as  $\hat{\epsilon}\kappa\lambda\hat{\epsilon}\gamma\omega$ ,  $\hat{\epsilon}\kappa$   $\nu\epsilon\hat{\omega}\nu$  (both  $\underline{\hspace{0.5cm}}$   $\underline{\hspace{0.5cm}}$ ).
- 103. The quantity of most syllables can be seen at once. Thus  $\eta$  and  $\omega$  and all diphthongs are long by nature;  $\epsilon$  and o are short by nature. (See 5.)
- 104. When a, i, and v are not long by position, their quantity must generally be learned by observing the usage of poets or from the Lexicon. But it is to be remembered that
- 1. Every vowel arising from contraction or crasis is long; as a in γέρα (for γέραα), ἄκων (for ἀέκων), and κάν (for καὶ ἄν).
- 2. The endings as and vs are long when  $\nu$  or  $\nu\tau$  has been dropped before  $\sigma$  (79).
- 3. The accent often shows the quantity of its own vowel, or of vowels in following syllables.

Thus the circumflex on  $\kappa \nu i \sigma a$ , savor, shows that  $\iota$  is long and a is short; the acute on  $\chi \omega \rho a$ , land, shows that a is long; on  $\tau i \nu \epsilon \varsigma$ ; who? that  $\iota$  is short; the acute on  $\beta a \sigma \iota \lambda \epsilon \iota a$ , kingdom, shows that the final a is long, on  $\beta a \sigma \iota \lambda \epsilon \iota a$ , queen, that final a is short. (See 106, 3; 111; 112.)

105. The quantity of the terminations of nouns and verbs will be stated below in the proper places.

#### ACCENT.

GENERAL PRINCIPLES

- There are three accents,
   the acute ('), as λόγος, αὐτός,
   the grave ('), as αὐτὸς ἔφη (115, 1),
   the circumflex (^ or ~), as τοῦτο, τῖμῶν.
- 2. The acute can stand only on one of the last three syllables of a word, the circumflex only on one of the last two, and the grave only on the last.
- 3. The circumflex can stand only on a syllable long by nature.

107. 1. The Greek accent was not simply a stress accent (like ours), but it raised the musical pitch or tone  $(\tau \delta v \sigma s)$  of the syllable on which it fell. This appears in the terms  $\tau \delta v \sigma s$  and  $\pi \rho \sigma \sigma \phi \delta l a$ , which designated the accent, and also in  $\delta \xi \dot{\sigma} s$ , sharp, and  $\beta a \rho \dot{\sigma} s$ , grave, flat, which described it. (See 110, 1 and 3.) As the language declined, the musical accent gradually changed to a stress accent, which is now its only representative in Greek as in other languages.

2. The marks of accent were invented by Aristophanes of Byzantium, an Alexandrian scholar, about 200 B.C., in order to teach foreigners the correct accent in pronouncing Greek. By the ancient theory every syllable not having either the acute or the circumflex was said to have the grave accent; and the circumflex, originally formed thus -, was said to result from the union of an acute and a following grave.

- 108. N. The grave accent is written only in place of the acute in the case mentioned in 115, 1, and occasionally on the indefinite pronoun  $\tau i s$ ,  $\tau i$  (418).
- 109. N. The accent (like the breathing) stands on the second vowel of a diphthong (12); as in  $\tilde{\alpha}i\rho\omega$ ,  $\mu\hat{\alpha}i\sigma\alpha$ ,  $\tau\hat{\alpha}i\sigma$  . But in the improper diphthongs  $(\alpha, \eta, \omega)$  it stands on the first vowel even when the  $\iota$  is written in the line; as in  $\tau\iota\mu\hat{\eta}$ ,  $\dot{a}\pi\lambda\hat{\omega}$ ,  $\Omega\iota(\dot{\omega})$ ,  $\Omega\iota\xi\alpha(\dot{\omega}\xi\alpha)$ .
- 110. 1. A word is called oxytone (ifi-rors, sharp-toned) when it has the acute on the last syllable, as  $\beta a \sigma i \lambda \epsilon \dot{\omega} s$ ; paroxytone, when it has the acute on the penult, as  $\beta a \sigma i \lambda \dot{\epsilon} \omega s$ ; propuroxytone, when it has the acute on the antepenult, as  $\beta a \sigma i \lambda \dot{\epsilon} \dot{\omega} \sigma s$ .
- 2. A word is called perisponenon (περισπώμενον) when it has the circumflex on the last syllable, as ελθεῖν; properisponenon, when it has the circumflex on the penult, as μοῦσα.
- 3. A word is called barytone (βαρύ-τονος, grave or flattoned) when its last syllable has no accent (107, 2). Of course, all paroxytones, proparoxytones, and properispomena are at the same time barytones.
- 4. When a word throws its accent as far back as possible (111), it is said to have *recessive* accent. This is especially the case with verbs (130). (See 122.).
- 111. The antepenult, if accented, takes the acute. But it can have no accent if the last syllable is long by nature or ends in  $\xi$  or  $\psi$ ; as  $\pi \epsilon \lambda \epsilon \kappa \nu s$ ,  $\check{\alpha} \nu \theta \rho \omega \pi \nu s$ ,  $\pi \rho o \phi \dot{\nu} \lambda a \xi$ .
- 112. An accented penult is circumflexed when it is long by nature while the last syllable is short by nature;

as μηλον, νησος, ηλιξ. Otherwise it takes the acute; as λόγος, τούτων.

- 113. N. Final  $\alpha$  and  $\alpha$  are counted as short in determining the accent; as ἄνθρωποι, νῆσοι: except in the optative, and in οἶκοι, at home; as τιμήσαι, ποιήσοι (not τίμησαι οτ ποίησοι).
- 114. N. Genitives in  $\epsilon \omega s$  and  $\epsilon \omega \nu$  from nouns in  $\epsilon s$  and  $\nu s$  of the third declension (251), all cases of nouns and adjectives in  $\omega s$  and  $\omega \nu$  of the Attic second declension (198), and the Ionic genitive in  $\epsilon \omega$  of the first (188, 3), allow the acute on the antepenult; as  $\epsilon \dot{\nu} \gamma \epsilon \omega s$ ,  $\pi \dot{\delta} \lambda \epsilon \omega s$ ,  $T \dot{\gamma} \rho \epsilon \omega$  ( $T \dot{\gamma} \rho \gamma s$ ). So some compound adjectives in  $\omega s$ ; as  $\dot{\nu} \psi l \cdot \kappa \epsilon \rho \omega s$ , high-horned. For the acute of  $\ddot{\omega} \sigma \pi \epsilon \rho$ , or  $\ddot{\delta} \epsilon$ , etc., see 146.
- 115. 1. An oxytone changes its acute to the grave before other words in the same sentence; as τοὺς πονηρούς ἀνθρώπους (for τούς πονηρούς ἀνθρώπους).
- 2. This change is not made before enclitics (143) nor before an elided syllable (48), nor in the interrogative  $\tau$  is,  $\tau$  i (418). It is not made before a colon: before a comma modern usage differs, and the tradition is uncertain.
- 116. (Anastrophe.) Dissyllabic prepositions (regularly oxytone) throw the accent back on the penult in two cases. This is called anastrophe (ἀναστροφή, turning back). It occurs

1. When such a preposition follows its case; as in τούτων πέρι (for περὶ τούτων), about these.

This occurs in prose only with  $\pi\epsilon\rho$ , but in the poets with all the dissyllable prepositions except  $\delta\nu\delta$ ,  $\delta\iota\delta$ ,  $\delta\iota\delta$ ,  $\delta\iota\delta$ , and  $\delta\nu\tau\delta$ . In Homer it occurs also when a preposition follows a verb from which it is separated by tracks; as  $\delta\lambda\delta\sigma$  as  $\delta\pi\rho$ , having destroyed.

When a preposition stands for itself compounded with ἐστίν;
 as πάρα for πάρεστιν, ἔνι for ἔνεστιν (ἐνί being poetic for ἐν). Here

the poets have ava (for avá-στηθι), up!

ACCENT OF CONTRACTED SYLLABLES AND ELIDED WORDS.

117. A contracted syllable is accented if either of the original syllables had an accent. A contracted penult or antepenult is accented regularly (111; 112). A contracted final syllable is circumflexed; but if the original word was oxytone, the acute is retained. E.g.

Τϊμώμενος from τζιαύμενος, φιλείτε from φιλέετε, φιλοίμεν from φιλέοιμεν, φιλούντων from φιλεόντων, τζιμώ from τζιμάω; but βεβώς from βεβαώς.

This proceeds from the ancient principle that the circumflex comes from '+' (107, 2), never from '+'; so that  $\tau\iota\mu\dot{a}\omega$  gives  $\tau\iota\mu\dot{\omega}$ , but  $\beta\epsilon\beta\dot{a}\omega$ s gives  $\beta\epsilon\beta\dot{\omega}$ s.

118. N. If neither of the original syllables had an accent, the contracted form is accented without regard to the contraction; as  $\tau i \mu \bar{a}$  for  $\tau i \mu a \epsilon$ ,  $\epsilon \bar{v} \nu o \iota$  for  $\epsilon \bar{v} \nu o \iota$ .

Some exceptions to the rule of 117 will be noticed under the

declensions. (See 203; 311.)

- 119. In crasis, the accent of the first word is lost and that of the second remains; as τάγαθά for τὰ ἀγαθά, ἐγῷδα for ἐγὼ οἶδα, κἄτα for καὶ εἶτα; τἄλλα for τὰ ἄλλα; τἄρα for τοι ἄρα.
- 120. In elision, oxytone prepositions and conjunctions lose their accent with the elided vowel; other oxytones throw the accent back to the penult, but without changing the acute to the grave (115, 1). E.g.

Έπ' αὐτῷ for ἐπὶ αὐτῷ, ἀλλ' εἶπεν for ἀλλὰ εἶπεν, φήμ' ἐγώ for

φημὶ ἐγώ, κάκ ἔπη for κακὰ ἔπη.

### ACCENT OF NOUNS AND ADJECTIVES.

121. 1. The place of the accent in the nominative singular of a noun (and the nominative singular masculine of an adjective) must generally be learned by observation. The other forms accent the same syllable as this nominative, if the last syllable permits (111); otherwise the following syllable. E.g.

Θάλασσα, θαλάσσης, θάλασσαν, θάλασσαι, θαλάσσαις; κόραξ, κόρακος, κόρακες, κοράκων; πρᾶγμα, πρᾶγματος, πρᾶγμάτων; δδούς, δδόντος, δδοῦσιν. So χαρίεις, χαρίεσσα, χαρίεν, gen. χαρίεντος, etc.;

άξιος, άξία, άξιον, άξιοι, άξιαι, άξια.

2. The kind of accent is determined as usual (111; 112); as νησος, νησου, νησου, νησοι, νησοις. (See also 123; 124.)

122. N. The following nouns and adjectives have recessive accent (110, 4): —

(a) Contracted compound adjectives in oos (203, 2):

(b) The neuter singular and vocative singular of adjectives  $\ln \omega_{\nu}$ , or (except those in  $\phi_{\rho\omega\nu}$ , compounds of  $\phi_{\rho\eta\nu}$ ), and the neuter of comparatives in  $\omega_{\nu}$ ; as  $\epsilon i \delta a (\mu \omega \nu)$ ,  $\epsilon i \delta a (\mu \omega \nu)$ ,  $\delta \epsilon i \delta a (\mu \omega \nu)$ ,  $\delta \epsilon i \delta a (\mu \omega \nu)$ ,  $\delta \epsilon i \delta a (\mu \omega \nu)$ ,  $\delta \epsilon i \delta a (\phi_{\rho\omega\nu})$ ,  $\delta a (\phi_{\rho\omega\nu})$ 

(c) Many barytone compounds in ns in all forms; as aυτάρκης, aυτάρκως; gen. pl. αυτάρκως; φιλαλήθης, φιλάληθες (but άληθής, άληθές); this includes vocatives like Σώκρατες, Δημόσθενες (228); so some other

adjectives of the third declension (see 314):

- (d) The vocative of syncopated nouns in  $\eta \rho$  (273), of compound proper names in ων, as 'Αγάμεμνον, Αυτόμεδον (except Λακεδαίμον), and of 'Απόλλων, Ποσειδών (Hom. Hoseιδάων), σωτήρ, saviour, and (Hom.) δάήρ, brother-in-law, - voc. "Απολλον, Πόσειδον (Hom. Horelbaov). σωτερ, δάερ (see 221, 2).
- 123. The last syllable of the genitive and dative of oxytones of the first and second declensions is circumflexed. E.g. Τιμής, τιμή, τιμαίν, τιμών, τιμαίς; θεού, θεώ, θεών, θεοίς.
- 124. In the first declension, we of the genitive plural (for έων) is circumflexed (170). But the feminine of adjectives and participles in os is spelt and accented like the masculine and neuter. E.g.

Δικών, δοξών (from δίκη, δόξα), πολίτων (from πολίτης); but άξίων, λεγομένων (fem. gen. plur. of άξιος, λεγόμενος, 302). For the genitive plural of other adjectives and participles, see 318.

- 125. N. The genitive and dative of the Attic second declension (198) are exceptions; as vews, gen. vew, dat. vew.
- 126. N. Three nouns of the first declension are paroxytone in the genitive plural: ἀφύη, anchory, ἀφύων; χρήστης, usurer, χρήστων; έτησίαι, Etesian winds, έτησίων.
- 127. Most monosyllables of the third declension accent the last syllable in the genitive and dative of all numbers: here we and our are circumflexed. E.g.

Θής, servant, θητός, θητί, θητοίν, θητών, θησί.

- 128. N. Δάς, torch, δμώς, slave, ούς, ear, παις, child, Τρώς, Trojan, φωs, light, and a few others, violate the last rule in the genitive dual and plural; so  $\pi \hat{a}_{S}$ , all, in both genitive and dative plural: as παίς, παιδός, παιδί, παισί, but παίδων; πας, παντός, παντί, πάντων,  $\pi \hat{a} \sigma \iota$ .
- 129. N. The interrogative τίς, τίνος, τίνι, etc., always accents the first syllable. So do all monosyllabic participles; as we, ovros, ovre, όντων, οὖσι; βάς, βάντος.

#### ACCENT OF VERBS.

- 130. Verbs generally have recessive accent (110, 4); ας βουλεύω, βουλεύομεν, βουλεύουσιν; παρέχω, πάρεχε; ἀποδίδωμι, άπόδοτε; βουλεύονται, βουλεύσαι (aor. opt. act.), but βούλευσαι (aor. imper. mid.). See 113.
  - 131. The chief exceptions to this principle are these: -

1. The second agrist active infinitive in ειν and the second agrist middle imperative in ou are perisponena: as λαβεῖν, ἐλθεῖν, λιπεῖν, λιποῦ, λαβοῦ. For compounds like κατά-θου, see 133, 3.

2. These second agrist imperatives active are oxytone: εἰπέ, ελθέ, εὐρέ, λαβέ. So ίδέ in the sense hehold! But their compounds

are regular; as απ-ειπε.

3. Many contracted optatives of the μ-inflection regularly circumflex the penult; as iσταίτο, διδοΐσθε (740).

4. The following forms accent the penult: the first acrist active infinitive, the second acrist middle infinitive (except πρίασθαι and δνασθαι, 798), the perfect middle and passive infinitive and participle, and all infinitives in ναι οr μεν (except those in μεναι). Thus, βουλεῦσαι, γενέσθαι, λελύσθαι, λελυμένος, ἰστάναι, διδόναι, λελυκέναι, δόμεν and δόμεναι (both epic for δοῦναι).

5. The following participles are oxytone: the second agrist active; and all of the third decleusion in -5, except the first agrist active. Thus, λιπών, λυθείς, διδούς, δεικνύς, λελυκώς, ίστας (pres.);

but Avoas and ornoas (aor.).

So lwv, present participle of clu, go.

- 132. Compound verbs have recessive accent like simple verbs; as  $\sigma'$   $\dot{\nu}$   $\dot$ 
  - 133. But there are these exceptions to 132: -

1. The accent cannot go further back than the augment or reduplication; as παρ-είχον (not πάρειχον), I provided, παρ-ην (not πάρην), he was present, ἀφ-ῖκται (not ἄφικται), he has arrived.

So when the augment falls on a long vowel or a diphthong which is not changed by it; as  $i\pi$ - $\epsilon i\kappa \epsilon$  (imperfect), he was yielding;

but υπ-εικε (imperative), yield!

2. Compounds of δός, ές, θές, and σχές are paroxytone; as

ἀπόδος, παράσχες (not ἄποδος, etc.).

- 3. Monosyllabic second a orist middle imperatives in -ov have recessive accent when compounded with a dissyllabic preposition; as  $\kappa\alpha\tau\dot{\alpha}\cdot\theta\sigma\nu$ , put down,  $\dot{\alpha}\pi\dot{\alpha}\cdot\delta\sigma\nu$ , sell: otherwise they circumflex the ov (131, 1); as  $\dot{\epsilon}\nu$ - $\theta\sigma\dot{\nu}$ , put in.
- 134. N. Participles in their inflection are accented as adjectives (121), not as verbs. Thus, βουλεύων has in the nenter βουλεῦον (not βούλευον); φιλέων, φιλῶν, has φιλέον (not φίλεον), φιλοῦν. (See 335.)
- 135. For the accent of optatives in at and ot, see 113. Some other exceptions to 130 occur, especially in poetic forms.

#### PROCLITICS.

- 136. Some monosyllables have no accent and are closely attached to the following word. These are called proclitics (from προκλίνω, lean forward).
- 137. The proclitics are the articles  $\delta$ ,  $\dot{\eta}$ ,  $\delta i$ , ai; the prepositions  $\dot{\epsilon}is$  ( $\dot{\epsilon}s$ ),  $\dot{\epsilon}\dot{\xi}$  ( $\dot{\epsilon}\kappa$ ),  $\dot{\epsilon}\nu$ ; the conjunctions  $\dot{\epsilon}i$  and  $\dot{\omega}s$  (so  $\dot{\omega}s$  used as a preposition); and the negative  $\dot{\delta}i$  ( $\dot{\delta}i$ ).
- 138. Exceptions. 1. Of takes the acute at the end of a sentence; as  $\pi \hat{\omega} s$   $\gamma \hat{\alpha} \rho$  of; for why not? So when it stands alone as Oi, No.
- 'Ωs and sometimes ¿ξ and ¿is take the acute when (in poetry) they follow their noun; as κακῶν ἔξ. from evils; θέὸς ῶς, as a God.
- 3. 'Ωs is accented also when it means thus; as ως εἶπεν, thus he spoke. This use of ως is chiefly poetic; but καὶ ως, even thus, and οὐδ' ως or μηδ' ως, not even thus, sometimes occur in Attic prose.

For a proclitic before an enclitic, see 143, 4.

139. N. When  $\delta$  is used for the relative  $\delta$ s, it is accented (as in Od. 2, 262); and many editors accent all articles when they are demonstrative, as Il. 1, 9,  $\delta$   $\gamma \lambda \rho$   $\beta \alpha \sigma i \lambda \hat{\gamma} \iota$   $\chi o \lambda \omega \theta \epsilon \iota s$ , and write  $\delta$   $\mu \epsilon \nu$ ...  $\delta$   $\delta \epsilon$ , and  $\delta \iota$   $\mu \epsilon \nu$ ...  $\delta$   $\delta \epsilon$ , even in Attic Greek.

#### ENCLITICS.

- 140. An enclitic ( $i\gamma\kappa\lambda l\nu\omega$ , lean upon) is a word which loses its own accent, and is pronounced as if it were part of the preceding word; as  $\tilde{a}\nu\theta\rho\omega\pi\omega$  (like hóminésque in Latin).
  - 141. The enclitics are: -
- The personal pronouns μοῦ, μοί, μέ; σοῦ, σοί, σέ; οὖ, οἰ, ἔ, and (in poetry) σφίσι.

To these are added the dialectic and poetic forms, μεῦ, σέο, σεῦ, τοί, τύ (accus. for σέ), ἔο, εῦ, ἔθεν, μίν, νίν, σφί, τφίν, σφέ, σφωέ, σφωίν, σφέων, σφέως, σφάς, σφάς, σφέα.

- 2. The indefinite pronoun  $\tau is$ ,  $\tau i$ , in all its forms (except  $\tilde{a}\tau \tau a$ ); also the indefinite adverbs  $\pi o i$ ,  $\pi o \theta i$ ,  $\pi \eta i$ ,  $\pi o i$ ,  $\pi o \theta i v$ ,  $\pi o \tau i$ ,  $\pi \omega i$ ,  $\pi \omega s$ . These must be distinguished from the interrogatives  $\tau i s$ ,  $\pi o i$ ,  $\pi o i \theta i v$ ,  $\pi o i \tau i s$ ,  $\pi \omega i s$ .
- 3. The present indicative of  $\epsilon i\mu i$ , be, and of  $\phi \eta \mu i$ , say, except the forms  $\epsilon i$  and  $\phi j s$ . But epic  $\epsilon \sigma \sigma i$  and Ionic  $\epsilon i s$  are enclitic.

- 4. The particles γέ, τέ, τοί, πέρ: the inseparable -δε in δδε, τούσδε, etc. (not δέ, but); and -θε and -χι in εἴθε and ναίχι (146). So also the poetic νύν (not νῦν), and the epic κέ (κέν), θήν, and ρά.
- 142. The enclitic always loses its accent, except a dissyllabic enclitic after a paroxytone (143, 2). See examples in 143.
- 143. The word before the enclitic always retains its own accent, and it never changes a final acute to the grave (115, 2).
- 1. If this word is proparoxytone or properispomenon, it receives from the enclitic an acute on the last syllable as a second accent. Thus ἄνθρωπός τις, ἄνθρωποί τινες, δεῖξόν μοι, παῖδές τινες, οὖτός ἐστιν.
- 2. If it is paroxytone, it receives no additional accent (to avoid two acutes on successive syllables). Here a dissyllable enclitic keeps its accent (to avoid three successive unaccented syllables). Thus, λόγος τις (not λόγος τις), λόγος τινές (not λόγοι τινές), λόγων τινῶν, οὖτω φησίν (but οὖτός φησιν by 1).
- 3. If its last syllable is accented, it remains unchanged; as τιμαί τε (115, 2), τιμῶν γε, σοφός τις, σοφοί τινες, σοφῶν τινες.
- 4. A proclitic before an enclitic receives an acute; as ε τις, ε φησιν ούτος.
- 144. Enclitics retain their accent whenever special emphasis falls upon them: this occurs
- 1. When they begin a sentence or clause; or when pronouns express antitlesis, as οὐ τᾶρα Τρωσὶν ἀλλὰ σοὶ μαχούμεθα, we shall fight then not wii Trojans but with you, S. Ph. 1253.
- When the preceding syllable is elided; as in πόλλ' ἐστίν (120) for πολλά ε τιν.
- 3. The personal pronouns generally retain their accent after an accented preposition: here  $\dot{\epsilon}\mu o \hat{v}$ ,  $\dot{\epsilon}\mu o i$ , and  $\dot{\epsilon}\mu \dot{\epsilon}$  are used (except in  $\pi \rho o s$   $\mu \epsilon$ ).
- 4. The personal pronouns of the third person are not enclitic when they are direct reflexives (988); σφίσι never in Attic prose.
- 5. Έστί at the beginning of a sentence, and when it signifies existence or possibility, becomes ἔστι; so after οὐκ, μή, εἰ, the adverb ώς, καί, ἀλλ' or ἀλλά, and τοῦτ' or τοῦτο.

- 145. When several enclitics occur in succession, each takes an acute from the following, the last remaining without accent; as at tis ti σοί φησιν, if any one is saying anything to you.
- 146. When an enclitic forms the last part of a compound word, the compound is accented as if the enclitic were a separate word. Thus, οὐτινος, ψ΄τινι, ώντινων, ώσπερ, ώστε, οίδε, τούσδε, εἴτε, σὔτε, μήτε, are only apparent exceptions to 106; 111; 112.

#### DIALECTIC CHANGES.

147. The Ionic dialect is marked by the use of  $\eta$  where the Attic has  $\bar{a}$ ; and the Doric and Aeolic by the use of  $\bar{a}$  where the Attic has  $\eta$ .

Thus, Ionic γενεή for γενεά, ἰήσομαι for ἰάσομαι (from ἰάσμαι, 635); Doric τιμάσω for τιμήσω (from τιμάω): Aeolic and Doric λάθα for λήθη. But an Attic  $\tilde{a}$  caused by contraction (as in τίμα from τίμαε), or an Attic  $\eta$  lengthened from  $\epsilon$  (as in φιλήσω from φιλέω, 635), is never thus changed.

- 148. The Ionic often has ει, ου, for Attic ε, ο; and ηι for Attic ει in nouns and adjectives in ειος, ειον; as ξείνος for ξένος, μοῦνος for μόνος; βασιλήτος for βασίλειος.
- 149. The Ionic does not avoid successive vowels to the same extent as the Attic; and it therefore very often omits contraction (36). It contracts εο and εου into ευ (especially in Herodotus); as ποιεῦμεν, ποιεῦσι (from ποιέομεν, ποιέουσι), for Attic ποιοῦμεν, ποιοῦσι. Herodotus does not use ν movable (56). See also 94 and 785, 1.

### PUNCTUATION MARKS.

- 150. 1. The Greek uses the comma (,) and the period (.) like the English. It has also a colon, a point above the line (·), which is equivalent to the English colon and semicolon; as οὐκ ἔσθ΄ ο΄ γ΄ εἶπον· οὐ γὰρ ωδ΄ ἄφρων ἔφῦν, it is not what I said; for I am not so foolish.
- 2. The mark of interrogation (;) is the same as the Euglish semicolon; as  $\pi \acute{o}\tau \acute{e} \mathring{\eta} \lambda \theta \epsilon \nu$ ; when did he come?

# PART II.

## INFLECTION.

- 151. INFLECTION is a change in the form of a word, made to express its relation to other words. It includes the *declension* of nouns, adjectives, and pronouns, and the *conjugation* of verbs.
- 152. Every inflected word has a fundamental part, which is called the *stem*. To this are appended various letters or syllables, to form cases, tenses, persons, numbers, etc.
- 153. Most words contain a still more primitive element than the stem, which is called the root. Thus, the stem of the verb τῖμάω, honor, is τῖμα-, and that of the noun τῖμή, is τῖμα-, that of τίσις, payment, is τισι-, that of τίμος, held in honor, is τῖμιο-, that of τίμημα (τῖμήματος), valuation, is τῖμηματ-; but all these stems are developed from one root, τι-, which is seen pure in the verb τί-ω, honor. In τίω, therefore, the verb stem and the root are the same.
- 154. The stem itself may be modified and assume various forms in different parts of a noun or verb. Thus the same verb stem may in different tense stems appear as  $\lambda \iota \pi$ ,  $\lambda \iota \pi$ , and  $\lambda \iota \iota \pi$  (see 459). So the same noun stem may appear as  $\tau \iota \mu \tilde{a}$ ,  $\tau \tilde{\iota} \mu \tilde{a}$ , and  $\tau \tilde{\iota} \mu \eta$ . (168).
- 155. There are three numbers; the singular, the dual, and the plural. The singular denotes one object, the plural more than one. The dual is sometimes used to denote two objects, but even here the plural is more common.

- 156. There are three genders; the masculine, the feminine, and the neuter.
- 157. N. The grammatical gender in Greek is very often different from the natural gender. Especially many names of things are masculine or feminine. A Greek noun is called masculine, feminine, or neuter, when it requires an adjective or article to take the form adapted to either of these genders, and the adjective or article is then said to have the gender of the corresponding noun; thus ὁ εὐρὸς ποταμός, the broad river (masc.), ἡ κολὴ οἰκία, the beautiful house (fem.), τοῦτο τὸ πρᾶγμα, this thing (neut.).

The gender of a noun is often indicated by prefixing the article (386); as (δ) ἀνήρ, man; (ή) γυνή, woman; (τὸ) πρᾶγμα, thing.

- 158. Nouns which may be either masculine or feminine are said to be of the common gender: as  $(\delta, \dot{\eta})$   $\theta \epsilon \delta s$ , God or Goddess. Names of animals which include both sexes, but have only one grammatical gender, are called epicene ( $\ell\pi i \kappa \omega \nu \sigma s$ ); as  $\delta \dot{\alpha} \epsilon \tau \delta s$ , the eagle;  $\dot{\eta} \dot{\alpha} \lambda \omega \pi \eta \dot{\delta}$ , the fox; both including males and females.
  - 159. The gender must often be learned by observation. But
- (1) Names of males are generally masculine, and names of females feminine.
- (2) Most names of rivers, winds, and months are masculine; and most names of countries, towns, trees, and islands are feminine.
- (3) Most nouns denoting qualities or conditions are feminine; as ἀρετή, virtue, ἐλπίς, hope.
- (4) Diminutive nouns are neuter; as παιδίον, child; γύναιον, old woman (literally, little woman).

Other rules are given under the declensions (see 168; 189; 281-284).

- 160. There are five cases; the nominative, genitive, dative, accusative, and vocative.
- 161. 1. The nominative and vocative plural are always alike.
- 2. In nenters, the nominative, accusative, and vocative are alike in all numbers; in the plural these end in  $\tilde{a}$ .
- 3. The nominative, accusative, and vocative dual are always alike; and the genitive and dative dual are always alike.
- 162. The cases of nouns have in general the same meaning as the corresponding cases in Latin; as Nom. a man (as subject),

Gen. of a man, Dat. to or for a man, Accus. a man (as object), Voc. O man. The chief functions of the Latin ablative are divided between the Greek genitive and dative. (See 1042.)

163. All the cases except the nominative and vocative are called oblique cases.

#### NOUNS.

- 164. There are three declensions of nouns, in which also all adjectives and participles are included.
- 165. These correspond in general to the first three declensions in Latin. The first is sometimes called the A declension (with stems in  $\bar{a}$ ), and the second the O declension (with stems in o). These two together are sometimes called the Vowel declension, as opposed to the third or Consonant declension (206).

The principles which are common to adjectives, participles, and substantives are given under the three declensions of nouns.

166. N. The name noun ( $\delta_{\nu \nu \mu a}$ ), according to ancient usage, includes both substantives and adjectives. But by modern custom noun is generally used in grammatical language as synonymous with substantive, and it is so used in the present work.

The relations of some of these endings to the terminations actually in use will be explained under the different declensions. The agreement of the two classes in many points is striking.

## FIRST DECLENSION.

- 168. Stems of the first declension end originally in  $\bar{a}$ . This is often modified into  $\eta$  in the singular, and it becomes  $\check{a}$  in the plural. The nominative singular of feminines ends in a or  $\eta$ ; that of masculines ends in  $\check{a}$ s or  $\eta$ s. There are no neuters.
- 169. The following table shows how the final a or  $\eta$  of the stem unites with the case endings (167), when any are added, to form the actual terminations:—

170. N. In the genitive singular of masculines Homeric  $\bar{a}$ o comes from  $\alpha$ -10 (169); but Attic ov probably follows the analogy of ov for oo in the second declension (191). Circumflexed  $\bar{\omega}\nu$  in the genitive plural is contracted from Ionic  $\ell\omega\nu$  (188, 5). The stem in  $\bar{a}$  (or  $\bar{a}$ ) may thus be seen in all cases of old and  $\chi\omega\rho\bar{a}$ , and (with the change of  $\bar{a}$  to  $\eta$  in the singular) also in the other paradigms (except in ov of the genitive). The forms ending in  $\alpha$  and  $\eta$  have no case-endings.

## FEMININES.

171. The nouns  $(\dot{\eta})$   $\chi \dot{\omega} \rho \bar{a}$ , land,  $(\dot{\eta})$   $\tau \bar{\iota} \mu \dot{\eta}$ , honor,  $(\dot{\eta})$   $olki(\dot{a})$ , house,  $(\dot{\eta})$  Movoa, Muse, are thus declined:—

172. The following show varieties of quantity and accent:— θάλασσα, sea, θαλάσσης, θαλάσση, θάλασσαν; Pl. θάλασσαι, θαλασσῶν, θαλάσσωις, θαλάσσῶς.

γέφυρα, bridge, γεφύρας, γεφύρα, γέφυραν; 1% γέφυραι, etc. σκιά, shadow, σκιάς, σκιάς, σκιάν; 1% σκιαί, σκιών, σκιώς, etc. γνώμη, opinion, γνώμης, γνώμη, γνώμην; 1% γνώμαι, γνωμών, etc. πείρα, attempt, πείρας, πείρα, πείραν; 1% πείραι, πειρών, etc.

- 173. The stem generally retains  $\bar{a}$  through the singular after  $\epsilon$ ,  $\iota$ , or  $\rho$ , but changes  $\bar{a}$  to  $\eta$  after other letters. See  $olki(\bar{a}, \chi \omega \rho \bar{a}, and \tau \bar{\iota} \mu \dot{\eta})$  in 171.
- 174. But nouns having  $\sigma$ ,  $\lambda\lambda$ , or a double consonant (18) before final  $\alpha$  of the stem, and some others, have  $\check{\alpha}$  in the nominative, accusative, and vocative singular, and  $\eta$  in the genitive and dative, like  $Mo\hat{\nu}\sigma\alpha$ .

Thus ἄμαξα, wagon; δίψα, thirst; ῥίζα, root; ἄμιλλα, contest; θάλασσα (with later Attic θάλαττα), sea. So μέριμνα, care; δέσποινα, mistress; λέαινα, lioness; τρίαινα, trident; also τόλμα, daring; δίαιτα, living; ἄκανθα, thorn; εὔθῦνα, scrutiny.

- 175. The following have  $\ddot{a}$  in the nominative, accusative, and vocative, and  $\bar{a}$  in the genitive and dative, singular (after  $\epsilon$ ,  $\iota$ , or  $\rho$ ):—
- (a) Most ending in ρα preceded by a diphthong or by  $\tilde{v}$ ; as μοῖρα, γέφῦρα.
- (b) Most abstract nouns formed from adjectives in  $\eta s$  or  $\cos s$ ; as  $d\lambda \dot{\eta}\theta \epsilon \omega$ , truth  $(d\lambda \eta \theta \dot{\eta} s$ , true),  $\epsilon \ddot{v}vo\omega$ , kindness  $(\epsilon \ddot{v}voos, kind)$ . (But the Attic poets sometimes have  $d\lambda \eta \theta \epsilon \dot{u} \ddot{a}$ ,  $\epsilon \dot{v}vo\dot{u} \ddot{a}$ , etc.)
- (c) Nouns in εια and τρια designating females; as βασίλεια, queen, ψάλτρια, female harper (but βασιλεία, kingdom). So μυΐα, fly, gen. μυΐας.

For feminine adjectives in a, see 318.

- 176. (Exceptions.)  $\Delta \epsilon \rho \eta$ , neck, and  $\kappa \delta \rho \eta$ , girl (originally  $\delta \epsilon \rho \epsilon \eta$ ,  $\kappa \delta \rho \epsilon \eta$ ), have  $\eta$  after  $\rho$  (173). E $\rho \sigma \eta$ , dew, and  $\kappa \delta \rho \sigma \eta$  (new Attic  $\kappa \delta \rho \rho \eta$ ), temple, have  $\eta$  after  $\sigma$  (174). Some proper names have  $\bar{a}$  irregularly; as  $\Lambda \dot{\eta} \delta \bar{a}$ , Led $\sigma$ , gen.  $\Lambda \dot{\eta} \delta \bar{a} \varsigma$ . Both  $o\bar{a}$  and  $o\eta$  are allowed; as  $\beta o \dot{\eta}$ ,  $c \gamma g$ ,  $c \gamma g$ ,  $c \gamma g$ .
- 177. N. It will be seen that  $\alpha$  of the nominative singular is always short when the genitive has  $\eta_5$ , and generally long when the genitive has  $\tilde{\alpha}_5$ .
- 178. N.  $A\nu$  of the accusative singular and  $\alpha$  of the vocative singular agree in quantity with  $\alpha$  of the nominative. The quantity of all other vowels of the terminations may be seen from the table in 169.

Most nouns in a have recessive accent (110, 4).

## MASCULINES.

179. The nouns (6)  $\tau a \mu i \bar{a} \varsigma$ , steward, (6)  $\pi o \lambda i \tau \eta \varsigma$ , citizen, and (6)  $\kappa \rho i \tau i \varsigma$ , judge, are thus declined:—

- 180. Thus may be declined νεūνίως, youth, στρατιώτης, soldier, ποιητής, poet.
- 181. The  $\tilde{a}$  of the stem is here retained in the singular after  $\epsilon$ ,  $\epsilon$ , or  $\rho$ ; otherwise it is changed to  $\eta$ : see the paradigms. For irregular or in the genitive singular, see 170.

182. The following nouns in  $\eta_s$  have  $\tilde{\alpha}$  in the vocative singular (like  $\pi o \lambda i \tau \eta_s$ ): those in  $\tau \eta_s$ ; national names, like  $\Pi \epsilon \rho \sigma \eta_s$ , Persian, voc.  $\Pi \epsilon \rho \sigma \tilde{\alpha}$ ; and compounds in  $\eta_s$ , like  $\gamma \epsilon \omega - \mu \epsilon \tau \rho \eta_s$ , geometer, voc.  $\gamma \epsilon \omega \mu \epsilon \tau \rho \tilde{\alpha}$ . Other nouns in  $\eta_s$  of this declension have the vocative in  $\eta$ ; as  $K \rho o \nu i \delta \eta_s$ . son of Cronos,  $K \rho o \nu i \delta \eta_s$ .

# CONTRACTS OF THE FIRST DECLENSION.

- 183. Most nouns in  $\alpha\tilde{a}$ ,  $\epsilon\tilde{a}$ , and  $\epsilon\tilde{a}$ s are contracted (35) in all their cases.
- 184. Μνάα, μνα, mina, συκέα, συκή, fig-tree, and Έρμέας, Έρμης, Hermes, are thus declined:—

- 186. N. Bopéās, North wind, which appears uncontracted in Attic, has also a contracted form Boppās (with irregular  $\rho\rho$ ), gen. Boppā (of Doric form), dat. Boppā, acc. Boppāv, voc. Boppā.
- 187. N. For  $\epsilon_{\alpha}$  contracted to  $\bar{\alpha}$  in the dual and the accusative plural, see 39, 1. For contract adjectives (feminines) of this class, see 310.

## DIALECTS OF THE FIRST DECLENSION.

188. 1. The Ionic has η for ā throughout the singular, even after ε, ι, or ρ; as γενέη, χώρη, ταμίης. But Homer has θεά, God-

- dess. The Doric and Aeolic have  $\bar{a}$  unchanged in the singular. The Ionic generally uses uncontracted forms of contract nouns and adjectives.
- Nom. Sing. Hom. sometimes ă for ης; as ἰππότα for ἰππότης, horseman, sometimes with recessive accent, as μητίετα, counsellor. (Compare Latin poeta = ποιπτής.)
- 3. Gen. Sing. For ou Homer has the original form āo, as 'Ατρείδαο; sometimes ω (for εo) after vowels, as Βορέω (from Βορέας). Hom. and IIdt. have lonic εω (always one syllable in Hom.), as 'Ατρείδεω (114), Τήρεω (gen. of Τήρης); and εω occurs in proper names in older Attic. The Doric has ā for āo, as 'Ατρείδα.
- 4. Acc. Sing. Hdt. sometimes forms an acc. in εα (for ην) from nouns in -ης, as in the third declension, as δεσπότεα (for δεσπότην) from δεσπότης, master (179): so Ξέρξης, acc. Ξέρξεα or Ξέρξην.
- 5. Gen. Pl. Hom. άων, the original form, as κλισιάων, of tents; sometimes ῶν (170). Hom. and Hdt. have lonic έων (one s liable in Hom.), as πυλέων, of gates. Doric ᾶν for άων, also in dramatic chorus.
- 6. Dat. Pl. Poetic aioi (also Aeolie and old Attic form); Ionic you (Hom., Hdt., even oldest Attic), Hom. also ns (rarely ais).
  - 7. Acc. Pl. Lesbian Aeolic aus for as.

#### SECOND DECLENSION.

- 189. Stems of the second declension end in o, which is sometimes modified to  $\omega$ . The nominative singular regularly ends in  $o_s$  or  $o_v$  (gen.  $o_v$ ). Nouns in  $o_s$  are masculine, rarely feminine; those in  $o_v$  are neuter.
- 190. The following table shows how the terminations of nouns in os and or are formed by the final o of the stem (with its modifications) and the case-endings:—

SINGULAR.	DUAL.	PLURAL,
Masc. & Fem. Neuter.	Masc., Fem., & Neuter.	Masc. & Fem. Neuter.

D. φ (for o-ι)	G. D. 0-17	D. o-tot or o-ts
Α. ο-ν		A. ous (for o-vs) &
V o-v	}	V. o-1 &

191. N. In the genitive singular the Homeric  $o \cdot o$  becomes  $o \cdot o$  and then  $o \cdot o$ . In the dative singular and the nominative etc. dual, o becomes  $o \cdot o$ . E takes the place of o in the vocative singular of nouns in  $o \cdot o$ , and  $o \cdot o$  takes the place of o in the nominative etc. of neuters. There being

no genitive plural in own, we is not accented as a contracted syllable  $(\lambda \delta \gamma \omega \nu, \text{ not } \lambda \delta \gamma \hat{\omega} \nu).$ 

192. The nouns (6)  $\lambda \dot{\phi} \gamma \phi s$ , word, (7)  $\nu \dot{\eta} \sigma \phi s$ , island,  $(\dot{o}, \dot{\eta})$   $\ddot{a}\nu\theta\rho\omega\pi\sigma\sigma$ , man or human being,  $(\dot{\eta})$   $\dot{o}\delta\dot{o}\sigma$ , road,  $(\tau \dot{o}) \delta \hat{\omega} \rho o \nu$ , gift, are thus declined:—

- 193. Thus may be declined νόμος, law, κίνδυνος, danger, ποταμός, river, Βίος, life, θάνατος, death, ταθρος, bull, σθκον, fig, τμάτιον, outer garment.
- 194. The chief femining nouns of the second declension are the following: -
- 1. βάσανος, touch-stone, βίβλος, book, γέρανος, crane, γνάθος, jaw, δοκός, beam, δρόσος, dew, κάμινος, oven, κάρδοπος, kneuding-trough, κιβωτός, chest, νόσος, disease, πλίνθος, heick, ράβδος, rod, σορός, coffin, σποδός, ashes, τάφρος, ditch, ψάμμος, sand, ψήφος, pebble; with δδός and κέλευθος, way, αμαξιτός, carriage-road, άτραπός, path.
- 2. Names of countries, towns, trees, and islands, which are regularly feminine (159, 2): so \(\tilde{\eta}\pi\eta\cop\), mainland, and \(\naggregar\), island.
- 195. The nominative in os is sometimes used for the vocative in ε; as ω φίλος. Θεός, God, has always θεύς as vocative.

## ATTIC SECOND DECLENSION.

196. A few masculine and feminine nouns of this declension have stems in  $\omega$ , which appears in all the cases.

is called the Attic declension, though it is not confined to Attic Greek. The noun (δ) νεώς, temple, is thus declined:—

SINGULAR.		L DUA	L.	PLURAL.		
Nom.	νεώς	}		Nom.	νεώ	
Gen.	ν€ώ	N. A. V.	νεώ	Gen.	νεών	
Dat.	νεώ	G. D.	νεών	Dat.	νεψς	
Acc.	νεών	}	•	Acc.	vews	
Voc.	νεώς			Voc.	ν€ψ	

- 197. N. There are no neuter nouns of the Attic declension in good use. But the corresponding adjectives, as ίλεως, propitious, εννεως, fertile, have neuters in ων, as ίλεων, εύγεων. (See 305.)
- 198. N. The accent of these nouns is irregular, and that of the genitive and dative is doubtful. (See 114; 125.)
- 199. N. Some nouns of this class may have  $\omega$  in the accusative singular; as  $\lambda \alpha \gamma \dot{\omega}s$ , accus.  $\lambda \alpha \gamma \dot{\omega}v$  or  $\lambda \alpha \gamma \dot{\omega}v$ . So  $^*A\theta \omega s$ ,  $\tau \dot{c}v$   $^*A\theta \omega v$  or  $^*A\theta \omega$ ;  $K\hat{\omega}s$ ,  $\tau \dot{c}v$   $^*K\hat{\omega}v$  or  $K\hat{\omega}$ ; and  $K\dot{c}\omega s$ ,  $T\dot{c}\omega s$ ,  $M\dot{c}v\omega s$ .  $^*E\omega s$ , dawn, has regularly  $\tau \dot{c}v$   $^*E\omega$ .
- 200. N. Most nouns of the Attic declension have older forms in āos or ηος, from which they are probably derived by exchange of quantity (33); as Hom. λāός, people, Att. λεώς; Dor. νάός, Ion. νηός, Att. νεώς; Hom. Μενέλαος, Att. Μενέλεως. But some come by contraction; as λαγώς, hare, from λαγωός. In words like Μενέλεως, the original accent is retained (114).

# CONTRACT NOUNS OF THE SECOND DECLENSION.

201. 1. From stems in oo and co- are formed contract nouns in oos and cov.

For contract adjectives in eos, ea, eov, and oos, oa, oov, sec 310.

2. Nόος, νοῦς, mind, and δστίον, δστοῦν, bone, are thus declined: —

  - 203. The accent of some of these forms is irregular: -
  - 1. The dual contracts έω and όω into ώ (not ω).
- 2. Compounds in oos accent all forms like the contracted nominative singular; as περίπλους, περίπλους, sailing round, gen. περιπλόου, περίπλου, etc.
  - 3. For  $\epsilon a$  contracted to  $\bar{a}$  in the plural, see 39, 1.

# DIALECTS OF THE SECOND DECLENSION.

  - 2. Gen. and Dat. Dual. Hom. our for our: as ιπποιν.

- 4. Acc. Plur. Doric ως or os for ous; as νόμως, τως λύκος; Lesbian Agolic oc.
  - 5. The Ionic generally omits contraction.

## THIRD DECLENSION.

- 205. This declension includes all nouns not belonging to either the first or the second. Its genitive singular ends in os (sometimes  $\omega_s$ ).
- 206. N. This is often called the Consonant Declension (165), because the stem here generally ends in a consonant. Some stems, however, end in a close vowel (, or v), some in a diphthong, and a few in o or w.
- 207. The stem of a noun of the third declension cannot always be determined by the nominative singular; but it is generally found by dropping of the genitive. The cases are formed by adding the case-endings (167) to the stem.
- 208. 1. For final ws in the genitive singular of nouns in 15, vs, v, evs, and of vavs, ship, see 249; 265; 269.

2. For ā and ās in the accusative singular and plural of nouns in eus, see 265.

3. The contracted accusative plural generally has es for eds Irregularly, to conform to the contracted nominative in ess for ees. (See 313.) So our in the accusative plural of comparatives in iwr (358).

4. The original vs of the accusative plural is seen in lxθûs (for lxθυ-νε) from lxθte (259), and the Ionic πολίε (for πολι-νε) from πόλιε

(255).

# FORMATION OF CASES.

# NOMINATIVE SINGULAR.

- 209. The numerous forms of the nominative singular of this declension must be learned partly by practice. The following are the general principles on which the nominative is formed from the stem.
- 1. Masculine and feminine stems, except those in  $\nu$ ,  $\rho$ ,  $\sigma$ , and ov  $\tau$  (2 and 3), add  $\tau$ , and make the needful euphonic changes. E.g.

Φιλαξ, guard, φύλακ-ος; γύψ, vulture, γῦπ-ός; φλέψ, vein, φλεβ-ός (74); ἐλπίς (for ἐλπίδς), hope, ἐλπίδ-ος; χάρις, grace, χάριτ-ος; ὄρνῖς, bird, ὄρνῖθ-ος; νύξ, night, νυκτ-ός; μάστιξ, scourge, μάστιζ-ος; σάλπιζ, trumpet, σάλπιγγ-ος. So Αἴας, Αjax, Αἴαντ-ος (79); λύσας, λύσαντ-ος; πᾶς, παντ-ός; τιθείς, τιθέντ-ος; χαρίεις, χαρίεντ-ος; δεικνύς, δεικνύντ-ος. (The neuters of the last five words, λύσαν, πᾶν, τιθέν, χαρίεν, and δεικνύν, are given under 4, below.)

2. Masculine and feminine stems in  $\nu$ ,  $\rho$ , and  $\sigma$  merely lengthen the last vowel, if it is short. E.g.

Αἰων, aye, aἰων-ος; δαίμων, divinity, δαίμον-ος; λιμήν, harbor, λιμόν-ος; θήρ, beast, θηρ-ός; ἀήρ, air, ἀέρ-ος; Σωκράτης (Σωκρατεσ-), Socrates.

- Masculine stems in ovr drop τ, and lengthen o to ω. E.g. Λέων, lion, λέοντ-ος; λέγων, speaking, λέγοντ-ος; ών, being, δντ-ος.
- 4. In neuters, the nominative singular is generally the same as the stem. Final  $\tau$  of the stem is dropped (25). E.g.

Σῶμα, body, σώματ-ος; μέλᾶν (neuter of μέλᾶς), black, μέλᾶν-ος; λῦσαν (neuter of λύσᾶς), having loosed, λύσαντ-ος; πᾶν, all, παντ-ός; τιθέν, placing, τιθέντ-ος; χαρίεν, graceful, χαρίεντ-ος; διδόν, giving, διδύντος; λέγον, saying, λέγοντ-ος; δεικνύν, showing, δεικνύντ-ος. (For the maxculine nominatives of these adjectives and participles, see 1, above.)

- 210. (Exceptions to 209, 1-3.) 1. In  $\pi o v_5$ , foot,  $\pi o \delta$ -ós, o  $\delta$ s becomes ovs.  $\Delta \dot{\alpha} \mu a \rho$ , wife,  $\delta \dot{\alpha} \mu a \rho \tau$ -os, does not add s. Change in quantity occurs in  $\dot{\alpha} \lambda \dot{\omega} \pi \eta \xi$ , fox,  $\dot{\alpha} \lambda \dot{\omega} \pi \epsilon \kappa$ -os,  $\kappa \dot{\eta} \rho \nu \xi$ , herald,  $\kappa \dot{\eta} \rho \bar{\nu} \kappa$ -os, and  $\Phi o \dot{\nu} \iota \xi$ ,  $\Phi o \dot{\nu} \iota \kappa$ -os.
- 2. Stems in  $\bar{\imath}\nu$  add  $\varsigma$  and have  $\bar{\imath}\varsigma$  (78, 3) in the nominative; as  $\hat{\rho}$ is, nose,  $\hat{\rho}\bar{\imath}\nu$ -ó $\varsigma$ . These also add  $\varsigma$ :  $\kappa\tau\epsilon(\varsigma, comb, \kappa\tau\epsilon\nu$ -ó $\varsigma$  (78, 3);  $\epsilon$ i $\varsigma$ , one,  $\hat{\epsilon}\nu$ -ó $\varsigma$ ; and the adjectives  $\mu\epsilon\lambda\bar{a}\varsigma$ , black,  $\mu\epsilon\lambda\bar{a}\nu$ -o $\varsigma$ , and  $\tau\dot{a}\lambda\bar{a}\varsigma$ , wretched,  $\tau\dot{a}\lambda\bar{a}\nu$ -o $\varsigma$ .

- 3. 'Οδούς (Ionic δδών), tooth, gen. δδώντ-os, forms its nominative like participles in ous: for these see 212, 1.
- 211. (Exceptions to 209, 4.) Some neuter stems in  $\alpha\tau$  have  $\alpha\rho$  in the nominative; as  $\tilde{\eta}\pi\alpha\rho$ , liver, gen.  $\tilde{\eta}\pi\alpha\tau$ -os (225), as if from a stem in  $\alpha\rho\tau$ . For nouns in  $\alpha\varsigma$  with double stems in  $\alpha\tau$  (or  $\tilde{\alpha}\tau$ -) and  $\alpha\sigma$ -, as  $\kappa\rho\acute{\epsilon}\alpha\varsigma$ ,  $\pi\acute{\epsilon}\rho\alpha\varsigma$  (225), and  $\tau\acute{\epsilon}\rho\alpha\varsigma$ , see 237.  $\Phi\tilde{\omega}\varsigma$  (for  $\phi\acute{\alpha}o\varsigma$ ), light, has gen.  $\phi\omega\tau$ - $\acute{o}\varsigma$ ; but Homer has  $\phi\acute{\alpha}o\varsigma$  (stem  $\phi\alpha\epsilon\sigma$ -). For  $\pi\hat{\nu}\rho$ , fire, gen.  $\pi\hat{\nu}\rho$ - $\acute{o}\varsigma$ , see 291.
- 212. (Participles.) 1. Masculine participles from verbs in ωμι add s to οντ- and have nominatives in ους (79); as διδούς, giving, διδόντ-ος. Neuters in οντ- are regular (209, 4).

Other participles from stems in ovr- have nominatives in  $\omega \nu$ , like nouns (209, 3).

- 2. The perfect active participle, with stem in στ-, forms its nominative in ως (masc.) and σς (neut.); as λελυκώς, having loosed, neut. λελυκός, gen. λελυκότ-ος. (See 335.)
- **213.** N. For nominatives in  $\eta_S$  and  $o_S$ , gen.  $\epsilon o_S$ , from stems in  $\epsilon \sigma$ -, see 227. For peculiar formations from stems in o (nom.  $\omega$ ), see 242.

# ACCUSATIVE SINGULAR.

- 214. 1. Most masculines and feminines with consonant stems add a to the stem in the accusative singular; as φύλαξ (φυλακ-), φύλακα; λέων (λεοντ-), lion, λέοντα.
- 2. Those with vowel stems add  $\nu$ ; as  $\pi \acute{o}\lambda \iota s$ , state,  $\pi \acute{o}\lambda \iota \nu$ ;  $i\chi \theta \acute{v}s$ , fish,  $i\chi \theta \acute{v}v$ ;  $va \mathring{v}s$ , ship,  $va \mathring{v}v$ ;  $go \mathring{v}s$ ,  $go \mathring{v}s$ .
- 3. Barytones in  $\iota_s$  and  $\upsilon_s$  with lingual  $(\tau, \delta, \theta)$  stems generally drop the lingual and add  $\nu$ ; as  $\check{\epsilon}\rho\iota_s$  ( $\check{\epsilon}\rho\iota\delta$ -), strife,  $\check{\epsilon}\rho\iota\nu$ ;  $\chi\acute{a}\rho\iota_s$  ( $\chi a\rho\iota\tau$ -),  $\chi a\rho\iota_s$ ,  $\chi a\rho\iota_s$ ,  $\chi a\rho\iota_s$ ),  $\chi a\rho\iota_s$ ,  $\chi a\rho\iota_s$ 
  - 215. Ν. κλείς (κλειδ.), key, has κλείν (rarely κλείδα).
- 216. N. Homer, Herodotus, and the Attic poets make accusatives in a of the nouns of 214, 3; as ἔριδα (Hom.) χάριτα (Hdt.), ὄρνῖθα (Aristoph.).
- **217.** N. ' $A\pi \acute{o}\lambda\lambda\omega\nu$  and  $\Pi o\sigma\epsilon\iota\delta \acute{\omega}\nu$  ( $\Pi o\sigma\epsilon\iota\delta \acute{a}\omega\nu$ ) have accusatives ' $A\pi \acute{o}\lambda\lambda\omega$  and  $\Pi o\sigma\epsilon\iota\delta \acute{\omega}$ , besides the forms in  $\omega\nu\alpha$ .

For  $\omega$  in the accusative of comparatives in  $\bar{\iota}\omega\nu$ , see 359.

**218.** N. For accusatives in  $\epsilon a$  from nominatives in  $\eta s$ , in  $\epsilon \bar{a}$  from those in  $\epsilon u s$ , and in  $\omega$  (for  $\omega a$  or  $\epsilon a$ ) from those in  $\omega s$  or  $\omega$ , see 228; 265; 243.

## VOCATIVE SINGULAR.

- 219. The vocative singular of masculines and feminines is sometimes the same as the nominative, and sometimes the same as the stem.
  - 220. It is the same as the nominative
- 1. In nouns with mute stems; as nom. and voc. φύλαξ (φυλακ-), watchman. (See the paradigms in 225.)
- 2. In oxytones with liquid stems; as nom. and voc. ποιμήν (ποιμεν-), shepherd, λιμήν (λιμεν-), harbor.

But barytones have the vocative like the stem; as δαίμων (δαιμον), voc. δαίμον. (See the paradigms in 225.)

- 221. (Exceptions.) 1. Those with stems in  $\iota\delta$ -, and harytones with stems in  $\nu\tau$  (except participles), have the vocative like the stem; as  $\ell\lambda\pi/s$  ( $\ell\lambda\pi/\delta$ -), hape, voc.  $\ell\lambda\pi/s$  (cf. 25): see  $\lambda/s$  and  $\gamma/s$ , declined in 225. So A/s (Alart-), Ajax, voc. A/s (Hom.), but A/s in Attic.
- 2. Σωτήρ (σωτηρ-), preserver, 'Απόλλων ('Απολλων-), and Ποσειδών (Ποσειδών- for Ποσειδάον-) shorten  $\eta$  and  $\omega$  in the vocative. Thus voc. σώτερ, "Απολλον, Πόσειδον (Hom. Ποσείδάον). For the recessive accent here and in similar forms, see 122 (d).
- 222. All others have the vocative the same as the stem. See the paradigms.
- **223.** There are a few vocatives in of from nouns in  $\omega$  and  $\omega \nu$ , gen. ovs: see 245; 248.

For the vocative of syncopated nouns, sec 273.

# DATIVE PLURAL.

**224.** The dative plural is formed by adding  $\sigma_i$  to the stem, with the needful cuphonic changes. E.g.

Φύλαξ (φυλακ-), φύλαξι; βήτωρ (βητορ-), βήτορσι; ἐλπίς (ἐλπίδ-), ἐλπίσι (74); ποῦς (ποδ-), ποσί; λέων (λεοντ-), λέουσι (79); δαίμων (δαιμον-), δαίμοσι (80); πιθείς (πιθεντ-), πιθείσι; χαρίεις (χαριεντ-), χαρίεσι (74); ἰστᾶς (ἰσταντ-), ἰστᾶσι; δεικνύς (δεικνυντ-), δεικνῦσι; βασιλεύς (βαπιλευ-), βασιλεῦσι; βοῦς (βου-), βουσί; γραῦς (γραῦ-), γραυσί. For a change in syncopated nouns, see 273.

# NOUNS WITH MUTE OR LIQUID STEMS.

225. The following are examples of the most common forms of nouns of the third declension with mute or liquid stems.

For the formation of the cases, see 209-224. For euphonic changes in nearly all, see 74 and 79. For special changes in  $\theta\rho$  $\xi$ , see 95, 5.

# STEMS ENDING IN $\Sigma$ .

- **226.** The final  $\sigma$  of the stem appears only where there is no case-ending, as in the nominative singular, being elsewhere dropped. (See 88, 1.) Two vowels brought together by this omission of  $\sigma$  are generally contracted.
- **227.** The proper substantive stems in  $\epsilon \sigma$  are chiefly neuters, which change  $\epsilon \sigma$  to  $\epsilon \sigma$  in the nominative singular. Some masculine proper names change  $\epsilon \sigma$  regularly to  $\epsilon \sigma$  (209, 2). Stems in  $\epsilon \sigma$  form nominatives in  $\epsilon \sigma$ , all neuters (228).
- **228.** Σωκράτης (Σωκρατέσ-), Socrates, (τὸ) γένος (γενέσ-), race, and (τὸ) γέρας (γερασ-), prize, are thus declined:

- 229. In the genitive plural εων is sometimes uncontracted, even in prose; as τειχέων from τείχος. For εεα contracted εᾶ, see 39, 2.
- 230. Proper names in ης, gen. εος, besides the accusative in η, have a form in ην of the first declension; as Σωκράτην, Δημοσθένην, Πολυνείκην.

For the recessive accent in the vocative of these nouns, see 122.

231. Proper names in κλέης, compounds of κλέος, glory, are doubly contracted in the dative, sometimes in the accusative. Περικλέης, Περικλής, Pericles, is thus declined:—

Nom. (Περικλέης) Περικλής Gen. (Περικλέους) Περικλέους Dat. (Περικλέεϊ) (Περικλέει) Περικλεί Acc. (Περικλέεα) Περικλέα (poet. Περικλή) Voc. (Περικλέες) Περίκλεις

- 232. N. In proper names in κλεης, Homer has η̂ος, η̂ι, η̂α, Herodotus έος (for έεος), έι, έα. In adjectives in εης Homer sometimes contracts εε to ει: as, εὐκλέης, acc. plur. εὐκλέιας for εὐκλέεας.
- 233. Adjective stems in  $\epsilon\sigma$  change  $\epsilon\sigma$  to  $\eta s$  in the masculine and feminine of the nominative singular, but leave  $\epsilon s$  in the neuter. For the declension of these, see 312.
- **234.** The adjective  $\tau \rho_1 \dot{\eta} \rho \eta_5$ , triply fitted, is used as a feminine noun,  $(\dot{\eta})$   $\tau \rho_1 \dot{\eta} \rho \eta_5$  (sc.  $\nu a \hat{\nu}_5$ ), trireme, and is thus declined:—

235. N. Τριήρης has recessive accent in the genitive dual and plural: for this in other adjectives in ης, see 122.

For the accusative plural in ets, see 208, 3.

- **236.** N. Some poetic nominatives in  $\alpha_s$  have  $\epsilon$  for  $\alpha$  in the other cases; as obtas, ground, gen. obtas, dat. obtai, obtai (Homer). So  $\beta \rho \epsilon \tau \alpha_s$ , image, gen.  $\beta \rho \epsilon \tau \epsilon \alpha_s$ , plur.  $\beta \rho \epsilon \tau \tau \delta \alpha_s$ , in Attic poetry.
- 237. 1. Some nouns in as have two stems, one in at- or at-with gen. atos (like  $\pi \epsilon \rho as$ , 225), and another in ac- with gen.

 $a(\sigma)$ os, aos, contracted  $\omega$ s (like yépas, 228). Thus κέρας (κερατ-, κερασ-), horn, is doubly declined.

- **239.** Alòώs has the declension of nouns in  $\omega$  (242), but the accusative in  $\hat{\omega}$  has the regular accent. (See also 359.)
- **240.** The Ionic ( $\hat{\eta}$ )  $\hat{\eta}\hat{\omega}_{S}$ , dawn, has stem  $\hat{\eta}o\sigma_{\gamma}$ , and is declined like  $a\hat{i}\delta\hat{\omega}_{S}$ :—gen.  $\hat{\eta}o\hat{i}_{S}$ , dat.  $\hat{\eta}o\hat{i}_{S}$ , acc.  $\hat{\eta}\hat{\omega}_{S}$ . The Attic  $\hat{\epsilon}\omega_{S}$  is declined like  $\nu\epsilon\hat{\omega}_{S}$  (196): but see 199.

# STEMS IN $\Omega$ OR O.

- 241. A few stems in  $\omega$  form masculine nouns in  $\omega$ s, gen.  $\omega$ -os, which are often contracted in the dative and accusative singular and in the nominative and accusative plural.
- **242.** A few in o-form feminines in  $\omega$ , gen. oûs (for o-os), which are always contracted in the genitive, dative, and accusative singular. The original form of the stems of these nouns is uncertain. (See 239.)
- 243. The nouns (i)  $\tilde{\eta}\rho\omega_{S}$ , hero, and (ii)  $\pi\omega\theta\dot{\omega}$ , persuasion, are thus declined:—

- **244.** These nouns in  $\omega_S$  sometimes have forms of the Attic second declension; as gen.  $\tilde{\eta}\rho\omega$  (like  $\nu\epsilon\dot{\omega}$ ), accus.  $\tilde{\eta}\rho\omega\nu$ . Like  $\tilde{\eta}\rho\omega_S$  are declined  $T\rho\dot{\omega}_S$ , Trojan (128), and  $\mu\dot{\eta}\tau\rho\omega_S$ , mother's brother.
- **245.** N. The feminines in  $\omega$  are chiefly proper names. Like  $\pi \epsilon \iota \theta \dot{\omega}$  may be declined  $\Sigma \alpha \pi \phi \dot{\omega}$  (Aeolic  $\Psi \dot{\alpha} \pi \phi \omega$ ), Sappho, gen.  $\Sigma \alpha \pi \phi o \hat{\nu}$ s, dat.  $\Sigma \alpha \pi \phi o \hat{\iota}$ , acc.  $\Sigma \alpha \pi \phi \dot{\omega}$ , voc.  $\Sigma \alpha \pi \phi o \hat{\iota}$ . So  $\Lambda \eta \tau \dot{\omega}$ ,  $Ka\lambda \upsilon \psi \dot{\omega}$ , and  $\dot{\eta} \chi \dot{\omega}$ , echo. No dual or plural forms of these nouns are found in the third declension; but a few occur of the second, as acc. plur.  $\gamma o \rho \gamma o \dot{\nu}$  from  $\gamma o \rho \gamma \dot{\omega}$ , Gorgon. No uncontracted forms of nouns in  $\dot{\omega}$  occur.
- 246. N. The vocative in of seems to belong to a form of the stem in o.; and there was a nominative form in φ, as Λητφ, Σαπφώ.
- 247. N. Herodotus has an accusative singular in οῦν; as Ἰοῦν (for Ἰώ) from Ἰώ, Io, gen. Ἰοῦς.
- 248. A few feminines in ων (with regular stems in ον-) have occasional forms like those of nouns in ω; as ἀηδών, nightingale, gen. ἀηδοῦς, νος. ἀηδοῦς εἰκών, image, gen. εἰκοῦς, acc. εἰκώ; χελίδων, swallow, νος. χελίδοῦ.

# STEMS IN I AND Y.

- **249.** Most stems in  $\iota$  (with nominatives in  $\iota$ s) and a few in  $\upsilon$  (with nominatives in  $\upsilon$ s and  $\upsilon$ ) have  $\iota$  in place of their final  $\iota$  or  $\upsilon$  in all cases except the nominative, accusative, and vocative singular, and have  $\omega$ s for  $\omega$ s in the genitive singular. The dative singular and the nominative plural are contracted.
- **250.** The nouns  $(\hat{\eta})$   $\pi \delta \lambda \iota s$   $(\pi \delta \lambda \iota s)$ , state,  $(\hat{\delta})$   $\pi \hat{\eta} \chi \upsilon s$   $(\pi \eta \chi \upsilon s)$ , cubit, and  $(\tau \hat{\delta})$   $\tilde{\delta} \sigma \tau \upsilon$   $(\tilde{\delta} \sigma \tau \upsilon s)$ , city, are thus declined:—

  - 252. N. The dual in ee is rarely left uncontracted.
- 253. N. "Αστυ is the principal noun in υ, gen. εως. Its genitive plural is found only in the poetic form ἀστέων, but analogy leads to Attic ἄστεων.
- **254.** No nouns in  $\iota$ , gen.  $\epsilon \omega s$ , were in common Attic use. See  $\kappa \delta \mu \mu \iota$  and  $\pi \epsilon \pi \epsilon \rho \iota$  in the Lexicon.
- 255. N. The original  $\iota$  of the stem of nouns in  $\iota$ s (Attic gen.  $\epsilon \omega s$ ) is retained in Ionic. Thus,  $\pi \delta \lambda \iota s$ ,  $\pi \delta \lambda \iota s$ ,  $(\pi \delta \lambda \iota \iota)$ ,  $\pi \delta \lambda \iota s$ ,  $(\pi \delta \lambda \iota \iota)$ ; plur.  $\pi \delta \lambda \iota \epsilon s$ ,  $\pi \delta \lambda \iota \omega s$ ; Ilom.  $\pi \delta \lambda \iota \epsilon s$  (Idt.  $\pi \delta \lambda \iota \omega s$ ),  $\pi \delta \lambda \iota a s$  (Idt. also  $\pi \delta \lambda \iota s$ ) for  $\pi \delta \lambda \iota \omega s$ , see 208, 4). Homer has also  $\pi \delta \lambda \iota \epsilon$  (with  $\pi \tau \delta \lambda \epsilon \iota$ ) and  $\pi \delta \lambda \iota \epsilon \iota$  in the dative. There are also epic forms  $\pi \delta \lambda \eta \iota s$ ,  $\pi \delta \lambda \eta \iota s$ ,  $\pi \delta \lambda \eta \iota s$ . The Attic poets have a genitive in  $\epsilon \iota s$ .

The louic has a genitive in eos in nouns in us of this class.

- **256.** N. Stems in v with gen.  $\epsilon \omega_s$  have also forms in  $\epsilon v$ , in which  $\epsilon v$  becomes  $\epsilon_F$ , and drops  $\epsilon$ , leaving  $\epsilon$ : thus  $\pi \eta \chi v$ ,  $\pi \eta \chi \epsilon v$ ,  $\pi \eta \chi \epsilon_F$ ,  $\pi \eta \chi \epsilon$ . (See 90, 3.)
- 257. Most nouns in  $v_{\bar{s}}$  retain  $v_{\bar{s}}$  as (i)  $i\chi\theta\dot{v}_{\bar{s}}$  ( $i\chi\theta v_{\bar{s}}$ ), fish, which is thus declined:—

- **259.** N. Homer and Herodotus have both  $i\chi\theta\dot{\omega}$ s and  $i\chi\theta\dot{\omega}$ s in the accusative plural.  $i\chi\theta\dot{\omega}$ s here is for  $i\chi\theta\dot{\omega}$ vs (208, 4).
- **260.** Oxytones and monosyllables have  $\vec{v}$  in the nominative, accusative, and vocative singular: see  $i\chi\theta\dot{v}s$ . Monosyllables are circumflexed in these cases; as  $\mu\dot{v}s$  ( $\mu v$ -), mouse,  $\mu\dot{v}\dot{o}s$ ,  $\mu\dot{v}\dot{u}$ ,  $\mu\dot{v}v$ ,  $\mu\dot{v}$ ; plur.  $\mu\dot{v}s$ ,  $\mu\dot{v}\dot{w}v$ ,  $\mu\dot{v}\dot{o}s$ ,

# STEMS ENDING IN A DIPHTHONG.

- **264.** Homer has  $\epsilon_{v}$  in three cases,  $\beta_{u}\sigma_{l}\lambda\epsilon\dot{v}_{s}$ ,  $\beta_{u}\sigma_{l}\lambda\epsilon\dot{v}_{s}$ , and  $\beta_{u}\sigma_{l}\lambda\epsilon\dot{v}\sigma_{l}$ ; but in the other cases  $\beta_{u}\sigma_{l}\lambda\dot{\eta}_{o}s$ ,  $\beta_{u}\sigma_{l}\lambda\dot{\eta}_{u}$ ,  $\beta_{u}\sigma_{l}\lambda\dot{\eta}_{e}s$ ,  $\beta_{u}\sigma_{l}\lambda\dot{\eta}_{u}s$ , also dat. plur.  $\delta_{p}\sigma_{l}\sigma_{l}\sigma_{l}s$  (from  $\delta_{p}\sigma_{l}\sigma_{l}s$ ); in proper names he has  $\epsilon_{o}s$ ,  $\epsilon_{l}$ , etc., as  $\Pi_{\eta}\lambda\dot{\epsilon}o_{s}s$ ,  $\Pi_{\eta}\lambda\dot{\epsilon}o_{l}s$  (rarely contracted, as  $\Lambda_{\chi}\lambda\lambda\lambda\epsilon\hat{l}s$ ). Herodotus has gen.  $\epsilon_{o}s$ .
- **265.** Nouns in  $\epsilon v_s$  originally had stems in  $\eta v_s$  before vowels  $\eta \epsilon$ . From forms in  $\eta \epsilon v_s$ ,  $\eta \epsilon v_s$ ,  $\eta \epsilon v_s$ , etc., came the Homeric  $\eta v_s$ ,  $\eta v_s$ , etc. The Attic  $\epsilon w_s$ ,  $\epsilon \tilde{a}$ ,  $\epsilon \tilde{a}_s$  came, by exchange of quantity (33), from  $\eta v_s$ ,  $\eta \tilde{a}_s$ .
- **266.** The older Attic writers (as Thucydides) with Plato have  $\hat{\eta}_s$  (contracted from  $\hat{\eta}_{\epsilon s}$ ) in the nominative plural; as  $i\pi\pi\hat{\eta}_s$ ,  $\beta a\sigma\iota\lambda\hat{\eta}_s$ , for later  $i\pi\pi\epsilon\hat{\iota}_s$ .  $\beta a\sigma\iota\lambda\hat{\epsilon}_s$ . In the accusative plural,  $\epsilon\hat{\iota}_s$  usually remains unchanged, but there is a late form in  $\epsilon \iota_s$ .

- 267. When a vowel precedes, έως of the genitive singular may be contracted into ως, and έα of the accusative singular into α; rarely έας of the accusative plural into ας, and έων of the genitive plural into ων. Thus, Πειραιεύς, Peiraeus, has gen. Πειραιέως, Πειραιώς, dat. Πειραιέϊ, Πειραιέζ, αcc. Πειραιέα, Πειραιά; Δωριεύς, Dorian, has gen. plur. Δωριέων, Δωριών, acc. Δωριέας, Δωριάς.
- **268.** The nouns  $(\delta, \dot{\eta})$   $\beta o \hat{v}_s$   $(\beta o v)$ , ox or cow,  $(\dot{\eta})$   $\gamma \rho a \hat{v}_s$   $(\gamma \rho a v)$ , old woman,  $(\dot{\eta})$   $v a \hat{v}_s$  (v a v), ship, and of (o i), sheep, are thus declined:—

**269.** N. The stems of  $\beta o \hat{v}_s$ ,  $\gamma \rho a \hat{v}_s$ , and  $\nu a \hat{v}_s$  became  $\beta o f_s$ ,  $\gamma \rho \bar{a}_f$ , and  $\nu \bar{a}_f$ - before a vowel of the ending (compare Latin  $b \hat{v}_s v_s$ ). The stem of  $\delta t$ , the only stem in  $\delta t_s$ , was  $\delta f_s v_s$  (compare Latin  $\delta v_s$ ). Afterwards  $f_s$  was dropped (90, 3), leaving  $f_s o_s$ ,  $\gamma \rho \bar{a}_s$ ,  $\nu \bar{a}_s$ , and  $\delta t_s$ . Attice  $\rho v_s v_s$  is for  $\nu \eta \delta s$  (33).

270. In Doric and Ionic rais is much more regular than in Attic:-

**271.** Homer has  $\gamma \rho \eta \hat{v}_{s}$  ( $\gamma \rho \eta v_{s}$ ) and  $\gamma \rho \eta \hat{v}_{s}$  ( $\gamma \rho \eta \hat{v}_{s}$ ) for  $\gamma \rho \alpha \hat{v}_{s}$ . He has  $\beta \delta \alpha s$  and  $\beta \delta \hat{v}_{s}$  in the accusative plural of  $\beta \delta \hat{v}_{s}$ .

272. Xoûs, three-quart measure, is declined like  $\beta$ oûs, except in the accusatives  $\chi$   $\delta$ a and  $\chi$   $\delta$ as. (See  $\chi$ 00s in 291.)

## SYNCOPATED NOUNS.

- 273. Four nouns in  $\eta\rho$  (with stems in  $\epsilon\rho$ -) are syncopated (65) in the genitive and dative singular by dropping  $\epsilon$ . The syncopated genitive and dative are oxytone; and the vocative singular has recessive accent (122), and ends in  $\epsilon\rho$  as a barytone (220, 2). In the other cases  $\epsilon$  is retained and is always accented. But in the dative plural  $\epsilon\rho$ -is changed to  $\rho\alpha$ -.
- **274.** These are (δ) πατήρ (πατερ-), father, (ή) μήτηρ (μητερ-), mother, (ή) θυγάτηρ (θυγατερ-), daughter, and (ή) γαστήρ (γαστερ-) belly.
  - 1. The first three are thus declined: -

- 2. Γαστήρ is declined and accented like πατήρ.
- 275. 'Αστήρ (δ), star, has ἀστράσι, like a syncopated noun, in the dative plural, but is otherwise regular (without syncope).
- 276. N. The unsyncopated forms of all these nouns are often used by the poets, who also syncopate other cases of θυγάτηρ; as θύγατρα, θύγατρες, θυγατρῶν. Homer has dat. plur. θυγατέρεσσι, and πατρῶν for πατέρων.
- 277. 1. 'Aνήρ (δ), man, drops  $\epsilon$  whenever a vowel follows  $\epsilon \rho$ , and inserts  $\delta$  in its place (67). It has  $\delta \nu \delta \rho o \hat{\nu} \nu$  and  $\delta \nu \delta \rho o \hat{\nu} \nu$ . In other respects it follows the declension of  $\pi a \tau \eta \rho$ .
- 2. Δημήτηρ, Demeter (Ceres), syncopates all the oblique cases, and then accents them on the first syllable.

# 278. 'Aνήρ and $\Delta \eta \mu \dot{\eta} \tau \eta \rho$ are thus declined:—

**279.** The poets often use the unsyncopated forms. Homer has ἄνδρεσσι as well as ἀνδράσι in the dative plural.

# GENDER OF THE THIRD DECLENSION.

- 280. The gender in this declension must often be learned by observation. But some general rules may be given.
  - 281. 1. MASCULINE are stems in

ευ-; as βασιλεύς (βασιλευ-), king.

ρ- (except those in ἄρ-); as κρᾶτήρ (κρατηρ-), mixing-bowl, ψάρ (ψᾶρ-), starling.

ν- (except those in īν-, γον-, δον-); as κανών (κανον-), rule.

ντ-; as όδούς (όδοντ-), tooth.

 $\eta\tau$ - (except those in  $\tau\eta\tau$ -); as  $\lambda\epsilon\beta\eta$ s ( $\lambda\epsilon\beta\eta\tau$ -), kettle.

ωτ-; as έρως (έρωτ-), love.

2. Exceptions. Feminine are γαστήρ, belly, κήρ, fate, χείρ, hand, φρήν, mind, ἀλκύων, halcyon, εἰκών, image, ἡιών, shore, χθών, earth, χιών, snow, μήκων, ρορρη, ἐσθής (ἐσθητ-), dress.

Neuter are πῦρ, fire, φῶς (φωτ-), light.

282. 1. FEMININE are stems in

 $\iota$  and  $\upsilon$ -, with nomin. in  $\iota$ s and  $\upsilon$ s; as  $\pi$ ó $\lambda$ is ( $\pi$ o $\lambda$ i-), city,  $l\sigma\chi\dot{\upsilon}$ s ( $l\sigma\chi\upsilon$ -), strength.

av-; as vavs (vav-).

 $\delta$ ,  $\theta$ ,  $\tau \eta \tau$ -; as  $\epsilon \rho i \epsilon$  ( $\epsilon \rho i \delta$ ), strife,  $\tau \alpha \chi \nu \tau \eta \epsilon$  ( $\tau \alpha \chi \nu \tau \eta \tau$ -), speed.

τν-, γον·, δον-; as ἀκτίς (ἀκτίν-), ray, σταγών (σταγον-), drop, χελίδων (χελίδον-), swallow.

Exceptions. Masculine are ἔχι-ς, viper, ὄφι-ς, serpent, βότρυ-ς, cluster of grapes, θρῆνυ-ς, footstool, ἰχθύ-ς, fish, μῦ-ς, mouse, νέκυ-ς,

corpse, στάχυ-ς, ear of grain, πέλεκυ-ς, axe, πῆχυ-ς, cubit, πούς  $(\pi \circ \delta)$ , fool, δελφίς  $(\delta \epsilon \lambda \phi i v - )$ , dolphin.

283. NEUTER are stems in

 $\epsilon$  and v with nomin. in  $\epsilon$  and v; as  $\pi \epsilon \pi \epsilon \rho \epsilon$ , pepper,  $\delta \sigma \tau v$ , city.

as-; as γέρας, prize (see 227).

es-, with nomin. in os; as yévos (yeveo-), race (see 227).

ăρ; 88 γέκταρ, nectur.

ατ-; as σωμα (σωματ-), body.

284. Labial and palatal stems are always either masculine or feminine. (See 225.)

285. Variations in gender sometimes occur in poetry: see, for example,  $ai\theta\eta\rho$ , sky, and  $\theta$ is, heap, in the Lexicon. See also 288.

## DIALECTS.

- 286. 1. Gen. and Dat. Dual. Homeric our for our.
- 2. Dat. Plur. Homeric εσσι, rarely εσι, and σσι (after vowels); also σι.
- 3. Most of the uncontracted forms enclosed in () in the paradigms, which are not used in Attic prose, are found in Homer or Herodotus; and some of them occur in the Attic poets.
- 4. For special dialectic forms of some nouns of the third declension, see 232, 236, 237, 240, 247, 255, 259, 264, 270, 271, 276, 279.

## IRREGULAR NOUNS.

287. 1. Some nouns belong to more than one declension. Thus σκότος, darkness, is usually declined like λόγος (192), but sometimes like γίνος (228). So Οιδίπους, Oedipus, has genitive Οιδίποδος or Οιδίπου, dative Οιδίποδο, accusative Οιδίποδο or Οιδίπουν.

See also yéhws, ¿pws, ¿δρώs, and others, in 291.

- 2. For the double accusatives in  $\eta$  and  $\eta\nu$  of  $\Sigma \omega\kappa\rho\acute{a}\tau\eta s$ ,  $\Delta\eta\mu o\sigma\theta\acute{\epsilon}\eta\eta s$ , etc., see 230.
- 288. Nouns which are of different genders in different numbers are called heterogeneous; as (δ) σίτος, corn, plur. (τὰ) σίτα, (δ) δεσμός, chain, (οί) δεσμοί and (τὰ) δεσμά.
- **289.** Defective nouns have only certain cases; as  $\delta \nu a \rho$ , dream,  $\delta \phi \epsilon \lambda o s$ , use (only nom. and accus.);  $(\tau \dot{\eta} \nu) \nu \dot{\iota} \phi a$ , snow (only accus.). Some, generally from their meaning, have only one number; as  $\pi \epsilon \iota \theta \dot{\omega}$ , persuasion,  $\tau \dot{a}$  O $\lambda \dot{\iota} \mu \pi \omega$ , the Olympic games.

- 290. Indeclinable nouns have one form for all cases. These are chiefly foreign words, as 'Aδάμ, Ίσραήλ; and names of letters, "Alda, Bnra, etc.
- 291. The following are the most important irregular nouns: --
- 1. "Aidns, Hades, gen. ov, etc., regular. Hom. Atons, gen. ao or εω, dat. η, acc. ην; also "Aϊδος, "Αϊδι (from stem 'Aϊδ-).

2. ἄναξ (ὁ), king, ἄνακτος, etc., νος. ἄναξ (poet. ἄνα, in addressing

Gods).

3. "Aprs, Ares, "Apews (poet. "Apeos), ("Apei) "Apei, ("Apea) "Apr or "Aρην, "Aρες (Hom. also Aρες). Hom. also "Aρηος, "Αρηι, "Αρηα.

4. Stem (άρν-), gen. (τοῦ οι τῆς) άρνός, lamb, ἀρνί, ἄρνα; pl. ἄρνες, άρνων, ἀρνάσι, ἄρνας. In the nom. sing. ἀμνός (2d decl.) is used.

5. γάλα (τό), milk, γάλακτος, γάλακτι, etc.

6. γέλως (δ), laughter, γέλωτος, etc., regular: in Attic poets acc. γέλωτα or γέλων. In Hom. generally of second declension, dat. γέλω, acc. γέλω, γέλων (γέλον?). (See 287, 1.) •

7. γόνυ (τό), knee, γύνατος, γόνατι, etc. (from stem γύνατ-); Ion. and poet. γούνατος, γούνατι, etc.; Hom. also gen. γουνός, dat. γουνί, pl. γοῦνα, γούνων, γούνεσσι.

8. γυνή (ή) wife, γυναικός, γυναικί, γυναικα, γύναι; dual γυναικε,

γυναικοίν; pl. γυναίκες, γυναικών, γυναιξί, γυναίκας.

9. δένδρον (τό), tree, δένδρου, regular (Ion. δένδρεον); dat. sing. δένδρει; dat. pl. δένδρεσι.

10. δέος (τό), fear, δέους, δέει, etc. Hom. gen. δείους.

11. δόρυ (τό), spear (cf. γόνυ); (from stem δορατ-) δόρατος, δόρατι; pl. δόρατα, etc. Ion. and poet. δούρατος, etc.; Epic also gen. δουρός, dat. δουρί; dual δοῦρε; pl. δοῦρα, δούρων, δούρεσσι. Poetic gen. δορός, dat. δορί and δόρει.

12. έρως (ό), love, έρωτος, etc. In poetry also έρος, έρω, έρον.

13. Zεύς (Aeol. Δεύς), Zeus, Διός, Διί, Δία, Ζεῦ. Ion. and poet.

 $Z\eta\nu\delta\varsigma$ ,  $Z\eta\nu\dot{\iota}$ ,  $Z\eta\nu\alpha$ . Pindar has  $\Delta\dot{\iota}$  for  $\Delta\iota\dot{\iota}$ .

14. Θέμις (ή), justice (also as proper name, Themis), gen. Θέμιδος, etc., reg. like έρις. Hom. θέμιστος, etc. Pind. θέμιτος, etc. Hdt. gen. θέμιος. In Attic prose, indeclinable in θέμις ἐστί, fas est; as θέμις είναι.

15. ίδρώς (δ), sweat, ίδρῶτος, etc. Hom. has dat. ίδρῷ, acc. ίδρῶ (243).

16. κάριι (τό), head, poetic; in Attic only nom., accus., and voc. sing., with dat. κάρα (tragic). Hom. κάρη, gen. κάρητος, καρήστος, κράατος, κρατός; dat. κάρητι, καρήμτι, κράατι, κρατί; acc. (τον) κράτα, (τὸ) κάρη or κάρ; plur. noin. κάρα, καρήατα, κράατα; gen.

κράτων; dat. κρασί; acc. κάρα with (τους) κράτας; nom. and acc. pl. also κάρηνα, gen. καρήνων. Soph. (τὸ) κράτα.

17. κρίνου (τό), lily, κρίνου, etc. In plural also κρίνεα (Hdt.)

and κρίνεσι (poetic). (See 287, 1.)

18. κύων (ὁ, ἡ), dog, voc. κύον: the rest from stem κυν-, κυνός. κυνί, κύνα; pl. κύνες, κυνών, κυσί, κύνας.

19. λάς (δ), stone, Hom. λάας, poetic; gen. λάος (or λάου), dat. λάζ, acc. λάων, λάν; dual λάς; plur. λάων, λάεσσι, or λάεσι.

20. λίπα (Hom. λίπ', generally with ἐλαίω, oil), fat, oil: proba-

bly λίπα is neut. accus., and λίπ is dat. for λιπί. See Lexicon.
21. μάρτυς (ὁ, ἡ), witness, gen. μάρτυρος, etc., dat. pl. μάρτυσι.

Hom. nous. μάρτυρος (2d decl.).

22. μάστιξ (ή), whip, gen. μάστιγος, etc., Hom. dat. μάστι, acc. μάστιν.

23. of (ή), sheep, for Attic declension see 268. Hom. δίς, δίος, δίν, δίες, δίων, δίεσσι (οίεσι, δεσσι), δίς. Aristoph. has dat. δί.

24. ὄνειρος (δ), ὄνειρον (τό), dream, gen. ου; also ὄναρ (τό), gen. ὀνείρατος, dat. ὀνείρατι; plur. ὀνείρατα, ὀνειράτων, ὀνείρισι.

25. ὄσσε (τώ), dual, eyes, poetic; plur. gen. ὄσσων, dat. ὄσσοις or ὄσσοισι.

26. ὄρνῖς (ὁ, ἡ), bird, see 225. Also poetic forms from stem ὅρνῖς, nom. and acc. sing. ὅρνῖς, ὅρνῖν; pl. ὅρνεις, ὅρνεων, acc. ὅρνεις or ὅρνῖς. Hdt. acc. ὅρνῖθα. Doric gen. ὅρνῖχος, etc.

27. οὖς (τό), ear, ἀτός, ἀτί; pl. ὧτα, ὥτων (128), ἀσί. Hom.

gen. ovaros; pl. ovara, ovara, and work Doric ws.

28. Πνύξ (ή), Ρηγχ, Πυκνός, Πυκνί, Πύκνα (also Πνυκ-ός, etc.).

29.  $\pi\rho\epsilon\sigma\beta\nu_s$  (6), old man, elder (properly adj.), poetic, acc.  $\pi\rho\epsilon\sigma\beta\nu\nu$  (as adj.), voc.  $\pi\rho\epsilon\sigma\beta\nu$ ; pl.  $\pi\rho\epsilon\sigma\beta\epsilon\epsilon$ s (Ep.  $\pi\rho\epsilon\sigma\beta\epsilon$ s), chiefs, elders: the common word in this sense is  $\pi\rho\epsilon\sigma\beta\nu\eta$ s, distinct from  $\pi\rho\epsilon\sigma\beta\epsilon\nu\eta$ is.  $\Pi\rho\epsilon\sigma\beta\nu_s = ambassador$ , w. gen.  $\pi\rho\epsilon\sigma\beta\epsilon\nu_s$ , is rare and poetic in sing.; but common in prose in plur.,  $\pi\rho\epsilon\sigma\beta\epsilon\nu_s$ ,  $\pi\rho\epsilon\sigma\beta\epsilon\nu_s$ ,  $\pi\rho\epsilon\sigma\beta\epsilon\nu_s$ ,  $\pi\rho\epsilon\sigma\beta\epsilon\nu_s$ ,  $\pi\rho\epsilon\sigma\beta\epsilon\nu_s$ ,  $\pi\rho\epsilon\sigma\beta\epsilon\nu_s$ , is common in sing., but rare in plural.

30.  $\pi \hat{v} \rho$  ( $\tau \hat{o}$ ), fire (stem  $\pi \check{v} \rho$ -),  $\pi v \rho \hat{o}_s$ ,  $\pi v \rho \hat{i}$ ; pl. ( $\tau \hat{a}$ )  $\pi v \rho \hat{a}$ , watch-

fires, dat. mupois.

31. σπέος οι σπείος (τό), cave, Ερίς; σπείους, σπηι, σπείων, σπήεσσι οι σπέσσι.

32. ταώς or ταῶς, Attic ταὧς (δ), peacock, like νεώς (196): also

dat. ταῶνι, ταῶσι, chiefly poetic.

38. χοῦς (ὁ), three-quart measure: see 272. Ionic and late nom. χοτός, with gen. χοτός, χοῶς, etc., regularly like Πειραιτός and Δωριτός (267).

39. χρώς (δ), skin, χρωτός, χρωτί, χρώτα; poet. also χροός, χροί,

χρόα; dat. χρώ (only in έν χρώ, near).

## LOCAL ENDINGS.

- **292.** The endings  $-\theta_{\ell}$  and  $-\theta_{\ell\nu}$  may be added to the stem of a noun or pronoun to denote place:—
- -θι, denoting where; as ἄλλο-θι, elsewhere; οὐρανό-θι, in heaven.
- 2. -θεν denoting whence; as οἴκο-θεν, from home; αὐτό-θεν, from the very spot.
- **293.** The enclitic  $-\delta\epsilon$  (141, 4) added to the accusative denotes whither; as  $M\epsilon\gamma a\rho a\delta\epsilon$ , to Megara, Έλευσῖνάδε, to Eleusis. After  $\sigma$ ,  $-\delta\epsilon$  becomes  $\xi\epsilon$  (see 18; 28, 3); as ' $A\theta\dot{\gamma}\nu\bar{\alpha}\xi\epsilon$  (for ' $A\theta\eta\nu\bar{\alpha}\varsigma$ - $\delta\epsilon$ ), to Athens,  $\Theta\dot{\gamma}\beta\bar{\alpha}\xi\epsilon$  (for  $\Theta\eta\beta\bar{\alpha}\varsigma$ - $\delta\epsilon$ ), to Thebes,  $\theta\dot{\gamma}\rho\bar{\alpha}\xi\epsilon$ , out of doors.
- 294. The ending -σε is sometimes added to the stem, denoting whither; as ἄλλοσε, in another direction, πάντοσε, in every direction.
- **295.** N. In Homer, the forms in  $-\theta \iota$  and  $-\theta \iota \nu$  may be governed by a preposition as genitives; as  $I\lambda\iota \iota \delta\theta\iota \pi\rho \delta$ , before Ilium;  $\xi\xi \iota \lambda \iota \delta\theta \iota \nu$ , from the sea.
- 296. N. Sometimes a relic of an original locative case is found with the ending ι in the singular and σι in the plural; as Ἰσθμοῖ, at the Isthmus; οἴκοι (οἰκοι), at home; Πυθοῖ, at Pytho; ᾿Αθήνησι, at Athens; Πλαταιᾶσι, at Plutaea; ᾿Ολυμπίᾶσι, at Olympia; θύρᾶσι, at the gates. These forms (and also those of 292) are often classed among adverbs; but inscriptions show that forms in ᾶσι and in ησι were both used as datives in the early Attic.
- **297.** N. The Epic ending  $\phi_i$  or  $\phi_i \nu$  forms a genitive or dative in both singular and plural. It is sometimes locative, as  $\kappa \lambda_i \sigma'_i \phi_i$ , in the tent; and sometimes it has other meanings of the genitive or dative, as  $\beta'_i \gamma \phi_i$ , with violence. These forms may follow prepositions; as  $\pi u \rho \hat{\alpha} \nu \alpha \hat{\nu} \phi_i$ , by the ships.

# ADJECTIVES.

# FIRST AND SECOND DECLENSIONS (Vowel Declension).

- 298. 1. Most adjectives in os have three endings, os,  $\eta$ , ov. The masculine and neuter are of the second declension, and the feminine is of the first; as  $\sigma \circ \phi \circ s$ ,  $\sigma \circ \phi \circ g$ ,  $\sigma \circ$
- 2. If a vowel or  $\rho$  precedes os, the feminine ends in  $\tilde{a}$ ; as  $\tilde{a}\xi i o s$ ,  $\tilde{a}\xi i \tilde{a}$ ,  $\tilde{a}\xi i o v$ , worthy. But adjectives in oos have on in the feminine, except those in  $\rho oos$ ; as  $\tilde{a}\pi\lambda \delta o s$ ,  $\tilde{a}\pi\lambda \delta o v$ ,  $\tilde{a}\pi\lambda \delta$
- **299.**  $\sum o\phi \acute{o}s$ , wise, and  $\check{a}\xi \iota os$ , worthy, are thus declined:—

302. The nominative and genitive plural of adjectives in os accent the feminine like the masculine: thus ἄξιος has ἄξιαι, ἀξίων (not ἀξίαι, ἀξιῶν, as if from ἀξία; see 124).

For feminines in \( \tilde{a} \) of the third and first declensions combined, see 318.

- 303. The masculine dual forms in  $\omega$  and  $\alpha\nu$  in all adjectives and participles may be used for the feminine forms in  $\hat{\alpha}$  and  $\alpha\nu$ .
- **304.** Some adjectives in os, chiefly compounds, have only two endings, os and ov, the feminine being the same as the masculine. They are declined like  $\sigma o\phi \acute{os}$ , omitting the feminine.
- 305. There are a few adjectives of the Attic second declension ending in  $\omega_s$  and  $\omega_r$ .

# THIRD (OR CONSONANT) DECLENSION.

- 312. Adjectives belonging only to the third declension have two endings, the feminine being the same as the masculine. Most of these end in  $\eta_5$  and  $\epsilon_5$  (stems in  $\epsilon\sigma$ -), or in  $\omega\nu$  and  $\sigma\nu$  (stems in  $\sigma\nu$ -). See 233.

healthy, (ὑγιέα) ὑγια and ὑγιῆ; εὐφυής, comely, (εὐφυέα) εὐφυα and εὐφυῆ. (See 39, 2.)

For as in the accusative plural, see 208, 3.

- 316. N. Adjectives compounded of nouns and a prefix are generally declined like those nouns; as εὔελπις, εὔελπις, hopeful, gen. εὐελπιδος, acc. εὔελπιν (214, 3), εὔελπις εὕχαρις, εὕχαρι, graceful, gen. εὐχάριτος, acc. εὕχαριν, εὕχαρι. But compounds of πατήρ and μήτηρ end in ωρ (gen. ορος), and those of πόλις in ις (gen. ιδος); as ἀπάτωρ, ἄπατορ, gen. ἀπάτορος, fatherless; ἄπολις, ἄπολι, ωithout a country, gen. ἀπόλιδος.
- 317. For the peculiar declension of comparatives in  $\omega\nu$  (stem in  $\omega\nu$ ), see 358.

# FIRST AND THIRD DECLENSIONS COMBINED

318. Adjectives of this class have the masculine and neuter of the third declension and the feminine of the first. The feminine always has  $\check{a}$  in the nominative and accusative singular (175); in the genitive and dative singular it has  $\check{a}$  after a vowel or diphthong, otherwise  $\eta$ .

 $\Omega_{\nu}$  of the feminine genitive plural is circumflexed regularly (124). Compare 302.

For feminine dual forms, see 303.

The masculine and neuter are declined like  $\pi \hat{\eta} \chi v_{S}$  and  $\check{a} \sigma \tau v$  (250), except that the genitive singular ends in os (not  $\omega s$ ) and the neuter plural in  $\epsilon a$  is not contracted.

- **341.** Present participles of verbs in όω (contracted ω) are declined like φιλων. Thus δηλων, δηλοῦσα, δηλοῦν, manifesting; gen. δηλοῦντος, δηλούσης; dat. δηλοῦντι, δηλούση, etc. No uncontracted forms of verbs in όω are used (493).
- 342. A few second perfect participles in αώς of the μι- form have ῶσα in the feminine, and retain ω in the oblique cases. They are contracted in Attic; as Hom. ἐσταώς, ἐσταῶσα, ἐσταός, Attic ἐστώς, ἐστῶσα, ἐστός οι ἐστώς, standing, gen. ἐστῶτος, ἐστώσης, ἐστῶτος, etc.; pl. ἐστῶτες, ἐστῶσαι, ἐστῶτα, gen. ἐστώτων, ἐστωσῶν, ἐστώτων, etc. (See 508.)

#### ADJECTIVES WITH ONE ENDING.

- **343.** Some adjectives of the third declension have only one ending, which is both masculine and feminine; as φυγάς, φυγάδος, fugitive; ἄπαις, ἄπαιδος, childless; ἀγνώς, ἀγνῶτος, unknown; ἄναλκις, ἀγάλκιδος, weak. The oblique cases occasionally occur as neuter.
- 344. The poetic ίδρις, knowing, has acc. ίδριν, voc. ίδρι, nom. pl. ίδρις.
- 345. A very few adjectives of one termination are of the first declension, ending in as or ηs; as γεννάδας, noble, gen. γεννάδου.

#### IRREGULAR ADJECTIVES.

- 347. N. Πολλός, ή, όν, is found in Homer and Herodotus, declined regularly throughout. Homer has forms πολέος, πολέων, πολέων, πολέων, πολέων, πολέων, πολέων, πολέων, πουλύς not to be confounded with epic forms of πόλις (255): also πουλύς, πουλύ.
- **348.** N.  $\Pi \rho \hat{q} \hat{o} \hat{o}$  has two stems, one  $\pi \rho q \hat{o} \hat{o}$ , from which the masculine and neuter are generally formed; and one  $\pi \rho \hat{a} \hat{v}$ , from which the feminine and some other forms come. There is an epic form  $\pi \rho \eta \hat{v} \hat{s}$  (lyric  $\pi \rho \hat{a} \hat{v} \hat{o}$ ) coming from the latter stem. The forms belonging to the two stems differ in accent.
- **349.** N. Some compounds of  $\pi \circ i \circ (\pi \circ \delta)$ , foot, have  $\circ \nu \nu$  in the nominative neuter and the accusative masculine; as  $\tau \rho l \pi \circ \nu \nu$ , three-footed.

#### COMPARISON OF ADJECTIVES.

- I. COMPARISON BY -τέρος, -τατος.
- 350. Most adjectives add  $\tau\epsilon\rho\sigma\varsigma$  (stem  $\tau\epsilon\rho\sigma$ -) to the stem to form the comparative, and  $\tau\alpha\tau\sigma\varsigma$  (stem  $\tau\alpha\tau\sigma$ -) to form the superlative. Stems in  $\sigma$  with a short penult lengthen  $\sigma$  to  $\omega$  before  $\tau\epsilon\rho\sigma\varsigma$  and  $\tau\alpha\tau\sigma\varsigma$ . For the declension, see 301. E.g.

Κοῦφος (κουφο-),  $\overline{light}$ , κουφύτερος (- $\overline{a}$ , -ov), lighter, κουφότατος (- $\eta$ , -ov), lightest.

Σοφός (σοφο-), wise, σοφώτερος, wiser, σοφώτατος, wisest.

''Aξιος (άξιο ), worthy, άξιώτερυς, άξιώτατος.

Σεμνός (σεμνο-), august, σεμνύτερος, σεμνύτατος.

Πικρός (πικρο-), bitter, πικρύτερος, πικρότατος.

'Οξύς (όξυ-), sharp, όξύτερος, όξύτατος.

Μέλας (μελαν-), black, μελάντερος, μελάντατος.

'Αληθής (ἀληθεσ-), true, ἀληθέστερος, ἀληθέστατος (312).

- **351.** Stems in  $\sigma$  do not lengthen  $\sigma$  to  $\omega$  if the penultimate rowel is followed by a mute and a liquid (100). See  $\pi \kappa \rho \sigma$  above.
- 352. Μέσος, middle, and a few others, drop o of the stem and add αίτερος and αίτατος; as μέσος (μεσο.), μεσαίτερος, μεσαίτατος.
- 353. Adjectives in oos drop final o of the stem and add έστερος and έστατος, which are contracted with o to ούστερος and ούστατος; as (εύνοος) εύνους (εύνοο-), well-disposed, εύνούστερος, εύνούστατος.
- 354. Adjectives in ων add έστερος and έστατος to the stem; as σώφρων (σωφρον-), prudent, σωφρονέστερος, σωφρονέστατος.
- **355.** Adjectives in εις add τερος and τατος to the stein in ετ- (331, 2); as χαρίεις, graceful, fem. χαρίεσσα (χαριετ-), χαριέστερος, χαριέστατος for χαριετ-τερος, χαριετ-τατος (71).
- 356. Adjectives may be compared by prefixing μᾶλλον, more, and μάλιστα, most; as μᾶλλον σοφός, more wise, μάλιστα κακός, most bad.

#### II. COMPARISON BY -ίων, -ιστος.

357. 1. Some adjectives, chiefly in υς and ρος, are compared by changing these endings to των and ιστος. E.g. Ἡδύς, εweet, ἡδίων, ἥδίωτος.

Taχύς, swift, ταχίων (rare), commonly θάσσων (95, 5), τάχιστος.

Αισχρός, base, αισχίων, αισχιστος. Έχθρός, hostile, εχθίων, εχθιστος.

Κυδρός (poet.), glorious, κυδίων κύδιστος.

- 2. The terminations low and loves are thus added to the root of the word (153), not to the adjective stem.
- 358. Comparatives in *îων*, neuter *īον*, are thus declined:—

 7. πένης (πενητ.), poor, πενέστερος,
                                                                       πλείστος.
 8. πολύς, much,
                              πλείων or πλέων (neut. some-
                                 times \pi \lambda \epsilon \hat{\imath} \nu),
                                                                       ράστος,

                                                                      φίλτατος,
10. φ(λος, dear,
                              φιλαίτερος (rare),
                                                                      φιλαίτατος
                                                                         (rare).
                              (φιλίων, twice in Hom.)
    Ionic or poetic forms are in ( ).

362. Irregularities in the comparison of the following words will be found in the Lexicon:—

αἰσχρός, ἀλγεινός, ἄρπαξ, ἄφθονος, ἄχαρις, βαθύς, βλάξ, βραδύς, γεραιός, γλυκύς, ἐπιλήσμων, ἐπίχαρις, ἦσυχος, ἴδιος, ἴσος, λάλος, μάκαρ, μακρός, νέος, παλαιός, παχύς, πέπων, πίων, πλησίος, πρέσβυς, προὔργου, πρώιος, σπουδαῖος, σχολαῖος, ψευδής, ὠκύς.

**363.** Some comparatives and superlatives have no positive, but their stem generally appears in an adverb or preposition. E.g.

'Ανώτερος, upper, ἀνώτατος, uppermost, from ἄνω, up; πρότερος, former, πρώτος οι πρώτιστος, first, from πρό, before; κατώτερος,

lower, κατώτατος, lowest, from κάτω, downward.

See in the Lexicon ἀγχότερος, ἀφάρτερος, κερδίων, ὁπλότερος, προσώτερος, ῥίγιον (neuter), ὑπέρτερος, ὕστερος, ὑψίων, φαάντερος, with their regular superlatives; also ἔσχατος, ὕπατος, and κήδιστος.

**364.** Comparatives and superlatives may be formed from nouns, and even from pronouns. *E.g.* 

Βασιλεύς, king, βασιλεύτερος, a greater king, βασιλεύτατος, the greatest king; κλέπτης, thief, κλεπτίστερος, κλεπτίστατος; κύων, dug, κύντερος, more impudent, κύντατος, most impudent. So αὐτός, self, αὐτότατος, his very self, ipsissimus.

## ADVERBS AND THEIR COMPARISON.

365. Adverbs are regularly formed from adjectives. Their form (including the accent) may be found by changing  $\nu$  of the genitive plural masculine to  $\varsigma$ . E.g.

Φίλως, dearly, from φίλος; δικαίως, justly (δίκαιος); σοφῶς, wisely (σοφός); ἡδέως, sweetly (ἡδύς, gen. plur. ἡδέων), ἀληθῶς, truly (ἀληθής, gen. plur. ἀληθέων, ἀληθών); σαφῶς (Ionic σαφέως), plainly (σαφής, gen. plur. σαφέων, σαφῶν); πάντως, wholly (πᾶς, gen. plur. πάντων).

366. Adverbs are occasionally formed in the same way from participles; as διαφερόντως, differently, from διαφέρων (διαφερόντων); τεταγμένως, regularly, from τεταγμένος (τάσσω, order).

367. The neuter accusative of an adjective (either singular or plural) may be used as an adverb. E.g.

Πολύ and πολλά, much (πολύς); μέγα or μεγάλα, greatly (μέγας); also μεγάλως (365), μόνον, only (μόνος, alone).

- 368. Other forms of adverbs occur with various terminations; as μάλα, very, τάχα, quickly, ἄνω, above, ἐγγύς, near.
- 369. The neuter accusative singular of the comparative of an adjective forms the comparative of the corresponding adverb, and the neuter accusative plural of the superlative forms the superlative of the adverb. E.g.

Σοφῶς (σοφός), wisely; σοφώτερον, more wisely; σοφώτατα, most wisely. 'Αληθῶς (ἀληθής), truly; ἀληθέστερον, ἀληθέστατα. 'Ηδέως (ἡδύς), sweetly, ἢδῖον, ἢδῖστα. Χαριέντως (χαρίεις), gracefully; χαριέστερον, χαριέστατα. Σωφρόνως (σώφρων), prudently; σωφρονέστερον, σωφρονέστατα.

- **370.** 1. Adverbs in ω generally form a comparative in τέρω, and a superlative in τάτω; as ἄνω, above, ἀνωτέρω, ἀνωτάτω.
- 2. A few comparatives derived from adjectives end in τένως; as βεβαιστέρως, more firmly, for βεβαιστέρου, from βεβαίως.
- 371. N. Μάλα, much, very, has comparative μάλλον (for μαλ·ι-ον, 84, 4), more, rather; superlative μάλιστα, most, especially.

#### NUMERALS.

**373.** Above 10,000, δύο μῦριάδες, 20,000, τρεῖς μῦριάδες, 30,000 etc., may be used.

374. The dialects have the following peculiar forms: -

1-4. See 377.

Sign

- 5. Aeolic πέμπε for πέντε.
- 9. Herod. είνατος for ένατος; also είνάκις, etc.
- 12. Doric and Ionic δυώδεκα; Poetic δυοκαίδεκα.
- 20. Ερίο ἐείκοσι; Dorie εἴκατι.

30, 80, 90, 200, 300. Ιοπίς τριήκοντα, δηδώκοντα, δυνήκοντα (Hom.), διηκόσιοι, τριηκόσιοι.

40. Herod. τεσσεράκοντα.

Homer has τρίτατος, τέτρατος, έβδόματος, όγδόατος, είνατος, δυωδέκατος, εεικοστός, and also the Attic form of each.

375. The cardinal numbers  $\epsilon i\varsigma$ , one,  $\delta io$ , two,  $\tau \rho \epsilon i\varsigma$ , three, and  $\tau \epsilon \sigma \sigma a \rho \epsilon \varsigma$  (or  $\tau \epsilon \tau \tau a \rho \epsilon \varsigma$ ), four, are thus declined:—

Nom.	٤ĺ۶	μία	ĩν

Gen.	7	ριών		TEG	σάρων
Dat.	7	ρισί		τέσ	σαρσι
Acc.	2) 30T	τοί	a	τέσσαρας	τέσσαρα

- 376. N. Δύο, two, with a plural noun, is sometimes indeclinable.
- 377. N. Homer has fem. ἴα, της, της, ταν, for μία; and ἰῷ for ἐνί. Homer has δύο and δύω, both indeclinable; and δοιώ and δοιοί, declined regularly. Herodotus has δυῶν, δυοῖσι, and other forms: see the Lexicon. Homer sometimes has πίσυρες for τέσσαρες. Hērodotus has τέσσερες, and the poets have τέτρασι.
- 378. The compounds οὐδείς and μηδείς, no one, none, are declined like είς. Thus, οὐδείς, οὐδεμία, οὐδίν; gen. οὐδενός, οὐδεμίας dat. οὐδενί, οὐδεμία; acc. οὐδένα, οὐδεμίαν, οὐδέν, etc. Plural forms sometimes occur; as οὐδένες, οὐδένων, οὐδέσι, οὐδένας, μηδένες, etc. When οὐδέ or μηδέ is written separately or is separated from είς (as by a preposition or by ἄν), the negative is more emphatic; as έξ οὐδενός, from no one; οὐδ' ἐξ ἐνός, from not even one; οὐδὲ είς, not a man.
- 379. Both is expressed by ἄμφω, ambo, ἀμφοῖν; and by ἀμφό τερος, generally plural, ἀμφότεροι, αι, α.
- 380. The cardinal numbers from 5 to 100 are indeclinable. The higher numbers in 101 and all the ordinals are declined regularly, like other adjectives in os.
- 381. In τρεῖς (τρία) καὶ δίκα and τέσσαρες (τέσσαρα) καὶ δίκα for 13 and 14, the first part is declined. In ordinals (13th to 19th) the forms τρεισκαιδέκατος etc. are Ionic, and are rarely found in the best Attic.

- 382. 1. In compound expressions like 21, 22, etc., 31, 32, etc., the numbers can be connected by καί in either order; but if καί is omitted, the larger precedes. Thus, εἶς καὶ εἴκοσι, one and twenty, or εἴκοσι καὶ εἶς, twenty and one; but (without καί) only εἴκοσιν εἶς, twenty-one.
- 2. In ordinals we have πρώτος καὶ εἰκοστός, twenty-first, and also εἰκοστὸς καὶ πρώτος, etc.; and for 21 εἶς καὶ εἰκοστός.
- 3. The numbers 18 and 19, 28 and 29, 38 and 39, etc., are often expressed by ένὸς (οτ δυοῦν) δέοντες εἴκοσι (τριάκοντα, τεσσαράκοντα, etc.); as ἔτη ένὸς δέοντα τριάκοντα, 29 years.
- 383. 1. With collective nouns in the singular, especially  $\hat{\eta}$  in  $\pi \sigma s$ , cavalry, the numerals in  $\iota \sigma \iota$  sometimes appear in the singular; as the diakonian into the (troop of) 200 cavalry (200 horse);  $d\sigma \pi i s$   $\mu \nu \rho i a$  kai respansion (X. An. i,  $7^{10}$ ), 10,400 shields (i.e. men with shields).
- 2. Μύριοι means ten thousand; μυρίοι, innumerable. Μυρίος sometimes has the latter sense; as μυρίος χρόνος, countless time; μυρία πενία, incalculable poverty.
- **384.** N. The Greeks often expressed numbers by letters; the two obsolete letters Vau (in the form  $\varsigma$ ) and Koppa, and the character San, denoting  $\theta$ , 90, and 900. (See 3.) The last letter in a numerical expression has an accent above. Thousands begin anew with  $\alpha$ , with a stroke below. Thus,  $\alpha\omega\varepsilon\eta'$ , 1808;  $\beta\chi\kappa\varepsilon'$ , 2025;  $\delta\kappa\varepsilon'$ , 4025;  $\beta\gamma'$ , 2003;  $\phi\mu'$ , 540;  $\rho\delta'$ , 104. (See 372.)
- **385.** N. The letters of the ordinary Greek alphabet are often used to number the books of the Iliad and Odyssey, each poem having twenty-four books. A, B,  $\Gamma$ , etc. are generally used for the Iliad, and  $\alpha$ ,  $\beta$ ,  $\gamma$ , etc. for the Odyssey.

## THE ARTICLE.

386. The definite article  $\delta$  (stem  $\tau o$ -), the, is thus declined:—

Acc.	τόν	τήν	τó	}				Acc.	TOÚS	τάs	τά

- 387. N. The Greek has no indefinite article; but often the indefinite  $\tau$  is (415, 2) may be translated by u or un; as  $\tilde{a}v\theta\rho\omega\pi\dot{o}s$   $\tau_{is}$ , a certain man, often simply a man.
  - 388. N. The regular feminine dual forms rá and raiv (espe-

cially  $\tau \acute{a}$ ) are very rare, and  $\tau \acute{\omega}$  and  $\tau \acute{\omega} \imath \nu$  are generally used for all genders (303). The regular plural nominatives  $\tau \acute{\omega}$  and  $\tau \acute{\omega}$  are epic and Doric; and the article has the usual dialectic forms of the first and second declensions, as  $\tau \acute{\omega} \acute{\omega}$ ,  $\tau \acute{\omega} \acute{\omega}$ 

### PRONOUNS.

#### PERSONAL AND INTENSIVE PRONOUNS.

389. The personal pronouns are  $\epsilon\gamma\omega$ , I,  $\sigma\dot{\nu}$ , thou, and  $\sigma\dot{\nu}$  (genitive), of him, of her, of it. A $\dot{\nu}\tau\dot{\sigma}s$ , himself, is used as a personal pronoun for him, her, it, etc. in the oblique cases, but never in the nominative.

They are thus declined: -

- **390.** N. The stems of the personal pronouns in the first person are  $\ell\mu\epsilon$  (cf. Latin me),  $\nu\omega$  (cf. nos), and  $\eta\mu\epsilon$ ,  $\ell\gamma\omega$  being of distinct formation; in the second person,  $\sigma\epsilon$  (cf. te),  $\sigma\phi\omega$ ,  $\dot{v}\mu\epsilon$ , with  $\sigma\dot{v}$  distinct; in the third person,  $\dot{\epsilon}$  (cf.  $s\epsilon$ ) and  $\sigma\phi\epsilon$ .
- 391. Adrós in all cases may be an intensive adjective pronoun, like ipse, self (989, 1).
- **392.** For the uses of  $\delta \hat{v}$ , of, etc., see 987; 988. In Attic prose,  $\delta \hat{l}$ ,  $\sigma \phi \hat{e} \hat{i} \hat{s}$ ,  $\sigma \phi \hat{\omega} \hat{v}$ ,  $\sigma \phi \hat{l} \hat{\sigma} \hat{e}$ , are the only common forms;  $\delta \hat{v}$  and  $\hat{\epsilon}$  never occur in ordinary language. The orators seldom use this pronoun at all. The tragedians use chiefly  $\sigma \phi \hat{i} \nu$  (not  $\sigma \phi \hat{i}$ ) and  $\sigma \phi \hat{\epsilon}$  (394).
- 393. 1. The following is the Homeric declension of  $\epsilon\gamma\dot{\omega}$ ,  $\sigma\dot{v}$ , and  $\delta\dot{v}$ . The forms not in ( ) are used also by Herodotus. Those with  $a\mu\mu$  and  $\nu\mu\mu$  are Aeolic.

- 2. Herodotus has also  $\sigma\phi\epsilon\alpha$  in the neuter plural of the third person, which is not found in Homer.
- **394.** The tragedians use  $\sigma\phi\dot{\epsilon}$  and  $\sigma\phi\dot{\omega}$  as personal pronouns, both masculine and feminine. They sometimes use  $\sigma\phi\dot{\epsilon}$  and rarely  $\sigma\phi\dot{\omega}$  as singular.
- 395. 1. The tragedians use the Doric accusative νίν as a personal pronoun in all genders, and in both singular and plural.
  - 2. The Ionic  $\mu \dot{\alpha}$  is used in all genders, but only in the singular.
- 396. N. The penult of ἡμῶν, ἡμῖν, ἡμᾶς, ὑμῶν, ὑμῖν, and ὑμᾶς is sometimes accented in poetry, when they are not emphatic, and τν and τς are shortened. Thus ἡμων, ἡμων, ἡμως, τμων, ὑμως. If they are emphatic, they are sometimes written ἡμίν, ἡμάς, ὑμίν, ὑμάς. So σφάς is written for σφᾶς.
- 397. N. Herodotus has αὐτόων in the feminine for αὐτῶν (188, 5). The lonic contracts ὁ αὐτός into ωὐτός οι ωὐτός, and τὸ αὐτό into τωὐτό (7).
- 398. N. The Doric has έγών; έμέος, έμοῦς, έμεῦς (for έμοῦ); έμίν for έμοι; άμες, άμεων, άμεν, άμε (for ἡμεῖς, ἡμῶν, ἡμῖν, ἡμᾶς); τό for σύ; τεῦ (for τέο), τέος, τεοῦ, τεοῦς (for σοῦ); τοὶ, τιν (for σοὶ); τέ, τύ (encitic) for σέ; ὑμές and ὑμά (for ὑμεῖς and ὑμᾶς); ἴν for οῖ; ψέ for σφέ. Pindar has only έγών, τύ, τοἱ, τίν.
- 399. Αὐτός preceded by the article means the same (idem); as ὁ αὐτὸς ἀνήρ, the same man. (See 989, 2.)
- 400. Αὐτός is often united by crasis (44) with the article; as ταὐτοῦ for τοῦ αὐτοῦ; ταὐτῷ for τῷ αὐτῷ; ταὐτῷ for τῷ αὐτῷ (not to be confounded with ταύτῃ from οὖτος). In the contracted form the neuter singular has ταὐτό or ταὐτόν.

#### REFLEXIVE PRONOUNS.

**401.** The reflexive pronouns are ἐμαυτοῦ, ἐμαυτῆς, of myself; σεαυτοῦ, σεαυτῆς, of thyself; and ἑαυτοῦ, ἐαυτῆς, of himself, herself, itself. They are thus declined:—

- 402. The reflexives are compounded of the stems of the personal pronouns (390) and αὐτός. But in the plural the two pronouns are declined separately in the first and second persons, and often in the third.
- **403.** N. In Homer the two pronouns are always separated in all persons and numbers; as σοὶ αὐτῷ, οἶ αὐτῷ, ε̂ αὐτήν. Herodotus has ἐμεωυτοῦ, σεωυτοῦ, ἐωυτοῦ.

#### RECIPROCAL PRONOUN.

**404.** The reciprocal pronoun is  $\partial \lambda \lambda \dot{\eta} \lambda \omega \nu$ , of one another, used only in the oblique cases of the dual and plural. It is thus declined:—

SINGULAR.

#### DUAL. PLURAL. Gen. άλληλοιν άλληλαιν άλληλων άλληλων άλληλων άλληλοιν Dat. αλλήλοιν άλλήλαιν άλλήλοιν άλλήλοις άλλήλαις άλλήλοις Αcc. άλλήλω άλλήλα άλλήλω άλλήλους άλλήλας άλληλα **405.** The stem is $d\lambda n\lambda o$ - (for $d\lambda \lambda$ - $a\lambda \lambda o$ -).

#### POSSESSIVE PRONOUNS.

- **406.** The possessive pronouns ἐμός, my, σός, thy, ἡμέτερος, our, ὑμέτερος, your, σφέτερος, their, and the poetic őς, his, are declined like adjectives in ος (298).
- 407. Homer has dual possessives νωίτερος, of us two, σφωίτερος, of you two; also τεός (Doric and Aeolic, = tuus) for σός, έός for δς, άμός for ἡμέτερος, ὑμός for ὑμέτερος, σφός for σφέτερος. The Attic poets sometimes have ἀμός or ἀμός for ἐμός (often as our for my).
- 408. \*Os not being used in Attic prose, his is there expressed by the genitive of αὐτός, as ὁ πατὴρ αὐτοῦ, his father.

#### DEMONSTRATIVE PRONOUNS.

409. The demonstrative pronouns are οὐτος and ὅδε, this, and ἐκεῖνος, that. They are thus declined:—

- **410.** Feminine dual forms in  $\bar{a}$  and aw are very rare (303).
- 411. Έκεῖνος is regular except in the neuter ἐκεῖνο. Κεῖνος is Ionic and poetic. "Οδε is formed of the article ὁ and -δε (141, 4). For its accent, see 146.
- 412. N. The demonstratives, including some adverbs (436), may be emphasized by adding i, before which a short vowel is dropped. Thus οὐτοσί, αὐτηί, τουτί; ὁδί, ἡδί, τοδί; τουτουί, ταυτί, τουτωνί. So τοσουτοσί (429), ώδί, οὐτωσί. In comedy γέ (rarely δέ) may precede this i, making γί or δί; as τουτογί, τουτοδί.
- 413. N. Herodotus has τουτέων in the feminine for τούτων (cf. 397). Homer has τοισδέσσι οτ τοισδέσι for τοισδέ.
- 414. N. Other demonstratives will be found among the pronominal adjectives (429).

#### INTERROGATIVE AND INDEFINITE PRONOUNS.

- **415.** 1. The interrogative pronoun  $\tau(s, \tau(t, who? which? what? always takes the acute on the first syllable.$
- 2. The indefinite pronoun  $\tau$ is,  $\tau$ i, any one, some one, is enclitic, and its proper accent belongs on the last syllable.

2. For the indefinite plural  $\tau \nu \alpha$  there is a form  $\tilde{\alpha}\tau\tau\alpha$  (Ionic  $\tilde{\alpha}\sigma\sigma\alpha$ ).

417. Οὔτις and μήτις, poetic for οὐδείς and μηδείς, no one, are declined like τiς.

87

- 418. 1. The acute accent of  $\tau(s)$  is never changed to the grave (115, 2). The forms  $\tau(s)$  and  $\tau(s)$  of the indefinite pronoun very rarely occur with the grave accent, as they are enclitic (141, 2).
- The Ionic has τέο and τεῦ for τοῦ, τέω for τῷ, τέων for τίνων, and τέοισι for τίσι; also these same forms as enclitics, for του, τω, etc.
- 419. Aλλos, other, is declined like αὐτός (389), having άλλο in the neuter singular.
- 420. 1. The indefinite δείνα, such a one, is sometimes indeclinable, and is sometimes declined as follows:—

#### RELATIVE PRONOUNS.

- **423.** N. For  $\ddot{o}_{S}$  used as a demonstrative, especially in Homer, see 1023. For the article ( $\tau$ -forms) as a relative in Homer and Herodotus, see 935 and 939.
  - 424. N. Homer has δου (δο) and έης for ου and ής.

**425.** The indefinite relative  $\tilde{o}\sigma\tau\iota\varsigma$ ,  $\tilde{\eta}\tau\iota\varsigma$ ,  $\tilde{o}\tau\iota$ , whoever, whatever, is thus declined:—

- 426. N. Ootis is compounded of the relative  $\delta s$  and the indefinite  $\tau is$ , each part being declined separately. For the accent, see 146. The plural  $\delta \tau \tau a$  (Ionic  $\delta \sigma \sigma a$ ) for  $\delta \tau \nu a$  must not be confounded with  $\delta \tau \tau a$  (416, 2). O  $\tau \iota$  is thus written (sometimes  $\delta$ ,  $\tau \iota$ ) to distinguish it from  $\delta \tau \iota$ , that.
- 427. N. The shorter forms στου, στων, απων, and στοις which are genuine old Attic forms, are used by the tragedians to the exclusion of σύτινος, etc.

2. Herodotus has ὅτευ, ὅτεω, ὅτεων, ὁτέοισι, and ἄσσα (420).

#### PRONOMINAL ADJECTIVES AND ADVERBS.

429. There are many pronominal adjectives which correspond to each other in form and meaning. The following are the most important:—

INTERROGATIVE.	INDEFINITE.	DEMONSTRATIVE.	RELATIVE.
*boos; how much? how many? quantus?	ποσός, of some quantity.	(τόσος), τοσόσδε, τοσοῦτος, so much, tantus, so many.	öσος, όπόσος, (as much, as many) as, quantus.
*oîos; of what kind? qualis?	ποιός, of some kind.	(τοῖος), τοιόσδε, τοιοῦτος, such, talis.	olos, ὁποῖος, of which kind, (such) as, qualis.
พฤฟไหดร; how old? how large?		(τηλίκος), τηλικόσδε, τηλικοῦτος, so old or so large.	ήλικος, όπηλικος, of which age or size, (as old) as, (as large) as.
πότερος; which of the two?	πότερος (οr ποτε- ρός), one of two (rare).	<pre>     trepos, the one or     the other (of     two).</pre>	όπότερος, which- ever of the two.

430. The pronouns  $\tau is$ ,  $\tau is$ , etc. form a corresponding series:—

 $\tau$ is; who?  $\tau$ is, any one.  $\delta\delta\epsilon$ , o $\dot{\upsilon}$   $\tau$ os, this,  $\delta$ s,  $\delta\sigma\tau$ is, who, this one. which.

- **431.** The may be added to οίος, ὅσος, ὁπόσος, ὁποῖος, and ὁπότερος, to make them more indefinite; as ὁποῖός τις, of what kind soever.
- 432. 1. Our added to indefinite relatives gives them a purely indefinite force; as  $\delta\sigma\tau\iota\sigma\sigma\delta\nu$ ,  $\delta\tau\iota\sigma\delta\nu$ , any one, anything, soever, with no relative character. So sometimes  $\delta\dot{\eta}$ ; as  $\delta\tau\sigma\nu$   $\delta\dot{\gamma}$ .
- N. Rarely ὁπότερος (without οὖν) has the same meaning, either of the two.
- **433.** N. Homer doubles  $\pi$  in many of these relative words; as  $\delta\pi\pi\delta\tau\epsilon\rho\sigma$ s,  $\delta\pi\pi\sigma$ ios. So in  $\delta\pi\pi\omega$ s,  $\delta\pi\pi\delta\tau\epsilon$ , etc. (436). Herodotus has  $\delta\kappa\delta\tau\epsilon\rho\sigma$ s,  $\delta\kappa\delta\sigma\sigma$ s,  $\delta\kappa\sigma$ o,  $\delta\kappa\delta\theta\epsilon\nu$ ,  $\delta\kappa\delta\tau\epsilon$ . e.c., for  $\delta\pi\delta\tau\epsilon\rho\sigma$ s, etc.
- 434. N. Tổơ s and το îos seldom o cur in Attic prose, τηλίκος never. Τοσόσδε, τοιόσδε, and τηλικόσδε are declined like τόσος and το îos; as τοσόσδε, τοιάδε, τοιάδε. Το σο το τοιούσδε, τοιάδε, τοιάδε. Το σο το τοιούτος, αnd τηλικούτος are declined like ο ὖτος (omitting the first  $\tau$  in το ύτου, το ῦτο, etc.), except that the neuter singular has o or  $o\nu$ ; as τοιοῦτος, τοιαύτη, τοιοῦτο οτ τοιοῦτον; gen. τοιούτου, τοιαύτης, etc.
- **435.** There are also negative pronominal adjectives; as ούτις, μήτις (poetic for οὐδείς, μηδείς), οὐδέτερος, μηδέτερος, neither of two. (For adverbs, see 440.)
- 436. Certain pronominal adverbs correspond to each other, like the adjectives given above. Such are the following:—

Interrogative.	INDEFINITE.	DEMONSTRATIVE.	RELATIVE.
#oû; where?	πού, somewhere.	(ἔνθα), ἐνθάδε, ἐνταῦθα, ἐκεῖ, there.	οὖ, ὅπου, where.
*î; which way? how?	πή, some way, somehow.	$(\tau \hat{\eta}), \tau \hat{\eta} \delta \epsilon, \tau a \hat{\nu} \tau \eta,$ this way, thus.	$ \dot{y}, \ddot{o}\pi y, which way, $ as.
#0î; whither?	πol, to some place.	έκεῖσε, thither.	ol, öποι, whither.
πόθεν; whence?	ποθέν, from some place.	(ἔνθεν), ένθένδε, έντεῦθεν, ἐκεῖθεν, thence.	$\ddot{o}\theta \epsilon \nu$ , $\dot{o}\pi \dot{o}\theta \epsilon \nu$ , whence.
τῶς; how?	πώς, in some way, somehow.	(τώς), (ὥς), ὧδε, οὕτως, thus.	ώs, ὅπωs, in which way, as.
πότε; when?	ποτέ, at some time.	$\tau \delta  au \epsilon$ , then.	öτε, ὁπότε, when.
nyika; at what time?		(την lκα), την ικά-δε, την ικαύτα,at that time.	ήνίκα, όπηνίκα, at which time, when.
4.0			

- 437. The indefinite adverbs are all enclitic (141, 2).
- 438. Forms which seldom or never occur in Attic prose are in (). " $E\nu\theta a$  and  $\bar{\epsilon}\nu\theta\epsilon\nu$  are relatives in prose, where, whence; as demonstratives they appear chiefly in a few expressions like  $\bar{\epsilon}\nu\theta a$  kai  $\bar{\epsilon}\nu\theta a$ , here and there,  $\bar{\epsilon}\nu\theta\epsilon\nu$  kai  $\bar{\epsilon}\nu\theta\epsilon\nu$ , on both sides. For  $\bar{\omega}s$ , thus, in Attic prose, see 138, 3. T $\bar{\omega}s$  (from  $\tau\sigma$ ), like  $o\bar{\nu}\tau\omega s$  (from  $o\bar{\nu}\tau\sigma s$ ), thus, is poetic.
- 439. 1. The poets have κείθι, κείθεν, κείσε for έκεί, ἐκείθεν, and ἐκείσε, like κείνος for ἐκείνος (411).
  - 2. Herodotus has ενθαθτα, ενθεθτεν for ενταθθα, εντεθθεν.
- 3. There are various poetic adverbs; as  $\pi \delta \theta_i$ ,  $\pi o \theta_i$ ,  $\delta \theta_i$  (for  $\pi o \hat{v}$ ,  $\pi o \hat{v}$ ,  $\sigma \delta \theta_i$ , there,  $\tau \delta \theta_i v$ , thence.
- 440. There are negative adverts of place, manner, etc.; as οὐδαμοῦ, μηδαμοῦ, nowhere, οὐδαμη, αηδαμη, in no way, οὐδαμῶς, μηδαμῶς, in no manner. (See 435.)

#### VERBS.

- 441. The Greek verb has three voices, the active, middle, and passive.
- 442. 1. The middle voice generally signifies that the subject performs an action upon himself or for his own benefit (1242), but sometimes it is not distinguished from the active voice in meaning.

- 2. The passive differs from the middle in form in only two tenses, the tuture and the agrist.
- 443. Deponent verbs are those which have no active voice, but are used in the middle (or the middle and passive) forms with an active sense.
- 444. N. Deponents generally have the agrist and future of the middle form. A few, which have an agrist (sometimes a future) of the passive form, are called passive deponents; while the others are called middle deponents.
- 445. There are four moods (properly so called), the indicative, subjunctive, optative, and imperative. To these are added, in the conjugation of the verb, the infinitive, and participles of the chief tenses. The verbal adjectives in  $\tau_{00}$  and  $\tau_{00}$  have many points of likeness to participles (see 776).
- 446. The four proper moods, as opposed to the infinitive, are called finite moods. The subjunctive, optative, imperative, and infinitive, as opposed to the indicative, are called dependent moods.
- 447. There are seven tenses, the present, imperfect, future, aorist, perfect, pluperfect, and future perfect. The imperfect and pluperfect are found only in the indicative. The future and future perfect are wanting in the subjunctive and imperative. The future perfect belongs regularly to the passive voice, but sometimes has the meaning of the active or middle.
- 448. The present, perfect, future, and future perfect indicative are called *primary* (or *principal*) tenses; the imperfect, pluperfect, and agrist indicative are called *secondary* (or *historical*) tenses.
- 449. Many verbs have tenses known as the second agrist (in all voices), the second perfect and pluperfect (active), and the second future (passive). These tenses are generally of more simple formation than the first (or ordinary) agrist, perfect, etc. Few verbs have both forms in any tense; when this occurs, the two forms generally differ in meaning (for example, by the first being transitive, the second intransitive), but not always.
  - 450. The agrist corresponds generally to the indefinite or his-

torical perfect in Latin, and the perfect to the English perfect or the definite perfect in Latin.

- 451. N. No Greek verb is in use in all these tenses, and the full paradigm of the regular verb must include parts of three different verbs. See 470.
- 452. There are three numbers, as in nouns, the singular, dual, and plural.
- 453. In each tense of the indicative, subjunctive, and optative, there are three *persons* in each number, the first, second, and third; in each tense of the imperative there are two, the second and third.
- 454. N. The first person dual is the same as the first person plural, except in a very few poetic forms (556, 2). This person is therefore omitted in the paradigms.

#### TENSE SYSTEMS AND TENSE STEMS.

- 455. The tenses are divided into nine classes or tense systems, each with its own tense stem.
  - 456. The tense systems are the following: —

SYSTEMS. TENSES.

- 1. Present, including present and imperfect.
- II. Future, " future active and middle.
- 111. First-aorist, " first aorist active and middle.
- IV. Second-aorist, " second aorist active and middle.
- v. First-perfect, " first perfect and pluperfect active.
- VI. Second-perfect, " second perfect and pluperfect active.
- vII. Perfect-middle, " perfect and pluperfect middle and future perfect.
- VIII. First-passive, " first agrist and future passive.
  - IX. Second-passive, " second agrist and future passive.
- 457. 1. The last five tense stems are further modified to form special stems for the two pluperfects, the future perfect, and the two passive futures.
- 2. As few verbs have both the first and the second forms of any tense (449), most verbs have only six tense stems, and many have even less.
- 458. The various tense stems are almost always formed from one fundamental stem, called the verb stem. These formations will be explained in 568-622.

459. Before learning the paradigms, it is important to distinguish between verbs in which the verb stem appears without change in all the tense systems, and those in which it is modified more or less in different systems (154).

Thus in  $\lambda \epsilon \gamma \omega$ , speak, the verb stem  $\lambda \epsilon \gamma$  is found in  $\lambda \epsilon \xi \omega$  ( $\lambda \epsilon \gamma \cdot \sigma \omega$ ),  $\epsilon \lambda \epsilon \xi \omega$ ,  $\lambda \epsilon \cdot \lambda \epsilon \gamma \cdot \mu \omega$ ,  $\epsilon \cdot \lambda \epsilon \chi \cdot \theta \eta \nu$  (71), and all other forms. But in  $\phi \alpha \epsilon \omega$ , show, the verb stem  $\phi \alpha \nu$  is seen pure in the second aorist  $\epsilon \cdot \phi \alpha \nu \gamma \nu$  and kindred tenses, and in the futures  $\phi \alpha \nu \omega$  and  $\phi \alpha \nu \omega \nu \omega$ , while elsewhere it appears modified, as in present  $\phi \alpha \epsilon \nu \omega$ , first aorist  $\epsilon \phi \eta \nu \cdot \alpha$ , second perfect  $\pi \epsilon \phi \eta \nu \cdot \alpha$ . In  $\lambda \epsilon \epsilon \pi \omega$  the stem  $\lambda \epsilon \epsilon \pi$  appears in all forms except in the second-aorist system ( $\epsilon \cdot \lambda \epsilon \pi \cdot \omega \nu \cdot \epsilon \cdot \lambda \epsilon \pi \cdot \delta \omega \gamma \nu \nu$ ) and the second-perfect system ( $\lambda \epsilon \cdot \lambda \omega \tau \cdot \delta \omega \nu \cdot \epsilon \nu \cdot \delta \omega \nu \nu$ ).

- 460. Verb stems are defined vowel stems or consonant stems, and the latter are called mute stems (including labial, palatal, and lingual stems) or liquid stems, according to their final letter. Thus we may name the stems of  $\phi i\lambda i\omega$  ( $\phi i\lambda \epsilon$ -),  $\lambda \epsilon i\pi \omega$  ( $\lambda \epsilon i\pi$ -,  $\lambda \epsilon i\pi$ -),  $\tau \rho t\beta \omega$  ( $\tau \rho i\beta$ -),  $\gamma \rho a \phi \omega$  ( $\gamma \rho a \phi$ -),  $\pi \lambda i \kappa \omega$  ( $\pi \lambda i \kappa$ -),  $\phi \epsilon i \gamma \omega$  ( $\phi \epsilon \nu \gamma$ -),  $\pi \epsilon i \theta \omega$  ( $\pi \epsilon i \theta$ -),  $\phi a i \gamma \omega$  ( $\phi a \nu$ -),  $\sigma \tau i \lambda \lambda \omega$  ( $\sigma \tau \epsilon \lambda$ -).
- 461. A verb which has a vowel verb stem is called a pure verb; and one which has a mute stem or a liquid stem is called a mute or a liquid verb.
- 462. 1. The principal parts of a Greek verb are the first person singular of the present, future, first aorist, and (first or second) perfect, indicative active; the perfect middle, and the (first or second) aorist passive; with the second aorist (active or middle) when it occurs. These generally represent all the tense systems which the verb uses. E.g.

Λύω, λύσω, ἔλυσα, λέλυκα, λέλυμαι, ἐλύθην (471).

Λείπω (λειπ-, λιπ-), λείψω, λέλοιπα, λέλειμμαι, ελείφθην, ελιπον. Φαίνω (φαν-), φανῶ, εφηνα, πέφαγκα (2 pf. πέφηνα), πέφασμαι, εφάνθην (and εφάνην).

Πράσσω (πρᾶγ-), do, πρᾶξω, ἔπρᾶξα, 2 perf. πέπρᾶχα and πέπρᾶγα,

πέπραγμαι, ἐπράχθην.

Στέλλω (στελ-), send, στελώ, ἔστειλα, ἔσταλκα, ἔσταλμαι, ἐστάλην.

- If a verb has no future active, the future middle may be given among the principal parts; as σκώπτω, jeer, σκώψομαι, ἔσκωψα, ἐσκώφθην.
- 463. In deponent verbs the principal parts are the present, future, perfect, and agrist (or agrists) indicative. E.g.

(Ἡγόρμαι) ἡγοῦμαι, lead, ἡγήσομαι, ἡγησάμην, ἥγημαι, ἡγήθην (in compos.).

Βούλομαι, wish, βουλήσομαι, βεβούλημαι, εβουλήθην. Γίγνομαι (γεν.), become, γενήσομαι, γεγένημαι, εγενόμην. (Αιδέομαι) αιδούμαι, respect, αιδέσομαι, ήδεσμαι, ήδεσθην. Έργαζομαι, work, εμγάσομαι, εἰργασάμην, εἰργασμαι, εἰργασθην.

#### CONJUGATION.

- 464. To conjugate a verb is to give all its voices, moods, tenses, numbers, and persons in their proper order.
  - 465. These parts of the verb are formed as follows:
- 1. By modifying the verb stem itself to form the different tense stems. (See 568-622; 660-717.)
- 2. By affixing certain syllables called endings to the tense stem; as in λέγο-μεν, λέγε-τε, λέγε-ται, λεγό-μεθα, λέγο-νται, λέξε-ται, λέξε-σθε. (See 551-554.)
- 3. In the secondary tenses of the indicative, by also prefixing ε to the tense stem (if this begins with a consonant), or lengthening its initial vowel (if it begins with a short vowel); as in ξ-λεγο-ν, ξ-λεξε, ε-φήνα-το; and in ήκουο-ν and ήκουσα, imperfect and agrist of ἀκούω, hear. This prefix or lengthening is confined to the indicative.
- 4. A prefix, seen in  $\lambda\epsilon$  of  $\lambda\epsilon\lambda\nu\kappa\alpha$  and  $\lambda\epsilon\lambda\epsilon\mu\mu\alpha\iota$ , in  $\pi\epsilon$  of  $\pi\epsilon\phi\alpha\sigma\mu\alpha\iota$ , and  $\epsilon$  of  $\epsilon\sigma\tau\alpha\lambda\mu\alpha\iota$  (487, 1), for which a lengthening of the initial vowel is found in  $\hbar\lambda\lambda\alpha\gamma\mu\alpha\iota$  ( $\hbar\lambda\lambda\alpha\gamma$ ) from  $\hbar\lambda\lambda\alpha\sigma\sigma\omega$  (487, 2), belongs to the perfect tense stem, and remains in all the moods and in the participle.
- 466. These prefixes and lengthenings, called augment (3) and reduplication (4), are explained in 510-550.
- 467. There are two principal forms of conjugation of Greek verbs, that of verbs in  $\omega$  and that of verbs in  $\mu\iota$ .
- **468.** Verbs in  $\mu$  form a small class, compared with those in  $\omega$ , and are distinguished in their inflection almost exclusively in the present and second-aorist systems, generally agreeing with verbs in  $\omega$  in the other systems.

## CONJUGATION OF VERBS IN $\Omega$ .

- 469. The following synopses (474-478) include -
- I. All the tenses of  $\lambda \delta \omega$  ( $\lambda \bar{\nu}$ -), loose, representing tense systems I., II., III., V., VIII., VIII.

473]

- II. All the tenses of  $\lambda \epsilon i\pi \omega$  ( $\lambda \epsilon i\pi$ -), leave; the second perfect and pluperfect active and the second agrist active and middle, representing tense systems IV. and VI., being in heavy-faced type.
- III. All the tenses of  $\phi \alpha i \nu \omega$  ( $\phi \alpha \nu$ ), show; the future and a rist active and middle (liquid form) and the second a rist and second future passive, representing tense systems II., III., and IX., being in heavy-faced type.
- 470. The full synopsis of  $\lambda \tilde{v}\omega$ , with the forms in heavier type in the synopses of  $\lambda \epsilon i\pi\omega$  and  $\phi \alpha i\nu\omega$ , will thus show the full conjugation of the verb in  $\omega$ , with the nine tense systems; and all these forms are inflected in 480-482. For the peculiar inflection of the perfect and pluperfect middle and passive of verbs with consonant stems, see 486 and 487.
- 471. N. Avo in the present and imperfect generally has v in Attic poetry and  $\tilde{v}$  in Homer; in other tenses, it has  $\tilde{v}$  in the future and acrist active and middle and the future perfect, elsewhere  $\tilde{v}$ .
- 472. The paradigms include the perfect imperative active, although it is hardly possible that this tense can actually have been formed in any of these verbs. As it occurs, however, in a few verbs (748), it is given here to complete the illustration of the forms. For the rare perfect subjunctive and optative active, see 720 and 731.
- 473. Each tense of  $\lambda \dot{\nu} \omega$  is translated in the synopsis of 474, except rare untranslatable forms like the future perfect infinitive and participle, and the tenses of the subjunctive and optative. The meaning of these last cannot be fully understood until the constructions are explained in the Syntax. But the following examples will make them clearer than any possible translation of the forms, some of which (e.g. the future optative) cannot be used in independent sentences.

Λύωμεν (οτ λύσωμεν) αὐτόν, let us loose him; μὴ λύσης αὐτόν, do not loose him. Έὰν λύω (οτ λύσω) αὐτὸν, χαιρήσει, if I (shall) loose him, he will rejoice. Ερχομιι, ΐνα αὐτὸν λύω (οτ λύσω), I am coming that I may loose him. Είθε λύοιμι (οτ λύσωμι) αὐτόν, O that I may loose him. Εὶ λύοιμι (οτ λύσαιμι) αὐτὸν, χαίροι ἄν, if I should loose him, he would rejoice. Ηλθον ΐνα αὐτὸν λύοιμι (οτ λύσαιμι), I came that I might loose him. Εἶπον ὅτι αὐτὸν λύοιμι, I said that I was loosing him; εἶπον ὅτι αὐτὸν λύσαιμι, I said that I had loosed him; εἶπον ὅτι αὐτὸν λύσοιμι, I said that I would loose him. For the difference between the present and aorist in these moods, see 1272, I; for the perfect, see I273.

VERBAL ADJECTIVES: λειπτός, λειπτέος

- 477. 1. The active of  $\lambda \epsilon (\pi \omega)$  in the various tenses means I leave (or am leaving), I left (or was leaving), I shall leave, etc. The second perfect means I have left, or I have failed or am wanting. The first acrist  $\tilde{\epsilon}\lambda\epsilon\psi$ a is not in good use.
- 2. The middle of  $\lambda \epsilon i \pi \omega$  means properly to remain (leave one's self), in which sense it differs little (or not at all) from the passive. But the second aorist  $\epsilon \lambda \iota \pi \delta \mu \eta \nu$  often means I left for myself (e.g. a memorial or monument): so the present and future middle in composition. E $\lambda \iota \pi \delta \mu \eta \nu$  in Homer sometimes means I was left behind or was inferior, like the passive.
- 3. The passive of  $\lambda \epsilon'_{i\pi 0}$  is used in all tenses, with the meanings I am left, I was left, I have been left, I had been left, I shall have been left, I was left, I shall be left. It also means I am inferior (left behind).

479. 1. The first perfect πέφαγκα means I have shown; the second perfect πέφηνα means I have appeared.

2. The passive of pairs means properly to be shown or made evident; the middle, to appear (show one's self). The second future passive φανήσομαι, I shall appear or be shown, does not differ in sense from φανούμαι; but ἐφάνθην is generally passive, I was shown, while ἐφάνην is I appeared. The agrist middle εφηνάμην means I showed; the simple form is rare and poetic; but ἀπ-εφηνάμην, I declared, is common.

- **483.** The uncontracted forms of the future active and middle of  $\phi a i \nu \omega$  (478) and of other liquid futures are not Attic, but are found in Homer and Herodotus. So with some of the uncontracted forms of the acrist subjunctive passive in  $\epsilon \omega$  (474).
- 484. The tenses of  $\lambda \epsilon i \pi \omega$  and  $\phi \alpha i \nu \omega$  which are not inflected above follow the corresponding tenses of  $\lambda i \omega$ ; except the perfect and pluperfect middle, for which see 486.  $\Lambda \epsilon \lambda \epsilon \iota \mu$ - $\mu a \iota$  is inflected like  $\tau \epsilon \tau \rho \iota \mu$ - $\mu a \iota$  (487, 1), and  $\pi \epsilon \phi a \sigma$ - $\mu a \iota$  is inflected in 487, 2.
- 485. Some of the dissyllabic forms of λύω do not show the accent so well as polysyllabic forms, e.g. these of κωλύω, hinder:—

Pres. Imper. Act. κώλυε, κωλυέτω, κωλύετε. Aor. Opt. Act. κωλύσαιμι, κωλύσεως (οτ κωλύσαις), κωλύσειε (οτ κωλύσαι). Aor. Imper. Act. κώλυσον, κωλυσάτω. Aor. Inf. Act. κωλυσαι. Aor. Imper. Mid. κώλυσαι, κωλυσάσθω.

The three forms κωλύσαι, κωλύσαι, κώλῦσαι (cf. λύσαι, λῦσαι, λῦσαι) are distinguished only by accent. See 130; 113; 131, 4.

- 2. When the stem ends in a consonant, the third person plural of these tenses is formed by the perfect middle participle with eloi, are, and hoar, were (806).
- 487. 1. These tenses of  $\tau \rho l \beta \omega$ , rub,  $\pi \lambda i \kappa \omega$ , weave,  $\pi \epsilon i \theta \omega$  persuade, and  $\sigma \tau i \lambda \lambda \omega$  ( $\sigma \tau \alpha \lambda$ -), send, are thus inflected:—

- **488.** N. The regular third person plural here (τετρίβ-νται, ἐπεπλεκ-ντο, etc., formed like λέλυ-νται, ἐλέλυ-ντο) could not be pronounced. The periphrastic form is necessary also when σ is added to a vowel stem (640), as in τετέλεσ-μαι. But when final ν of a stem is dropped (647), the regular forms in νται and ντο are used; as κλίνω, κέκλι-μαι, κέκλινται (not κεκλιμένοι εἰσί).
  - 489. For the euphonic changes here, see 71-77 and 83.
- 1. Thus τέτριμ-μαι is for τετριβ-μαι (75); τέτριψαι for τετριβσαι (74); τέτριπ-ται for τετριβ-ται, τέτριφ-θον for τετριβ-θον (71).

  So πέπλεγ-μαι is for πεπλεκ-μαι (75); πέπλεχ-θον for πεπλεκ-θον
  (71). Πέπεισ-ται is for πεπειθ-ται, and πέπεισ-θον is for πεπειθθον (71); and πέπεισμαι (for πεπειθ-μαι) probably follows their analogy; πέπει-σαι is for πεπειθ-σαι (74).
- 2. In  $\tau\epsilon\tau\dot{\epsilon}\lambda\dot{\epsilon}\sigma$ - $\mu\alpha\iota$ ,  $\sigma$  is added to the stem before  $\mu$  and  $\tau$  (640), the stem remaining pure before  $\sigma$ . Te $\tau\dot{\epsilon}\lambda\dot{\epsilon}\sigma\mu\alpha\iota$  and  $\pi\dot{\epsilon}\pi\dot{\epsilon}\iota\sigma\mu\alpha\iota$ , therefore, inflect these tenses alike, though on different principles. On the other hand, the  $\sigma$  before  $\mu$  in  $\pi\dot{\epsilon}\phi\alpha\sigma\mu\alpha\iota$  (487, 2) is a sub-

stitute for  $\nu$  of the stem (83), which  $\nu$  reappears before other letters (700). In the following comparison the distinction is shown by the hyphens:—

τετέλε-σ-μαι	πέπεισ-μαι	πέφασ-μαι
τετέλε-σαι	πέπει-σαι	[πέφαν-σαι]
τετέλε-σ-ται	πέπεισ-ται	πέφαν-ται
τετέλε-σθε	πέπεισ-θε	πέφαν-θε

- 3. Under ἤλλαγ-μαι, ἤλλαξαι is for ἦλλαγ-σαι, ἤλλακ-ται for ἦλλαγ-ται, ἤλλαχ-θον for ἦλλαγ-θον (74; 71). Under ἐλήλεγ-μαι, γγμ (for γχμ) drops one γ (77); ἐλήλεγξαι and ἐλήλεγκ-ται are for ἐληλεγχ-σαι and ἐληλεγχ-ται (74; 71). See also 529.
- 490. 1. All perfect-middle stems ending in a labial inflect these tenses like τέτριμ-μαι; as λείπω, λέλειμ-μαι; γράφω (γραφ-), write, γέγραμ-μαι (75); ρίπτω (ρίφ-, ρίφ-), throw, ἔρριμ-μαι. But when final μπ of the stem loses π before μ (77), the π recurs before other consonants; as κάμπτω (καμπ-), bend, κέκαμ-μαι, κέκαμψαι, κέκαμπ-ται, κέκαμφ-θε; πέμπω (πεμπ-), send, πέπεμ-μαι, πέπεμψαι, πέπεμ-ται, πέπεμφ-θε: compare πέπεμ-μαι from πέσσω (πεπ-), cook, inflected πέπεψαι, πέπεπ-ται, πέπεφ-θε, etc.
- 2. All ending in a palatal inflect these tenses like  $\pi \epsilon \pi \lambda \epsilon \gamma \mu a \iota$  and  $\tilde{\eta} \lambda \lambda \alpha \gamma \mu a \iota$ ; as  $\pi \rho \tilde{a} \sigma \sigma \omega$  ( $\pi \rho \tilde{a} \gamma \cdot$ ), do,  $\pi \epsilon \pi \rho \tilde{a} \gamma \cdot \mu a \iota$ ;  $\tau \alpha \rho \tilde{a} \sigma \sigma \omega$  ( $\tau \alpha \rho \alpha \gamma \cdot$ ), confuse,  $\tau \epsilon \tau \tilde{a} \rho \alpha \gamma \cdot \mu a \iota$ ;  $\phi \nu \lambda \tilde{a} \sigma \sigma \omega$  ( $\phi \nu \lambda \alpha \kappa \cdot$ ),  $\pi \epsilon \phi \tilde{\nu} \lambda \alpha \gamma \cdot \mu a \iota$ . But when  $\gamma$  before  $\mu$  represents  $\gamma \gamma$ , as in  $\epsilon \lambda \tilde{\eta} \lambda \epsilon \gamma \cdot \mu a \iota$  from  $\epsilon \lambda \tilde{\epsilon} \gamma \chi \cdot \omega$  (489, 3), the second palatal of the stem recurs before other consonants (see 487, 2).
- 3. All ending in a lingual mute inflect these tenses like πέπεισμαι, etc.; as φράζω (φραδ·), tell, πέφρασ-μαι, πέφρασ-ται; εθίζω (εθιδ·), accustom, είθισ-μαι, είθισ-αι, είθισ-ται, είθισ-θε; pluf.
  είθισ-μην, είθι-σο, είθισ-το; σπένδω (σπενδ·), pour, εσπεισ-μαι (like πέπεισ-μαι, 489, 1) for εσπενδ-μαι, εσπεισ-αι, εσπεισ-ται, εσπεισ-θε.
- Most ending in ν (those in aν- and υν- of verbs in ανω or ῦνω) are inflected like πέφασ-μαι (see 489, 2).
- 5. When final  $\nu$  of a stem is dropped (647), as in  $\kappa\lambda\ell\nu\omega$ , bend,  $\kappa\epsilon\kappa\lambda\iota$ - $\mu\omega$ , the tense is inflected like  $\lambda\epsilon\lambda\nu$ - $\mu\omega$  (with a vowel stem).
- 6. Those ending in  $\lambda$  or  $\rho$  are inflected like ἔσταλ-μαι; as ἀγγέλλω (ἀγγέλ·), aunounce, η̈γγέλ-μαι; αϊρω (ἀρ-), raise, ηρ-μαι; ἐγείρω (ἐγερ-), rouse, ἐγήγερ-μαι; πείρω (περ-), pierce, πέπαρ-μαι (045).
- 491. For the full forms of these verbs, see the Catalogue. For φαίνω, see also 478.

- **495.** 1. Dissyllabic verbs in  $\epsilon\omega$  contract only  $\epsilon\epsilon$  and  $\epsilon\epsilon\iota$ . Thus  $\pi\lambda\epsilon\omega$ , sail, has pres.  $\pi\lambda\epsilon\omega$ ,  $\pi\lambda\epsilon$ is,  $\pi\lambda\epsilon$ i,  $\pi\lambda\epsilon$ iτον,  $\pi\lambda\epsilon$ ουσι; imperf.  $\epsilon\pi\lambda\epsilon$ ουν,  $\epsilon\pi\lambda\epsilon$ ις,  $\epsilon\pi\lambda\epsilon$ ις, etc.; infin.  $\pi\lambda\epsilon$ iν; partic.  $\pi\lambda\epsilon\omega\nu$ .
- 2.  $\Delta \epsilon \omega$ , bind, is the only exception, and is contracted in most forms; as  $\delta o \hat{v} \sigma \omega$ ,  s contracted like  $\pi \lambda \epsilon \omega$ .
- **496.** N. A few verbs in  $\alpha\omega$  have  $\eta$  for  $\bar{\alpha}$  in the contracted forms; as διψάω, διψώ, thirst, διψής, διψής, διψήτε; imperf.  $\epsilon$ δίψων,  $\epsilon$ δίψης,  $\epsilon$ δίψη; infin. διψήν. So ζάω, live, κνάω, scrape,  $\pi\epsilon$ ινάω, hunger, σμάω, smear, χράω, give oracles, with χράομαι, use, and ψάω, rub.
- 497. N. 'Ρίγόω, shiver, has infinitive ρίγων (with ρίγουν), and optative ρίγων. 'Ίδρόω, sweat, has ίδρωσι, ίδρωη, ίδρωντι, etc.
- Λούω, wash, sometimes drops v, and λόω is then inflected like δηλόω; as έλου for έλουε, λούμωι for λούομωι.
  - 498. N. The third person singular of the imperfect active does

not take ν movable in the contracted form; thus ἐφίλεε or ἐφίλεεν gives ἐφίλει (never ἐφίλειν). See 58.

499. For (áciv) av and (óciv) our in the infinitive, see 39, 5.

### CONJUGATION OF VERBS IN MI.

- **500.** The peculiar inflection of verbs in  $\mu$  affects only the present and second agrist systems, and in a few verbs the second perfect system. Most second agrists and perfects here included do not belong to presents in  $\mu$ , but are irregular forms of verbs in  $\omega$ ; as  $\tilde{\epsilon}\beta\eta\nu$  (second agrist of  $\beta\alphai\nu\omega$ ),  $\tilde{\epsilon}\gamma\nu\omega\nu$  ( $\gamma\iota\gamma\nu\omega\sigma\kappa\omega$ ),  $\tilde{\epsilon}\pi\tau\dot{\alpha}\mu\eta\nu$  ( $\pi\dot{\epsilon}\tau\sigma\mu\alpha\iota$ ), and  $\tau\dot{\epsilon}\theta\nu\alpha\mu\epsilon\nu$ ,  $\tau\dot{\epsilon}\theta\nu\alpha\dot{\epsilon}\eta\nu$ ,  $\tau\dot{\epsilon}\theta\nu\dot{\alpha}\nu\alpha\iota$  (second perfect of  $\theta\nu\dot{\gamma}\sigma\kappa\omega$ ). (See 798, 799, 804.)
- **501.** Tenses thus inflected are called  $\mu$ -forms. In other tenses verbs in  $\mu$  are inflected like verbs in  $\omega$  (see the synopses, 509). No single verb exhibits all the possible  $\mu$ -forms, and two of the paradigms,  $\tau(\theta\eta\mu)$  and  $\delta(\delta\omega\mu)$ , are irregular and defective in the second agrist active (see 802).
  - 502. There are two classes of verbs in μ: —
- (1) Those in  $\eta\mu$  (from stems in a or  $\epsilon$ ) and  $\omega\mu$  (from stems in o), as  $\tilde{\iota}$ - $\sigma\tau\eta$ - $\mu$  ( $\sigma\tau a$ -), set,  $\tau i$ - $\theta\eta$ - $\mu$  ( $\theta\epsilon$ -), place,  $\delta i$ - $\delta\omega$ - $\mu$  ( $\delta\sigma$ -), give.
- (2) Those in νομι, which have the μι-form only in the present and imperfect; these add νυ (after a vowel ννυ) to the verb stem in these tenses, as δείκ-νι-μι (δεικ-), show, ρόω-ννυ-μι (ρω-), strengthen. For poetic verbs in νημι (with να added to the stem), see 609 and 797, 2.
  - **503.** For a full enumeration of the  $\mu$ -forms, see 793-804.

505. As ἴστημι wants the second acrist middle, ἐπριάμην, I bought (from a stem πρια- with no present), is added here and in the inflection. As δείκνῦμι wants the second acrist (502, 2), ἔδῦν, I entered (from δύω, formed as if from δῦ-μι), is added. No second acrist middle in υμην occurs, except in scattered poetic forms (see λύω, πνέω, σεύω, and χέω, in the Catalogue).

506. Inflection of ἴστημι, τίθημι, δίδωμι, and δείκνῦμι in the Present and Second Aorist Systems; with ἔδῦν and ἐπριάμην (505).

### AUGMENT.

- 510. In the secondary tenses of the indicative, the verb receives an augment (i.e. increase) at the beginning, which marks these as past tenses.
  - 511. Augment is of two kinds: -
- 1. Syllabic augment, which prefixes  $\epsilon$  to verbs beginning with a consonant; as  $\lambda \hat{\nu}\omega$ , imperfect  $\mathring{\epsilon}-\lambda \tilde{\nu}o\nu$ ;  $\lambda \epsilon i\pi \omega$ , second acrist  $\mathring{\epsilon}-\lambda \iota\pi o\nu$ .
- 2. Temporal augment, which lengthens the first syllable of verbs beginning with a vowel or diphthong; as ἄγω, lead, imperf. ἡγου; οἰκέω, οἰκῶ, dwell, aor. ὤκησα.

512. The augment is confined strictly to the indicative, never appearing in the other moods or the participle, even when any of these denote past time.

# IMPERFECT AND AORIST INDICATIVE.

513. The imperfect and agrist indicative of verbs beginning with a consonant have the syllabic augment  $\epsilon$ . E.q.

Λύω, ἔλῦον, ἔλῦσα, ἐλῦόμην, ἐλῦσάμην, ἐλύθην; γράφω, write, ἔγραφον, ἔγραψα, ἐγράφην; ῥίπτω, throw, ἔρρῦπτον, ἐρρίφην.

For  $\rho$  doubled after the syllabic augment, see 69.

- **514.** In Homer any liquid (especially  $\lambda$ ) may be doubled after the augment  $\epsilon$ ; as  $\tilde{\epsilon}\lambda\lambda\alpha\chi\sigma\nu$  for  $\tilde{\epsilon}\lambda\alpha\chi\sigma\nu$ ,  $\tilde{\epsilon}\mu\mu\alpha\theta\epsilon$  for  $\tilde{\epsilon}\mu\alpha\theta\epsilon$ . So sometimes  $\sigma$ ; as  $\tilde{\epsilon}\sigma\sigma\epsilon\acute{\epsilon}\sigma\tau$  from  $\sigma\epsilon\acute{\epsilon}\omega$ .
- 515. The imperfect and agrist indicative of verbs beginning with a short vowel have the temporal augment, which lengthens the initial vowel;  $\check{a}$  and  $\epsilon$  becoming  $\eta$ , and  $\check{\iota}$ , o,  $\check{v}$  becoming  $\bar{\iota}$ ,  $\omega$ ,  $\bar{v}$ . E.g.

"Αγω, lead, ήγον, ήχθην; ελαύνω, drive, ήλαυνον; ίκετεύω, implore, ἔκέτευον, ἐκέτευσα; ὀνειδίζω, reproach, ώνείδιζον; ὑβρίζω insult, ὑβρίσθην; ἀκολουθέω, accompany, ἡκολούθησα; ὀρθόω, erect, ωρθωσα.

- 516. A long initial vowel is not changed, except that  $\bar{\alpha}$  generally becomes  $\eta$ ; as  $\hat{a}\theta\lambda\epsilon\omega$ , struggle,  $\hat{\eta}\theta\lambda\eta\sigma a$ . But both  $\bar{\alpha}$  and  $\eta$  are found in  $\hat{a}v\bar{a}\lambda\epsilon\sigma\kappa\omega$  and  $\hat{a}v\bar{a}\lambda\epsilon\omega$ , and  $\hat{a}\epsilon\omega$  (poetic), hear, has  $\tilde{a}\epsilon\sigma\nu$ .
- 517. Βούλομαι, wish, δύναμαι, he able, and μέλλω, intend, often have  $\eta$  for  $\epsilon$  in the augment, especially in later Attic; as  $\epsilon$ βουλόμην οτ  $\dot{\eta}$ βουλόμην,  $\dot{\epsilon}$ βουλήθην οτ  $\dot{\eta}$ βουλήθην;  $\dot{\epsilon}$ δυνάμην οτ  $\dot{\eta}$ δυνήθην  $\dot{\epsilon}$ δυνήθην;  $\dot{\epsilon}$ εμέλλον οτ  $\dot{\eta}$ μελλον.
- 518. A diphthong takes the temporal augment on its first vowel,  $a\iota$  or a becoming  $\eta$ . E.g.

Αἰτέω, ask, ἤτησα; εἰκάζω, guess, ἤκασα; οἰκέω, dwell, ϣκησα; αὐξάνω, increase, ηὕξησα, ηὐξήθην; ἄδω, sing, ἤδον.

519. Ou is never augmented. Et and ευ are often without augment, especially in later Attic; but Mss. and editors differ in regard to many forms, as εἴκασα or ηκασα (from εἰκάζω, liken), εὖδον or ηὖδον (from εὖδω, sleep), εὖρέθην or ηὖρέθην (from εὖρίσκω, find), εὖξάμην or ηὖξάμην (from εὖχομαι, pray). Editions vary also in the augment of αὐαίνω, dry, and of some verbs beginning with ot, as οἰᾶκοστροφέω, steer.

### REDUPLICATION.

520. The perfect, pluperfect, and future perfect, in all the moods and in the participle, have a reduplication, which is the mark of completed action.

# PERFECT AND FUTURE PERFECT.

521. Verbs beginning with a single consonant (except  $\rho$ ) are reduplicated in the perfect and future perfect by prefixing that consonant followed by  $\epsilon$ . E.g.

Λύω, λέ-λυκα, λέ-λυμαι, λε-λυκέναι, λε-λυκώς, λε-λυμένος, λε-λύσομαι; λείπω, λίλοιπα, λέλειμμαι, λελείψομαι. So θύω, sacrifice, τέ-θυκα; Φαίνω (φαν), show, πέ-φασμαι, πε-φάνθαι; χαίνω, gape, κέ-χηνα.

For the pluperfect, sec 527.

**522.** N. (a) Five verbs have  $\alpha$  in the perfect instead of the reduplication:—

λαγχάνω (λαχ-), obtain by lot, είληχα, είληγμαι;

λαμβάνω (λαβ-), take, είληφα, είλημμαι (poet. λέλημμαι);

λέγω, collect, in composition, -είλοχα, -είλεγμαι with -λέλεγμαι; διαλέγομαι, discuss, has δι-είλεγμαι;

μείρομαι (μερ-), obtain part, είμαρται, it is fated;

from stem (ρε-) εἴρηκα, have said, εἴρημαι, fut. pf. εἰρήσομαι (see εἶπον).

- (b) An irregular reduplication appears in Homeric δείδωκα and δείδω, from δείδω, fear, and δείδεγμαι (for δέδεγμαι), greet, from a stem δεκ- (see δείκνυμι).
- 523. In verbs beginning with two consonants (except a mute and a liquid), with a double consonant  $(\zeta, \xi, \psi)$ , or with  $\rho$ , the reduplication is represented by a simple  $\epsilon$ , having the same form as the syllabic augment. E.g.

Στέλλω, send, έσταλκα; ζητέω, seek, εζήτηκα; ψεύδω, cheat, έψευ-

σμαι, έψευσμένος; βίπτω, throw, έρριμμαι, έρριφθαι (69).

**524.** 1. Most verbs beginning with a mute and a liquid have the full reduplication; as γράφω, write, γέγραφα, γέγραμμαι, γεγράφθαι, γεγραμμένος.

 But those beginning with yν, and occasionally a few in βλ or yλ, have ε; as γνωρίζω, recognize, perf. εγνώρικα; γιγνώσκω

(γνο), κποω, έγνωκα. See βλαστάνω and γλύφω.

525. N. Μιμνήσκω (μνα-), remind, has μέμνημαι (memini), remember, and κτάομαι, acquire, has both κέκτημαι and έκτημαι, possess. See also Homeric perfect passive of μέπτω and μυπόω.

526. Verbs beginning with a short vowel lengthen the vowel, and those beginning with a diphthong lengthen its first vowel, in all forms of the perfect and future perfect, the reduplication thus having the form of the temporal augment. E.g.

"Αγω, lead, ήχα, ήγμαι, ήγμένος; ἀκολουθέω, follow, ήκολούθηκα, ήκολουθηκέναι; όρθόω, crect, ώρθωμαι; όρίζω, hound, ώρικα, ώρισμαι; άτιμόω, dishonor, ήτίμωκα, ήτίμωμαι, tut. pl. ήτιμώσομαι. Αιρέω, tuke, ήρηκα, ηρημαι, ήρήσομαι; εἰκάζω, liken, ήκασμαι; εὐρίσκω, fini,

ηύρηκα, ηύρημαι (οι εύρηκα, εύρημαι, 519).

Long a may become η (see 516); as in ἀναλίσκω, pf. ἀνήλωκα or ἀναλωκα.

### PRUPERFECT.

527. When the reduplicated perfect begins with a consonant, the pluperfect prefixes the syllabic augment  $\epsilon$  to the reduplication. In other cases the pluperfect keeps the reduplication of the perfect without change. E.g.

Λύω, λέλυκα, ε-λελύκη, λέλυμαι, ε-λελύμην; στέλλω, ἔσταλκα, ἐστάλκη, ἔσταλμαι, ἐστάλμην; λαμβάνω, εἴληφα, εἰλήφη; ἀγγέλλω, ἤγγελκα, ἤγγέλκη, ἤγγελμαι, ἤγγελμαν; αἰρέω, ἤρηκα, ήρήκη; εὑρίσκω, ηὑρηκα, ηὑρήκη, ηὑρήμην, (οι εὑρ-).

528. N. From ἴστημι (στα-), set, we have both εἰστήκη (older form) and ἐστήκη (through perl. ἔστηκα); and from perf. ἔσικα, resemble, ἐψκη.

### ATTIC REDUPLICATION.

529. Some verbs beginning with a,  $\epsilon$ , or o, followed by a single consonant, reduplicate the perfect and phaperfect by prefixing their first two letters, and lengthening the following vowel as in the temporal augment. This is called  $Attic\ reduplication$ . E.g.

'Αρόω, plough, ἀρ-ήρομαι; ἐμέω, vomit, ἐμήμεκα; ἐλέγχω, prove, ἐλήλεγμαι; ἐλαύνω (ἐλα-), drive, ἐλήλακα, ἐλήλαμαι; ἀκούω, hear, ἀκήκοι. For the pluperfect, see 533.

- 530. N. The Attic reduplication (so called by the Greek grammarians) is not peculiarly Attic, and is found in Homer.
- 531. N. Other verbs which have the Attic reduplication are ἀγείρω, ἀλείφω, ἀλέω, ἐγείρω, ἐρείδω, ἔρχομαι, ἐσθίω, ὅλλῦμι, ὅμνῦμι, ὁρύσσω, φέρω. See also, for louic or poetic forms, αἰρέω, ἀλάομαι, ἀλυκτέω, ἀραρίσκω, ἐρείπω, ἔχω, ἡμύω, (ὀδυ-) ὀδώδυσμαι, ὅζω, ὁράω (ὅπωπα), ὀρίγω, ὄρν: μι (ὀρ·).

- **532.** N. Έγείρω (ἐγερ-), rouse, has 2 perf. ἐγρ-ήγορα (for ἐγ-ηγορ-α, 643), but perf. mid. ἐγ-ήγερμαι.
- 533. By strict Attic usage, the pluperfect takes a temporal augment in addition to the Attic reduplication. Thus, ἀκούω, hear, ἀκήκοα, plup. ἡκηκόη; so ἀπ-ωλώλει (of ἀπ-όλλυμι, ἀπ-όλωλα), ωμωμόκει (of ὅμνυμι, ὁμώμοκα), and δι-ωρώρυκτο (of δι-ορύσσω, δι-ορώρυγμαι) occur in Attic prose. See also Homeric pluperfects of ἐλαύνω and ἐρείδω.

But the MSS and the editions of Attic authors often omit the additional augment, as in  $i\lambda - \eta \lambda i \gamma \mu \eta \nu$  (487, 2).

### REDUPLICATED AORISTS.

- 534. N. The second agrist active and middle in all the moods and the participle sometimes has a reduplication in Homer; as πέφραδον from φράζω, tell; πέπιθον from πείθω (πιθ-), persuade; τεταρπόμην (646) from τέρπω, delight; κεκλόμην and κεκλόμενος (650) from κέλομαι, command; ήραρον from ἀραρίσκω (ἀρ-), join (531); ώρορον from ὄρνῦμμ (ὀρ-), rouse; πεπαλών (partic.) from πάλλω (παλ-), shake; κεκάμω (subj.) from κάμνω (καμ-), so λελάχω from λαγχάνω; πεφιδέσθαι, inf. from φείδομαι (φιδ-), spare, so λελαθέσθαι, λελαβέσθαι. In the indicative a syllabic augment may be prefixed to the reduplication; as ἐκεκλόμην, ἔπεφνον (from φεν-), ἐπέφραδον.
- 535. N. The second agrist of ἄγω, lead, has a kind of Attic reduplication (529), which adds the temporal augment in the indicative. Thus ἡγ-αγ-ον (ἀγ-αγ-), subj. ἀγάγω, opt. ἀγάγοιμι, inf. ἀγαγεῖν, part. ἀγαγών; mid. ἡγαγόμην, ἀγάγωμαι, etc., all in Attic prose. See also the agrists ἡνεγκα and ἡνεγκον (from stem ἐνεκ-, ἐν-ενεκ-, ἐν-ενεκ-) of φέρω, the Homeric ἄλαλκον (for ἀλ-αλεκ-ον) of ἀλέξω, ward off, and ἐνένῖπον or ἡνίπ-απ-ον of ἐνίπτω (ἐνιπ-), chide. See also ἐρύκω, ἡρῦκ-ακ-ον.

# REDUPLICATED PRESENTS.

**536.** A few verbs reduplicate the present by prefixing the initial consonant with  $\iota$ ; as  $\gamma\iota$ - $\gamma\nu\omega$ σκω ( $\gamma\nu$ ο-), know,  $\tau\iota$ - $\theta\eta\mu$ μ ( $\theta\epsilon$ -), put,  $\gamma\iota$ - $\gamma\nu$ ομαι (for  $\gamma\iota$ - $\gamma\epsilon\nu$ -ομαι), become.

For these see 651 and 652, with 794, 2.

E AS AUGMENT OR REDUPLICATION BEFORE A VOWEL.

537. 1. Some verbs beginning with a vowel take the syllabic augment, as if they began with a consonant. These verbs also have a simple  $\epsilon$  for the reduplication. When another  $\epsilon$  follows,  $\epsilon \epsilon$  is contracted into  $\epsilon a$ . E.g.

 $\Omega\theta$ έω (ώθ-), push, έωσα, ἔωσμαι, ἐώσθην; ἀλίσκομαι, be captured, ἐάλωκα, 2 aor. ἐάλων (or ἢλων); ἄγνῦμι (ἀγ-), break, ἔαξα, 2 pf. ἔαγα; ἔρδω, do, Ionic, 2 pf. ἔοργα; ἀνέομαι, buy, ἐωνούμην, etc.; ἐθίζω, accustom, εἴθισα, εἴθικα (from ἐεθ-); ἐάω, permit, εἴάσα, εἴακα; ἔχω, have, εἶγον (from ἐ-εχον).

2. These verbs are, further,  $\hat{\epsilon}\lambda \hat{i}\sigma\sigma\omega$ ,  $\hat{\epsilon}\lambda\kappa\omega$ ,  $\hat{\epsilon}\pi\omega$ ,  $\hat{\epsilon}\rho\gamma\hat{a}\hat{\xi}\rho\mu\alpha$ ,  $\hat{\epsilon}\rho\pi\omega$  or  $\hat{\epsilon}\rho\pi\hat{\nu}\hat{\xi}\omega$ ,  $\hat{\epsilon}\sigma\tau\hat{a}\omega$ ,  $\hat{\eta}\mu$  ( $\hat{\epsilon}$ ), with the arrists  $\hat{\epsilon}\hat{\iota}\delta\sigma\nu$  and  $\hat{\epsilon}\hat{\iota}\lambda\sigma\nu$  (a $\hat{\iota}\rho\hat{\epsilon}\omega$ ); the perfects  $\hat{\epsilon}\hat{\iota}\omega\theta$ a (with irregular  $\epsilon$ i), Ionic  $\hat{\epsilon}\omega\theta$ a ( $\hat{\eta}\theta$ -), and  $\hat{\epsilon}\hat{\iota}\kappa\alpha$  ( $\hat{\iota}\kappa$ -,  $\hat{\epsilon}\hat{\iota}\kappa$ -), and plpf.  $\hat{\epsilon}\hat{\iota}\sigma\tau\hat{\eta}\kappa\eta$  (for  $\hat{\epsilon}$ - $\hat{\epsilon}\sigma\tau$ -) of  $\hat{\iota}\sigma\tau\eta\mu$ . See also Ionic and poetic forms under  $\hat{a}\nu\delta\hat{a}\nu\omega$ ,  $\hat{a}\pi\tau\omega$ ,  $\hat{\epsilon}\hat{\iota}\delta\rho\mu\alpha$ ,  $\hat{\epsilon}\hat{\iota}\lambda\omega$ ,  $\hat{\epsilon}\hat{\iota}\pi\sigma\nu$ ,  $\hat{\epsilon}\hat{\iota}\rho\omega$ ,

έλπω, έννυμι, ίζω, and έζομαι.

538. N. Όράω, see, and ἀν-οίγω, open, generally take the temporal augment after ε; as ἐώρων, ἐώρᾶκα (οτ ἐόρᾶκα), ἐώραμαι (with the aspirate retained); ἀν-έωγον, ἀν-έωξα (rarely ἤνοιγον, ἤνοιξα, 544). Homer has ἐήνδανον from ἀνδάνω, please; ἐωνοχόει imp. of οἰνοχοέω, pour wine; and 2 plpf. ἐώλπει and ἐώργει from ἔλπω and ἔρδω. Ἑορτάζω, keep holiday (Hdt. ὁρτάζω), has Attic imp. ἐώρταζον.

**539.** N. This form is explained on the supposition that these verbs originally began with the consonant  $\rho$  or  $\sigma$ , which was afterwards dropped. Thus  $\epsilon i\delta o \nu$ , saw, is for  $\ell \epsilon i\delta o \nu$  (cf. Latin  $vid \cdot i$ );  $\ell o \rho \gamma \sigma$  is for  $\ell \epsilon \rho \sigma \rho \gamma \sigma$ , cf. Eng. work (German Werk). So  $\ell \rho \sigma \omega$ , creep, is for  $\sigma \epsilon \rho \sigma \omega$  (cf. Latin serpo), with imperf.  $\ell \cdot \sigma \epsilon \rho \sigma \sigma \nu$ ,  $\ell \cdot \ell \rho \sigma \sigma \nu$ ,  $\ell \cdot \ell \rho \sigma \sigma \nu$ , elemov (see 86); and  $\ell \chi \omega$ , have, is for  $\sigma \epsilon \chi \omega$ , whence imp.  $\ell \cdot \sigma \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ , whence imp.  $\ell \cdot \sigma \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ , whence imp.  $\ell \cdot \sigma \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ , whence imp.  $\ell \cdot \sigma \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ , whence imp.  $\ell \cdot \sigma \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \sigma \nu$ , whence imp.  $\ell \cdot \sigma \epsilon \chi \sigma \nu$ ,  $\ell \cdot \epsilon \chi \nu$ ,  $\ell \cdot \epsilon \chi \nu$ ,  $\ell \cdot \epsilon \chi \nu$ ,  $\ell \cdot \epsilon \chi \nu$ ,  $\ell \cdot \epsilon \chi \nu$ ,  $\ell \cdot \epsilon \chi \nu$ ,  $\ell \cdot \epsilon \chi \nu$ ,  $\ell \cdot \epsilon \chi \nu$ ,  $\ell \cdot \epsilon \chi \nu$ ,  $\ell \cdot \epsilon \chi \nu$ ,  $\ell \cdot \epsilon \chi$ 

elxov.

# AUGMENT AND REDUPLICATION OF COMPOUND VERBS.

540. In compound verbs (882, 1) the augment or reduplication follows the preposition. Prepositions (except  $\pi\epsilon\rho i$  and  $\pi\rho i$ ) here drop a final vowel before  $\epsilon$ . E.g.

Προσ-γράφω, προσ-έγραφον, προσ-γέγραφα; εἰσ-άγω, εἰσ-ῆγον (133, 1); ἐκ-βάλλω, ἐξ-έβαλλον (63); συλ-λέγω, συν-έλεγον; συμ-πλέκω, συν-έπλεκον (78, 1); συγ-χέω, συν-έχεον, συγ-κέχικα; συσκευάζω, συν-εσκεύαζον (81); ἀπο-βάλλω, ἀπ-έβαλλον; ἀνα-βαίνω, ἀν-έβη; — but περι-έβαλλον and προ-έλεγον.

541. N. Πρό may be contracted with the augment; as προύλεγον and προύβαινον, for προέλεγον and προέβαινον.

**542.** N. 'Ex in composition becomes  $\hat{\epsilon}\hat{\xi}$  before  $\epsilon$ ; and  $\hat{\epsilon}\nu$  and  $\sigma \hat{\nu}\nu$  resume their proper forms if they have been changed. See examples in 540.

543. N. Some denominative verbs (861), derived from nouns or adjectives compounded with prepositions, are augmented or

reduplicated after the preposition, like compound verbs; as ύποπτεύω (from ὖποπτος), suspect, ὑπώπτεύου, as if the verb were from ὑπό and ὁπτεύω; ἀπολογέομαι, defend one's self, ἀπ-ελογησάμην; see also ἐκκλησιάζω. Παρανομέω, transgress law, παρηνόμουν, etc., is very irregular. Κατηγορέω (from κατήγορος), accuse, hus κατηγόρουν (not ἐκατηγόρουν). See διαιτάω and διᾶκονέω in the Catalogue of Verbs.

Such verbs are called indirect compounds (882, 2).

- 545. 1. Indirect compounds of  $\delta w\sigma$ , ill, and occasionally those of  $\epsilon \tilde{v}$ , well, are augmented or reduplicated after the adverb, if the following part begins with a short vowel. E.g.

Δυσαρεστέω, be displeased, δυσηρέστουν; εὐεργετέω, do good,

εύηργέτουν Οι εύεργέτουν.

- 2. In other cases, compounds of δυσ- have the augment or reduplication at the beginning, as δυστυχέω (from δυστυχής, unfortunate), έδυστύχουν, δεδυστύχηκα; and those of εῦ generally omit the augment.
- 546. Other indirect compounds are augmented or reduplicated at the beginning; as οἰκοδομέω, build (from οἰκοδόμος, house-builder), ψκοδόμουν, ψκοδόμησα, ψκοδόμηται. See, however, ὁδοποιέω.

# OMISSION OF AUGMENT AND REDUPLICATION.

- 547. Homer and the lyric poets often omit both the syllabic and the temporal augment; as δμίλεον, ἔχον, δῶκε (for ώμίλουν, εἶχον, ἔδωκε).
- 548. Herodotus often omits the temporal augment of the imperfect and agrist, and the syllabic augment of the pluperfect. He never adds the temporal augment to the Attic reduplication in the pluperfect (533). He always omits the augment in the iterative forms in σκον and σκομην; as λάβεσκον, ξχασκον (778).
- 549. The Attic tragedians sometimes omit the augment in (lyric) choral passages, seldom in the dialogue.

550. The reduplication is very rarely omitted. But Homer has  $\delta \ell \chi \alpha \tau \alpha_i$ , from  $\delta \ell \chi \alpha \mu \alpha_i$ , for  $\delta \epsilon \delta \ell \chi \alpha \tau \alpha_i$ , receive, and a few other cases. Herodotus occasionally fails to lengthen the initial vowel in the perfect; as in καταρρώδηκας (for κατ-ηρρ-).

### ENDINGS

551. The verb is inflected by adding certain endings to the different tense stems. Those which mark the persons in the finite moods are called personal endings. There is one class of endings for the active voice, and another for the middle and passive; but the passive acrists have the active endings.

There is also one set of endings in each class for primary tenses, and one for secondary tenses.

552. The personal endings of the indicative, subjunctive, and optative, which are most distinctly preserved in verbs in  $\mu$  and other primitive forms, are as follows:—

ACTIVE,			MIDDLE AND PASSIVE.		
	Primary Tenses.	Secondary Tenses.	Primary Touses.	Secondary Tenses.	
Sing. 1.	μι	ν }	· μαι	μην	
2.	$s(\sigma\iota),(\theta a)$	\$	σαι	σο	
3.	σι (τι)	-	Tal	то	
Dual 2.	TOV	τον	σθον (θον)	σθον (θον)	
3.	TOV	την	σθον (θον)	σθην (θην)	
Plur. 1.	μεν (μες)	μεν (μες)	μεθα	μεθα	
2.	TE	TE	σθε (θε)	σθε (θε)	
3.	νσι (ντι), ασι	v, oav	VTal	VTO	

553. The personal endings of the imperative are as follows:—

		Activ	E.	Middle and Passive.		ASSIVE.
2. 3.	• •	Dual. τον των	Plur. τε ντων Ο)' τωσαν	Sing. σο σθω (θω)		Plur. σθε (θε) · σθων (θων) οιτ σταν (θωσαν)

554. The endings of the infinitive are as follows:—

ACTIVE: ev (contracted with preceding e to eiv), val, sometimes eval (probably for Feval).

MIDDLE AND PASSIVE: ofal (primitive fal).

555. For the formation of the participles and the verbals in τος and τεος, see 770-776.

### REMARKS ON THE ENDINGS.

- **556.** 1. Only verbs in  $\mu \iota$  have the primary endings  $\mu$  and  $\sigma \iota$ in the indicative active. For  $\mu$  in the optative, see 731. The original  $\sigma_{\ell}$  of the second person singular is found only in the epic έσ-σί, thou art (807, 1). Θα (originally perfect ending) appears in οίσθα (for οίδ-θα) from οίδα (820) and in ησ-θα from εἰμί (806); whence  $(\sigma)\theta\alpha$  in many Homeric forms (780, 4; 787, 4), and rarely in Attic (as  $\xi \phi \eta - \sigma \theta a$ ). In the third person singular  $\tau \iota$  is Doric, as in  $\tau i\theta \eta \tau i$  for  $\tau i\theta \eta \sigma i$ ; and it is preserved in Attic in  $\epsilon \sigma \tau i$ , is.
- 2. A first person dual in  $\mu\epsilon\theta\sigma\nu$  is found three times in poetry: περιδώμεθον, subj. of περιδίδωμι, Il. 23, 485; λελείμμεθον, from λείπω, S. El. 950; δρμώμεθον, from δρμάω, S. Ph. 1079. Generally the first person plural is used also for the dual.
- 3. In Homer  $\tau o \nu$  and  $\sigma \theta o \nu$  are sometimes used for  $\tau n \nu$  and  $\sigma \theta n \nu$ in the third person dual of past tenses. This occurs rarely in the Attic poets, who sometimes have  $\tau n \nu$  for  $\tau o \nu$  in the second person. The latter is found occasionally even in prose.
- 4. In the first person plural ues is Doric. The poets often have  $\mu\epsilon\sigma\theta\alpha$  for  $\mu\epsilon\theta\alpha$  (777, 1).
- 5. In the third person plural  $\nu\sigma\iota$  always drops  $\nu$  (78, 3) and the preceding vowel is lengthened; as in λύουσι for λύο-νσι. The more primitive ντι is Doric; as φέρο-ντι (Latin ferunt) for φέρουσι.1
- A comparison of the various forms of the present indicative of the primitive verb be (whose original stem is as-, in Greek and Latin es-), as it appears in Sanskrit, the older Greek, Latin, Old Slavic, and Lithuanian (the most primitive modern language, still spoken on the Baltic), will illustrate the Greek verbal endings.

		SING	ULAR.		
	Sanskrit.	Older Greek.	Latin.	Old Slavic.	Lithuanian.
1.	as-ıni	έμ-μί (for έσ-μι)	[e]s-um	yes-m'	es-mi
2.	asi	łσ-σί	es	yesi	esi
3.	as-ti	łσ-τί	es-t	yes-t'	es-ti
		PLU	RAL.		
1.	s-mas	έσ-μέν (Dor. είμές)	[c]s-u-mus	yes-mi	es-me
2.	s-tha	łσ-π <b>ί</b>	es-tis	yes-te	es-te
3.	s-a-nti	e-vrl (Doric)	[e]s-u-nt	s-u-t'	es-ti

6.  $\Theta\iota$  seldom appears in the imperative, except in the second arist active of  $\mu\iota$ -forms (755), and in the arist passive, which has the active forms (551).

In the third person plural of the imperative the endings ντων

and  $\sigma\theta\omega\nu$  ( $\theta\omega\nu$ ) are used in the older and better Attic.

7. The primitive middle forms  $\theta o \nu$ ,  $\theta \eta \nu$ ,  $\theta \epsilon$ ,  $\theta \omega$ , etc. appear in the perfect and pluperfect after consonants; as  $\tau \epsilon \tau \rho \bar{\iota} \phi - \theta \epsilon$  ( $\tau \rho \epsilon \beta - \omega$ ). See 489.

# TENSE STEMS AND FORMS OF INFLECTION.

### SIMPLE AND COMPLEX TENSE STEMS.

- 557. Tense stems are of two classes, simple and complex. A simple tense stem is the verb stem (often in a modified form), to which the endings are applied directly. A complex tense stem is composed of the verb stem (with its modifications) prolonged by a tense suffix (561,5), to which the endings are applied. See 458.
- 558. (Simple Tense Stems.) Simple tense stems are found
- (a) in the present and imperfect, the second agrist active and middle, and the second perfect and pluperfect, of the conjugation in  $\mu$  (500), except in the subjunctive;

(b) in the perfect and pluperfect middle of all verbs.

E.g.

- (a) From φημί (stem φα-), say, come φα-μέν, φα-τέ, φά-ναι, ἔ-φα-τε, etc. From τίθημι (stem  $\theta\epsilon$ -), put, come 2 aor. ἔ-θε-τε, ἔ-θε-το, θέ-σθω, θέ-σθαι, θέ-μενος, etc.; and from the reduplicated  $\tau\iota$ -θε- (536) come  $\tau$ ίθε-μεν, τίθε-τε, τίθε-σαι, τίθε-ται,  $\epsilon$ -τίθε-ντο,  $\epsilon$ -τίθε-σθε, τίθε-σο, τίθε-σθαι, etc.
- (b) From λε-λυ- (reduplicated stem of λύ-ω) with the middle endings (552) come λέλυ-μαι, λέλυ-σαι, λέλυ-σθε, λελύ-σθαι, λελυ-μένος; ἐ-λελύ-μην, ἐ-λέλυ-σο, ἐ-λέλυ-σθε, ἐ-λέλυ-ντο.
- **559.** (Complex Tense Stems.) Complex tense stems are found in all other forms of the verb. E.g.
- Λύω (stem  $\lambda \bar{v}$ -), has (pres.)  $\lambda \dot{v}$ ο- $\mu \epsilon v$ ,  $\lambda \dot{v}$ ο- $\mu \epsilon \theta a$ ,  $\lambda \dot{v}$ ε- $\sigma \theta \epsilon$ ,  $\lambda \dot{v}$ ο- $\nu \tau a$ ι, etc.; (fut.)  $\lambda \dot{v}$ σο- $\mu \epsilon v$ ,  $\lambda \dot{v}$ σε- $\tau \epsilon$ ,  $\lambda \dot{v}$ σε- $\sigma \theta a a$ , etc.; (aor.)  $\dot{\epsilon}$ - $\lambda \dot{v}$ σα- $\mu \epsilon v$ ,  $\dot{\epsilon}$ - $\lambda \dot{v}$ σα- $\sigma \epsilon$ ,  $\dot{\epsilon}$ - $\lambda \dot{v}$ σα- $\sigma \theta a$ ι, etc.; (1 aor. pass.)  $\dot{\epsilon}$ - $\lambda \dot{v}$ θη  $\nu$ ,  $\dot{\epsilon}$ - $\lambda \dot{v}$ θη  $\nu$ ,  $\dot{\epsilon}$ - $\lambda \dot{v}$ θη  $\tau \epsilon$ , etc.

**560.** This distinction will be seen by a comparison of the present indicative middle of  $\tau i\theta \eta \mu$  ( $\tau i\theta \epsilon$ ) with that of  $\phi i\lambda \epsilon \omega$  ( $\phi i\lambda \epsilon$ ) in its uncontracted (Homeric) form:—

τίθε-μαι φιλέ-ο-μαι τιθέ-μεθα φιλε-ό-μεθα τίθε-σαι φιλέ-ε-(σ)αι τίθε-σθε φιλέ-ε-σθε τίθε-ται φιλέ-ε-ται τίθε-νται φιλέ-ο-νται

561. (Tense Suffixes.) 1. In the present, imperfect, and second aorist active and middle of the conjugation in  $\omega$ , in all futures, and in the future perfect, the tense stem ends in a variable vowel, called the thematic vowel, which is o before  $\mu$  and  $\nu$  and in the optative, and is elsewhere  $\epsilon$ . This is written %-; as  $\lambda \bar{\nu}\%$ -, present stem of  $\lambda \epsilon' \omega$ ;  $\lambda \iota \pi\%$ -, second aorist stem of  $\lambda \epsilon' \iota \pi$ - $\omega$ . In the futures and the future perfect the thematic vowel is preceded by  $\sigma$ . To these prolonged tense stems the endings are added. E.g.

Λύο-μεν, λύε-τε, λύουσι for λύο-νσι (78, 3);  $\tilde{\epsilon}$ -λιπο-ν,  $\tilde{\epsilon}$ -λιπο-κες,  $\hat{\epsilon}$ -λίπο-μεν,  $\hat{\epsilon}$ -λίπε-τε;  $\hat{\epsilon}$ -λίπε-σθε,  $\hat{\epsilon}$ -λίπο-ντο; λύσο-μεν, λύσε-τε, λύσο-νται. For the terminations  $\omega$ ,  $\epsilon_{15}$ ,  $\epsilon_{1}$  in the singular, see 623.

2. The subjunctive has a long thematic vowel "/η", which appears in both conjugations; as λέγω-μεν, λέγη-τε, λέγω-σι for λεγω-νσι (78, 3); θῶμεν for θέ-ω-μεν, θῆτε for θέ-η-τε.

3. The first agrist stem has a suffix  $\sigma \alpha$ , the first perfect  $\kappa \alpha$ , and

the second perfect a -.

4. The first agrist passive has a suffix  $\theta \epsilon$ - (or  $\theta \eta$ -), and the second agrist passive  $\epsilon$ - (or  $\eta$ -); as  $\lambda \epsilon i \pi$ - $\omega$ ,  $\epsilon \lambda \epsilon i \phi$ - $\theta \eta$ - $\nu$ ,  $\lambda \epsilon \iota \phi$ - $\theta \hat{\eta}$ - $\nu u \iota$ , ( $\lambda \epsilon \iota \phi$ - $\theta \hat{\epsilon}$ - $\omega$ )  $\lambda \hat{\epsilon} \iota \phi \theta \hat{\omega}$ ;  $\phi \alpha i \nu \omega$  ( $\phi \alpha \nu$ -),  $\hat{\epsilon} \phi \hat{\alpha} \nu \eta$ - $\nu$ ,  $\phi \alpha \nu \hat{\eta}$ - $\nu \alpha \iota$ ,  $\phi \alpha \nu$ - $\hat{\epsilon}$ - $\nu \tau \sigma s$ ;  $\hat{\epsilon} \lambda \hat{\nu} \theta \eta$ - $\nu$ ,  $\hat{\epsilon} \lambda \hat{\nu} \theta \eta$ -s,  $\hat{\epsilon} \lambda \hat{\nu} \theta \eta$ - $\mu \epsilon \nu$ ,  $\lambda \nu$ - $\theta \hat{\epsilon}$ - $\nu \tau \omega \nu$ ,  $\lambda \nu$ - $\theta \hat{\epsilon}$ - $\nu \tau \epsilon s$ .

The first and second passive futures have  $\theta\eta\sigma\%$ - and  $\eta\sigma\%$ -; as

λειφ-θήσο-μαι, λυ-θήσε-σθε, φαν-ήσο-μαι, φαν-ήσε-ται.

- 5. The thematic vowels, and  $\sigma$ %,  $\sigma$ a,  $\kappa$ a- (a-),  $\theta$ e- ( $\theta$ η-) or  $\epsilon$  (η-),  $\theta$ ησ%- or  $\eta$ σ%-, (1-4), are called tense suffixes.
- 562. (Optative Suffix.) The optative inserts a mood suffix ι or ιη (ιε-) between both the simple and the complex tense stem and the personal endings. (See 730.)

For the subjunctive, see 718; 561, 2.

# TWO FORMS OF INFLECTION.

563. To the two classes of tense stems correspond generally two forms of inflection, — the simple form and the common form.

# I. THE SIMPLE FORM OF INFLECTION.

- 564. To this form (sometimes called the  $\mu$ -form) belong all tenses which have simple tense stems (558) and also both passive acrists,—always excepting the subjunctives (561, 2.). It has these peculiarities of inflection:—
- 1. The first and third persons singular of the present indicative active have the endings  $\mu$  and  $\sigma\iota$  (552); as  $\phi\eta\mu\dot{\iota}$ ,  $\phi\eta\sigma\dot{\iota}$ ;  $\tau\dot{\iota}\theta\eta\mu\iota$ ,  $\tau\dot{\iota}\theta\eta\sigma\iota$ .
- 2. The second agrist imperative active generally retains the ending  $\theta \iota$  (553); as  $\beta \hat{\eta} \cdot \theta \iota$ , go. So rarely the present; as  $\phi a \cdot \theta \iota$ , say. (See 752; 755.)
  - 3. The third person plural has the active endings agrand gav (552).
- 4. The infinitive active has the ending ναι or εναι (554); as τιθέναι, θέναι (τημι), εναι (τίμι)
- 5. Participles with stems in o-ντ have nominatives in ous; as διδούς, διδό-ντ-ος (see 565, 5).
- 6. In all forms of this class except the eccond agrist and the optative, the middle endings  $\sigma ai$  and  $\sigma o$  regularly retain  $\sigma$ ; as  $\tau(\theta \epsilon \sigma ai)$ ,  $\epsilon \tau(\theta \epsilon \sigma o)$ ;  $\lambda(\lambda v \sigma ai)$ ,  $\epsilon \lambda(\lambda v \sigma o)$ . But 2 agrist  $\epsilon \theta o v$  (for  $\epsilon \theta \epsilon \sigma o$ ); optative  $i\sigma \tau a i o$  (for  $i\sigma \tau a \cdot i \sigma o$ ).

# II. THE COMMON FORM OF INFLECTION.

- 565. To this form belong all parts of the verb in  $\omega$ , except the perfect and pluperfect middle and the passive acrists, and also all subjunctives. It has the following peculiarities of inflection.
- 1. It has the thematic vowel and the other tense suffixes mentioned in 561, 1-3. For the inflection of the present and imperfect indicative, see 623 and 624.
- 2. The imperfect and second agrist have the ending  $\nu$  in the third person plural; the pluperfect has  $\sigma a \nu$ .
- 3. The imperative active has no ending in the second person singular. For or in the first agrist, see 747.
- 4. The infinitive active has  $\alpha\nu$  (for  $\epsilon$ - $\alpha\nu$ ) in the present, future, and second agrist;  $\epsilon$ - $\nu\alpha\nu$  in the perfect; and  $\sigma$ - $\alpha\nu$  (or  $\alpha\nu$ ) in the first agrist. See 759-764.
  - 5. Participles with stems in οντ have nominatives in ων (564, 5).

6. The middle endings out and so in the second person singular drop  $\sigma$  and are contracted with the thematic vowel; as  $\lambda \tilde{v} \epsilon \sigma \alpha_i$ ,  $\lambda \tilde{v} \epsilon \alpha_i$ ,  $\lambda \tilde{v} \sigma_i$  or  $\lambda \tilde{v} \epsilon v$ ;  $\epsilon \lambda \tilde{v} \epsilon \sigma \sigma_i$ ,  $\epsilon \lambda \tilde{v} \epsilon v$  (88, 2). For Ionic uncontracted forms, see 777, 2; 785, 2.

# FORMATION AND INFLECTION OF TENSE SYSTEMS.

566. To understand the inflection of the verb, we must know the relation of each tense stem to the verb stem, and also certain internal modifications which the verb stem undergoes in some of the tense systems.

# FORMATION OF THE PRESENT STEM FROM THE VERB STEM. — EIGHT CLASSES OF VERBS.

- **567.** When the verb stem does not appear unchanged in the present stem, as it does in  $\lambda \acute{\nu}$ -ω and  $\lambda \acute{\epsilon} \gamma$ -ω (459), it generally appears in a strengthened form; as in  $\kappa \acute{o}\pi\tau$ -ω ( $\kappa o\pi$ -), cut,  $\mu a\nu \theta \acute{a}\nu$ -ω ( $\mu a\theta$ -), learn,  $\mathring{a}\rho \acute{\epsilon} \sigma \kappa$ -ω ( $\mathring{a}\rho \acute{\epsilon}$ -), please. In a few very irregular verbs no connection is to be seen between the present stem and the stem or stems of other tenses; as in  $\Phi \acute{\epsilon} \rho$ -ω ( $\Phi \acute{\epsilon} \rho$ -), bear, fut.  $\mathring{o} \sigma \omega$ , aor.  $\mathring{\eta} \nu \epsilon \gamma \kappa a$ .
- 568. Verbs are divided into eight classes with reference to the relation of the present stem to the verb stem.
- **569.** First Class. (Verb Stem unchanged in Present.) Here the present stem is formed by adding the thematic vowel %-(565, 1) to the verb stem. E.g.

Λέγω (λεγ-), say, present stem λεγ%-, giving λέγο-μεν, λέγε-τε, λέγο-μαι, λέγε-ται, λέγο-νται, ἔ-λεγο-ν, ἔ-λεγε-ς, ἐ-λέγε-τε, ἐ-λέγε-σθε, ὲ-λέγο-ντο, etc. in the present and imperfect. For ω, εις, ει in the present active, see 623.

- 570. N. Some verbs of this class have the stem variable in quantity in different tenses; as δύω, φύω, θλίβω, πνίγω, τρίβω, τύφω, ψύχω. See these in the Catalogue of Verbs. For λύω, see 471.
- 571. N. The pure verbs of the first class which irregularly retain a short vowel in certain tenses are given in 639; those which insert  $\sigma$  in certain tenses, in 640. The verbs (of all classes) which add  $\epsilon$  to the stem in some or all tenses not of the present system (as  $\beta o \hat{\nu} \lambda o \mu a \epsilon$ ) are given in 657 and 658. Reduplicated presents of all classes are given in 651 and 652. These and others which are peculiar in their inflection are found in the Catalogue of Verbs. For special peculiarities, see  $\gamma l \gamma \nu o \mu a \epsilon$ ,  $\ell m \omega$ 
572. Second Class. (Stems with Strong Forms.) This class includes verbs with mute stems which have strong forms with  $\epsilon\iota$  ( $\epsilon\iota$ ),  $\epsilon\nu$ , or  $\eta$  (31) in all tenses except in the second agrist and second passive systems, in which they have the weak forms in  $\iota$ ,  $\nu$ , and  $\check{\epsilon}\iota$ . The present stem adds %-to the strong form of the stem. E.g.

Λείπ-ω, leave, 2 aor. ἔ-λιπ-ον, 2 perf. λέ-λοιπ-α; φεύγ-ω, flee, 2 aor. ἔ-φυγ-ον; τήκ-ω, melt, 2 aor. pass. ἐ-τάκ-ην; with present stems  $\lambda \epsilon \iota \pi \%$ -, φευγ%-, τηκ%-.

573. Το this class belong ἀλείφ-ω, ἐρείπ-ω, λείπ-ω, πείθ-ω, στείβ-ω, στείχ-ω, φείδ-ομαι; κεύθ-ω, πεύθ-ομαι, τεύχ-ω, φεύγ-ω; κήδ-ω, λήθ-ω, σήπ-ω, τήκ-ω; with Ionic or poetic ἐρείκ-ω, ἐρεύγ-ομαι, τμήγ-ω;— all with weak stems in ι, υ, or α. See also θαπ- or ταφ-, stem of τέθηπα and ἔταφον, and εἴκω (ἔοικα). Τρώγ-ω, gnaw, 2 aor. ἔτραγ-ον, irregularly has ω in the present. For ῥήγ-νῦμι and εἴωθα (ἡθ-), see 689.

For exceptions in a few of these verbs, see 642, 2. See 611.

**574.** Six verbs in  $\epsilon_{\omega}$  with weak stems in  $\nu$  belong by formation to this class. These originally had the strong form in  $\epsilon_{\nu}$ , which became  $\epsilon_{F}$  (90, 2) before a vowel, and finally dropped  $_{F}$ , leaving  $\epsilon$ ; as  $\pi\lambda\epsilon_{-\omega}$ , sail (weak stem  $\pi\lambda\nu$ ), strong stem  $\pi\lambda\epsilon_{\nu}$ ,  $\pi\lambda\epsilon_{F}$ ,  $\pi\lambda\epsilon_{F}$ , present stem  $\pi\lambda\epsilon_{\nu}^{*}$ .

These verbs are  $\theta \dot{\epsilon}$ - $\omega$  (weak stein  $\theta v$ -), run,  $v \dot{\epsilon}$ - $\omega$  (v v-), swim,  $\pi \lambda \dot{\epsilon}$ - $\omega$  ( $\pi \lambda v$ -), sail,  $\pi v \dot{\epsilon}$ - $\omega$  ( $\pi v v$ -), breathe,  $\dot{\rho} \dot{\epsilon}$ - $\omega$  ( $\dot{\rho} v$ -), flow,  $\chi \dot{\epsilon}$ - $\omega$  ( $\chi v$ -), pour. The poetic  $\sigma \dot{\epsilon} \dot{\nu} \omega$  ( $\sigma v$ -), urge, has this formation, with  $\dot{\epsilon} v$  retained. (See 601.)

- 575. As verbs of the second class have the strong stem in almost all forms, this stem is here called the verb stem.
- 576. Third Class. (Verbs in  $\pi\tau\omega$ , or T Class.) Some labial  $(\pi, \beta, \phi)$  verb stems add  $\tau\%$ -, and thus form the present in  $\pi\tau\omega$ ; as  $\kappa \dot{o}\pi\tau \omega$  ( $\kappa o\pi \nu$ ), cut (present stem  $\kappa o\pi\tau\%$ -),  $\beta\lambda\dot{a}\pi\tau \omega$  ( $\beta\lambda\alpha\beta$ -), hurt,  $\dot{\rho}\dot{t}\pi\tau \omega$  ( $\dot{\rho}\dot{t}\phi$ -,  $\dot{\rho}\dot{t}\phi$ -), throw (71).
- 577. N. Here the exact form of the verb stem cannot be determined from the present. Thus, in the examples above given, the stem is to be found in the second agrists  $\tilde{\epsilon}\kappa\acute{o}\pi\eta\nu$ ,  $\tilde{\epsilon}\beta\lambda\acute{a}\beta\eta\nu$ , and  $\tilde{\epsilon}\rho\rho\acute{c}\phi\eta\nu$ ; and in  $\kappa a\lambda\acute{v}\pi\tau\omega$  ( $\kappa a\lambda\upsilon\beta$ -), cover, it is seen in  $\kappa a\lambda\acute{v}\beta$ - $\eta$ , hut.

- σκώπτω (σκωπ-), τύπτω (τυπ-). with Homeric and poetic γνάμπτω (γναμπ-), ἐνίπτω (ἐνιπ-), and μάρπτω (μαρπ-).
- 579. FOURTH CLASS. (Iota Class.) In this class the present stem is formed by adding 1%- to the verb stem and making the euphonic changes which this occasions. (See 84.) There are four divisions.
- **580.** I. (Verbs in  $\sigma\sigma\omega$  or  $\tau\tau\omega$ .) Most presents in  $\sigma\sigma\omega$  ( $\tau\tau\omega$ ) come from palatal stems,  $\kappa$  or  $\chi$  and generally  $\gamma$  with  $\iota$  becoming  $\sigma\sigma$  ( $\tau\tau$ ). These have futures in  $\xi\omega$ ; as  $\pi\rho\dot{\alpha}\sigma\sigma\omega$  ( $\pi\rho\dot{\alpha}\gamma$ -), do, present stem  $\pi\rho\dot{\alpha}\sigma\sigma\%$  (for  $\pi\rho\dot{\alpha}\gamma\iota\%$ -), fut.  $\pi\rho\dot{\alpha}\xi\omega$ ,  $\mu\alpha\lambda\dot{\alpha}\sigma\omega$  ( $\mu\alpha\lambda\alpha\kappa$ -, seen in  $\mu\alpha\lambda\alpha\kappa\dot{\omega}$ s), soften, fut.  $\mu\alpha\lambda\dot{\alpha}\xi\omega$ ;  $\tau\alpha\rho\dot{\alpha}\sigma\omega$  ( $\tau\alpha\rho\alpha\chi$ -, seen in  $\tau\alpha\rho\alpha\chi\dot{\gamma}$ ), confuse, fut.  $\tau\alpha\rho\dot{\alpha}\xi\omega$ ;  $\kappa\eta\rho\dot{\omega}\sigma\omega$  ( $\kappa\eta\rho\dot{\omega}\kappa$ -), proclaim, fut.  $\kappa\eta\rho\dot{\omega}\xi\omega$ . (See 84, 1.)
- 581. So also ἀἰσσω (ἀϊκ-), ἀλλάσσω (ἀλλαγ-), ἀράσσω (ἀραγ-), βήσσω (βηχ-), δράσσω (δραγ-), ἐλίσσω (ἐλικ-), θράσσω (θραχ-'), μάσσω (μωγ-), μύσσω (μυκ-), ορύσσω (ὐρυχ-), πλήσσω (πληγ-, πλαγ-), πτήσσω (πτηκ-), πτύσσω (πτυγ-), σάττω (σαγ-), τάσσω (ταγ-), φράσσω (φραγ-), φρίσσω (φρῖκ-), φυλάσσω (φυλακ-). See also epic δειδίσσομαι, Ionic and poetic ἀμύσσω and προίσσομαι, and poetic ἀφύσσω and νύσσω.¹
- 582. Some presents in  $\sigma\sigma\omega$  ( $\tau\tau\omega$ ) are formed from lingual stems, which have futures in  $\sigma\omega$  or a rists in  $\sigma\alpha$ ; as  $\epsilon\rho\epsilon\sigma\sigma\omega$ , row (from stem  $\epsilon\rho\epsilon\tau$ , seen in  $\epsilon\rho\epsilon\tau\eta$ s, rower), aor.  $\tilde{\eta}\rho\epsilon\sigma\alpha$ . So also  $\tilde{\alpha}\rho\mu\dot{\alpha}\tau\tau\omega$  (fut.  $\tilde{\alpha}\rho\mu\dot{\alpha}\sigma\omega$ ),  $\beta\lambda\dot{\alpha}\tau\tau\omega$  ( $\mu\epsilon\lambda\tau\tau$ , 66),  $\lambda\dot{\alpha}\sigma\sigma\mu\alpha$  ( $\lambda\tau\tau$ ),  $\pi\dot{\alpha}\sigma\sigma\omega$ ,  $\pi\lambda\dot{\alpha}\sigma\sigma\omega$ ,  $\pi\tau\dot{\alpha}\sigma\sigma\omega$ , with  $\tilde{\alpha}\phi\dot{\alpha}\sigma\omega$  (Hdt.), and poetic  $i\mu\dot{\alpha}\sigma\sigma\omega$ , κορύσσω (κορυθ-).

Many presents of this kind are formed on the analogy of verbs with real lingual stems (see 587).

- 583. N. Πέσσω, cook, comes from an old stem  $\pi \epsilon \kappa$ -; while the tenses  $\pi \epsilon \psi \omega$ ,  $\tilde{\epsilon} \pi \epsilon \psi \omega$ , etc. belong to the stem  $\pi \epsilon \pi$ -, seen in later  $\pi \epsilon \pi \tau \omega$  and lonic  $\pi \epsilon \pi \tau \tau \omega \omega$  of Class III.
- **584.** II. (Verbs in  $\zeta_{\omega}$ .) Presents in  $\zeta_{\omega}$  may be formed in two ways:—
- 585. (1) From stems in  $\delta$ , with futures in  $\sigma\omega$ ; as κομίζω (κομίδ-, seen in κομίδ-ή), carry, fut. κομίσω; φράζω (φραδ-), say, fut. φράσω. (See S4, 3.)

<sup>&</sup>lt;sup>1</sup> The lists of verbs of the fourth class are not complete, while those of the other classes which are given contain all the verbs in common usc.

- 586. So ἀρμόζω (ἀρμοδ-), ἀρπάζω, ἐλπίζω (ἐλπιδ-), ἐρίζω (ἐριδ-), θαυμάζω, ἴζω (ἰδ-) with ἔζομαι (ἐδ-), κτίζω, νομίζω, ὄζω (ὐδ-), πελάζω, σχάζω, σχίζω (σχιδ-), σώζω.
- **587.** N. Many verbs in  $\zeta \omega$ , especially most in  $a\zeta \omega$ , with futures in  $\sigma \omega$ , were formed on the analogy of those with actual stems in  $\delta$ . (See Meyer, *Gr. Gram.* §§ 521, 522.)
- 588. (2) From stems in  $\gamma$  (or  $\gamma\gamma$ ), with futures in  $\xi\omega$ ; as  $\sigma\phi$ άζω ( $\sigma\phi$ αγ-), slay ( $\sigma\phi$ άττω in prose), fut.  $\sigma\phi$ άξω;  $\dot{\rho}$ έζω ( $\dot{\rho}$ εγ-), do (poetic and Ionic), fut.  $\dot{\rho}$ έξω; κλάζω (κλαγγ-), scream (cf. clango), fut. κλάγξω. (See 84, 3.)
- 589. So κράζω (κραγ-), σαλπίζω (σαλπιγγ-), στίζω (στιγ-); with poetic ἀλαλάζω, βάζω, βρίζω, γρύζω, ἐλελίζω, κρίζω, μύζω, grumble, στάζω.
- **590.** N. Some verbs in  $\zeta \omega$  have stems both in  $\delta$  and  $\gamma$ ; as  $\pi \alpha i \zeta \omega$  ( $\pi \alpha i \delta$ -,  $\pi \alpha i \gamma$ -), play, fut.  $\pi \alpha i \xi o \hat{\nu} \mu a i$  (666), nor. έπαισα. See also partic forms of  $\dot{\alpha} \rho \pi \dot{\alpha} \dot{\zeta} \omega$  and  $\dot{\nu} \dot{\alpha} \sigma \sigma \omega$ . (See 587.)
- 591. N. Nίζω, wash, fut. νίψω, forms its tenses from a stem  $\nu\iota\beta$ -, seen in Homerie νίπτομαι and later νίπτω.
- 592. III. (Enlarged Liquid Stems in Present.) Of these there are three divisions:—
- **593.** (1) Presents in  $\lambda\lambda\omega$  are formed from verb stems in  $\lambda$  with  $\iota\%$  added,  $\lambda\iota$  becoming  $\lambda\lambda$ ; as  $\sigma\tau\dot{\epsilon}\lambda\lambda\omega$ , send, for  $\sigma\tau\dot{\epsilon}\lambda\cdot\iota-\omega$ ;  $d\gamma\gamma\dot{\epsilon}\lambda\lambda\omega$ , announce, for  $d\gamma\gamma\dot{\epsilon}\lambda\cdot\iota-\omega$ ;  $\sigma\phi\dot{\epsilon}\lambda\lambda\omega$ , trip up, for  $\sigma\phi\dot{\epsilon}\lambda\cdot\iota-\omega$ ; present stems  $\sigma\tau\dot{\epsilon}\lambda\lambda\%$ -, etc. (See 84, 4.)

See ἄλλομαι (άλ-), βάλλω (βαλ-), θάλλω (θαλ-), ὀκέλλω (ὀκέλ-), πάλλω (πιλ-), τέλλω (τέλ-), with poetic δαιδάλλω, ἰάλλω, σκέλλω, τίλλω.

**594.** (2) Presents in alow and alow are formed from verb stems in  $\breve{a}\nu$  and  $\breve{a}\rho$  with  $\iota\%$  added.

Here the  $\iota$  is transposed and then contracted with a to a $\iota$ ; as  $\phi \alpha i \nu \omega$  ( $\phi \alpha \nu$ -), show, for  $\phi \alpha \nu$ - $\iota$ - $\omega$  (present stein  $\phi \alpha \iota \nu$ %-), future  $\phi \alpha \nu \omega$ ;  $\chi \alpha i \rho \omega$  ( $\chi \alpha \rho$ -), rejoice, for  $\chi \alpha \rho$ - $\iota$ - $\omega$  (See 84, 5.)

595. So εὐφραίνω (εὐφραν·), κερδαίνω (κερδαν·), μαίνομαι (μαν·), μιαίνω (μιαν·), ξαίνω (ξαν·), ξηραίνω (ξηραν·), ποιμαίνω (ποιμαν·), ραίνω (ραν·), σαίνω (σαν·), σημαίνω (σημαν·), τετραίνω (τετραν·), ὑφαίνω (ὑφαν·), χραίνω (χραν·); with poetic κραίνω (κραν·), παπταίνω (παπταν·), πιαίνω (πιαν·). Αἴρω (ἀρ·), κυθαίρω (καθαρ·), τεκμαίρομαι (τεκμαρ·), with poetic ἐναίρω (ἐναρ·), ἐχθαίρω (ἐχθαρ·), σαίρω (σαρ·).

**596.** (3) Presents in  $\epsilon_{i\nu\omega}$ ,  $\epsilon_{i\rho\omega}$ ,  $\bar{\imath}_{\nu\omega}$ ,  $\bar{\imath}_{\rho\omega}$ ,  $\bar{\imath}_{\nu\nu}$ , and  $\bar{\imath}_{\rho\omega}$  come from stems in  $\epsilon_{\nu}$ ,  $\epsilon_{\rho}$ ,  $\bar{\imath}_{\nu}$ ,  $\bar{\imath}_{\rho}$ ,  $\bar{\imath}_{\nu}$ , and  $\bar{\imath}_{\rho}$ , with i%- added.

Here the added  $\iota$  disappears and the preceding  $\epsilon$ ,  $\iota$ , or v is lengthened to  $\epsilon\iota$ ,  $\tilde{\iota}$ , or  $\tilde{v}$ ; as  $\tau\epsilon\iota\nu\omega$  ( $\tau\epsilon\nu$ ), stretch, for  $\tau\epsilon\nu\iota\omega$ ;  $\kappa\epsilon\iota\rho\omega$  ( $\kappa\epsilon\rho$ ), shear, for  $\kappa\epsilon\rho\iota\omega$ ;  $\kappa\rho\iota\nu\omega$  ( $\kappa\rho\iota\nu$ ), judge, for  $\kappa\rho\iota\nu\iota\omega$ ; a $\mu\dot{\nu}\nu\omega$  (a $\mu\nu\nu$ ), ward off, for a $\mu\nu\nu\iota\omega$ ; o $\nu\rho\omega$  ( $\nu\rho\omega$ ), draw, for  $\nu\rho\iota\omega$ .

- 597. So γείνομαι (γεν-), κτείνω (κτεν-), and poetic θείνω (θεν-); ἀγείρω (ἀγερ-), δείρω (δερ-), ἐγείρω (ἐγερ-), ἡμείρω (ἡμερ-), μείρομαι (μερ-), φθείρω (φθερ-), σπείρω (σπερ-), with poetic πείρω (περ-). Κλίνω (κλιν-), σίνομαι (σιν-), αἰσχύνω (αἰσχυν-), θαρσύνω (θαρσυν-), ὀξύνω (ὀξυν-), πλύνω (πλυν-), μαρτύρομαι (μαρτυρ-), ὀλοφύρομαι (ὀλοφυρ-). Οἰκτίρω (οἰκτιρ-), pity (commonly written οἰκτείρω), is the only verb in τρω.
- 598. N. 'Οφείλω (ὀφελ-), be obliged, owe, follows the analogy of stems in  $\epsilon\nu$ , to avoid confusion with ὀφέλλω (ὀφελ-), increase; but in Homer it has the regular present ὀφέλλω. Homer has είλομαι, press, from stem ἐλ-.
- 599. N. Verbs of this division (III.) regularly have futures and acrists active and middle of the *liquid* form (663). For exceptions (in poetry), see 668.
- **600.** N. Many verbs with liquid stems do not belong to this class; as  $\delta \epsilon \mu \omega$  and  $\delta \epsilon \rho \omega$  in Class I. For  $\beta u i \nu \omega$  etc. in Class V., see 610.
- **601.** IV. (Stems in au.) Here belong καίω, burn, and κλαίω, weep (Attic also κάω and κλάω). The stems καυ- and κλαυ- (seen in καύσω and κλαύσομαι) became και- and κλαι-, whence και- and κλαι- (90, 2). (See 574.)
- **602.** N. The poets form some other presents in this way; as  $\delta a \omega (\delta a_{f^{-}})$ , burn,  $val\omega (va_{f^{-}})$ , swim. So, from stems in as-,  $\mu a \log \omega (\mu a \sigma_{f^{-}})$ ,  $\mu a \omega_{f^{-}}$ ,  $\mu \alpha 
- 603. FIFTH CLASS. (N Class.) (1) Some verb stems are strengthened in the present by adding  $\nu$  before the thematic vowel %-; as  $\phi\theta\acute{a}\nu$ - $\omega$  ( $\phi\theta\acute{a}$ -), anticipate (present stem  $\phi\theta\acute{a}\nu$ %-);  $\phi\theta\acute{\nu}$ - $\omega$  ( $\phi\theta\acute{\nu}$ -), waste;  $\delta\acute{a}\kappa\nu$ - $\omega$  ( $\delta a\kappa$ -), bite;  $\kappa\acute{a}\mu\nu$ - $\omega$  ( $\kappa a\mu$ -), be weary;  $\tau\acute{e}\mu\nu$ - $\omega$  ( $\tau \epsilon\mu$ -), cut.
- **604.** So βαίνω (βα-, βαν-, 610), πίνω (πι-, see also 621), τίνω (τι-), δύνω (with δύω), Hom. θύνω (with θύω), rush; for ἐλαύνω (ἐλα-), see 612.

- **605.** (2) (a) Some consonant stems add av; ἀμαρτάν-ω (ἀμαρτ-), err (present stem ἀμαρταν%-); αἰσθάν-ομαι (αἰσθ-), perceive; βλαστάν-ω (βλαστ-), sprout.
- (b) Here, if the last vowel of the stem is short, another nasal ( $\mu$  before a labial,  $\nu$  before a lingual,  $\gamma$  before a palatal) is inserted after this vowel; as  $\lambda a \nu \theta \acute{a} \nu \omega (\lambda a \theta \lambda a \nu \theta \lambda a$
- **606.** So αὐξάν-ω (with αὔξ-ω), δαρθάν-ω (δαρθ-), ἀπ-εχθάν-ομαι (ἐχθ-), ἰζάν-ω (with τζ-ω), οἰδάν-ω (οἰδ-), ὀλισθάν-ω (ὀλισθ-), ὀφλισκάν-ω (ὀφλ-, ὀφλισκ-, 614); with poetic ἀλιταίν-ομαι (ἀλιτ-, 610), ἀλφάν-ω (ἀλφ-), ἐριδαίν-ω (ἐριδ-). With inserted  $\nu$ , γ, or  $\mu$ , ἀνδάν-ω (άδ-), κιγχάνω, ερίς κιχάνω (κιχ-), λαγχάι-ω (λαχ-), μανθάν-ω (μαθ-), πυνθάν-ομαι (πυθ-), τυγχάν-ω (τυχ-), with poetic χανδάν-ω (χαδ-), ἐρυγγάν-ω (ἐρυγ-).
- **607.** (3) A few stems add  $re: \beta \bar{\nu} r \acute{\epsilon} \omega$  (with  $\beta \acute{\iota} \omega$ ), stop up,  $\acute{\iota} \kappa r \acute{\epsilon} \omega \omega$  (with  $\acute{\iota} \kappa \omega$ ), come,  $\kappa r r \acute{\epsilon} \omega$  ( $\kappa r \omega$ ), kiss; also  $\acute{\iota} \mu \pi \iota \sigma \chi r \acute{\epsilon} \omega \omega$ , have on, and  $\acute{\iota} \pi \iota \sigma \chi r \acute{\epsilon} \omega \omega$ , promise, from  $\acute{\iota} \sigma \chi \omega$ .
- **608.** (4) Some stems add  $\nu\nu$  or (after a vowel)  $\nu\nu\nu$ . These form the second class (in  $\nu\bar{\nu}\mu\iota$ ) of verbs in  $\mu\iota$ , as  $\delta\epsilon(\kappa\nu\bar{\nu}-\mu\iota)$  ( $\delta\epsilon(\kappa-)$ ), show,  $\kappa\epsilon\rho\dot{\alpha}\nu\nu\bar{\nu}-\mu\iota$  ( $\kappa\epsilon\rho\dot{\alpha}-)$ ), m/x, and are enumerated in 797, 1. Some of these have also presents in  $\nu\nu\omega$ . (See 502, 2.)
- **609.** (5) A few poetic (chiefly epic) verbs add  $\nu a$  to the stem, forming presents in  $\nu \eta \mu$  (or deponents in  $\nu a \mu u$ ): most of these have presents in  $\nu a \omega$ ; as  $\delta a \mu \nu \eta \mu$  ( $\delta a \mu \cdot \nu a \cdot$ ), also  $\delta a \mu \nu a \omega$ , subdue. These form a third class of verbs in  $\mu$ , and are enumerated in 797, 2.
- **610.** N. Βαίνω (βα-, βαν-). go, and δσφραίνομαι (δσφρ-, δσφραν-), smell, not only add  $\nu$  or  $\alpha\nu$ , but lengthen  $\alpha\nu$  to  $\alpha\nu$  on the principle of Class IV. (594). They belong here, however, because they do not have the inflection of liquid verbs (599). See also  $\kappa\epsilon\rho\delta\alpha'\nu\omega$ ,  $\rho\alpha'\nu\omega$ ,  $\tau\epsilon\tau\rho\alpha'\nu\omega$ , with Homeric ἀλιταίνομαι (ἀλιτ-, ἀλιταν-).
- **611.** N. Some stems of this class lengthen a short vowel (on the principle of Class II.) in other tenses than the present; as  $\lambda \alpha \mu \beta \acute{a} \nu \omega$  ( $\lambda \alpha \beta$ -), fut.  $\lambda \acute{\eta} \psi \sigma \mu \alpha \iota$  ( $\lambda \eta \beta$ -): so  $\delta \acute{a} \kappa \nu \omega$ ,  $\lambda \alpha \gamma \chi \acute{a} \nu \omega$ ,  $\delta \dot{a} \nu \omega$ ,  $\tau \nu \gamma \chi \acute{a} \nu \omega$ . See also  $\vec{\epsilon} \rho \nu \gamma \gamma \acute{a} \nu \omega$ ,  $\vec{\epsilon} \rho \chi \sigma \mu \alpha \iota$ , and  $\pi \nu \nu \theta \acute{a} \nu \sigma \rho \mu \alpha \iota$ .

Three verbs in νυμι (608), ζεύγνυμι, πήγνυμι, ἡήγνυμι, belong equally to Class II. and Class V.

612. N. Έλαύνω (ἐλα-), drive, is irregular in the present stem (probably for ἐλα-νυ-ω). "Ολ-λῦ-μι (ὀλ-), destroy, adds λυ (by assimilation) instead of νυ to the stem ὀλ-.

- **613.** Sixth Class. (Verbs in σκω.) These add σκ%- or ισκ%- to the verb stem to form the present stem; as γηρά-σκω (γηρα-), grow old (present stem γηρασκ%-); εὐρ-ίσκω (εὐρ-), find (εὐρισκ%-); ἀρέ-σκω (ἀρε-), please, στερ-ίσκω (στερ-), deprive.
- 614. These verbs are, further, άλ-ίσκομαι, ἀμβλ-ίσκω, ἀμπλακάσκω (poetic), ἀναλ-ίσκω, ἀπαφ-ίσκω (poet.), ἀμαρ-ίσκω (poet.),
  βά-σκω (poet.), βι-βρώ-σκω (βρο-), ἀναβιώ-σκομαι (βιο-), βλώσκω (μολ-, βλο-), γεγων-ίσκω, γι-γνώ-σκω (γνο-), δι-δρά-σκω (δρα-),
  ἐπαυρ-ίσκω (poet.), ἡβά-σκω, θνή-σκω (θαν-, θνα-), θρώ-σκω (θορ-,
  θρο-), ἱλά-σκομαι, μεθύ-σκω, κικλή-σκω (κλη-) (poet.), κυ-ίσκυμαι
  (κυ-), μι-μνή-σκω (μνα-), πι-πί-σκω (lon. and Pind.), πι-πρά-σκω,
  πιφαύ-σκω (φαυ-), declare (Hom.), τι-τρώ-σκω (τρο-), φά-σκω,
  χά-σκω. See also the verbs in 617. 'Οφλ-ισκάνω (ὀφλ-) takes ισκ
  and then adds αν (606).
- 615. N. Many presents of this classs are reduplicated (536); as γι-γνώσκω (γνω). See 652, 1. 'Αρ-αρ-ίσκω has a form of Attic reduplication (529).
- **616.** N. Final o of the verb stem becomes  $\omega$ , and final  $\check{a}$  sometimes becomes  $\bar{a}$  or  $\eta$ ; as in  $\gamma_i \gamma_{\nu} \dot{\omega} \sigma_{\kappa} \omega$  ( $\gamma_{\nu} \dot{\sigma}$ ),  $\delta_i \delta_{\rho} \dot{d} \sigma_{\kappa} \omega$  ( $\delta_{\rho} \dot{a}$ -);  $\theta_{\nu} \dot{\eta} \sigma_{\kappa} \omega$  ( $\theta_{\alpha} \dot{\sigma}$ -,  $\theta_{\nu} \dot{a}$ -), Dorie  $\theta_{\nu} \dot{q} \sigma_{\kappa} \omega$  (for  $\theta_{\nu} \dot{a}$ - $\iota_{\sigma} \kappa \omega$ ).
- 617. N. Three verbs, ἀλύ-σκω (ἀλυκ-), avoid, διδά-σκω (διδαχ-), teach, and λά-σκω (λακ-), speak, omit κ or χ before σκω. So Homeric ἐίσκω or ίσκω (ἐίκ- or ἰκ-), liken, and τιτύσκομαι (τυχ-, τυκ-), for τι-τυκ-σκομαι, prepare. See also μίσγω (for μιγ-σκω) and πάσχω (for παθ-σκω).
- **618.** N. These verbs, from their ending  $\sigma \kappa \omega$ , are called *inceptive*, though few have any inceptive meaning.
- 619. SEVENTH CLASS. (Presents in  $\mu$  with simple stems.) Here the verb stem, sometimes reduplicated (652), without the thematic vowel, appears as the present stem. E.g.
- Φημί (φα-), say, φα-μέν, φα-τέ; τίθημι (θε-), put, τίθε-μεν, τίθε-τε, τίθε-μμι, τιθέ-μεθα,  $\dot{\epsilon}$ -τίθε-σθε,  $\dot{\epsilon}$ -τίθε-ντο; δίδωμι (δο-), δί-δο-μεν.

For the strong form of these stems in the singular of the active, see 627.

- 620. All verbs in  $\mu$ , except those in  $\nu\bar{\nu}\mu$  under 608, and the epic forms in  $\nu\eta\mu$  (or  $\nu\alpha\mu\alpha$ ) with  $\nu\alpha$  added to the stem (609), are of this class. They are enumerated in 794. (See 502, 1.)
- 621. Eighth Class. (Mixed Class.) This includes the few irregular verbs which have any of the tense stems so essentially different from others, or are otherwise so pecul-

iar in formation, that they cannot be brought under any of the preceding classes. They are the following:—

αίρεω (αίρε-, έλ-), take, fut. αίρήσω, 2 nor. είλον.

είδον (ριδ., ίδ.), saw, nidi, 2 aorist (no present act.); 2 pf. οίδα, know (820). Mid. είδομαι (poet.). Είδον is used as 2 aor. of ὁράω (see below).

εἶπον (εἰπ-, ἐρ-, ῥε-), spoke, 2 aor. (no pres.); fut. (ἐρέω) ἐρῶ, pf. εἶ-ρη-κα. The stem ἐρ- (ῥε-) is for ρερ- (ρρε-), seen in Lat.

ver-bum (649). So èν-έπω.

ἔρχομαι (ἐρχ-, ἐλευθ-, ἐλυθ-, ἐλθ-), go, fut. ἐλεύσομαι (poet.), 2 perf. ἐλήλυθα, 2 aor. ἢλθον. The Attic future is εξμι, shall go (S0S).

έσθίω (έσθ-, έδ-, φαγ-), cat, fut. έδομα, 2 aor. έφαγον.

οράω (όρα, όπ-, είδ-), see, fut. οψομαι, pf. εόρακα, 2 aor. είδον (see above).

πάσχω (παθ-, πενθ-), suffer, fut. πείσομαι, 2 pf. πέπονθα, 2 aor. επαθον. (See 617.)

πίνω (πι-, πο-), drink, fut. πίομαι, pf. πίπωκα, 2 aor. ξπιον. (See 604.)

τρέχω (τρέχ-, δραμ-), run, fut. δραμοθμαι, pf. δεδράμηκα (657),

2 aor. έδραμον.

φέρω (φερ-, οἰ-, ἐνεκ-, by reduplication and syncope ἐν-ενεκ, ἐνεγκ-), bear, fero: fut. οἴσω, αοτ. ἥνεγκα, 2 p. ἐν-ήνοχ-α (643; 692), ἐν-ήνεγ-μαι, αοτ. p. ἦνέχθην.

For full forms of these verbs, see the Catalogue. See also the

irregular verbs in μι (805-820).

**622.** N. Occasional Homeric or poetic irregular forms appear even in some verbs of the first seven classes. See ἀκαχίζω, ἀλέξω, γίγνομα, and χανδάνω in the Catalogue.

INFLECTION OF THE PRESENT AND IMPERFECT INDICATIVE.

- 623. (Common Form.) The present indicative adds the primary endings (552) to the present tense stem in %-, except in the singular of the active, where it has the terminations  $\omega$ ,  $\alpha$ s,  $\alpha$ , the origin of which is uncertain. The first person in  $\omega$  is independent of that in  $\mu$ , and both the forms in  $\omega$  and in  $\mu$  were probably inherited by the Greek from the parent language. For the third person in  $\omega \sigma \alpha$  (for  $\omega \sigma \alpha$ ), see 556, 5.
- **624.** Of the two forms of the second person singular middle in  $\eta$  and  $\epsilon \epsilon$  (565, 6), that in  $\epsilon \epsilon$  is the true Attic form, which was

- used in prose and in comedy. But the tragedians seem to have preferred the form in  $\eta$ , which is the regular form in the other dialects, except Ionic, and in the later common dialect. This applies to the future middle and passive and to the future perfect, as well as to the present.
- **625.** Βούλομαι, wish, and οἴομαι, think, have only βούλει and οἴει, with no forms in η. So ὄψομαι, future of ὁράω, see, has only ὄψει.
- **626.** The imperfect adds the secondary endings to the tense stem in %-. See the paradigm of  $\lambda \delta \omega$ .
- **627.** (Mi-form.) Here the final vowel of the stem is long (with  $\eta$ ,  $\omega$ ,  $\bar{v}$ ) in the singular of both present and imperfect indicative active, but short (with  $\bar{u}$  or  $\epsilon$ , o,  $\bar{v}$ ) in the dual and plural, and also in most other forms derived from the present stem. This change from the strong stem in the indicative singular to the weak stem in other forms is one of the most important distinctions between the  $\mu$ -form and that in  $\omega$ . The endings here include  $\mu$ ,  $\epsilon$ ,  $\sigma$  in the singular of the present, and  $\sigma \omega$  in the third person plural of the imperfect. (See 506.)
- **628.** The third person plural of the present active has the ending  $\bar{a}\sigma\iota$  (552), which is always contracted with a (but never with  $\epsilon$ , o, or v) of the stem; as  $i\sigma\tau\hat{a}\sigma\iota$  (for  $i\sigma\tau a$ - $\bar{a}\sigma\iota$ ), but  $\tau\iota\theta\dot{\epsilon}-\bar{a}\sigma\iota$ ,  $\delta\iota\delta\dot{\epsilon}-\bar{a}\sigma\iota$ ,  $\delta\epsilon\iota\kappa\nu\dot{\epsilon}-\bar{a}\sigma\iota$ .
- 629. The only verbs in  $\mu \iota$  with consonant stems are the irregular  $\epsilon l \mu \iota'$  ( $\epsilon \sigma$ -), be, and  $\tilde{\eta} \mu \alpha \iota$  ( $\tilde{\eta} \sigma$ -), sit. (See 806 and 814.)
- **630.** Some verbs in  $\eta\mu$  and  $\omega\mu$  have forms which follow the inflection of verbs in  $\epsilon\omega$  and  $\omega\omega$ . Thus the imperfect forms  $\epsilon\tau i\theta\epsilon\iota s$  and  $\epsilon\tau i\theta\epsilon\iota$  (as if from  $\tau\iota\theta\epsilon\omega$ ), and  $\epsilon\delta\iota\delta\delta\upsilon\nu$ ,  $\epsilon\delta\iota\delta\upsilon\nu$ ,  $\epsilon\delta\iota\delta\upsilon\nu$  (as if from  $\delta\iota\delta\delta\omega$ ), are much more common than the regular forms in  $\eta s$ ,  $\eta$  and  $\omega\nu$ ,  $\omega s$ ,  $\omega$ . So  $\tau\iota\theta\epsilon\iota s$  for  $\tau\iota\theta\eta s$  in the present. (See also 741.)
- 631. Some verbs in υμι have also presents in υω; as δεικνύω for δείκνυμι.
- **632.** Δύναμαι, can, and ἐπίσταμαι, know, often have ἐδύνω (or ἠδύνω) and ἡπίστω for ἐδύνασο and ἡπίστασο in the imperfect, and occasionally δύνα and ἐπίστα for δύνασαι and ἐπίστασαι in the present.
- 633. For the present (with the other tenses) in the dependent moods and the participle, see the account of these (718-775).
- $^1$  Kirchhoff and Wecklein in Aeschylus, and Bergk in Sophocles, give only the form in  $\mathfrak{g}.$

## MODIFICATION OF THE VERB STEM IN CERTAIN TENSE SYSTEMS.

- 634. Before discussing the other tense systems (II.-IX.), we must mention some modifications which the verb stem regularly undergoes in certain forms. Mere irregularities, such as are found only in verbs of the eighth class (621), are not noticed here.
- 635. (Lengthening of Vowels.) Most stems ending in a short vowel lengthen this vowel before the tense suffix (561, 5) in all tenses formed from them, except the present and imperfect. A and  $\epsilon$  become  $\eta$ , and  $\delta$  becomes  $\omega$ ; but  $\tilde{a}$  after  $\epsilon$ ,  $\iota$ , or  $\rho$  becomes  $\tilde{a}$  (29). E.g.

Τίμάω (τίμα-), honor, τιμή-σω, ἐτίμη-σα, τετίμη-κα, τετίμη-μαι, ἐτίμη-θην; φιλέω (φιλε-), love, φιλήσω, ἐφίλησα, πεφίληκα, πεφίλημαι, ἐφιλήθην; δηλώω (δηλο-), show, δηλώσω, ἐδήλωσα, δεδήλωκα, δακρύω, δακρύσω. Βιιτ ἐάω, ἐάσω; ἰάομαι, ἰάσομαι; δράω, δράσω, ἔδρασα, δέδρακα.

- **636.** This applies also to stems which become vowel stems by metathesis (649); as  $\beta$ άλλω ( $\beta$ αλ-,  $\beta$ λα-), throw,  $\gamma$ 1.  $\beta$ έ $\beta$ λη-κα; κάμνω (καμ-, κμα-), labor, κέκμη-κα; or by adding  $\epsilon$  (657); as  $\beta$ ούλομαι ( $\beta$ ουλ-,  $\beta$ ουλέ-), wish,  $\beta$ ουλή-σομαι,  $\beta$ ε $\beta$ ούλη-μαι, έ $\beta$ ουλή-θην.
- **637.** For the long stem vowel in the singular of the present and imperfect indicative of verbs in  $\mu$ , see 627.
- 638. N. 'Ακροάομαι, hear, has ἀκροάσομαι etc.; χράω, give oracles, lengthens ἄ to η; as χρήσω etc. So τρήσω and ἔτρησα from stem τρά-; see τετραίνω, hore.
- 639. Some vowel stems retain the short vowel, contrary to the general rule (635); as γελάω, laugh, γελάσομαι, ἐγέλάσα; ἀρκέω, suffice, ἀρκέσω, ἤρκεσα; μάχομαι (μοχε-), fight, μαχέσομαι (lon.), ἐμαχεσάμην.
- (a) This occurs in the following verbs: (pure verbs) ἄγαμαι, αιδέομαι, ἀκέυμαι, ἀλέω, ἀνύω, ἀμκέω, ἀρόω, ἀρύω, γελάω, έλκύω (see ἔλκω), ἐμέω, ἐράω, ζέω, θλάω, κλάω, break, ξέω, πτύω, σπάω, τελέω, τρέω, φλάω, χαλάω; and epic ἀκηδίω, κοτέω, λοέω, νεικέω, and the stems (ἀα-) and (ἀε-); (other verbs with vowel stems) ἀρέσκω (ἀρε-). ἄχθομαι (ἀχθε-), ἐλαύνω (ἐλα-), ἱλάσκομαι (ἰλα-), μεθύσκω (μεθυ-); also all verbs in αννῦμι and εντῦμι, with stems in α and ε (given in 797, 1), with ὅλλῦμι (ὀλε-) and ὅμνῦμι (ὀμο-).
- (b) The final vowel of the stem is variable in quantity in different tenses in the following verbs: (pure verbs) αἰνίω, αἰρίω, δέω,

- bind, δύω (see δύνω), ἐρύω (epic), θύω, sacrifice, καλέω, λύω, μύω, ποθέω, πονέω;— (other verbs) βαίνω (βα-), εὐρίσκω (έὑρ-, εὑρε-), μάχομαι (μαχε-), πίνω (πι-, πο-), φθάνω (φθυ-), φθίνω (φθι-).
- **640.** (Insertion of  $\sigma$ .) Vowel stems which retain the short vowel (639) and some others add  $\sigma$  to the final vowel before all endings not beginning with  $\sigma$  in the perfect and pluperfect middle. The same verbs have  $\sigma$  before  $\theta \epsilon$  or  $\theta \eta$  in the first passive tense system. E.g.

Τελέω, finish, τετέλε-σ-μαι, ετετελέσμην, ετελέσθην, τελέσθήσομαι; γελάω, laugh, εγελά-σ-θην, γελασθήναι; χράω, give oracles, χρήσω, κέχρη-σ-μαι, εγρήσθην.

- 641. This occurs in all the verbs of 639 (a), except ἀρόω, so far as they form these tenses; and in the following: ἀκούω, δράω, θραύω, κελεύω, κλείω (κλήω), κνάω, κναίω, κρούω, κυλίω (οτ κυλίνδω), λεύω, νέω, heap, ξύω, παίω, παλαίω, παίω, πλέω, πρίω, σείω, τίνω, ὅω, χόω, χράω, χρίω, and poetic ραίω. Some, however, have forms both with and without σ. See the Catalogue.
- 642. (Strong Form of Stem in Second Class.) 1. Verbs of the second class have the strong form of the stem (572), as λειπ- οτ λοιπ- in λείπω, τηκ- in τήκω, νευ- in (νεςω) νέω, in all tenses except in the second agrist and second passive tense systems; as φεύγω, φεύξομαι, πέφευγα, ἔφυγον; λείπω, λείψω, λέλοιπα, ἔλιπον; τήκω, τήξω, τέτηκα, ἐτάκην; ῥέω (for ῥεςω), ῥεύσομαι, ἐρρύην.
- 2. Exceptions are the perfect and a orist passive of  $\tau\epsilon\dot{\nu}\chi\omega$  ( $\tau\nu\chi$ -), which are regular in Ionic, and most tenses of  $\chi\dot{\epsilon}\omega$  ( $\chi\nu$ -) and  $\sigma\dot{\epsilon}\dot{\nu}\omega$  ( $\sigma\nu$ -). After the Attic reduplication (529) the weak form appears; as in  $d\lambda\dot{\epsilon}\dot{\rho}\omega$  ( $d\lambda\dot{\epsilon}\phi$ -),  $d\lambda$ - $\eta\lambda\dot{\epsilon}\dot{\rho}\omega$ : see also  $\dot{\epsilon}\rho\dot{\epsilon}\dot{\epsilon}\kappa\omega$  and  $\dot{\epsilon}\rho\dot{\epsilon}\dot{\epsilon}\tau\omega$ . The perfects  $\dot{\epsilon}\rho\rho\dot{\nu}\eta\kappa\omega$  ( $\dot{\rho}\dot{\epsilon}\omega$ ) and  $\dot{\epsilon}\sigma\dot{\epsilon}\dot{\beta}\eta\mu\omega$  are from stems in  $\dot{\epsilon}$  (658, 2).
- **643.** (E changed to o in Second Perfect.) In the second perfect system,  $\epsilon$  of the verb stem is changed to o. E.g.

Στέργω, love, ξοτυργα; πέμπω, send, πέπομφα; κλέπτω, steal, κέκλοφα (576; 692); τρέφω, nourish, τέτροφα; τίκτω (τεκ-), bring forth, τέτοκα; γίγνομαι (γεν-), become, γέγονα, εγεγόνη, γεγονέναι, γεγονώς.

Sο ἐγείρω (ἐγερ-), ἐγρήγορα (532); κτείνω (κτεν-), ἔκτονα (in compos.); λέγω, collect, εἴλοχα; πάσχω (παθ-, πενθ-), πέπονθα; πέρδομαι, πέπορδα; τρέπω, τέτροφα; φέρω (ἐνεκ-), ἐνήνοχα; φθείρω (φθερ-). ἔφθορα; χέζω (χεδ-), κέχοδα.

For  $\lambda \epsilon i \pi \cdot \omega$ ,  $\lambda \epsilon \cdot \lambda o i \pi \cdot a$ , and  $\pi \epsilon i \theta \cdot \omega$ ,  $\pi \epsilon \cdot \pi o i \theta \cdot a$ , see 31; 642, 1.

**644.** (A lengthened to  $\eta$  or  $\bar{a}$  in Second Perfect.) In some verbs  $\bar{a}$  of the stem is lengthened to  $\eta$  or  $\bar{a}$  in the second perfect.

These are ἄγνῦμι (ἀγ·), ἔαγα (1οπίς ἔηγα); θάλλω (θαλ-), τέθηλα; κράζω (κραγ·), κέκραγα; λάσκω (λακ-), λέλακα; μαίνομαι (μαν-), μέμηνα; σαίρω (σαρ-), σέσηρα; φαίνω (φαν-), πέφηνα.

**645.** (E changed to  $\check{a}$ .) In monosyllabic liquid stems,  $\epsilon$  is generally changed to  $\check{a}$  in the first perfect, perfect middle, and second passive tense systems. E.g.

Στέλλω (στελ-), send, ξσταλκα, ξσταλμαι, ἐστάλην, σταλήσομαι; κείρω (κερ-), shear, κέκαρμαι, ἐκάρην (1011.); σπείρω (σπερ-), sow, ξσπαρμαι, ἐσπάρην. So in δέρω, κτείνω, μείρομαι, τείνω, τέλλω, and φθείρω.

- 647. (N of stem dropped.) Four verbs in  $\nu\omega$  drop  $\nu$  of the stem in the perfect and first passive systems, and thus have vowel stems in these forms:—

κρίνω (κριν-), separate, κέκρικα, κέκριμαι, ἐκρίθην; κλίνω (κλιν-), incline, κέκλικα, κέκλιμαι, ἐκλίθην; πλύνω (πλυν-), wash, πέπλυμαι, ἐπλύθην; τείνω (τεν-), stretch, τέτακα (645), τέταμαι, ἐτάθην, ἐκταθήσομαι. So κτείνω in some poetic forms; as ἐκτά-θην, ἐκτά-μην. See also epic stem φεν-, φα-. For the regular Homeric ἐκλίνθην and ἐκρίνθην, see 709.

- 648. When final ν of a stem is not thus dropped, it becomes nasal γ before κα (78, 1), and is generally replaced by σ before μαι (83); as φαίνω (φαν-), πέφαγκα, πέφασμαι, ἐφάνθην. (See 700.)
  - 649. (Metathesis.) The stem sometimes suffers metathesis (64):
  - (I) in the present, as  $\theta v \eta' \sigma \kappa \omega$  ( $\theta \omega$ ,  $\theta v \alpha$ -), die, (616);
- (2) in other tenses, as βάλλω (βαλ-, βλα-), throw, βέβληκα, βέβλημαι, ξβλήθην; and (poetic) δέρκομαι (δερκ-), see, 2 aor. ξδρακον (δρακ-, 646).

- 650. (Syncope.) Sometimes syncope (65):
- (1) in the present, as γίγνομαι (γεν-), become, for γι-γεν-ομαι;

(2) in the second agrist, as επτόμην for ε-πετ-ομην;

- (3) in the perfect, as πετάννυμι (πετα-), expand, πέπταμαι for πε-πετα-μαι. See φέρω in 621.
- **651.** (Reduplication.) Sometimes reduplication, besides the regular reduplication of the perfect stem (520):

(1) in the present, as γι-γνώσκω, know, γί-γνομαι, τί-θημι.

- (2) in the second agrist, as  $\pi\epsilon i\theta\omega$  ( $\pi\iota\theta$ -), persuade,  $\pi\epsilon -\pi\iota\theta\omega$  (epic); so  $\tilde{\alpha}\gamma\omega$ ,  $\tilde{\eta}\gamma\alpha\gamma\omega$  (Attic).
  - 652. 1. The following are reduplicated in the present: -
- (a) In Class I., γί-γνομωι (for γι-γεν-ομωι); ἴσχω (for σι-σεχ-ω); μίμνω (for μι-μενω), poetic for μένω; πίπτω (for πι-πετ-ω); τίκτω (for  $\tau$ ι-τεκ-ω).
- (b) In Class VI., βι-βρώσκω (βρο-), γι-γνώσκω (γνο-), δι-δράσκω (δρα-), μι-μνήσκω (μνα-), πι-πράσκω (πρα-), τι-τρώσκω (τρο-), with poetic πι-πίσκω and πι-φαύσκω, and ἀραρίσκω with peculiar Attic reduplication (615).
- (c) In Class VII., the verbs in  $\mu$  which are enumerated in 794, 2.
  - 2. For reduplicated second agrists, see 534 and 535.
- **653.** (E added to Stem.) New stems are often formed by adding  $\epsilon$  to the verb stem.
- **654.** (1) From this new stem in  $\epsilon$  some verbs form the present stem (by adding %-), sometimes also other tense stems. E.g.

Δοκέ-ω (δοκ-), scem, pres. stem (δοκέ-%-, fut. δόξω; γαμέ-ω (γαμ-), marry, fut. γαμῶ, pf. γεγάμηκα; ωθέω (ωθ-), push, fut. ὧσω (poet. ωθήσω).

655. These verbs are, further, γεγωνέω, γηθέω, κτυπέω, κυρέω, μαρτυρέω (also μαρτύρομαι), ρίπτεω (also ρίπτω), φιλέω (see epic forms); and poetic δουπέω, είλεω, ἐπαυρέω, κελαδέω, κεντέω, πατέσμαι, ρίγέω, στυγέω, τορέω, and χραισμέω. See also πεκτέω (πεκ-, πεκτ-).

Most verbs in  $\epsilon \omega$  have their regular stems in  $\epsilon$ -, as  $\pi o i \hat{\epsilon} \omega$  ( $\pi o i \epsilon$ -), make, fut.  $\pi o i \hat{\eta} \sigma \omega$ .

- **656.** N. A few chiefly poetic verbs add a in the same way to the verb stem. See βρῦχάομαι, γοάω, δηριάω, μηκάομαι, μητιάω, μῦκάομαι.
  - **657.** (2) Generally the new stem in  $\epsilon$  does not appear in

the present. But in some verbs it forms special tenses; in others it forms all the tenses except the present, imperfect, second perfect, and the second agrists. E.g.

Βούλομαι (βουλ-). wish, βουλήσομαι (βουλε-, 636); αἰσθάνομαι (αἰσθ-), perceive, αἰσθήσομαι (αἰσθε-), ήσθημαι; μένω (μεν-), remain, μεμένηκα (μενε-); μάχομαι (μαχ-), fight, fut. (μαχέ-ομαι) μαχοῦμαι, εμαχεσάμην, μεμάχημαι.

- 658. 1. The following have the stem in ε in all tenses except those mentioned (657): αἰσθάνομαι (αἰσθ-), ἀλέξω, ἄλθομαι (1οπ.), ἀμαρτάνω (ἀμαρτ-), ἀνδάνω (άδ-), ἀπ-εχθάνομαι (-εχθ-), αὐξάνω (αὐξ-), ἄχθομαι, βλαστάνω (βλαστ-), βούλομαι, βόσκω, δέω, want, ἐθέλω and θέλω, ἔρομαι and εἴρομαι (1οπ.), ἔρρω, εὕδω, εὑρίσκω, ἔψω, κέλομαι (poet.), κιχάνω (κιχ-), λάσκω (λακ-), μανθάνω (μιθ-), μάχομαι, μέδομαι, μέλλω, μέλω, μύζω, οἴομαι, οἴχομαι, ὀλισθάνω (ὀλισθ : ἄλλιπμι, ὀφλισκάνω (ὀφλ-), πέτομαι, στορνύμι: see poetic ἀμπλακίσκω and ἀπαφίσκω, and the stem δα-. See also κερδαίνω.
- 2. The following have the stem in  $\epsilon$  in special tenses formed from the verb stem or the weak stem (31):  $\delta \alpha \rho \theta \delta \omega (\delta \alpha \rho \theta)$ .  $\rho \delta \omega \omega (\delta \alpha \rho \theta)$ ,  $\rho \delta \omega \omega (\delta \alpha \rho \theta)$ ,  $\rho \delta \omega (\delta \alpha \rho \rho)$ ,  $\rho \delta \omega (\delta \alpha \rho)$ ,  $\rho$

3. The following form certain tenses from a stem made by adding  $\epsilon$  to the present stem without the thematic vowel: διδάσκω, καθίζω, κήδω, κλαίω, ὅζω, ὀφείλω, τύπτω, χαίρω.

**659.** N. In ὅμνῦμι, swear, the stem ὅμ- is enlarged to ὁμο- in some tenses, as in ὅμο-σα; in ἀλίσκομα, be captured, ἀλ- is enlarged to ἀλο-, as in ἀλώσομαι. So τρῦχω (τρῦχ-), exhaust, τρῦχώσω. So probably οἴχομαι, be gone, has stem οἰχο- for οἰχε- in the perfect οἵχω-κα (cf. lon. οἵχη-μαι).

## FORMATION OF TENSE STEMS AND INFLECTION OF TENSE SYSTEMS IN THE INDICATIVE.

#### I. PRESENT SYSTEM.

- 660. The formation of the present stem and the inflection of the present and imperfect indicative have been explained in 568-622 and 623-632.
- 661. The eight remaining tense stems (II.-IX.) are formed from the verb stem. This is the simplest form of the stem in all classes of verbs except the Second, where it is the *strong* form (575; 642).

For special modifications of certain tense stems, see 634-659.

For the inflection of the subjunctive, optative, and imperative in all tenses, see 718-758; for the formation of the infinitive, see 759-769; and for that of the participles and verbals in -70s and -760s, see 770-776.

#### II. FUTURE SYSTEM.

662. (Future Active and Middle.) Vowel and mute stems (460) add  $\sigma$ %- to form the stem of the future active and middle. The indicative active thus ends in  $\sigma\omega$ , and the middle in  $\sigma\sigma\mu$ a. They are inflected like the present (see 480). E.g.

Τιμάω, honor, τιμήσω (τιμησ%-); δράω, do, δράσω (635); κόπτω (κοπ-), cut, κόψω; βλάπτω (βλαβ-), hurl, βλάψω, βλάψομαι (74); γράφω, write, γράψω, γράψομαι; πλέκω, twist, πλέξω; πράσσω (πραγ-), do, πράξω, πράξομαι; ταράσσω (ταραχ-), confuse, ταράξω, ταράξομαι; φράζω (φραδ-), tell, φράσω (for φραδ-σω); πείθω, persuade, πείσω (for πειθ-σω); λείπω, leave, λείψω, λείψομαι (642). So σπένδω, pour, σπείσω (for σπενδ-σω, 79), τρέφω, nourish, θρέψω, θρέψομαι (95, 5).

**663.** (Liquid Futures.) Liquid stems (460) add ε%- to form the future stem, making forms in  $\epsilon_{\omega}$  and  $\epsilon_{\omega}$  and  $\epsilon_{\omega}$  contracted to  $\hat{\omega}$  and  $\hat{\omega}$  and inflected like  $\hat{\omega}$  and  $\hat{\omega}$  and  $\hat{\omega}$   $\hat{\omega}$  and  $\hat{\omega}$   $\hat{\omega}$  and  $\hat{\omega}$   $\hat{\omega}$  and  $\hat{\omega}$   $\hat{\omega}$   $\hat{\omega}$   $\hat{\omega}$  and  $\hat{\omega}$   $\hat{$ 

Φαίνω (φαν-), show, fnt. (φανέ-ω) φανῶ, (φανέ-ομαι) φανοῦμαι; στέλλω (στελ-), send, (στελέ-ω) στελῶ, (στελέ-ομαι) στελοῦμαι; νέμω, divide, (νεμέ-ω) νεμῶ; κρίνω (κριν-), judge, (κρινέ-ω) κρινῶ-

- **664.** N. Here  $\epsilon$ %- is for an original  $\epsilon \sigma$ %-, the  $\sigma$  being dropped between two vowels (88).
- **665.** (Attic Future.) 1. The futures of καλίω, call, and τελέω, finish, καλίσω and τελέσω (639), drop  $\sigma$  of the future stem, and contract καλε- and τελε- with  $\omega$  and omai, making καλῶ, καλοῦμωι, τελῶ and (poetic) τελοῦμαι. These futures have thus the same forms as the presents.

So ὅλλῦμι (όλ-, ὁλε-), destroy, has future ὀλέσω (Hom.), ὀλέω (Hdt.), ὀλῶ (Attic). So μαχέσομαι, Homeric future of μάχομαι (μαχε-), fight, becomes μαχοῦμαι in Attic. Καθέζομαι (έδ-), sit, has καθέδοῦμαι.

2. In like manner, futures in ασω from verbs in αννύμι, some in εσω from verbs in εννύμι, and some in ασω from verbs in αζω, drop σ and contract αω and εω to ω. Thus σκεδάννύμι (σκεδα-), scatter, fut. σκεδάσω, (σκεδάω) σκεδώ; στορέννύμι (στορε-), spread, στορίσω, (στορέω) στορώ; βιβάζω, cause to go, βιβάσω, (βιβάω) βιβω. So

 $\dot{\epsilon}$ λαύνω ( $\dot{\epsilon}$ λα-), drive (612), future  $\dot{\epsilon}$ λάσω, ( $\dot{\epsilon}$ λάω)  $\dot{\epsilon}$ λώ. For future  $\dot{\epsilon}$ λόω,  $\dot{\epsilon}$ λόωσι, etc. in Homer, see 784, 2 (c).

3. Futures in ισω and ισομαι from verbs in ιζω of more than two syllables regularly drop σ and insert ε; then ιέω and ιέομαι are contracted to ιῶ and ιοῦμαι; as κομίζω, carry, κομίσω, (κομιέω) κομιῶ, κομίσομαι, (κομιέομαι) κομιοῦμαι, inflected like φιλῶ, φιλοῦμαι (492). See 785, 1 (end).

4. These forms of future (665, 1-3) are called Attic, because the purer Attic seldom uses any others in these tenses; but they are

found also in other dialects and even in Homer.

666. (Doric Future.) 1. These verbs form the stem of the future middle in σε%-, and contract σέομαι to σοῦμαι: πλέω, sail, πλευσοῦμαι (574); πνέω, breathe, πνευσοῦμαι; νέω, swim, νευσοῦμαι; κλαίω, weep, κλαυσοῦμαι (601); φεύγω, flee, φευξοῦμαι; πίπτω, fall, πεσοῦμαι. See also παίζω (590) and πυνθάνομαι.

The Attic has these, with the regular futures πλεύσομαι, πνεύ-

σομαι, κλαύσομαι, φεύξομαι (but never πέσομαι).

2. These are called *Doric* futures, because the Doric forms futures in σέω, σώ, and σέομαι, σούμαι.

- 667. N. A few irregular futures drop  $\sigma$  of the stem, which thus has the appearance of a present stem. Such are  $\chi \epsilon \omega$  and  $\chi \epsilon \omega \omega$ , fut. of  $\chi \epsilon \omega$ , pour;  $\epsilon \delta \omega \omega$ , from  $\epsilon \sigma \theta \epsilon \omega$  ( $\epsilon \delta$ -), eat;  $\pi \epsilon \omega \omega$ , from  $\pi \epsilon \omega \omega$  ( $\pi \epsilon$ -), drink (621).
- 668. N. A few poetic liquid stems add  $\sigma$  like mute stems; κέλλω (κέλ-), land, κέλσω; κίρω, meet, κύρσω; δρνῦμι (όρ-), rouse, δρσω. So θέρομαι, be warmed, Hom. fut. θέρσομαι; φθείρω (φθερ-), destroy, Hom. fut. φθέρσω. For the corresponding agrists, see 674 (b).

#### III. FIRST AORIST SYSTEM.

669. (First Aorist Active and Middle.) 1. Vowel and mute stems (460) add  $\sigma a$  to form the stem of the first aorist active and middle. The indicative active thus ends in  $\sigma a$ , which becomes  $\sigma \epsilon$  in the third person singular; and the middle ends in  $\sigma a \mu \eta \nu$ . E.g.

Τιμάω, ἐτίμησα, ἐτίμησάμην (535); δράω, ἔδρασα; κόπτω, ἔκοψα, ἐκοψάμην; βλάπτω, ἔβλαψα; γράφω, ἔγραψα, ἐγραψάμην; πλέκω, ἔπλεξα, ἐπλεξάμην; πράσσω, ἔπραξα, ἐπραξάμην; ταράσσω, ἔτάραξα; φράζω, ἔφρασα (tor ἐφραδοσα); πείθω, ἔπεισα (74); σπένδω, ἔσπεισα (for ἐσπενδοσα); τρέφω, ἔθρεψα, ἐθρεψάμην (95, 5); τήκω, melt, ἔτηξα; πλέω, sail, ἔπλευσα (574).

For the inflection, see 480.

- 670. Three verbs in  $\mu$ , δίδω $\mu$  (δο-), give, ξη $\mu$  (ξ-), send, and τίθη $\mu$ ι (θε-), put, have  $\kappa a$  for  $\sigma a$  in the first acrist active, giving ξδωκα, ήκα, and ξθηκα. These forms are seldom used except in the indicative, and are most common in the singular, where the second acrists are not in use. (See 802.) Even the middle forms ήκάμην and  $\xi \theta$ ηκάμην occur, the latter not in Attic Greek (810).
- 671. N. Χέω, pour, has a rists ἔχεα (Hom. ἔχευα) and ἐχεάμην, corresponding to the futures χέω and χέυμαι (667). Εἶπον, said, has also first a rist εἶπα; and φέρω, bear, has ἥνεγκ-α (from stem ἐνεγκ-).

For Homeric acrists like έβήσετο, έδύσετο, ίξον, etc., see 777, 8.

672. (Liquid Aorists.) Liquid stems (460) drop  $\sigma$  in  $\sigma a$ , leaving a, and lengthen their last vowel,  $\tilde{a}$  to  $\eta$  (after  $\epsilon$  or  $\rho$  to  $\tilde{a}$ ) and  $\epsilon$  to  $\epsilon \epsilon$  (89). See 482. E.g.

Φαίνω (φαν-), ἔφην-α (for ἐφανσα); στέλλω (στελ-), ἔστειλ-α (for ἐστελ-σα) ἐστειλ-άμην; ἀγγέλλω (ἀγγελ-), announce, ἤγγειλα, ἤγγειλάμην; περαίνω (περαν-), finish, ἐπέρᾶνα; μιαίνω (μαν-), stain, ἐμίᾶνα; νέμω, divide, ἔνειμα, ἐνειμάμην; κρίνω, judge, ἔκρῖνα; ἀμύνω, kcep off, ἤμῦνα, ἡμῦνάμην; φθείρω (φθερ-), destroy, ἔφθειρα. Compare the futures in 663, and see 664.

- 673. N. A few liquid stems lengthen av to āv irregularly; as κερδαίνω (κερδαν-), gain, ἐκέρδανα. A few lengthen ραν to ρην; as τετραίνω (τετραν-), bore, ἐτέτρηνα.
- 674. N. (a) Αἴρω (ἀρ·), raise, has ἦρα, ἦράμην (augmented): but ā in other forms, as ἄρω, ἄρον, ἄρᾶς, ἄρωμαι, ἄραίμην, ἄράμενος
- (b) The poetic κάλλω, κύρω, and ὅρνῦμι have acrists ἔκελσα, ἔκυρσα, and ὅρσα. See the corresponding futures (668). But ἀκέλλω (in prose) has ὥκειλα (see S9).

### IV. SECOND AORIST SYSTEM.

675. (Second Aorist Active and Middle.) The stem of the second aorist active and middle of the common form (565) is the verb stem (in the second class, the weak stem) with %-affixed. These tenses are inflected in the indicative like the imperfect (see 626). E.g.

Λείπω (572), ἔλιπον, ἐλιπόμην (2 aor. stem λιπ%-); λαμβάνω (λαβ-), take, ἔλαβον, ἐλαβόμην (2 aor. stem λαβ%-). See 481.

- 676. N. A few second agrist stems change ε to α; as τέμνω (τεμ-), cut, Ionic and poetic ἔταμον, ἐταμόμην. See 646.
- 677. N. A few stems are syncopated (650); as πέτομαι (πετ-), fly, 2 aor. m. ἐπτόμην for ἐπετ-ομην; ἐγείρω (ἐγερ-), rouse, ἡγρόμην

for  $\eta \gamma \epsilon \rho - \rho \mu \eta \nu$ ;  $\eta \lambda \theta \rho \nu$ , went, from stein  $\epsilon \lambda \nu \theta$ , for  $\eta \lambda \nu \theta \rho \nu$  (Hom.);  $\tilde{\epsilon}\pi o\mu \alpha i$  ( $\sigma \epsilon \pi$ -), follow,  $\tilde{\epsilon}\sigma \pi o\mu \eta \nu$ , for  $\tilde{\epsilon}\sigma \epsilon \pi o\mu \eta \nu$ ;  $\tilde{\epsilon}\chi \omega$  ( $\sigma \epsilon \chi$ -), have, έσγον for έ-σεγ-ον. So the Homeric εκεκλόμην, for έ-κε-κελ-ομην, or κεκλόμην, from κέλομαι, command: άλαλκον, for άλ-αλεκ-ον, from άλέξω (άλεκ-), ward off: for these and other reduplicated second aorists, see 531; 535. For yayov, 2 aor. of ayw, see 535.

678. (Mi-form.) The stem of the second agrist of the  $\mu$ -form is the simple verb stem with no suffix. The stem vowel is regularly long  $(\eta, \omega, \text{ or } \bar{\nu})$  throughout the indicative active, and the third person has the ending our. (For the long vowel in the imperative and infinitive, see 755; 766, 2.)  $E_{g}$ .

"Ιστημι (στα-), 2 aor. έστην, έστης, έστη, έστησαν, etc. For the inflection, see 506. For δίδωμι, Ιημι, and τίθημι, see 802.

For the great variety of forms in these second agrists, see the complete enumeration (798; 799).

- 679. The second agrist middle of the pe-form regularly drops  $\sigma$  in  $\sigma$ o in the second person singular (564, 6) after a short vowel, and then contracts that vowel with o; as ifor in the or (ifeo); έδου for ε-δο-σο (εδοο).
- **680.** Verbs in  $\bar{\nu}\mu$  form no Attic second agrists from the stem in v (797, 1).
- 681. For second agrists middle in nunv, tunv, and vunv, and some from consonant stems, see 800.

#### V. FIRST PERFECT SYSTEM.

682. (First Perfect and Pluperfect Active.) The stem of the first perfect active is formed by adding Ka- to the reduplicated verb stem. It has ka, kas, ke, in the indicative singular, and κῶσι (for κα-νσι), rarely κᾶσι in poetry, in the third person plural. For the inflection, see 480. E.g.

 $\Lambda \dot{v}\omega$ , ( $\lambda \epsilon \lambda v \kappa$ -)  $\lambda \dot{\epsilon} \lambda v \kappa a$ ;  $\pi \epsilon \dot{\iota} \theta \omega$ , persuade,  $\pi \dot{\epsilon} \pi \epsilon \iota \kappa a$  (for  $\pi \epsilon - \pi \epsilon \iota \theta - \kappa a$ ); κομίζω (κομιδ.), carry, κεκόμικα (for κε-κομιδ.κα, 73).

683. 1. The pluperfeet changes final a- of the perfect stem to e-, to which are added a oristic terminations a, as, e (669) in the singular, ea, eas, ee(v) being contracted to n, ns, ec(v) in Attic. The dual and plural add the regular secondary endings (552) to the stem in e-, with oar in the third person plural.

Έλελύκη, ελελύκης, ελελύκει(ν), ελελύκε-τον, ελελύκε-μεν, ελελύκε-τε, έλελύκε-σαν: στέλλω, έσταλκα, έστάλκη, έστάλκης, ζυτάλκει(ν),

έστάλκε-μεν, έστάλκε-σαν. Γου ει(ν), see 58.

- 2. In the singular, Herodotus has the original  $\epsilon \alpha$ ,  $\epsilon \alpha s$ ,  $\epsilon \epsilon \epsilon$ , and Homer has  $\epsilon \alpha$ ,  $\gamma s$ ,  $\epsilon \epsilon (\nu)$ ; later Attic writers, and sometimes the orators, have  $\epsilon \iota \nu$ ,  $\epsilon \iota s$ ,  $\epsilon \iota$ . In the dual and plural  $\epsilon \iota$  for  $\epsilon$  is not classic.
- 684. The stem may be modified before  $\kappa$  in both perfect and pluperfect, by lengthening its final vowel (635), by changing  $\epsilon$  to  $\tilde{\alpha}$  in monosyllabic liquid stems (645), by dropping  $\nu$  in a few verbs (647), or by metathesis (649); as  $\phi\iota\lambda\epsilon\omega$ , love,  $\pi\epsilon\phi\iota\lambda\eta\kappa\alpha$ ;  $\phi\theta\epsilon\iota\rho\omega$  ( $\phi\theta\epsilon\rho$ ), destroy,  $\tilde{\epsilon}\phi\theta\alpha\rho\kappa\alpha$ ;  $\kappa\rho\iota\nu\omega$  ( $\kappa\rho\iota\nu$ ), judge,  $\kappa\epsilon\kappa\rho\iota\kappa\alpha$ ;  $\beta\dot{\alpha}\lambda\lambda\omega$  ( $\beta\alpha\lambda$ ), throw,  $\beta\epsilon\beta\lambda\eta\kappa\alpha$  (636).
  - 685. N. Ει of the stem becomes οι in (δείδω) δέδοικα (31).
- **686.** N. The first perfect (or perfect in  $\kappa a$ ) belongs especially to vowel stems, and in Homer it is found only with these. It was afterwards formed from many liquid stems, and from some lingual stems,  $\tau$ ,  $\delta$ , or  $\theta$  being dropped before  $\kappa a$ .

#### VI. SECOND PERFECT SYSTEM.

- **687.** (Second Perfect Active.) The stem of the second perfect of the common form is the reduplicated verb stem with a affixed; as γράφ-ω, write, γέγραφα (stem γεγραφα-); φεύγω, flee, πέφευγα (642).
- 688. 1. For the change of  $\epsilon$  to o in the stem, see 643. For  $\lambda \epsilon \lambda o i \pi a$  and  $\pi \epsilon \pi o i \theta a$ , see 642, 1, and 31.
  - 2. For the lengthening of  $\tilde{a}$  to  $\eta$  or  $\tilde{a}$  in some verbs, see 644.
- 3. For the lengthening of the stem vowel in  $\lambda \alpha \gamma \chi \acute{a}\nu \omega$  ( $\lambda \alpha \chi$ -),  $\lambda \alpha \mu \beta \acute{a}\nu \omega$  ( $\lambda \alpha \beta$ -),  $\lambda \alpha \nu \theta \acute{a}\nu \omega$  ( $\lambda \alpha \theta$ -),  $\tau \nu \gamma \chi \acute{a}\nu \omega$  ( $\tau \nu \chi$ -), and some other verbs, see 611.
- **689.** N. Έρρωγα from ρήγν $\bar{\nu}$ μι (ρηγ-) and εἴωθα (537, 2) from ε̃θω (ήθ-) change  $\eta$  of the stem to  $\omega$  (31).
- **690.** N. Vowel stems do not form second perfects; ἀκήκο-α, from ἀκού-ω, hear (stem ἀκου-, ἀκος-), is only an apparent exception.
- **691.** N. Homer has many second perfects not found in Attic; as προ-βέβουλα from βούλομαι, wish; μέμηλα from μέλω, concern; ξολπα from ξλπω, hope; δίδουπα from δουπέω (δουπ-), resound.
- 692. (Aspirated Second Perfects.) Most stems ending in  $\pi$  or  $\beta$  change these to  $\phi$ , and most ending in  $\kappa$  or  $\gamma$  change these to  $\chi$ , in the second perfect, if a short vowel precedes. Those in  $\phi$  and  $\chi$  make no change. E.g.

Βλάπτω (βλαβ-), βέβλαφα; κόπτω (κοπ-), κέκοφα; ἀλλάσσω

(άλλαγ-), ήλλαχα; φυλάσσω (φυλακ-), πεφύλαχα.

But πλήσσω, πέπληγα; φεύγω, πέφευγα; στέργω, ἔστοργα; λάμπω, λέλαμπα. In ἄγω (ἀγ-), ήχα, η is lengthened by reduplication.

- 693. The following verbs form aspirated second perfects: ἄγω, ἀλλάσσω, ἀνοίγω, βλάπτω, δείκνῦμι, κηρύσσω, κλέπτω, κόπτω, λαμβάνω, λάπτω, λέγω (collect), μάσσω, πέμπω, πράσσω, πτήσσω, τάσσω, τρέπω, τρίβω, φέρω, φυλάσσω. Of these δείκνῦμι, κηρύσσω, λαμβάνω, πέμπω, and πτήσσω are exceptions to 692. 'Ανοίγω has both ἀνίψγα and ἀνέψχα, and πράσσω has both πέπραχα, have done, and πέπραγα, fare (well or ill).
- 694. N. The aspirated perfect is not found in Homer: only  $\tau \epsilon \tau \rho \rho \phi a$  ( $\tau \rho \epsilon \pi \omega$ ) occurs in tragedy, and only  $\pi \epsilon \pi \rho \omega \phi a$  in Herodotus and Thucydides. It is common in comedy and in the subsequent prose.
- 695. The inflection of the second perfect of the common form is the same as that of the first perfect (see 682).
- 696. (Second Pluperfect Active.) The stem of the second pluperfect changes final a- of the second perfect stem to ε-. It has the same inflection as the first pluperfect (683). E.g. Ἐπεφήνη, ἐπεφήνης, ἐπεφήνει(ν), ἐπεφήνεμεν, ἐπεφήνεσαν, etc.
- 697. (Mt-forms.) A few verbs have second perfects and pluperfects of the simple  $\mu$ -form, which affix the endings directly to the verb stem. They are never found in the singular of the indicative. E.a.

Θυήσκω (θνα-, θαν-), die, 2 perf. τέθνα-τον, τέθνα-μεν, τέθνασι; 2 plpf. ἐτέθνασαν. (See 508.)

These m-forms are enumerated in 804.

### VII. PERFECT MIDDLE SYSTEM.

698. (Perfect and Pluperfect Middle.) The stem of the perfect and pluperfect middle is the reduplicated verb stem, to which the endings are directly affixed. E.g.

Λύω, λέλυ-μαι, λέλυ-σαι, λέλυ-ται, λέλυ-σθε, λέλυ-νται;  $\epsilon$ -λελύ-μην,  $\epsilon$ -λελύ-μεθα,  $\epsilon$ -λέλυ-ντο; λείπω (λειπ-), λέλειμ-μαι (75), λέλειψαι, λέλειπ-ται.

For the inflection, see 480.

**699.** The stem may be modified (in general as in the first perfect active), by lengthening its final vowel (635), by changing  $\epsilon$  to a in monosyllabic liquid stems (645), by dropping  $\nu$  in a few verbs (617), or by metathesis (649); as  $\phi\iota\lambda\dot{\epsilon}-\omega$ ,  $\pi\epsilon\dot{\phi}\iota\lambda\gamma-\mu\alpha\iota$ ,  $\dot{\epsilon}-\pi\epsilon\dot{\phi}\iota\lambda\dot{\gamma}-\mu\gamma\nu$ ;  $\dot{\phi}\theta\dot{\epsilon}\dot{\epsilon}\dot{\rho}\omega$  ( $\dot{\phi}\theta\dot{\epsilon}\dot{\rho}-\dot{\rho}$ ),  $\ddot{\epsilon}\dot{\phi}\theta\alpha\dot{\rho}-\mu\alpha\iota$ ,  $\dot{\epsilon}\dot{\phi}\theta\dot{\alpha}\dot{\rho}-\mu\gamma\nu$ ;  $\kappa\rho\dot{t}\nu\omega$  ( $\kappa\rho\iota\nu$ -),  $\kappa\dot{\epsilon}\kappa\rho\iota-\mu\alpha\iota$ ,  $\dot{\epsilon}\kappa\kappa\kappa\dot{\rho}\dot{\epsilon}-\mu\gamma\nu$ ;  $\dot{\beta}\dot{\alpha}\lambda\lambda\omega$  ( $\dot{\beta}\alpha\lambda$ -,  $\dot{\beta}\lambda\alpha$ -),  $\dot{\beta}\dot{\epsilon}\dot{\beta}\lambda\gamma-\mu\alpha\iota$ ,  $\dot{\epsilon}-\dot{\beta}\dot{\epsilon}\dot{\beta}\lambda\dot{\gamma}-\mu\gamma\nu$ . (See 684.)

- 700. When  $\nu$  is not dropped before  $\mu a\iota$  (647), it is generally replaced by  $\sigma$  (83), and it sometimes becomes  $\mu$  (78, 2); as  $\phi a\iota \nu \omega$  ( $\phi a\nu$ -),  $\pi \dot{\epsilon} \phi a\sigma$ - $\mu a\iota$ ,  $\dot{\epsilon} -\pi \dot{\epsilon} \phi \dot{a}\sigma$ - $\mu \eta \nu$ ;  $\dot{\delta} \dot{\epsilon} \dot{\nu} \nu \omega$  ( $\dot{\delta} \dot{\epsilon} \nu \nu$ -), sharpen,  $\dot{\delta} \dot{\epsilon} \nu \mu$ - $\mu a\iota$ . Before endings not beginning with  $\mu$ , the original  $\nu$  reappears; as  $\pi \dot{\epsilon} \phi a \nu \tau a\iota$ ,  $\pi \dot{\epsilon} \phi a \nu \theta \dot{\epsilon}$ ; but forms in  $\nu$ - $\sigma a\iota$  and  $\nu$ - $\sigma o$  (like  $\pi \dot{\epsilon} \phi a \nu$ - $\sigma a\iota$ ,  $\dot{\epsilon} -\pi \dot{\epsilon} \phi a \nu$ - $\sigma o$ ) seem not to occur.
- 701. In the third person plural of the perfect and pluperfect middle, consonant stems are compelled to use the perfect participle with  $\epsilon i \sigma i$  and  $\delta \sigma a \nu$  (486, 2).

Here, however, the Ionic endings αται and ατο for νται and ντο (777, 3) are occasionally used even in Attic prose; as τετάχ-αται and ἐτετάχ-ατο (Thueyd.) for τεταγμένοι είσί and ἦσαν.

- 702. 1. For perfects in αμμαι of στρίφω, τρέπω, τρέφω, see 646.
  2. For the addition of σ to certain vowel stems before endings not beginning with σ, as τετέλεσμαι, see 640.
- 703. (Future Perfect.) The stem of the future perfect is formed by adding  $\sigma\%$  to the stem of the perfect middle. It ends in  $\sigma\sigma\mu$ a, and has the inflection of the future middle (662). A short final vowel is always lengthened before  $\sigma\sigma\mu$ a. E.g.

Λύω, λε·λύ-, λελύ-σομαι; γράφ-ω, γε-γραφ-, γεγράψομαι (74); λείπω, λελειπ-, λελείψομαι; δέω, bind, δέδεμαι (639), δεδή-σομαι; πράσσω (πράγ-), πεπράγ-, πεπράξομαι.

- 704. The future perfect is generally passive in sense. But it has a middle meaning in μεμνήσομαι, shall remember, and πεπαύσομαι, shall have ceased; and it is active in κεκτήσομαι, shall possess. It is found in only a small number of verbs.
- 705. N. Two verbs have a special form in Attic Greek for the future perfect active; θνήσκω, die, has τεθνήζω, shall be dead, formed from the perfect stem τεθνηκ-; and ἴστημι, set, has ἐστήξω, shall stand, from ἐστηκ-, stem of perfect ἔστηκα, stand. In Homer, we have also κεχαρήσω and κεχαρήσωμα, from χαίρω (χαρ-), rejoice; and κεκαδήσω (irreg.), from χάζω (χαδ-), yield.
- 706. N. In most verbs the future perfect active is expressed by the perfect participle and ἐσομαι (future of εἰμί, be); as ἐγνωκότες ἐσόμεθα, we shall have learnt. The future perfect passive may also be expressed in this way; as ἀπηλλαγμένοι ἐσόμεθα, we shall have been freed.

VIII. FIRST PASSIVE SYSTEM.

707. (First Aorist Passive.) The stem of the first aorist passive is formed by adding  $\theta\epsilon$  to the stem as it appears in

the perfect middle (omitting the reduplication). In the indicative and infinitive, and in the imperative except before  $\nu\tau$ ,  $\theta\epsilon$  becomes  $\theta\eta$ . It has the secondary active endings (552), and is inflected (in general) like the second acrist active in  $\eta\nu$  of the  $\mu$ -form (678). E.g.

Λύω, λέλυ-μαι, ἐλύθην (λυθη·); λείπω, λέλειμ-μαι, ἐλείφθην (λειπ-θη·, 71); πράσσω (πρᾶγ-), πέπρᾶγμαι, ἐπράχθην (πρᾶγ-θη·); πείθω, πέπεισ-μαι, ἐπείσ-θην; φιλέω, πεφίλη-μαι, ἐφιλήθην; πλέω (πλυ·), πέπλευσ-μαι, ἐπλεύσθην (641); τείνω (τεν-), τέτα-μαι, ἐτάθην (647); βάλλω (βαλ-, βλα-), βέβλημαι, ἐβλήθην; τελέω, τετέλεσ-μαι (640), ἐτελέσθην; ἀκούω, ἤκουσμαι, ἤκούσθην. See 480.

708. N. Τρέπω has τέτραμμαι (646), but ἐτρέφθην (Ion. ἐτράφθην); τρέφω has τέθραμμαι, ἐθρέφθην; and στρέφω has ἔστραμμαι, with (rare) ἐστρέφθην (Ion. and Dor. ἐστράφθην). Φαίνω has πέφασμαι (700), but ἐφάνθην.

**709.** N. N is added in Homer to some vowel stems before  $\theta$  of the aorist passive; as  $i\delta\rho\dot{\nu}\omega$ , ercct,  $i\delta\rho\dot{\nu}\mu\alpha\iota$ ,  $i\delta\rho\dot{\nu}r\theta\eta\nu$ , as if from a stem in  $\nu\nu$  (Attic  $i\delta\rho t\theta\eta\nu$ ). So Hom.  $\ell\kappa\lambda\ell\nu\theta\eta\nu$  and  $\ell\kappa\rho\ell\nu\theta\eta\nu$  (647), from original stems in  $\nu$ .

For  $\ell\tau\ell\theta\eta\nu$  from  $\tau\ell\theta\eta\mu\iota$  ( $\theta\epsilon$ -), and  $\ell\tau\iota\theta\eta\nu$  from  $\theta\iota\omega$ , sacrifice, see 95,3. For  $\ell\theta\rho\ell\phi\theta\eta\nu$  from  $\tau\rho\ell\phi\omega$ , nourish, and other forms with interchangeable aspirates, see 95,5.

710. (First Future Passive.) The stem of the first future passive adds  $\sigma\%$ - to the prolonged stem (in  $\theta\eta$ ) of the first aorist passive. It ends in  $\theta\eta\sigma\sigma\mu\alpha$ , and is inflected like the future middle (662). E.g.

Λύω, ἐλύθην, λυθήσομαι (stem λυθησ%-); λείπω, ἐλείφθην, λειφθήσομαι; πράσσω (πράγ-), ἐπράχθην, πράχθήσομαι; πείθω, ἐπείσθην, πεισθήσομαι; τείνω, ἐτάθην, ταθήσομαι; πλέκω, ἐπλέχθην, πλεχθήσομαι; τιμάω, ἐτιμήθην, τιμηθήσομαι; τελέω, ἐτελέσθην, τελεσθήσομαι; κλίνω, ἐκλίθην, κλιθήσομαι.

711. The first passive system rarely appears in verbs with monosyllabic liquid stems (645). But  $\tau \epsilon \acute{\nu} \omega$  ( $\tau \epsilon \nu$ ), stretch (647), has  $\epsilon \tau \acute{\alpha} \theta \eta \nu$  and  $\tau \alpha \theta \acute{\eta} \sigma \omega \omega$ .

#### IX. SECOND PASSIVE SYSTEM.

712. (Second Aorist Passive.) The stem of the second aorist passive is formed by adding  $\epsilon$  to the verb stem (in the second class, to the weak stem, 31). In the indicative, infinitive, and imperative, except before  $\nu\tau$  (707),  $\epsilon$  becomes  $\eta$ . The only regular modification of the stem is the change of  $\epsilon$  to  $\alpha$  (645). For the inflection, see 482. E.g.

Βλάπτω (βλαβ-), hurt, ἐβλάβην; γράφω (γραφ-), write, ἐγράφην; ῥίπτω (ῥιφ-), throw, ἐρρίφην; φαίνω (φαν-), ἐφάνην; στρέφω, turn, ἐστράφην(040); τέρπω, μπωse, ἐτάρπην; στέλλω(στελ-), send, ἐστάλην.

- 713. N. Πλήσσω (πληγ-), strike, has 2 aor. pass. ἐπλήγην, but in composition ἐξ-επλάγην and κατ-επλάγην (from stem πλαγ-).
- **714.** N. Some verbs have both passive aorists; as  $\beta\lambda \dot{\alpha}\pi\tau\omega$  ( $\beta\lambda \dot{\alpha}\beta$ -), hurt,  $\dot{\epsilon}\beta\lambda \dot{\alpha}\phi\theta\eta\nu$  and  $\dot{\epsilon}\beta\lambda \dot{\alpha}\beta\eta\nu$ ;  $\sigma\tau\rho\dot{\epsilon}\phi\omega$ , turn,  $\dot{\epsilon}\sigma\tau\rho\dot{\epsilon}\phi\theta\eta\nu$  (rare) and  $\dot{\epsilon}\sigma\tau\rho\dot{\alpha}\phi\eta\nu$  (646). Τρ $\dot{\epsilon}\pi\omega$ , turn, has all the six aorists:  $\ddot{\epsilon}\tau\rho\epsilon\psi\dot{\alpha}$ ,  $\dot{\epsilon}\tau\rho\epsilon\psi\dot{\alpha}\mu\eta\nu$ ,  $\ddot{\epsilon}\tau\rho\alpha\sigma\nu$  (epic and lyric),  $\dot{\epsilon}\tau\rho\alpha\pi\dot{\nu}$ ,  $\dot{\epsilon}\tau\rho\dot{\epsilon}\phi\theta\eta\nu$ ,  $\dot{\epsilon}\tau\rho\dot{\alpha}\pi\eta\nu$ .
- 715. (Second Future Passive.) The stem of the second future passive adds  $\sigma\%$  to the prolonged stem (in  $\eta$ ) of the second agrist passive. It ends in  $\eta\sigma\sigma\mu$  and is inflected like the first future (710). E.g.

Βλάπτω (βλαβ-), ἐβλάβην, βλαβή-σομαι; γράφω, ἐγράφην, γραφήσομαι; φαίνω (φαν-), ἐφάνην, φανή-σομαι; στέλλω (στέλ-), ἐστάλην, σταλή-σομαι; στρέφω, ἐστράφην, στραφή-σομαι.

- 717. The following table shows the nine tense stems (so far as they exist) of  $\lambda \hat{\nu}\omega$ ,  $\lambda \epsilon \hat{\mu}\omega$ ,  $\pi \rho \hat{\alpha} \sigma \sigma \omega$  ( $\pi \rho \hat{\alpha} \gamma$ -),  $\phi \alpha \hat{\nu}\omega$  ( $\phi \alpha \nu$ -), and  $\sigma \tau \hat{\epsilon} \lambda \lambda \omega$  ( $\sigma \tau \hat{\epsilon} \lambda$ -), with their sub-divisions.

# FORMATION OF THE DEPENDENT MOODS AND THE PARTICIPLE.

#### SUBJUNCTIVE.

- 718. The subjunctive has the primary endings (552) in all its tenses. In all forms (even in verbs in  $\mu$ ) it has a long thematic vowel  $^{\omega}/_{\pi}$  (561, 2).
- 719. (Common Form.) In the common form of inflection, the present and second agrist tense stems change  $^{o}/_{e}$ to  $^{o}/_{\eta}$ , and the first agrist tense stem changes final a to  $^{o}/_{\eta}$ . All have  $\omega$ ,  $\eta_{S}$ ,  $\eta$  in the singular, and  $\omega \sigma_{i}$  for  $\omega \nu \sigma_{i}$  (78, 3) in the third person plural, of the active. E.g.

Λείπω, pres. subj. λείπω, λείπωμαι, 2 aor. λίπω, λίπωμαι; λύω, 1 aor. λύσω, λύσωμαι.

- 720. A perfect subjunctive active is rarely formed, on the analogy of the present, by changing final  $\alpha$  of the tense stem to  $\omega_{n}$ ; as  $\lambda \dot{\epsilon} \lambda \nu \kappa \alpha$ ,  $\lambda \dot{\epsilon} \lambda \dot{\nu} \kappa \omega$ ;  $\dot{\epsilon} \dot{\epsilon} \lambda \eta \phi \alpha$ ,  $\dot{\epsilon} \dot{\epsilon} \lambda \dot{\nu} \phi \omega$ . (See 731.) But the more common form of the tense is the perfect active participle with  $\vec{\omega}$  (subjunctive of  $\dot{\epsilon} \dot{\epsilon} \mu \dot{\epsilon}$ , be); as  $\lambda \dot{\epsilon} \lambda \nu \kappa \dot{\omega} s \vec{\omega}$ ,  $\dot{\epsilon} \dot{\epsilon} \lambda \eta \phi \dot{\omega} s \vec{\omega}$ .
- 721. The perfect subjunctive middle is almost always expressed by the perfect middle participle and  $\vec{\omega}$ ; as  $\lambda \epsilon \lambda \nu \mu \hat{\nu} \hat{\nu} \hat{\nu}$ ,  $\vec{\eta}_s$ ,  $\vec{\eta}_s$ ,  $\vec{\eta}_s$ , etc.
- 722. A few verbs with vowel stems form a perfect subjunctive middle directly, by adding " $l_{\eta}$ " to the tense stem; as  $\kappa \tau \hat{\alpha} \cdot \rho \mu \alpha_i$ , acquire, pf.  $\kappa \epsilon \kappa \tau \cdot \eta \mu \alpha_i$ , possess, subj.  $\kappa \epsilon \kappa \tau \hat{\alpha} \mu \alpha_i$  (for  $\kappa \epsilon \kappa \tau \eta \omega \mu \alpha_i$ ),  $\kappa \epsilon \kappa \tau \hat{\eta} \tau \alpha_i$ ; so  $\mu \iota \mu \nu \eta' \sigma \kappa \omega_i$ , remind,  $\mu \epsilon \mu \nu \tau \mu \alpha_i$ , remember (memini), subj.  $\mu \epsilon \mu \nu \hat{\omega} \mu \alpha_i$ ,  $\mu \epsilon \mu \nu \hat{\omega} \mu \epsilon \theta \alpha_i$  (Hdt.  $\mu \epsilon \mu \nu \epsilon \hat{\omega} \mu \epsilon \theta \alpha_i$ ). These follow the analogy of  $i \sigma \tau \hat{\omega} \mu \alpha_i$ ,  $-\hat{\eta}$ ,  $-\hat{\eta} \tau \alpha_i$ , etc. (724). (For a similar optative, see 734.)
- 723. (Mi-form.) In all  $\mu$ i-forms, including both passive acrists (564), the final vowel of the stem is contracted with the thematic vowel ( $\omega$  or  $\eta$ ), so that the subjunctive ends in  $\hat{\omega}$  or  $\hat{\omega}\mu\alpha$ i.
- 724. 1. Verbs in  $\eta\mu$  (with stems in  $\epsilon$  and  $\alpha$ -) have  $\hat{\omega}$ ,  $\hat{\eta}$ s,  $\hat{\eta}$ ,  $\hat{\omega}\mu\alpha$ ,  $\hat{\eta}$ ,  $\hat{\eta}\tau\alpha$ , etc., in the subjunctive, as if all had stems in  $\epsilon$ . Thus  $\tilde{\iota}\sigma\tau\eta\mu$  ( $\sigma\tau\alpha$ -) has  $i\sigma\tau\hat{\eta}$ s,  $i\sigma\tau\hat{\eta}$ ,  $i\sigma\tau\hat{\eta}\tau\alpha$ ,  $\sigma\tau\hat{\eta}$ s,  $\sigma\tau\hat{\eta}$ , etc., as if the uncontracted form were  $i\sigma\tau\epsilon$ - $\omega$ , not  $i\sigma\tau\alpha$ - $\omega$ . These verbs have Ionic stems in  $\epsilon$  (see 788, 1).
- 2. The inflection is that of the subjunctives φιλῶ and φιλῶμαι (492).

- **725.** For the inflection of the agrist passive subjunctive, with  $\epsilon$  of the tense stem contracted with  $\omega$  or  $\eta$ , as  $\lambda \upsilon \theta \hat{\omega}$  (for  $\lambda \upsilon \theta \hat{\epsilon} \omega$ ),  $\lambda \upsilon \theta \hat{\omega} \mu \epsilon \nu$  (for  $\lambda \upsilon \theta \hat{\epsilon} \omega \omega \omega$ ), etc.,  $\omega \omega \omega$  (for  $\omega \omega \omega$ ), etc., see 480, 3.
- 726. For a few subjunctives of the simple perfect of the  $\mu$ -form, as  $\dot{\epsilon}\sigma\tau\dot{\omega}$  (for  $\dot{\epsilon}\sigma\tau\alpha$ - $\omega$ ),  $\beta\epsilon\beta\dot{\omega}\sigma\iota$  (for  $\beta\epsilon\beta\alpha$ - $\omega\sigma\iota$ ), see 508.
- **727.** Verbs in  $\omega\mu$  (with stem in o) have by contraction  $\hat{\omega}$ ,  $\hat{\varphi}$ s,  $\hat{\varphi}$ s, etc.,  $\hat{\omega}\mu\alpha\iota$ ,  $\hat{\varphi}$ s,  $\hat{\omega}\tau\alpha\iota$ , etc. (for o- $\omega$ , o- $\eta$ s, o- $\eta$ , o- $\omega\mu\alpha\iota$ , etc.); as  $\delta(\hat{\delta}\omega\mu\iota$ , subj.  $\delta(\hat{\delta}\omega)$ s,  $\delta(\hat{\delta}$
- **728.** Verbs in νῦμι form the subjunctive (as the optative, 743) like verbs in ω; as δείκνῦμι, subj. δεικνύ-ω, δεικνύ-ωμαι.
- 729. N. Δύναμαι, can, ἐπίσταμαι, understand, κρέμαμαι, hang, and the second agrist ἐπριάμην, bought, accent the subjunctive (as the optative, 742) as if there were no contraction; thus δύνωμαι, ἐπίστωμαι, κρέμωμαι, πρίωμαι (compare τιθώμαι).

#### OPTATIVE.

- 730. 1. The optative adds the secondary endings (552) to the tense stem, preceded by the mood suffix (562) ι or ιη (ιε); as λύοιτε (for λῦο-ι-τε), ἱσταίην (for ἰστα-ιη-ν), λυθεῖεν (for λυθε-ιε-ν). For the ending μι, see 731.
- 2. The form  $i\eta$  appears only before active endings. It is always used in the singular of  $\mu$ -forms with these endings (including the aorist passive, 564, 7) and of contracted presents in  $oi\eta\nu$  and  $\phi\eta\nu$  of verbs in  $a\omega$ ,  $\epsilon\omega$ , and  $o\omega$ . After  $i\eta$  the first person singular always has the ending  $\nu$ . See examples in 737 and 739.
- 3. Before the ending  $\nu$  of the third person plural  $\iota\epsilon$  is always used; as  $\lambda \hat{\nu}o\iota\epsilon\nu$  (for  $\lambda \bar{\nu}o\iota\epsilon\nu$ ).
- 4. In the second person singular middle, σο drops σ (564, 6); as iσταῖο (for iστα-ι-σο, iστα-ι-ο).
- 731. (Verbs in  $\omega$ .) Verbs in  $\omega$  have the ending  $\mu$  (for  $\nu$ ) in the first person singular in all tenses of the active voice. In the present, future, and second agrist systems, the thematic vowel (always o) is contracted with  $\iota$  to oi, giving oim, ois, oi, etc., oim, oi, oi, oito, etc. In the first agrist system, final a of the tense stem is contracted with  $\iota$ , giving aim, ois, oi, etc. (but see 732),  $\alpha_i \mu \eta \nu$ , oio, oito, etc. The rare perfect active (like the subjunctive, 720) follows the analogy of the present. E.g.

- Λέγοιμι (for λεγο-ι-μι), λέγοις (for λεγο-ι-ς), λέγοι (for λεγο-ι), λέγοιτε (for λεγο-ι-τε), λέγοιεν (for λεγο-ιε-ν). Λείπω, 2 aor. λίποιμι (for λιπο-ι-μι), λίποιεν (for λιπο-ιε-ν). Λύσαιμι (for λῦσα-ι-μι), λύσαιμεν (for λῦσα-ι-μεν), λῦσαίμην (for λῦσα-ι-μην), λύσαισθε (for λῦσα-ι-σθε). Perf. εἴληφα, opt. εἰλήφοιμι, etc.
- 732. The Attic generally uses the so-called Acolic terminations εως, ειε, and εων, for αις, αι, αιεν, in the acrist active; as λύσεως, λύσεως, λύσεως. See λύω and φαίνω in 480, 1 and 482.
- 733. The perfect middle is almost always expressed by the perfect middle participle and εἴην; as λελυμένος εἴην (see 480, 2). The perfect active is more frequently expressed by the perfect active participle and εἴην than by the form in οιμι given in the paradigms; as λελυκώς εἴην. (See 720; 721.)
- 734. I. A few verbs with vowel stems form a perfect optative middle (like the subjunctive, 722) directly, by adding ε-μην or ο-ι-μην to the tense stem; as κτάομαι, pf. κέκτη-μαι, opt. κεκτήμην, κεκτήο, κεκτήτο (for κεκτη-ι-μην, κεκτη-ι-ο, κεκτη-ι-το), etc.; also κεκτώμην, κεκτώο, κεκτώο (for κεκτη-ο-ι-μην, etc.); so μιμνήσκω, μέμνημαι, opt. μεμνήμην οr μεμνώμην; καλέω, κέκλημαι, opt. κεκλήμην, κεκλήο, κεκλήμεθα; and βάλλω, βέβλημαι, opt. δια-βεβλήσθε. So Hom. λελύτο or λελύντο (for λελν-ι-το or λελυ-ι-ντο), perf. opt. of λύω. Compare δαινύτο, pres. opt. of δαίνυμι.
- 2. The forms in  $\omega\mu\eta\nu$  belong to the common form of inflection (with the thematic vowel); those in  $\eta\mu\eta\nu$ , etc. and  $\hat{\nu}\tau$ 0 have the  $\mu$ -form (740).
- 735. A few verbs have αην (737) in the second perfect optative; as ἐκπέφευγα, ἐκπεφευγαίην.

The second agrist optative of  $\xi_{\chi\omega}$ , have, is  $\sigma_{\chi}$  on  $\omega$ , but the regular  $\sigma_{\chi}$  on  $\omega$  is used in composition.

- **736.** A very few relics remain of an older active optative with  $\nu$  for  $\mu_i$  in the first person singular; as  $\tau \rho \ell \phi o_i \nu$  for  $\tau \rho \ell \phi o_i \mu_i$  (from  $d\mu a \rho \tau d \tau \omega$ ).
- 737. (Contract Verbs.) In the present active of contract verbs, forms in  $\iota_{\eta}$ - $\nu$ ,  $\iota_{\eta}$ -s,  $\iota_{\eta}$ , etc., contracted with the thematic vowel o to  $o\iota_{\eta}\nu$ ,  $o\iota_{\eta}s$ ,  $o\iota_{\eta}$ , etc., are much more common in the singular than the regular forms in  $o\iota_{\mu\iota}$ ,  $o\iota_{s}$ ,  $o\iota$ , but they seldom occur in the dual and plural. Both the forms in  $o\iota_{\eta}\nu$  and those in  $o\iota_{\mu}\iota$  are again contracted with an a of the verb stem to  $\iota_{\eta}\nu$  and  $\iota_{\mu}\iota$ , and with an  $\epsilon$  or o to  $o\iota_{\eta}\nu$  and  $o\iota_{\mu}\iota$ . E.g.

Τίμα-σ-τη-ν, τίμα-οίην, τίμώην; φιλε-ο-ιη-ν, φιλε-οίην, φιλοίην; δηλο-ο-ιη-ν, δηλο-οίην, δηλοίην; τίμα-ο--μι, τίμά-οιμι, τίμώμι; φιλε-ο--μι, φιλέ-οιμι, φιλούμι; δηλο-ο--μι, δηλο-οιμι, δηλούμι. (See the inflection in 492.)

It is only the second contraction which makes these contract forms.

- 738. For the optative ριγώην, from ριγόω, shiver, see 497.
- 739. (Mi-form.) 1. The present and second acrist active of the  $\mu$ i-form, and both acrists passive in all verbs, have the suffix  $\iota\eta$ , and in the first person singular the ending  $\nu$ . Here a,  $\epsilon$ , or o of the stem is contracted with  $\iota\eta$  to  $a\iota\eta$ ,  $\epsilon\iota\eta$ , or  $o\iota\eta$ ; as  $i\sigma\tau a \cdot \iota\eta \nu$ ,  $i\sigma\tau a i\eta\nu$ ;  $\sigma\tau a \cdot \iota\eta \mu\epsilon\nu$ ,  $\sigma\tau a i\eta\mu\epsilon\nu$ ;  $\lambda\nu\theta\epsilon \cdot \iota\eta \nu$ ,  $\lambda\nu\theta\epsilon i\eta\nu$ ;  $\delta\sigma \cdot \iota\eta \nu$ ,  $\delta o i\eta\nu$ .
- 2. In the dual and plural, forms with  $\iota$  for  $\iota\eta$ , and  $\iota\epsilon$ - $\nu$  for  $\iota\eta$ - $\sigma a\nu$  in the third person plural, are much more common than the longer forms with  $\iota\eta$ ; as  $\sigma \tau a \hat{\iota} \mu \epsilon \nu$ ,  $\sigma \tau a \hat{\iota} \tau \epsilon$ ,  $\sigma \tau a \hat{\iota} \tau \epsilon$ ,  $\sigma \tau a \hat{\iota} \tau \epsilon$ ,  $\sigma \tau a \hat{\iota} \tau \epsilon \sigma a \hat{\iota} \tau \epsilon$ . See 506.
- 740. In the present and second agrist middle of verbs in  $\eta\mu$  and  $\omega\mu$ , final a,  $\epsilon$ , or o of the stem is contracted with  $\epsilon$  into a,  $\epsilon \iota$ , or o, to which the simple endings  $\mu\eta\nu$ , etc., are added. E.g.

Ίσταίμην (for ἱστα-ι-μην), ἱσταῖο, ἱσταῖτο; θείμην (θε-ι-μην), θεῖο (θε-ι-σο, θε-ι-ο), θεῖτο; δοίμην (δο-ι-μην). See the inflection in 506; and 730, 4. See also the cases of perfect optative middle in ημην and  $\bar{v}$ το in 734.

- **741.** N. The optatives  $\tau\iota\thetaoi\mu\eta\nu$ ,  $\tau\iota\thetaoio$ ,  $\tau\iota\thetaoi\tau$ o, etc. (also accented  $\tau\iota\thetaoio$ ,  $\tau\iota\thetaoi\tau$ o, etc.) and (in composition)  $\thetaoi\mu\eta\nu$ ,  $\thetaoio$ ,  $\thetaoi\tau$ o, etc. (also accented  $\sigmai\nu-\thetaoi\tau$ o,  $\pi\rhoi\sigma-\thetaoi\sigma\theta\epsilon$ , etc.), as if formed from  $\tau\iota\theta\epsilon\omega$  (or  $\tau\iota\theta\omega$ ), are found, as well as the regular  $\tau\iota\theta\epsilon\iota\mu\eta\nu$   $\theta\epsilon\iota\mu\eta\nu$ , etc. See also  $\pi\rhoio\tau$ 0 and other forms of  $i\eta\mu$  (810, 2).
- 742. Ν. Δύναμαι, ἐπίσταμαι, κρέμαμαι, and the second acrists ἐπριάμην (505) and ὧνήμην (from ὁνίνημι), accent the optative as if there were no contraction; δυναίμην, δύναιο, δύναιτο; ἐπίσταιτο, ἐπίσταισθε, κρέμαιο, πρίαιο, πρίαιντο, ὄναισθε. For the similar subjunctives, see 729.
- 743. Verbs in νῦμι form the optative (as the subjunctive, 728) like verbs in ω; as δείκνῦμι, opt. δεικνύοιμι, δεικνυοίμην (inflected like λύοιμι, λῦοίμην).

- **744.** N. Second acrists from stems in v of the  $\mu\iota$ -form (as  $\xi\delta\bar{v}\nu$ ) have no optative in Attic (see 500). But Homer has a few forms like  $\delta\bar{v}\eta$ ,  $\delta\bar{v}\mu\epsilon\nu$  (for  $\delta v$ - $\iota\eta$ ,  $\delta v$ - $\iota$ - $\mu\epsilon\nu$ ), from  $\xi\delta\bar{v}\nu$ .
- **745.** A few second perfect optatives of the  $\mu$ -form are made by adding  $\iota_{\eta}$ - $\nu$  to stems in a-; as  $\tau \epsilon \theta \nu u \iota \eta \nu$  (for  $\tau \epsilon \theta \nu a \iota \eta$ - $\nu$ ),  $\epsilon \sigma \tau a \iota \eta \nu$  (508). See the enumeration of  $\mu$ -forms, 804.

#### IMPERATIVE.

746. (Common Form.) The present and the second acrist active and middle of the common form have the thematic vowel  $\epsilon$  (o before  $\nu\tau\omega\nu$ ), to which the imperative endings (553) are affixed. But the second person singular in the active has no ending; in the middle it drops  $\sigma$  in  $\sigma$ 0 and contracts  $\epsilon$ -0 to  $\omega$ . E.a.

Λείπε, λειπέ-τω, λείπε-τον, λειπέ-των, λείπε-τε, λειπό-ντων; λείπου, λειπέ-σθω, λείπε-σθον, λειπέ-σθων, λείπε-σθε, λειπέ-σθων. So λίπε and λιποῦ.

747. The first acrist active and middle are also irregular in the second person singular, where the active has a termination  $o\nu$  and the middle  $a\iota$  for final a of the stem. In other persons they add the regular endings to the stem in  $\sigma a$ - (or a-). E.g.

Λῦσον, λῦσά-τω, λὖσά-τον, λῦσά-των, λύσα-τε, λῦσά-των; λῦσα, λῦσά-σθω, λῦσα-σθε, λῦσά-σθων. Φῆνον, φηνά-τω, etc.; φῆναι, φηνάσθω, φήνα-σθε, φηνά-σθων.

- 748. The perfect active is very rare, except in a few cases of the  $\mu$ -form (508) with a present meaning. But Aristophanes has  $\kappa \epsilon \kappa \rho \dot{\alpha} \gamma \epsilon \tau \epsilon$ , screech, from  $\kappa \rho \dot{\alpha} \zeta \omega$  ( $\kappa \rho \alpha \gamma$ -), and  $\kappa \epsilon \chi \dot{\gamma} \nu \epsilon \tau \epsilon$ , gape, from  $\chi \dot{\alpha} \sigma \kappa \omega$  ( $\chi u \nu$ -).
- 749. The third person singular of the perfect passive is the only form of perfect imperative in common use; for this see 1274.
- **750.** N. The second person singular of the middle occasionally occurs as an emphatic form; as  $\pi \epsilon \pi a \nu \sigma o$ , stop!
- 751. N. The perfect imperative in all voices can be expressed by the perfect participle and ἴσθι, ἔστω, etc. (imperative of εἰμί, be); as εἰρημίνον ἔστω, for εἰρήσθω, let it have heen said (i.e. let what has been said stand), πεπεισμένοι ἔστων, suppose them to have been persuaded.
- 752. (Mi-form.) The present imperative of the  $\mu$ i-form retains  $\theta_i$  in the second person singular active only in a few primitive

verbs; as in  $\phi a \cdot \theta i$  from  $\phi \eta \mu i$  ( $\phi a \cdot$ ), say,  $i \cdot \theta i$  from  $\epsilon l \mu i$  ( $l \cdot$ ), go,  $l \sigma \cdot \theta i$  from  $\epsilon l \mu i$ , be, and from olda, know. (See 806; 808; 812; 820.)

For Homeric forms in  $\theta \iota$ , see 790.

- **753.** The present active commonly omits  $\theta_{i}$  in the second person, and lengthens the preceding vowel of the stem  $(\alpha, \epsilon, o, \text{ or } v)$  to  $\eta$ ,  $\epsilon_{i}$ ,  $o_{i}$ , or  $\bar{v}$ ; as  $\tilde{i}\sigma\tau\eta$ ,  $\tau(\theta\epsilon_{i}$ ,  $\delta(\delta o_{i})$ , and  $\delta\epsilon(\kappa\nu\bar{v})$ . The other persons add the regular endings (553) to the short stem; as  $\tilde{i}\sigma\tau\acute{a}$ - $\tau\omega$ ,  $\tilde{i}\sigma\tau\dot{a}$ - $\tau\epsilon$ ,  $\tilde{i}\sigma\tau\acute{a}$ - $\tau\tau\omega\nu$ ;  $\tau\iota\theta\acute{\epsilon}$ - $\tau\omega$ ;  $\delta(\delta o_{i}-\tau\epsilon;\delta\epsilon\kappa\nu\acute{\nu})$ - $\tau\omega\nu$ .
- 754. The present middle of verbs in  $\eta\mu$  and  $\omega\mu$  has the regular form in  $\sigma$ 0, and also poetic forms in  $\omega$  (for  $\alpha\sigma$ 0) and ov (for  $\epsilon\sigma$ 0 and  $\sigma\sigma$ 0), in the second person singular; as  $\delta\sigma\tau\alpha\sigma$ 0 or  $\delta\sigma\tau\omega$ ,  $\tau i\theta\epsilon\sigma$ 0 or  $\tau i\theta\sigma$ 0,  $\delta i\delta\sigma\sigma$ 0 or  $\delta i\delta\sigma$ 0. But verbs in  $\bar{\nu}\mu$  always retain  $\nu\sigma\sigma$ 0; as  $\delta\epsilon i\kappa\nu\bar{\nu}\mu$ ,  $\delta\epsilon i\kappa\nu\sigma\sigma$ 0. In the other persons the inflection is regular: see the paradigms (506).
- **755.** 1. In the second agrist active the stem vowel is regularly long  $(\eta, \omega, \bar{\nu})$ , except before  $\nu\tau\omega\nu$  (553), and  $\theta\iota$  is retained in the second person singular. E.g.

Στῆ-θι (στα-), στή-τω, στῆ-τε, στά-ντων; βῆ-θι (βα-), βή-τω, βῆ-τε, βά-ντων; γνῶ-θι, γνώ-τω, γνῶ-τε, γνό-ντων; δῦ-θι, δῦ-τω, δῦ-τε, δύ-ντων. (See 678 and 766, 2.)

- 2. But we have  $\varsigma$  for  $\theta\iota$  in  $\theta\dot{\epsilon}\varsigma$  (from  $\tau\dot{\epsilon}\cdot\theta\eta\mu\iota$ ),  $\delta\dot{\epsilon}\varsigma$  (from  $\delta\dot{\epsilon}\delta\omega\mu\iota$ ),  $\ddot{\epsilon}\varsigma$  (from  $\ddot{\epsilon}\eta\mu\iota$ ), and  $\sigma\chi\dot{\epsilon}\varsigma$  (from  $\ddot{\epsilon}\sigma\chi\sigma\nu$ , 2 aor. of  $\ddot{\epsilon}\chi\omega$ ). These verbs have the short vowel in all persons; as  $\theta\dot{\epsilon}\varsigma$ ,  $\theta\dot{\epsilon}\cdot\tau\omega$ ,  $\theta\dot{\epsilon}\cdot\tau\dot{\epsilon}$ ,  $\theta\dot{\epsilon}\cdot\nu\tau\omega\nu$ ;  $\delta\dot{\epsilon}\varsigma$ ,  $\delta\dot{\epsilon}\cdot\tau\omega$ ,  $\delta\dot{\epsilon}\cdot\tau\dot{\epsilon}$ ,  $\delta\dot{\epsilon}\cdot\nu\tau\omega\nu$ .
- 3.  $\Sigma \tau \hat{\eta} \theta \iota$  and  $\beta \hat{\eta} \theta \iota$  have poetic forms  $\sigma \tau \bar{a}$  and  $\beta \bar{a}$ , used only in composition; as  $\kappa \alpha \tau \hat{a} \cdot \beta \bar{a}$ , come down,  $\pi a \rho \hat{a} \cdot \sigma \tau \bar{a}$ , stand near.
- **756.** 1. In the second agrist middle,  $\sigma_0$  drops  $\sigma$  in the second person singular after a short vowel, and contracts that vowel with  $\sigma$ . E.g.

Έπριάμην, πρίασο (poet.), πρίω (for πρια-ο), ἐθέμην, θοῦ (for θε-σο, θε-ο), ἐδόμην, δοῦ (for δο-σο, δο-ο). But epic δέξο (δεχ-σο), λέξο (λεχ-σο).

- 2. The other persons have the regular endings (553); as  $\pi \rho \iota \acute{a} \cdot \sigma \theta \omega$ ;  $\theta \acute{\epsilon} \cdot \sigma \theta \omega$ ,  $\theta \acute{\epsilon} \cdot \sigma \theta \omega$ ;  $\delta \acute{e} \cdot \sigma \theta \omega$ ,  $\delta \acute{e} \cdot \sigma \theta \omega$ .
- 757. 1. The first agrist passive adds the ordinary active endings ( $\theta_{\iota}$ ,  $\tau_{\omega}$ , etc.) directly to  $\theta_{\epsilon}$ -( $\theta_{\eta}$ -) of the tense stem (707) after which  $\theta_{\iota}$  becomes  $\tau_{\iota}$  (95, 2); as  $\lambda \dot{\nu} \theta_{\eta}$ - $\tau_{\iota}$ ,  $\lambda \nu \theta \dot{\gamma}$ - $\tau_{\omega}$ , etc.
  - 2. The second agrist passive adds the same terminations

- to  $\epsilon$  (η-) of the tense stem (712),  $\theta_{\ell}$  being retained; as  $\phi$ άνη- $\theta_{\ell}$ ,  $\phi$ ανή-τω;  $\sigma$ τάλη- $\theta_{\ell}$ ,  $\sigma$ ταλή-τω, etc.
- 3. Both agrists have ε-ντων in the third person plural; as λυθέ-ντων, φανέ-ντων, σταλέ-ντων.
- **758.** N. A few second perfects of the  $\mu$ -form have imperatives in  $\theta\iota$ : see  $\theta\nu j\sigma\kappa\omega$ ,  $\tau \epsilon\theta\nu\alpha\theta\iota$ , and  $\delta\epsilon \delta\delta\omega$ ,  $\delta\epsilon\delta\iota\theta\iota$ , in 804.

#### INFINITIVE.

- **759.** (Common Form.) The present, second agrist, and future active add  $\epsilon_{\nu}$  to the tense stem, the thematic vowel (here always  $\epsilon$ -) being contracted with  $\epsilon_{\nu}$  to  $\epsilon_{\nu}$ ; as  $\lambda \dot{\epsilon} \gamma \epsilon_{\nu} \nu$  (for  $\lambda \epsilon \gamma \epsilon \epsilon_{\nu}$ ),  $\delta \dot{\epsilon} \dot{\epsilon} \nu$  (for  $\delta \dot{\epsilon} \dot{\epsilon} \epsilon_{\nu}$ ),  $\lambda \dot{\epsilon} \dot{\epsilon} \dot{\epsilon} \nu$  (for  $\lambda \epsilon \dot{\epsilon} \epsilon_{\nu} \nu$ ).
- **760.** N. The ending εν (without preceding ε) appears in Doric; as γαρύεν in Pindar (Attic γηρύειν).
- **761.** N. For contract presents in  $\hat{a}\nu$  (not  $\hat{a}\nu$ ) for  $\acute{a}\epsilon\nu$ , and  $\acute{o}\nu$  for  $\acute{o}\epsilon\nu$ , see 39, 5.
- **762.** N. The second agrist in  $\epsilon \hat{\iota} \nu$  is probably contracted from  $\dot{\epsilon} \cdot \epsilon \nu$ , not from  $\dot{\epsilon} \cdot \epsilon \nu$  (759).
- 763. The first agrist active substitutes at (of uncertain origin) for final a of the tense stem (669); as λῦσαι, φῆναι.
- **764.** The perfect active substitutes  $\epsilon$ -vai for final a of the tense stem; as  $\lambda \epsilon \lambda \nu \kappa \epsilon$ -vai,  $\gamma \epsilon \gamma \rho \alpha \phi \epsilon$ -vai,  $\pi \epsilon \phi \eta \nu \epsilon$ -vai,  $\lambda \epsilon \lambda o i \pi \epsilon$ -vai.
- **765.** 1. The infinitive middle adds  $\sigma\theta\alpha$  to the tense stem in the present, future, and first and second agrists. E.g.

Λέγε-σθαι, λέξε-σθαι, φαίνε-σθαι, φανεῖ-σθαι (for φανέε-σθαι), φήνα-σθαι, λύσα-σθαι, λιπέ-σθαι.

2. Both passive futures likewise add  $\sigma\theta\alpha$ . E.g.

Λυθήσε-σθαι, λειφθήσε-σθαι, φανήσε-σθαι, σταλήσε-σθαι.

- 3. For the perfect middle and the passive agrists, see 766, 1; 768.
- 766. (Mi-forms.) 1. The present, second agrist, and second perfect active of the  $\mu$ -form, and both passive agrists, add  $\nu a \iota$  to the tense stem in the infinitive. E.g.

Ίστά-ναι, τιθέ-ναι, διδό-ναι, δεικνύ-ναι, στ $\hat{\eta}$ -ναι, γν $\hat{\omega}$ -ναι, δ $\hat{v}$ -ναι, δ $\hat{v}$ -ναι, λυθ $\hat{\eta}$ -ναι (707), φαν $\hat{\eta}$ -ναι (712).

2. In the second agrist active the final vowel of the stem is regularly long (678; 755, 1); as  $t\sigma\tau\eta\mu\iota$  ( $\sigma\tau\alpha$ -),  $\sigma\tau\hat{\eta}$ - $\nu\alpha\iota$ ;  $\xi\beta\eta\nu$  ( $\beta\alpha$ -),  $\beta\hat{\eta}$ - $\nu\alpha\iota$ .

- 767. Some μι-forms have the more primitive ending εναι (for fεναι) in the infinitive active. Such are δοῦναι (from old δο-fεναι, δο-εναι); θεῖναι (for θε-fεναι); εἶναι, 2 aor. of ἔημι (for ἐ-fεναι); 2 perf. δεδιέναι (for δε-δρι-fεναι).
- 768. In all the simple forms of the middle voice (the present and second agrist of the  $\mu$ t-form, and all perfects), vowel stems add  $\sigma\theta\alpha$  directly to the tense stem. E.g.

769. Consonant stems here (768) add the more primitive ending  $\theta a (554)$ . E g.

Ἐστάλ-θαι, λελείφ-θαι (71), πεπλέχ-θαι, τετρίφ-θαι, πεφάν-θαι. So ήσ-θαι, pres. inf. ot ήμαι (ήσ-), sit.

#### PARTICIPLES AND VERBALS IN TOS AND TEOS.

770. All active tenses (except the perfect) and both aorists passive add  $\nu\tau$  to their tense stem to form the stem of the participle. Stems in  $o\nu\tau$  of the common form have nominatives in  $o\nu$ ; those of the  $\mu\iota$ -form have nominatives in  $o\nu$ s. E.g.

Λέγω: pres. λέγο-ντ-, nom. λέγων; fut. λέξο-ντ-, nom. λέξων; 1 aor. λέξα-ντ-, nom. λέξας. Φαίνω: aor. φηνα-ντ-, nom. φήνας. Λείπω: 2 aor. λιπο-ντ-, nom. λιπών; 1 aor. pass. λειφθε-ντ-, nom. λειφθείς (79). Στέλλω (σταλ-): 2 aor. pass. σταλε-ντ-, nom. σταλείς. Ίστημι: pres. ἰστα-ντ-, nom. ἱστάς, 2 aor. στα-ντ-, nom. στάς. Τίθημι: pres. τιθε-ντ-, nom. τιθείς; 2 aor. θε-ντ-, nom. θείς. Δίδωμι: pres. διδο-ντ-, nom. διδούς; 2 aor. δυ-ντ-, nom. δυύς. Δείκνυμι: δεικνυ-ντ-, nom. δεικνύς. Δύνω: 2 aor. δυ-ντ-, nom. δύς.

- 771. For the inflection of these participles and the formation of the feminines, see 335-337.
- 772. The perfect active participle changes final a of the tense stem to or in the stem of the participle. E.g.

Λελυκα-, λελυκοτ-, nom. λελυκώς; πεφηνα-, πεφηνοτ-, nom. πεφηνώς.

For the inflection, and for the irregular feminine in wa, see 335; 337, 2.

773. N. Homer has many varieties of the second perfect participle of the μι-form; in αώς, gen. αῶτος (sometimes αότος), fem. ανία, as γεγαώς, βεβαώς; in ηώς, gen. ηῶτος οτ ηότος, fem. ηνῖα, as τεθνηώς, τε-

θνηώτος or -ότος, τεθνηνία (804). Herodotus has εώς, εώσα, εός, gen. εῶτος, εώσης, as ἐστεώς, etc., some forms of which (c.g. ἐστεῶτα, τεθνεῶτι) occur in Homer. The Attic contracts αώς, αῶσα, αός, to ώς, ῶσα, ός (or ώς) (342), gen. ῶτος, ώσης, etc., but leaves τεθνεώς (2 perfect of θνήσκω) uncontracted.

- 774. N. The stem of the feminine of the second perfect participle in Homer often has a short vowel when the other genders have a long one; as  $d\rho\eta\rho\omega\delta$ ,  $d\rho\delta\rho\omega\delta$ ,  $d\rho\delta\rho\omega\delta$ ,  $\tau\epsilon\theta\delta\lambda\omega\delta$ a.
- 775. All tenses of the middle voice add  $\mu \epsilon \nu \rho$  to the tense stem to form the stem of the participle. E.q.

Λυόμενος (λυο-μενο-), λυσόμενος (λυσο-μενο-), λυσάμενος (λυσαμενο-), Ιστάμενος (Ιστα-μενο-), θέμενος (θε-μενο-), πριάμενος (πριαμενο-), λιπόμενος (λιπο-μενο-), λελυμένος (λελυ-μενο-).

For the inflection of participles in mevos, see 301.

- 776. 1. The stem of the verbals in  $\tau$ 0s and  $\tau$ 60s is formed by adding  $\tau$ 0 or  $\tau$ 60 to the verb stem, which generally has the same form as in the first aorist passive (with the change of  $\phi$  and  $\chi$  to  $\pi$  and  $\kappa$ , 71); as  $\lambda \nu \tau$ 60s (stems  $\lambda \nu$ - $\tau$ 0-,  $\lambda \nu$ - $\tau$ 60-, aor. pass.  $\dot{\epsilon}\lambda \dot{\nu}\theta\eta\nu$ ;  $\tau\rho\bar{\iota}\pi\tau$ 0s,  $\pi\epsilon\iota\sigma\tau$ 60s (stems  $\tau\rho\bar{\iota}\pi$ - $\tau$ 0-,  $\pi\epsilon\iota\sigma$ - $\tau$ 60-), aor. pass.  $\dot{\epsilon}\tau\rho\dot{\iota}\phi\theta\eta\nu$ ,  $\dot{\epsilon}\pi\epsilon\dot{\iota}\sigma\theta\eta\nu$ ;  $\tau\alpha\kappa\tau$ 0s,  $\tau\alpha\kappa$ - $\tau$ 60s, from  $\tau$ 60σω (stem  $\tau\alpha\gamma$ -), aor. pass.  $\dot{\epsilon}\tau\dot{\alpha}\chi$ - $\theta\eta\nu$ ;  $\theta\rho\epsilon\pi\tau$ 0s from  $\tau\rho\dot{\epsilon}\phi\omega$  (95, 5).
- 2. The verbal in τος is sometimes equivalent to a perfect passive participle, as κριτός, decided, τακτός, ordered; but oftener it expresses capability, as λυτός, capable of being loosed, ἀκουστός, audible; πρᾶκτός, that may be done.

3. The verbal in τεος is equivalent to a future passive participle (the Latin participle in dus); as λυτέος, that must be loosed, solvendus; τιμητέος, to be honored, honorandus. (See 1594.)

For the impersonal use of the neuter in  $\tau \epsilon o \nu$  in the sense of  $\delta \epsilon \hat{i}$  and the infinitive active, see 1597.

### DIALECTIC AND POETIC FORMS OF VERBS IN $\Omega$ .

- 777. 1. The Doric has the personal endings  $\tau_i$  for  $\sigma_i$ ,  $\mu \epsilon_s$  for  $\mu \epsilon_{\nu}$ ,  $\tau \bar{\alpha} \nu$  for  $\tau \eta \nu$ ,  $\sigma \theta \bar{\alpha} \nu$  for  $\sigma \theta \eta \nu$ ,  $\mu \bar{\alpha} \nu$  for  $\mu \eta \nu$ ,  $\nu \tau \iota$  for  $\nu \sigma \iota$ . The poets have  $\mu \epsilon \sigma \theta a$  for  $\mu \epsilon \theta a$ .
- 2. When  $\sigma$  is dropped in  $\sigma \omega$  and  $\sigma o$  of the second person (565, 6), Homer often keeps the uncontracted forms  $\epsilon \omega$ ,  $\eta \omega$ ,  $\epsilon o$ . Herodotus has  $\epsilon \omega$  and  $\epsilon o$  (indic.), but generally  $\eta$  for  $\eta \omega$  (subj.). In 11dt. and sometimes in Homer,  $\epsilon o$  may become  $\epsilon \omega$ . In Homer  $\sigma \omega$  and  $\sigma o$  sometimes drop  $\sigma$  even in the perf. and pluperf.; as

μέμνησι for μέμνησαι, έσσυο for έσσυσο. A lingual sometimes becomes σ before σαι; as in κέκασσαι for κεκαδ-σαι (κέκασμαι).

For Ionic contract forms, see 785, 2.

The forms ata and ato sometimes occur in Attic (701). Herodotus has them also in the present and imperfect of verbs

in μι.

- 4. Herodotus has  $\epsilon \alpha$ ,  $\epsilon \alpha s$ ,  $\epsilon \epsilon(\nu)$  in the pluperfect active, as  $\epsilon \tau \epsilon \theta \dot{\eta} \pi \epsilon \alpha$ ; whence comes the older and better Attic  $\eta$ ,  $\eta s$ ,  $\epsilon \epsilon(\nu)$ . Homer has  $\epsilon \alpha$ ,  $\eta s$ ,  $\epsilon \epsilon(\nu)$ , with  $\epsilon \epsilon$  in  $\ddot{\eta} \delta \epsilon \epsilon$  (821, 2), and rarely  $\epsilon \nu$ ,  $\epsilon s$ ,  $\epsilon \epsilon$ .
- 5. Homer and Herodotus generally have the uncontracted forms of the future (in εω and εομαι) of liquid stems; as μενέω, Attic μενῶ. When they are contracted, they follow the analogy of verbs in εω.
- 6. The Doric has  $\sigma \ell \omega$ ,  $\sigma \ell \omega \mu \omega$  (contracted  $\sigma \omega$ ,  $\sigma \delta \omega \mu \omega$  or  $\sigma \epsilon \delta \mu \omega$ ) for  $\sigma \omega$ ,  $\sigma \omega \mu \omega$  in the future. The Attic has  $\sigma \delta \omega \mu \omega$  in the future middle of a few verbs (666).
- 7. In Homer  $\sigma$  is sometimes doubled after a short vowel in the future and agrist; as  $\tau \epsilon \lambda \epsilon \omega$ ,  $\tau \epsilon \lambda \epsilon \sigma \sigma \omega$ ;  $\kappa \epsilon \lambda \epsilon \omega$ ,  $\epsilon \kappa \epsilon \lambda \epsilon \sigma \sigma \omega$ . In  $\kappa \epsilon \omega \epsilon \omega$ , Hom.  $\epsilon \kappa \epsilon \omega \epsilon \omega$ ,  $\epsilon \kappa \epsilon \omega \epsilon \omega$ , the stem ends in  $\delta$  (see 777, 2).
- 8. In Homer agrists with  $\sigma$  sometimes have the inflection of second agrists; as  $l\xi \omega$ ,  $l\xi \varepsilon$ s, from  $l\kappa \omega \epsilon \omega \mu \omega$ , come;  $\epsilon \beta \dot{\eta} \sigma \epsilon \tau \sigma$  (more common than  $\epsilon \beta \dot{\eta} \sigma \sigma \tau \sigma$ ), from  $\beta \alpha \dot{\iota} \psi \omega$ ,  $q\sigma$ . These are called mixed agrists.
- 9. In the poets ησαν of the acrist passive indicative often becomes εν; as ῶρμηθεν for ώρμήθησαν, from ὁρμάω, urge. So ἄν or εν for ησαν or εσαν in the active of verbs in μι (787, 4).
- 778. Homer and Herodotus have iterative forms in σκον and σκομην in the imperfect and second agrist active and middle. Homer has them also in the first agrist. These are added to the tense stem; as  $\tilde{\epsilon}\chi\omega$ , impf.  $\tilde{\epsilon}\chi\epsilon$ -σκον;  $\tilde{\epsilon}\rho\dot{\nu}\omega$ , 1 agr.  $\tilde{\epsilon}\rho\dot{\nu}\sigma\alpha$ -σκε;  $\phi\epsilon\dot{\nu}\gamma\omega$ , 2 agr.  $(\phi\nu\gamma)$   $\phi\dot{\nu}\gamma\epsilon$ -σκον;  $\tilde{\epsilon}\sigma\tau\eta\mu\iota$   $(\sigma\tau\alpha)$ ,  $\sigma\tau\dot{\epsilon}$ -σκε;  $\delta\dot{\epsilon}\delta\omega\mu\iota$   $(\delta\sigma)$ ,  $\delta\dot{\epsilon}$ -σκε. Verbs in  $\epsilon\omega$  have  $\epsilon\epsilon$ -σκον or  $\epsilon$ -σκον in the imperfect; as καλέε-σκον;  $\tau\omega\lambda\dot{\epsilon}$ -σκετο (dropping one  $\epsilon$ ). Verbs in  $\epsilon\omega$  have  $\epsilon$ -σκον in the imperfect; as κρύπτασκον from κρύπτω.

These forms are inflected like imperfects, and are confined to the indicative, and denote repetition; as  $\pi\omega\lambda\epsilon\sigma\kappa\epsilon\tau$ 0, he went (regularly). They generally (in Hdt. always) omit the augment.

For  $\mu\iota$ -forms with these endings see 787, 5.

779. Some verbs have poetic stems, made by adding  $\theta\%$ - to the present or the second agrist tense stem, in which  $\alpha$  or  $\epsilon$  (rarely v) takes the place of the thematic vowel; as  $d\mu\bar{v}\nu\alpha\theta\%$ -,  $\delta\iota\omega\kappa\alpha\theta\%$ -,  $d\kappa\varphi\epsilon\theta\%$ -, from  $d\mu\bar{v}\nu\omega$ , ward off,  $\delta\iota\omega\kappa\omega$ , pursue,  $d\kappa\varphi\nu\omega$ , burn. From these special forms are derived, — sometimes presents, as  $d\kappa\varphi\epsilon'\theta\omega$ ; sometimes imperfects, as  $i\delta\iota\omega\kappa\alpha\theta\sigma\nu$ ; sometimes second agrists, as  $i\delta\kappa\alpha'\theta\sigma\nu$ , ( $d\kappa\alpha'\theta\nu$ ); also subjunctives and optatives, as  $i\kappa\alpha'\theta\omega$ ,  $i\kappa\alpha'\theta\sigma\iota\mu$ ,  $i\kappa\alpha'\theta\sigma\iota\nu$ ,  $i\kappa\alpha'\theta\nu$ ,  $i\kappa\alpha'$ 

See in the Lexicon ἀλκάθειν, ἀμυνάθω, διωκάθω, εἰκάθειν, ἐργάθειν, ἡερίθομαι, ἡγερέθομαι, μετακιάθω, σχέθω, φθινύθω, φλεγίθω.

- 780. (Subjunctive.) 1. In Homer the subjunctive (especially in the first aor. act. and mid.) often has the short thematic vowels  $\epsilon$  and o (Attic  $\eta$  and  $\omega$ ), yet never in the singular of the active voice nor in the third person plural; as  $\epsilon \rho \nu \sigma \sigma \rho \omega \epsilon \nu$ ,  $\epsilon \nu \delta \gamma \delta \sigma \epsilon \tau \epsilon$ ,  $\epsilon \nu \delta \gamma \delta \sigma \epsilon \tau \epsilon$ ,  $\epsilon \nu \delta \gamma \delta \delta \epsilon \tau \epsilon$ . So sometimes in Pindar.
- 2. In both a orist passive subjunctives Herodotus generally has the uncontracted forms in  $\epsilon\omega$ ,  $\epsilon\omega\mu\epsilon\nu$ ,  $\epsilon\omega\sigma\iota$ , but contracts  $\epsilon\eta$  and  $\epsilon\eta$  to  $\eta$  and  $\eta$ ; as  $\mathring{a}\phi\alpha\iota\rho\epsilon\theta\acute{e}\omega$  (Att.  $-\theta\mathring{\omega}$ ),  $\phi\alpha\nu\acute{e}\omega\sigma\iota$  (Att.  $-\mathring{\omega}\sigma\iota$ ), but  $\phi\alpha\nu\mathring{\eta}$  and  $\phi\alpha\nu\mathring{\eta}\tau\epsilon$  (as in Attic).
- 3. In the second acrist passive subjunctive of some verbs, Homer has forms in  $\epsilon\omega$ ,  $\eta\eta s$ ,  $\eta\eta$ ,  $\epsilon\omega\mu\epsilon\nu$ ,  $\eta\epsilon\tau\epsilon$  (780, 1), as they are commonly written; as  $\delta a\mu\epsilon i\omega$  (from  $\epsilon\delta a\mu\eta\nu$ , 2 acr. pass. of  $\delta a\mu\nu a\omega$ ,  $\epsilon ubdue$ ),  $\delta a\mu\eta\eta s$ ,  $\delta a\mu\eta i$ ,  $\delta a\mu\eta i\epsilon\tau\epsilon$ ;  $\tau \rho a\pi\epsilon i\omega\mu\epsilon\nu$  (from  $\epsilon\tau a\mu\nu$ ), of  $\tau\epsilon \mu\omega$ , amuse). It is highly probable that  $\eta$  should be written for  $\epsilon$  in all persons. This is more fully developed in the second acrist active of the  $\mu$ -form (see 788, 2).
- 4. In the subjunctive active Homor often has ωμι, ησθα, ησι; as ἐθέλωμι, ἐθέλησθα, ἐθέλησι.
- 781. (Optative.) 1. The so-called Aeolic forms of the first aorist optative active in ειας, ειε, ειαν are the common forms in all dialects.

- 2. Homer sometimes has  $oi\sigma\theta a$  (556, 1) in the second person for ois; as  $\kappa \lambda a ioi\sigma\theta a$ . For  $a\tau o$  (for  $\nu\tau o$ ) see 777, 3.
- 782. (Infinitive.) 1. Homer often has μεναι and μεν for εν (759) in the infinitive active; as ἀμῦνέμεναι, ἀμῦνέμεν (Attic ἀμῦνειν); ἐλθέμεναι, ἐλθέμεν (ἐλθεῖν); ἀξέμεναι, ἀξέμεν (ἄξειν). For the perfect (only of the μ-form), see 791: the perf. in έναι does not occur in Homer. So Hom. μεναι, Dor. μεν for ναι in the acrist passive; as ὁμοιωθή-μεναι (ὁμοιωθή-ναι), δαή-μεναι (also δαῆ-ναι), Hom.; αἰσχυνθῆ-μεν (αἰσχυνθῆ-ναι), Pind. (See 784, 5.)
- The Doric has εν (760) and the Acolic ην for ειν in the infin.;
   thus ἀείδεν and γαρύεν (Dor.) for ἀείδειν and γηρύειν; φέρην and ἔχην (Aeol.) for φέρειν and ἔχειν; εἴπην (Aeol.) for εἰπεῖν.
- 783. (Participle.) The Aeolic has οισα for ουσα, and αις, αισα for ας, ασα, in the participle; as έχοισα, θρέψαις, θρέψαισα.

#### SPECIAL DIALECTIC FORMS OF CONTRACT VERBS.

- 784. (Verbs in αω.) 1. In Homer verbs in αω are often contracted as in Attic. In a few cases they remain uncontracted; sometimes without change, as ναιετάουσι, ναιετάων, from ναιετάω, dwell; sometimes with ā, as in πεινάω, hunger, διψάω, thirst; sometimes with εον for ἄον in the imperfect, as μενοίνεον from μενοινάω, long for.
- 2. (a) The Mss. of Homer often give peculiar forms of verbs in  $a\omega$ , by which the two vowels (or the vowel and diphthong) which elsewhere are contracted are assimilated, so as to give a double A or a double O sound. The second syllable, if it is short by nature or has a diphthong with a short initial vowel, is generally prolonged; sometimes the former syllable; rarely both. We thus have  $a\bar{a}$  (sometimes  $\bar{a}a$ ) for  $a\epsilon$  or  $a\eta$  (aq for  $a\epsilon$  or  $a\eta$ ), and au0 (sometimes au0 or au0 (au0 for au0):

```

                                 စ်ဝဝဲမ
                                         for ópáw

             όράει ()] όράη
                                 όρόωσι " όράουσι (i.e. όραονσι)
                                 όρόωσα " όράουσα (i.e. όραοντ-ια)
οράασθε
             όράεσθε
                                         " ὁράοιεν

                                 όρόωνται " όράονται

             όράειν (Dor. όράεν) αιτιόωο " αιτιάοιο

- (b) The lengthening of the former vowel occurs only when the word could not otherwise stand in the Homeric verse; as in
- <sup>1</sup> Although these forms are found in all editions of Homer, yet most Homeric scholars are agreed that they are not genuine, but are early substitutes for the regular forms in  $a\omega$  etc. which they represent. See Monro, Homeric Grammar (2 ed.), pp. 50-54.

ήβώοντες for ήβάοντες, ήβώοιμι for ήβάοιμι, μνάασθαι for μνάεσθαι, μνώοντο for (ἐ)μνάοντο. In this case the second vowel or diphthong is not lengthened. But it may be long in a final syllable, as in μενοινάα (for  $-\alpha \epsilon \iota$ ), or when ωσα or ωσι comes from οντια or ονσι, as in ήβώωσα, δρώωσι, for ήβα-οντια, δρα-ονσι. The assimilation never occurs unless the second vowel is long either by nature or by position; thus ὁράομεν, ὁράετε, ὁραέτω cannot become ὁροωμεν, ὁραατε, ὁραατο.

- (c) These forms extend also to the so-called Attic futures in  $\acute{a}\sigma\omega$ ,  $\acute{a}\omega$ ,  $\acute{\omega}$  (655, 2); as  $\acute{\epsilon}\lambda\acute{o}\omega$ ,  $\acute{\epsilon}\lambda\acute{o}\omega\sigma\iota$ ,  $\kappa\rho\epsilon\mu\acute{o}\omega$ ,  $\delta a\mu\acute{a}a$ ,  $\delta a\mu\acute{o}\omega\sigma\iota$ , for  $\acute{\epsilon}\lambda\acute{a}\sigma\omega$  ( $\acute{\epsilon}\lambda\acute{a}\omega$ ), etc.
- 3. The Doric contracts as and an to  $\eta$ ; as  $\delta\rho\hat{\eta}\tau\epsilon$  for  $\delta\rho\hat{a}\epsilon\tau\epsilon$ ,  $\delta\rho\hat{\eta}$  for  $\delta\rho\hat{a}\epsilon\iota$  and  $\delta\rho\hat{a}\eta$ . A peculiar form (of contraction?) occurs in the dual of a few imperfects in Homer, as  $\pi\rho\sigma\sigma\alpha\nu\delta\hat{\eta}\tau\eta\nu$  (from  $\pi\rho\sigma\sigma\alpha\nu\delta\hat{a}\omega$ ),  $\phi\sigma\iota\tau\hat{\eta}\tau\eta\nu$  ( $\phi\sigma\iota\tau\hat{a}\omega$ ),  $\sigma\nu\lambda\hat{\eta}\tau\eta\nu$  ( $\sigma\nu\lambda\hat{a}\omega$ ). So Hom.  $\delta\rho\eta\alpha\iota$  (or  $\delta\rho\hat{\eta}\alpha\iota$ ) for  $\delta\rho\hat{a}\epsilon\alpha\iota$  (Attic  $\delta\rho\hat{a}$ ) in the pres. ind. middle of  $\delta\rho\hat{a}\omega$ . (See 785, 4.)
- 4. Herodotus sometimes changes αω, αο, and αου to εω, εο, and εου, especially in δράω, εἰρωτάω, and φοιτάω; as δρέω, δρέοντες, δρέονσι, εἰρωτεον. These forms are generally uncontracted.

In other cases Herodotus contracts verbs in aw regularly.

- 5. Homer sometimes forms the present infinitive active of verbs in αω and εω in ημεναι; as γοήμεναι (γοάω), πεινήμεναι (πεινάω), φιλήμεναι (φιλέω). (See 785, 4.)
- **785.** (Verbs in εω.) 1. Verbs in εω generally remain uncontracted in both Homer and Herodotus. But Homer sometimes contracts εε or εει to ει, as τάρβει (τάρβεε). Helt. has generally δεῖ, must, and δεῖν, but impf. εδεε. Both Homer and Herodotus sometimes have ευ as a contract form for εο; as ἀγνοεῦντες, διανοεῦντο: so in the Attic futures in ισω, ισομαι (665, 3), as κομιεύμεθα (Hdt.). Forms in ευ for εου, like οἰχνεῦσι, ποιεῦσι, are of very doubtful authority.
- 2. Homer sometimes drops  $\epsilon$  in  $\epsilon a \iota$  and  $\epsilon o$  (for  $\epsilon \sigma a \iota$ ,  $\epsilon \sigma o$ , 777, 2) after  $\epsilon$ , thus changing  $\epsilon \epsilon a \iota$  and  $\epsilon \epsilon o$  to  $\epsilon a \iota$  and  $\epsilon o$ , as  $\mu \nu \theta \epsilon a \iota$  for  $\mu \nu \theta \epsilon \epsilon a \iota$  (from  $\mu \nu \theta \epsilon o \iota$ ); and he also contracts  $\epsilon \epsilon a \iota$  and  $\epsilon \epsilon o$  to  $\epsilon \iota a \iota$  and  $\epsilon \iota o$ , as  $\mu \nu \theta \epsilon \iota a \iota$ , albeit (for albeit). Herodotus sometimes drops the second  $\epsilon$  in  $\epsilon \epsilon o$ ; as  $\phi \circ \beta \epsilon o$ , alteo,  $\epsilon \xi \gamma \gamma \epsilon o$ .

3. Homer sometimes has a form in ειω for that in εω; as νεικείω (νεικέω). So in ετελείετο from τελείω (τελέω).

4. For Homeric infinitives in ημεναι, see 784, 5. Φορέω, carry, has φορήμεναι and φορήναι. Homer has a few dual imperfects like δμαρτήτην (δμαρτέω) and ἀπειλήτην (ἀπειλέω). (See 784, 3.)

786. (Verbs in oω.) 1. Verbs in oω are always contracted in Herodotus, and his Mss. sometimes have ευ (for oυ) from oo or oou,

especially in δικαιόω, think just.

2. They are always contracted in Homer, except in the few cases in which they have forms in οω or οω resembling those of verbs in aω (784, 2); as ἀρόωσι (from ἀρόω, plough); δηιόωεν and (impf.) δηιόωντο (from δηιόω).

#### DIALECTIC FORMS OF VERBS IN MI.

787. 1. Homer and Herodotus have many forms (some doubtful) in which verbs in  $\eta\mu$  (with stems in  $\epsilon$ ) and  $\omega\mu$  have the inflection of verbs in  $\epsilon\omega$  and  $\omega\omega$ ; as  $\tau\iota\theta\epsilon\hat{\iota}$ ,  $\delta\iota\delta\hat{\omega}\hat{\iota}$ s,  $\delta\iota\delta\hat{\omega}\hat{\iota}$ . So in compounds of  $i\eta\mu$ , as  $\dot{\alpha}\nu\iota\epsilon\hat{\iota}$ s (or  $\dot{\alpha}\nu\iota\epsilon\hat{\iota}$ s),  $\mu\epsilon\theta\iota\epsilon\hat{\iota}$  (or  $-\dot{\epsilon}\epsilon\iota$ ) in pres., and  $\pi\rhooi\epsilon\nu$ ,  $\pi\rhooi\epsilon\iota$ s,  $\dot{\alpha}\nu\dot{\epsilon}\epsilon\iota$ , in impf. Hom. has imperat.  $\kappa\alpha\theta\cdot\dot{\epsilon}\sigma\tau\bar{\alpha}$  (Attic- $\eta$ ). Hdt. has  $i\sigma\tau\hat{\alpha}$  (for  $i\sigma\tau\eta\sigma\iota$ ),  $i\pi\epsilon\rho\cdot\epsilon\tau\dot{\epsilon}\theta\epsilon$ a in impf., and  $\pi\rhoo\sigma-\theta\epsilon\hat{\omega}\tau\sigma$  (for  $-\theta\epsilon\hat{\iota}\tau\sigma$ ), etc. in opt. For  $\dot{\epsilon}\delta\dot{\iota}\delta\omega\nu$ , etc. and  $\dot{\epsilon}\tau\dot{\epsilon}\theta\epsilon\iota$ s,  $\dot{\epsilon}\tau\dot{\epsilon}\theta\epsilon\iota$  (also Attic), see 630.

2. In the Aeolic dialect most verbs in  $\alpha\omega$ ,  $\epsilon\omega$ , and  $\omega\omega$  take the form in  $\mu$ ; as  $\phi i \lambda \eta \mu$  (with  $\phi i \lambda \epsilon \iota \sigma \theta \alpha$ ,  $\phi i \lambda \epsilon \iota$ ) in Sappho, for

φιλέω, etc.; ὄρημι (for ὁράω), κάλημι, αἴνημι.

3. A few verbs in Hom. and Hdt. drop  $\sigma$  in  $\sigma a\iota$  and  $\sigma o$  of the second person after a vowel; as imperat.  $\pi a \rho i \sigma \tau a \sigma o$  (for -a $\sigma o$ ) and impf.  $\ell \mu a \rho \nu a \sigma o$  (Hom.);  $\ell \xi \epsilon \pi i \sigma \tau \epsilon a \iota$  (for -a $\sigma a \iota$ ) with change of a to  $\epsilon$  (Hdt.). So  $\theta \epsilon o$ , imperat. for  $\theta \epsilon \sigma o$  (Att.  $\theta o \hat{v}$ ) and  $\ell \nu \theta \epsilon o$  (Hom.).

4. The Doric has  $\tau_i$ ,  $\nu\tau_i$  for  $\sigma_i$ ,  $\nu\sigma_i$ . Homer sometimes has  $\sigma\theta_a$  (556, 1) for  $\sigma$  in 2 pers. sing., as  $\delta i\delta \omega \sigma \theta_a$  ( $\delta i\delta \delta i\sigma \theta_a$  or  $\delta i\delta \delta i\sigma \theta_a$ ),  $\tau i\theta \eta \sigma \theta_a$ . The poets have  $\nu$  for  $\sigma a\nu$  (with preceding vowel short) in 3 pers. plur., as  $\tilde{\epsilon}\sigma \tau a\nu$  (for  $\tilde{\epsilon}\sigma \tau \eta \sigma a\nu$ ),  $\tilde{\epsilon}\epsilon\nu$  (for  $\tilde{\epsilon}\sigma a\nu$ ),  $\pi \rho \delta \tau i\theta \epsilon\nu$  (for  $\pi \rho \rho \epsilon \tau i\theta \epsilon \sigma a\nu$ ); see 777, 9.

5. Herodotus sometimes has atal, ato for vtal, vto in the present and imperfect of verbs in  $\mu$ l, with preceding a changed to  $\epsilon$ ; as  $\pi \rho \sigma \tau \theta (\delta \alpha \tau a)$ ,  $\delta \theta (\delta \tau a)$ . For the iterative endings  $\sigma \kappa \rho \nu$ ,  $\sigma \kappa \rho \mu \nu$ , see 778; these are added directly to the stem of verbs in  $\mu$ l, as  $\tilde{l} \sigma \tau a - \sigma \kappa \rho \nu$ ,  $\delta \delta - \sigma \kappa \rho \nu$ ,  $\xi \omega \nu \nu \hat{v} - \sigma \kappa \epsilon \tau \rho$ ,  $\tilde{\epsilon} - \sigma \kappa \rho \nu$  ( $\epsilon i \mu i$ , b e).

6. For poetic (chiefly Homeric) second agrists in ημην, εμήν,

υμην, and from consonant stems, see 800.

788. 1. Herodotus sometimes leaves  $\epsilon \omega$  uncontracted in the subjunctive of verbs in  $\eta \mu$ ; as  $\theta \dot{\epsilon} \omega \mu \epsilon \nu$  (Att.  $\theta \dot{\omega} \mu \epsilon \nu$ ),  $\delta \iota a \theta \dot{\epsilon} \omega \nu \tau a \iota$  ( $-\theta \dot{\omega} \nu \tau a \iota$ ),  $\dot{a} \pi - \iota \dot{\epsilon} \omega \sigma \iota$  (Att.  $\dot{a} \dot{\phi} - \bar{\iota} \dot{\omega} \sigma \iota$ , from  $\dot{a} \dot{\phi} - \dot{\iota} \dot{\eta} \mu$ ). He forms the subj. with  $\epsilon \omega$  in the plural also from stems in a; as  $\dot{a} \pi \sigma - \sigma \tau \dot{\epsilon} - \omega \sigma \iota$  ( $-\sigma \tau \dot{\omega} \sigma \iota$ ),  $\dot{\epsilon} \pi \iota \sigma \tau \dot{\epsilon} - \omega \nu \tau a \iota$  (for  $\dot{\epsilon} \pi \iota \sigma \tau a - \nu \tau a \iota$ , Att.  $\dot{\epsilon} \pi \iota \dot{\sigma} \tau \omega \nu \tau a \iota$ ). Homer sometimes has these forms with  $\epsilon \omega$ ; as  $\theta \dot{\epsilon} \omega \mu \epsilon \nu$ ,  $\sigma \tau \dot{\epsilon} \omega \mu \epsilon \nu$  (724, 1).

2. Generally, when the second agrist subjunctive active is uncontracted in Homer, the final vowel of the stem is lengthened,  $\epsilon$  (or  $\alpha$ ) to  $\eta$  or  $\epsilon$ , o to  $\omega$ , while the short thematic vowels  $\epsilon$  and o are used in the dual and plural, except before  $\sigma\iota$  (for  $\nu\sigma\iota$ ). Thus we find in Homer:—

```

The editions of Homer retain  $\alpha$  of the Mss. before  $\alpha$  and  $\omega$ ; but probably  $\eta$  is the correct form in all persons (see 780, 3).

- 3. A few cases of the middle inflected as in 2 occur in Homer; as  $\beta\lambda\dot{\eta}$ -εται ( $\beta\dot{a}\lambda\lambda\omega$ ),  $\ddot{a}\lambda$ -εται ( $\ddot{a}\lambda\lambda\alpha\mu\alpha$ ι),  $\ddot{a}\pi\sigma$ -θείομαι, κατα-θείομαι; so κατα-θημα (Hesiod) for καταθε-ημι (Att. καταθη).
- **789.** For Homeric optatives of  $\delta\alpha'\nu\bar{\nu}\mu$ ,  $\delta\dot{\nu}\omega$ ,  $\lambda\dot{\nu}\omega$ , and  $\phi\theta'\nu\omega$ ,  $\delta\alpha\nu\bar{\nu}\tau$ 0,  $\delta\dot{\nu}\eta$  and  $\delta\ddot{\nu}\mu\epsilon\nu$ ,  $\lambda\epsilon\lambda\hat{\nu}\tau$ 0 or  $\lambda\epsilon\lambda\hat{\nu}\tau$ 0.  $\phi\theta t\mu\eta\nu$  (for  $\phi\theta t\mu\eta\nu$ ), see these verbs in the Catalogue, with 734, 1; 744.
- **790.** Homer sometimes retains  $\theta_t$  in the present imperative, as δίδω $\theta_t$ , ὅμνν $\theta_t$  (752). Pindar often has δίδω.
- 791. Homer has μεναι or μεν (the latter only after a short vowel) for ναι in the infinitive. The final vowel of the stem is seldom long in the present; as  $l\sigma\tau\dot{\alpha}$ -μεναι,  $l\dot{\epsilon}$ -μεναι, μεθι $\dot{\epsilon}$ -μεν, δρνύμεναι, δρνύμεν, τιθέ-μεν, but τιθή-μεναι. In the second acrist active the vowel is regularly long (766, 2), as  $\sigma\tau\dot{\eta}$ -μεναι, γνώ-μεναι; but τίθημι. δίδωμι, and ζημι have θέμεναι and θέμεν, δόμεναι and δόμεν, and (ζμεν) μεθ-έμεν. (See 802.) In the perfect of the μι-form we have  $\dot{\epsilon}\sigma\tau\dot{\alpha}$ -μεναι,  $\dot{\epsilon}\sigma\tau\dot{\alpha}$ -μεν, τεθνά-μεναι, τεθνά-μεν.
- 792. Homer rarely has ημένος for έμενος in the participle. For second-perfect participles in ως (αως, έως, ηως), see 773.

#### ENUMERATION OF THE MI-FORMS.

The forms with this inflection are as follows: -

793. I. Presents in  $\mu$ . These belong to the Seventh and the Fifth Class of verbs (see 619 and 608).

### 794. Those of the Seventh Class are

1. Verbs in μι with the simple stem in the present. These are the irregular εἰμί, be, εἶμι, go, φημί, say, ἡμαι, sit, and κεῖμαι, lie, which are inflected in 806-818; with ἡμί, say, and the deponents ἄγαμαι, δύναμαι, ἐπίσταμαι, ἔραμαι, κρέμαμαι.

See these last in the Catalogue, and also Ionic or poetic (chiefly Homeric) forms under άημι, δίαμαι, δίεμαι (stem διε-), δίζημαι, έδω, ίλημι, κιχάνω, όνομαι, ρύομαι and έρύομαι, σεύω, στεύμαι, φάρω.

For δάμνημι and other verbs in νημι, see 797, 2.

2. Verbs in μι with reduplicated present stems (651). These are ἴστημι, τίθημι, and δίδωμι, inflected in 506, ἔημι, inflected in 810, δίδημι (rare for δίω), bind, κίχρημι (χρα-), lend, δυίνημι (όνα-), benefil, πίμπλημι (πλα-), fill, πίμπρημι (πρα-), burn. (For the last five, see the Catalogue.)

See also ιπταμαι (late), and Hom. βιβάς, striding, present par-

ticiple of rare βίβημι.

- **795.** N. Hi $\mu\pi\lambda\eta\mu$  and  $\pi'(\mu\pi\rho\eta\mu)$  insert  $\mu$  before  $\pi$ ; but the  $\mu$  generally disappears after  $\mu$  (for  $\nu$ ) in  $\epsilon\mu$ - $\pi'(\pi\lambda\eta\mu)$  and  $\epsilon\mu$ - $\pi'(\pi\rho\eta\mu)$ ; but not after  $\nu$  itself, as in  $\epsilon\nu$ - $\epsilon\pi'(\mu\pi\lambda\alpha\sigma\alpha\nu)$ .
- **796.** N. 'Ονίνημι (of uncertain formation) is perhaps for όνονημι, by reduplication from stem όνα.

### 797. Those of the Fifth Class are

1. Verbs in ννμ, which add νυ (after a vowel, ννυ) to the verb stem in the present (608). These are all inflected like δείκννμι (506), and, except σβένννμι, quench (803, 1), they have no Attic μι-forms except in the present and imperfect. The following belong to this class:—

(Stems in a), κερά-ννῦμι, κρεμά-ννῦμι. πετά-ννῦμι, σκεδά-ννῦμι; — (stems in  $\epsilon$  for  $\epsilon\sigma$ ),  $\tilde{\epsilon}$ -ννῦμι, κορέ-ννῦμι,  $\sigma$ βέ-ννῦμι; — (stems in  $\omega$ ), ζώ-ννῦμι,  $\tilde{\rho}$ ώ-ννῦμι,  $\tilde{\sigma}$ τονῦμι, στρώ-ννῦμι; — (consonant stems),  $\tilde{a}$ γ-νῦμι,  $\tilde{a}$ ρ-νυμι, δέκ-νῦμι, εἶργ-νῦμι, ζείγγ-νῦμι, ἀπο-κτίν-νῦμι (κτείνω), μίγ-νῦμι, οἴγ-νῦμι (in compos.), ὅλ-λῦμι, ὅμ-νῦμι, ὁμόργ-νῦμι, ὅρ-νῦμι, πήγ-νῦμι (παγ-), πτάρ-νυμαι, ρήγ-νῦμι (ρηγ-), στόρ-νῦμι, φράγ-νῦμι. See these in the Catalogue, and also Ionic or poetic (chiefly Homeric) forms under αἴνυμαι, ἄχνυμαι, γάνυμαι, διίνῦμι, καίνυμαι, κίνυμαι, ὀρέγ-νῦμι, τάνυμαι (see τείνω), τίνυμαι (see τίνω).

2. Verbs in νημι (chiefly epic), which add να to the verb stem in the present (609). These are δάμνημι, κίρνημι, κρήμνημι, μάρναμαι, πέρνημι, πίλναμαι, πίτνημι, σκίδνημι or κίδνημι. Many of these have also forms in ναω. (See the Catalogue.)

**798.** II. Second Aorists of the  $\mu$ -Form. The only second aorists formed from verbs in  $\mu$  are those of  $\tilde{\imath}\eta\mu$  (810), of  $\tilde{\imath}\sigma\tau\eta\mu$ ,  $\tau(\theta\eta\mu$ , and δίδω $\mu$  (506), of  $\sigma\beta$ ένν $\tilde{\imath}\mu$  (803, 1); with  $\tilde{\epsilon}\pi\rho\iota\dot{\alpha}\mu\eta\nu$  (505); also the irregular  $\tilde{\omega}\nu\dot{\eta}\mu\eta\nu$  (later  $\tilde{\omega}\nu\dot{\alpha}\mu\eta\nu$ ), of  $\tilde{\omega}\nu\dot{\nu}\eta\mu$ , and  $\tilde{\epsilon}\pi\lambda\dot{\eta}\mu\eta\nu$  (poetic) of  $\pi\dot{\iota}\mu\pi\lambda\eta\mu$ .

See also Homeric agrist middle forms of μίγνυμι, ὄρνυμι, and

πήγνυμι, in the Catalogue.

799. The second agrists of this form belonging to verbs in  $\omega$  are the following:—

'Αλίσκυμαι (άλ-), he taken: ἐάλων or ἡλων, was taken, άλω,

άλοίην, άλωναι, άλούς. (See 803, 2.)

Βαίνω (βα-),  $go: \xi\beta\eta\nu$ ,  $β\hat{\omega}$ , βαίην,  $β\hat{\eta}\theta\iota$  (also  $β\bar{a}$  in comp.),  $β\hat{\eta}νa\iota$ , βάs. Hom. βάτην for  $\xiβ\hat{\eta}την$ .

Βιόω (βιο-), live: ἐβίων, βιῶ, βιώην (irregular), βιῶναι, βιούς.

(Hom. imper. βιώτω.)

Γηράσκω (γηρα·), grow old, 2 aor. inf. γηράνω (poet.), Hom. part. γηράς.

Γιγνώσκω (γνο·), know: ἔγνων, γνῶ, γνοίην, γνῶθι, γνῶναι, γνούς. Διδράσκω (δρα·), run: ἔδραν, ἔδρας, ἔδρας, etc., subj. δρῶ, δρῶς, δρῶς, etc., opt. δραίην, δρῶναι, δράς. Hdt. ἔδρην, δρῆναι, δράς. Only in composition. (See 801.)

 $\Delta \hat{v}\omega$  ( $\delta v$ -), enter:  $\delta \delta v$ , entered (506),  $\delta v\omega$ , (for opt. see 744),  $\delta \hat{v}\theta \iota$ ,

δῦναι, δύς.

Κτείνω (κτεν-, κτα-), kill: act. (poetic) ἔκτἄν, ἔκτἄς, ἔκτἄ, ἔκτἄμεν (3 pl. ἔκτἄν, subj. κτέωμεν, inf. κτάμεναι, κτάμεν, 110m.), κτάς. Mid. (140m.) ἐκτάμην, was killed, κτάσθαι, κτάμενος.

Πέτομαι (πτα., πτε-), fly: act. (poetic) ἔπτην, (πτῶ, late), πταίην (πτῆθι, πτῆναι, late), πτάς. Mid. ἐπτάμην, πτάσθαι, πτάμενος.

[Τλάω] (τλα-), endure: ἔτλην, τλῶ, τλαίην, τλῆθι, τλῆναι, τλάς. Φθάνω (Φθα-), anticipate: ἔφθην, φθῶ, φθαίην, φθῆναι, φθάς.

Φύω (φυ-), produce: ἔφου, was produced, am. φύω, φῦναι, φύς (like ἔδου).

Add to these the single forms,  $\delta\pi\sigma\sigma\kappa\lambda\hat{\eta}\nu\alpha$ , of  $\delta\pi\sigma\sigma\kappa\hat{\epsilon}\lambda\lambda\omega$ , dry up,  $\sigma\chi\hat{\epsilon}s$ , imperat. of  $\delta\chi\omega$ , have,  $\pi\hat{\epsilon}\theta$ , imperat. of  $\pi\hat{\epsilon}\nu\omega$ , drink, and epic forms of  $\xi\nu\mu\beta\hat{a}\lambda\lambda\omega$  (800, 1) and of  $\kappa\epsilon\chi\hat{a}\nu\omega$  ( $\kappa\epsilon\chi\hat{a}\nu\omega$ ).

800. 1. Some poetic (chiefly Homeric) second agrists of the  $\mu\iota$ -form in  $\eta\mu\eta\nu$ ,  $\iota\mu\eta\nu$ , and  $\upsilon\mu\eta\nu$  are formed from stems in a,  $\iota$ , and  $\upsilon$  belonging to verbs in  $\omega$ . E.g.

Βάλλω (βαλ., βλα-), throw, 2 aor. act. (ἔβλην) ξυμ-βλήτην (dual); mid. (ἐβλήμην) ἔβλητο; φθίνω (φθι-), waste, 2 a. m. ἐφθίμην; σεύω (σν-), urge, ἐσσύμην (in Attic poets ἔσυτο, σύμενος); χέω (χυ-), pour, ἐχύμην, χύμενος.

See these verbs in the Catalogue. For other Homeric agrists see ἆω, ἀπαυράω, βιβρώσκω, κλύω, κτίζω, λύω, οὐτάω, πελάζω, πλώω, πνέω, πτήσσω.

2. Some are formed from consonant stems, with the simple

ending  $\mu\eta\nu$ . E.g.

"Αλλομαι (άλ-), leap, 2 a. m. (άλ-μην) άλσο, άλτο; δέχομαι (δεχ-), receive, (ἐδέγ-μην) δέκτο; (ἐλέγ-μην) ἔλεκτο, laid himself to rest (see stem  $\lambda$ εχ-).

Besides these, see ἀραρίσκω, γέντο, grasped, πάλλω, πέρθω.

3. For the inflection, see 803, 3.

- **801.** N. Second agrists in  $\eta\nu$  or  $a\mu\eta\nu$  from stems in a are inflected like  $\ell\sigma\tau\eta\nu$  or  $\ell\pi\rho\iota\dot{a}\mu\eta\nu$ ; but  $\ell\delta\rho\ddot{a}\nu$  substitutes  $\ddot{a}$  (after  $\rho$ ) for  $\eta$ , and  $\ell\kappa\tau\ddot{a}\nu$  is irregular.
- **802.** 1. The second agrists active of  $\tau(\theta\eta\mu\nu, t\eta\mu)$ , and  $\delta(\delta\omega\mu\nu)$  have the short vowel ( $\epsilon$  or o) of the stem (678; 755) in the indicative (dual and plural) and imperative ( $\epsilon t\tau o\nu$ ,  $\epsilon t\mu \epsilon \nu$ , etc., being augmented): in the infinitive they have  $\theta \epsilon t\nu a\iota$ ,  $\epsilon t\nu a\iota$ , and  $\delta o t\nu a\iota$ , and in the second person of the imperative  $\theta \epsilon t$ ,  $\epsilon t$ , and  $\delta t$ .
- 2. As these tenses have no forms for the indicative singular, this is supplied by the irregular first aorists  $\tilde{\epsilon}\theta\eta\kappa\alpha$ ,  $\tilde{\eta}\kappa\alpha$ , and  $\tilde{\epsilon}\delta\omega\kappa\alpha$  (670); so that the actual aorist indicative active is as follows:—

έθηκα, έθηκας, έθηκε, έθετον, έθέτην, έθεμεν, έθετε, έθεσαν.

ήκα, ήκας, ήκε, είτον, είτην, είμεν, είτε, είσαν.

έδωκα, έδωκας, έδωκε, έδοτον, έδότην, έδομεν, έδοτε, έδοσαν.

- 803. 1. The two other second agrists active from stems in  $\epsilon$  are  $\tilde{\epsilon}\sigma\beta\eta\nu$ , went out ( $\sigma\beta\dot{\epsilon}\nu\nu\dot{\nu}\mu$ , quench), inflected like  $\tilde{\epsilon}\sigma\tau\eta\nu$ , and  $\dot{a}\pi\sigma\sigma\kappa\lambda\hat{\eta}\nu\alpha$ , dry up ( $\sigma\kappa\dot{\epsilon}\lambda\lambda\omega$ ). See 797, 1; 799.
- 2. The other second agrists, from stem in o, are inflected like ἔγνων, as follows:—
- Indic. ἔγνων, ἔγνως, ἔγνω, ἔγνωτον, ἐγνώτην, ἔγνωμεν, ἔγνωτε, ἔγνωσαν. Subj. γνω (like δω). Ορι. γνοίην (like δωίην). Imper. γνωθι, γνώτω, γνώτον, γνώτων, γνώτων (755). Infin. γνωναι. Partic. γνούς (like δούς).
- 3. The second agrists δυήμην and ἐπλήμην (798), and the poetic agrists in ημην, ιμην, and υμην (800, 1) or in μην from consonant stems (800, 2), are inflected like the pluperfect middle (698).
- 804. III. Second Perfects and Pluperfects of the  $\mu$ t-Form. The following verbs have forms of this class in Attic Greek, most of them even in prose:—

\*Ιστημ (στα-); see 508 (paradigm). For Ionic forms of the participle, see 773.

Βαίνω (βα-), go; poetic 2 pf. βεβάσι (Hom. βεβάσι), subj. βεβώσι, inf. βεβάναι (Hom. βεβάμεν), part. βεβώς (Hom. βεβαώς, βεβαυῖα); 2 plup. (Hom. βέβασαν).

Γίγνομαι (γεν., γα-), become, 2 pf. γέγονα, am; (Hom. 2 pf. γεγάασι, 2 plup. dual γεγάτην, inf. γεγάμεν, part. γεγαώς, γεγαυια), Att. γεγώς,

γεγῶσα (poetic).

Θνήσκω (θαν-, θνα-), die; 2 pf. τέθνατον, τέθναμεν, τεθνάσι, opt. τεθναίην, imper. τέθναθι, τεθνάτω, inf. τεθνάναι (Hom. τεθνάμεναι or τεθνάμεν), part. τεθνεώς (773), τεθνεώσα (Hom. τεθνηώς, with

τεθνηυίης), 2 plup. ετέθνασαν.

Δείδω (δει-, δι-), epic in pres., fear, Attic 2 pf. δέδια, δέδιας, δέδιες, plur. δέδιμεν, δέδιτε, δεδίασι; 2 plup. ἐδεδίειν, ἐδέδισαν; subj. δεδίη, δεδίωσι, opt. δεδιείη, imper. δέδιθι, inf. δεδιέναι, part. δεδιώς. (Hom. 2 pf. δείδιας, δείδιας, δείδιες, pl. δείδιμεν, imper. δείδιθι, δείδιτε, inf. δειδίμεν, part. δειδιώς; plup. ἐδείδιμεν, ἐδείδισαν, rarely δείδιε (777, 4).

[Εἴκω] (ϵἰκ-, ἰκ-), 2 pf. ἔοικα, seem; also 2 pf. ἔοιγμεν, ϵἴξᾶσι (for ἐοίκᾶσι), inf. ϵἰκέναι, part. ϵἰκώς (Hom. 2 pf. ἔϊκτον, 2 plup. ϵἰκτην),

used with the regular forms of ξοικα, ξώκη (see Catalogue).

Oίδα (ίδ-), know; see 820 (paradigm).

See also poetic, chiefly Homeric, forms under the following verbs in the Catalogue: ἀνώγω,  $\beta$ ιβρώσκω, ἐγείρω, ἔρχομαι, κράζω, μαίομαι, πάσχω, πείθω, πίπτω, [τλάω], φύω, and stem (δα-).

#### IRREGULAR VERBS OF THE MI-FORM.

**805.** The verbs  $\epsilon i\mu i$ , be,  $\epsilon i\mu i$ , go,  $\epsilon i\mu i$ , send,  $\phi \eta \mu i$ , say,  $\epsilon i\mu ai$ , sit,  $\kappa \epsilon i\mu ai$ , lie, and the second perfect of  $\delta a$ , know, are thus inflected.

## 806. 1. $\epsilon i \mu i$ (stem $\epsilon \sigma$ -, Latin es-se), be.

# PART III.

# FORMATION OF WORDS.

822. (Simple and Compound Words.) A simple word is formed from a single stem; as  $\lambda \delta \gamma \sigma s$  (stem  $\lambda \epsilon \gamma$ -), speech,  $\gamma \rho \delta \phi \omega$  ( $\gamma \rho \alpha \phi$ -), write. A compound word is formed by combining two or more stems; as  $\lambda \sigma \sigma \gamma \rho \delta \phi \sigma \omega$ ,  $\gamma \rho \delta \phi \omega$ -,  $\gamma \rho \delta \omega$ -,  $\gamma$ 

# FORMATION OF SIMPLE WORDS.

- 823. (Primitives and Denominatives.) (a) Nouns or adjectives formed directly from a root (153) or from a verb stem are called primitives; as άρχή (stem ἀρχα-), beginning, from ἀρχ-, stem of ἄρχω; γραφεύς (γραφευ-), writer, γραφίς (γραφίδ-), style (for writing), γραμμή (γραμμα- for γραφ-μα-), line (828), γράμμα (γραμματ-), written document, γραφικός (γραφικο-), able to write, all from γραφ-, stem of γράφω, write; ποιη-τής, poet (maker), ποίη-σις, poesy (making), ποίη-μα, poem, ποιη-τικός, able to make, from ποιε-, stem of ποιέω, make. So δίκη (δικα-), justice, from the root δικ-; κακός, bal, from κακ-.
- 824. Nouns, adjectives, and verbs formed from the stems of nouns or adjectives, are called denominatives; as  $\beta \alpha \sigma \iota \lambda \epsilon (\bar{\alpha}, kingdom, from <math>\beta \alpha \sigma \iota \lambda \epsilon (v)$  (263);  $d \rho \chi \alpha i \delta s$ , ancient, from  $d \rho \chi \bar{\alpha}$  (stem of  $d \rho \chi \hat{\eta}$ );  $\delta \iota \kappa \alpha \iota \sigma \sigma \dot{\nu} r \eta$ , justice, from  $\delta \iota \kappa \alpha \iota \sigma$ ;  $\tau \bar{\iota} \mu \dot{\alpha}$ - $\omega$ , honor, from  $\tau \bar{\iota} \mu \bar{\alpha}$ -, stem of the noun  $\tau \bar{\iota} \mu \dot{\gamma}$ .
- **825.** N. (1) The name verbal is often applied to primitive words, because generally their root or stem actually occurs as a verb stem. This, however, does not show that the noun or adjective is derived from the verb, but merely that both have the same root or stem. Thus the root  $\gamma\rho\alpha\phi$ -contains only the general idea write, not as yet developed into a noun, adjective, or verb. By adding  $\tilde{a}$  it becomes  $\gamma\rho\alpha\phi\tilde{a}$ ,

the stem of  $\gamma\rho\alpha\phi\eta$ , a writing, which stem generally appears as  $\gamma\rho\alpha\phi\tilde{\alpha}$ -in the plural, and is modified by case-endings to  $\gamma\rho\alpha\phi\tilde{\alpha}$ -l,  $\gamma\rho\alpha\phi\tilde{\alpha}$ -l, etc. (See 108; 170.) By adding the thematic vowel % (561, 1),  $\gamma\rho\tilde{\alpha}q$ - is developed into  $\gamma\rho\alpha\phi\%$ -, the present stem of the verb  $\gamma\rho\tilde{\alpha}q\phi\omega$ , write, which is modified by personal endings to  $\gamma\rho\tilde{\alpha}\phi\omega$ - $\mu\epsilon\nu$ , we write,  $\gamma\rho\tilde{\alpha}q\epsilon$ - $\tau\epsilon$ , you write, etc.

(2) Even a noun or adjective derived from the stem of a denominative verb is called primitive; as αὐλητής, flute-player, from αὐλε, the stem of αὐλεω, play the flute; the latter, however, is formed from the

stem of auld-s, flute (829).

- 826. (Suffixes.) Roots or stems are developed into new stems by the addition of syllables (not themselves stems) called suffixes. Thus, in the examples in 823, final a- in  $d\rho\chi\bar{a}$ -,  $\epsilon\nu$  in  $\gamma\rho\alpha\phi\epsilon\nu$ -,  $\iota\delta$  in  $\gamma\rho\alpha\phi\iota\delta$ -,  $\mu\alpha$  in  $\gamma\rho\alpha\mu\mu\alpha$ -,  $\iota\kappa\nu$  in  $\gamma\rho\alpha\mu\nu\alpha$ -,  $\epsilon\nu$  in  $\gamma\nu$   **827.** N. Rarely a noun stem has no suffix, and is identical with the verb stem; as in  $\phi \dot{\nu} \lambda a \xi$ , guard, from stem  $\phi \dot{\nu} \lambda a \kappa$ , seen also in  $\phi \dot{\nu} \lambda d \sigma \sigma \omega$ , I guard (580);  $\phi \lambda \delta \xi$  ( $\phi \lambda o \gamma$ -), flame, from same stem as  $\phi \lambda \dot{\epsilon} \gamma \omega$  (831).
- **828.** N. The final consonant of a stem is subject to the same euphonic changes before a suffix as before an ending; as in  $\gamma\rho\dot{\alpha}\mu-\mu$ a for  $\gamma_f\alpha\phi-\mu\alpha$ ,  $\lambda\xi\xi$ is for  $\lambda\epsilon\gamma-\sigma$ is,  $\delta\iota\kappa\alpha\sigma-\tau$ is for  $\delta\iota\kappa\alpha\delta-\tau$ is. (See 71; 74; 75.)
- 829. N. A final vowel of the stem may be contracted with a vowel of the suffix; as in δρχαῖος, ancient, from δρχα- and το-ς (850). But such a vowel is sometimes dropped; as in οὐράν-τος, heavenly, from ούρανο- and το-ς, βαστλεικός, kingly, from βαστλε(ν)- and τκο-ς; εῦνο-τα, ηουά-will, from εὐνοο- and τα (842).

A final stem vowel is sometimes changed; especially from o to ε in denominatives, as in olκέ-ω, dwell (οἶκο-ς, house), οἰκέ-της, house-servant, and οἰκεῖος (οἰκε-ιος), domestic; — sometimes from ā to ω, as in στρατιώτης, soldler (στρατιά-), Σικελιώ-της, Sicilian Greek (Σικελιά-); — some-

times from  $\tilde{a}$  to  $\eta$ , as in  $\tilde{v}\lambda\dot{\eta}$ - $\epsilon is$ , woody, from  $\tilde{t}\lambda\eta$  ( $\tilde{v}\lambda\tilde{a}$ -).

830. N. (1) Many vowel stems (especially verb stems) lengthen their final vowel before a consonant of the suffix, as in verbs (635); as ποίη-μα, ποίη-σις, ποίη-τικός, ποίη-τής, from ποίε-.

(2) Many add σ before μ and τ of a suffix, as in the perfect and agrist passive (640); as κελευ-σ-τής, commander, κέλευ-σ-μα, command,

from κελευ- (κελεύω), κεκέλευ-σ-μαι.

(3) Others add θ, as σταθ-μός, station, from στα- (ιστημι).

(4) Others drop a final consonant, as σωφρο-σύνη, temperance, from σωφρον-.

# I. FORMATION OF NOUNS.

#### PRIMITIVE NOUNS.

832. The simplest and most common suffixes in nouns are o-(nom. os or ov) and  $\tilde{a}$ - (nom. a or  $\eta$ ). Nouns thus formed have a great variety of meanings. The change of  $\epsilon$  to o (831) is here regular. E.a.

Λόγο-ς (λογ-ο-), speech, from λεγ-, stem of λέγω (831); τρόπος, turn, from τρεπ- (stem of τρέπω, turn); στόλος, expedition, and στολή, equipment, from στελ- (stem of στέλλω, send); μάχ-η (μαχ-α-), battle, from μαχ- (stem of μάχομαι, fight).

833. (Agent.) 1. The following suffixes denote the agent:—
ευ- (noin. εύς): γραφ-εύ-ς, writer, from γραφ- (γράφω); γον-εύ-ς, parent, from γεν-

τηρ- (nom. τήρ):  $\sigma \omega \tau \eta \rho$ , saviour, from  $\sigma \omega$ - ( $\sigma \omega \omega$ ,  $\sigma \omega \zeta \omega$ , save).

τορ- (nom.  $\tau \omega \rho$ ):  $\dot{\rho}\dot{\eta}\tau \omega \rho$ , orator, from  $\dot{\rho}\epsilon$ - ( $\dot{\epsilon}\rho\dot{\epsilon}\omega$ ,  $\dot{\epsilon}\rho\dot{\omega}$ , shall say).

τα- (10111. της): ποιητής, poet (maker), from ποιε- (ποιέω); δρχησ-τής, dancer, from δρχε- (δρχέσμαι, dance). (See 830, 1, 2.)

2. To these correspond the following feminine forms: -

τειρά- (nom. τειρά): σώτειρα, fem. of σωτήρ.

τρια- (nom. τριά): ποιήτρια, poetess; όρχήστρια, dancing-girl.

τριδ- (nom. τρίς): ἀρχηστρίς, dancing-girl, gen. -ίδος.

τιδ- (nom. τις): προφήτις, prophetess; οἰκέτις, female servant.

3. Verbals in  $\tau\eta\rho$  and  $\tau\rho\iota\varsigma$  are oxytone: those in  $\tau\omega\rho$ ,  $\tau\rho\omega$ , and  $\tau\epsilon\iota\rho\omega$  have recessive accent (110, 4).

834. (Action.) These suffixes denote action: —

τι- (nom. τις, fem.):  $\pi$ ίσ-τις, belief, from  $\pi$ ιθ- ( $\pi$ είθω, believe).

σι- (nom. σις, fem.):  $\lambda \dot{v}$ -σις, loosing, from  $\lambda v$ - ( $\lambda \dot{v}\omega$ ).

σιά- (nom. σιά, fem.): δοκιμα-σίά, testing (δοκιμάζω, test).

μο- (nom. μός, masc.): ὀδυρμός, wailing (ὀδύρ-ομια. wail); σπασμός, spasm (σπά-ω, draw); ἡυθμός (830, 3), rhythm (ἡέω, flow, stem ἡυ-). (See 574.)

**835.** N. The suffix  $\mu\bar{a}$ - (nom  $\mu\eta$ , fem.) has the same force as simple  $\bar{a}$ -(832); as  $\gamma\nu\omega\mu\eta$ , knowledge ( $\gamma\nu\nu$ -);  $\delta\delta\mu\dot{\eta}$ , odor ( $\delta\zeta\omega$ ,  $\delta\delta$ -).

836. N. From stems in  $\epsilon v$  ( $\epsilon_F$ ) of verbs in  $\epsilon v\omega$  come nouns in  $\epsilon i\bar{a}$  denoting action; as  $\beta a\sigma i\lambda \epsilon i\bar{a}$ , kingly power, kingdom,  $\pi ai\delta \epsilon l\bar{a}$ , education. For feminines in  $\epsilon i\bar{a}$  of nouns in  $\epsilon vs$ , see 841.

837. (Result.) These suffixes denote the result of an action:—
ματ- (noin. μα, neut.): πρᾶγ-μα, thing, act, from πρᾶγ- (πράσσω,
do); ἡῆμα, saying (thing said), from ἡε- (fut. ἐρῶ); τμῆ-μα, section,
gen. τμήματος, from τμε-, τεμ- (τέμνω, cut).

εσ- (nom. os, neut.): λάχος (λαχεσ-), lot, from λαχ- (λαγχάνω, gain by lot); έθος (έθεσ-), custom, from έθ- (εἴωθα, am accustomed); γένος (γενεσ-), race, from γεν- (γέ-γον-α, 831).

In some primitives this suffix  $\epsilon\sigma$ -denotes quality; as  $\beta\delta\delta$  os  $(\beta\alpha\theta\epsilon\sigma)$ , depth (from root  $\beta\alpha\theta$ -);  $\beta\delta\rho$  os  $(\beta\alpha\rho\epsilon\sigma)$ , weight (from root  $\beta\alpha\rho$ -);  $\delta\delta$ 

(θαλπέσ-), heat (θάλπ-ω, warm).

.838. (Means or Instrument.) This is denoted by

- τρο- (1:011. τρον, Latin trum): ἄρο-τρον, plough, aratrum, from άρο (ἀρόω, plough); λύ-τρον, ransom, from λυ- (λύω); λοῦ-τρον, bath, from λου- (λούω, wash).
- 839. N. The feminine in  $\tau \rho \bar{a}$  sometimes denotes an instrument, as  $\chi \dot{\nu} \tau \rho \bar{a}$ , earthen pot, from  $\chi \dot{\nu} \cdot (\chi \dot{\ell} \omega, pour)$ ;  $\xi \dot{\nu} \cdot \sigma \cdot \tau \rho \bar{a}$ , scraper ( $\xi \dot{\nu} \cdot \omega, scrape$ ); sometimes other relations, e.g. place, as  $\pi a \lambda a l \cdot \sigma \cdot \tau \rho \bar{a}$ , place for wrestling, from  $\pi a \lambda a \iota \cdot (\pi a \lambda a l \omega, \text{ wrestle, 640})$ .
  - 840. Some primitives are formed from stems in

avo-, as στέφ-avo-s, crown (στέφ-ω, crown);

ονα-, as ήδ-ονή, pleasure (ήδ-ομαι, be pleased);

ον- οτ ων-, as εἰκ-ών, image, from εἰκ- (ἔοικα, resemble), κλύδ-ων, wave, from κλυδ- (κλύζω, dash).

#### DENOMINATIVE NOUNS.

- 841. (Person Concerned.) A person concerned with anything may be denoted by the following suffixes:—
- ευ-, mase. (nom. εύς), sometimes εια- (for ε $\varphi$ -ια), fem. (nom. εια): ἱερ-εύς, priest, from ἱερό-ς, sacred (829), fem. ἱέρ-εια, priestess; βασιλ-εύς, king (derivation uncertain), fem. βασίλ-εια, queen; πορθμ-εύς, ferryman, from πορθμό-ς, ferry.
- τά-, mase. (nom. της), τιδ-, fem. (nom. τις): πολί-της, citizen, from πόλι-ς, city, fem. πολί-τις, female citizen: οἰκί-της, house-servant, from οἶκο-ς, house, fem. οἰκί-τις, housemaid; στρατιώ-της, soldier, from στρατιά, army (829).
- 842. (Quality.) Nouns denoting quality are formed from adjective stems by these suffixes:—
- τητ- (nom. της, fem.): νεότης (νεοτητ-), youth, from νέος young; ισότης (ισοτητ-), equality, from ισος, equal (cf. Latin veritas, gen. veritatis, and virtus, gen. virtuits).
- συνά- (nom. σύνη, fem.): δικοιο-σύνη, justice, from δίκαιο-5, just; σωφρο-σύνη, temperance, from σώφρων (σωφρων), temperate.
- ιά- (nom. ιά or ιά, fem.): σοφ · ία wisdom (σοφό-ς), κακία, rice (κακό-ς), ἀλήθεω, truth, for ἀληθεσ-ω (άληθής, true), εὖνοια, kindness, for εὐνοια (εὕνοι-ς, εὕνοις, kind).

843. (Place.) This is denoted by these suffixes: -

1. το- (nom. τον, neut.) with the termination τηρ-τον: δικαστήρτον, court-house, ἀκροῦ-τήρ-τον, place of hearing (auditorium). These are probably from old stems in τηρ- (Babrius has δικαστήρων, from δικαστήρ, for δικαστῶν, of judges). So σημαν-τήρ-τον, seal (place of sealing), from σημαντήρ.

 $\epsilon$ io- for  $\epsilon$ -ιο-: κουρείον, barber's shop, from κουρεύ- $\epsilon$ , barber; so λογ-είον (λόγο- $\epsilon$ ), speaking-place, Moυσ-είον (Mοῦσα), haunt of the Muses.

2. ων- (nom. ών, masc.): ἀνδρών, men's apartment, from ἀνήρ, gen. ἀνδρ-ός, man; ἀμπελών, vineyard, from ἄμπελος, vine.

844. (Diminutives.) These are formed from noun stems by the following suffixes:—

το- (nom. τον, neut.): παιδ-ίον, little child, from παιδ- (παῖς, child); κηπ-ίον, little garden (κῆπος). Sometimes also τδιο-, αριο-, υδριο-, υλλιο- (all with nom. in τον); οἰκ-ίδιον, little house (οἶκος); παιδ-άριον, little child: μελ-ύδριον, little song (μέλος); ἐπ-ύλλιον, little verse, versicle, Latin versiculus (ἔπος). Here final  $\epsilon \sigma$ - of the stem is dropped.

ισκο- (nom. ίσκος, masc.) and ισκα- (nom. ίσκη, fem.): παιδίσκος, young boy, παιδίσκη, young girl; so νεᾶνίσκος, νεᾶνίσκη, from stem νεᾶν- (nom. νεᾶν, youth).

845. N. Diminutives sometimes express endearment, and sometimes contempt; as πατρίδιον, papa (πατήρ, father), Σωκρατίδιον, Εὐρὶπίδιον.

**846.** (Patronymics.) These denote descent from a parent or ancestor (generally a father), and are formed from proper names by the suffixes  $\delta \bar{a}$ - (nom.  $\delta \eta s$ , masc. parox.) and  $\delta$ - (nom. s for  $\delta s$ , fem. oxytone); after a consonant  $s\delta \bar{a}$ - and  $s\delta$ - (nom.  $t\delta \eta s$  and ts-).

 Steins (in ā-) of the first declension shorten a and add δāand δ; as Boρεά-δης, son of Boreas, and Boρεά-ς, gen. Βορεά-δος, daughter of Boreas, from Βορέāς, Boreas.

2. Stems of the second declension drop the final o and add ιδάand ιδ.: as Πριαμ-ίδης, son of Priam, Πριαμ-ίς, gen. Πριαμίδος,
daughter of Priam, from Πρίαμο-ς. Except those in ιο, which
change o to a, making nominatives in ιάδης and ιάς (as in 1); as
Θεστιάδης and Θεστιάς, son and daughter of Thestius (Θέστιο-ς).

3. Stems of the third declension add ιδά- and ιδ-, those in εν dropping ν before ι; as Κεκροπ-ίδης, son (or descendant) of Cecrops, Κεκροπ-ίς, gen. ίδος, daughter of Cecrops, from Κέκροψ, gen. Κέκροπ-ος; 'Ατρείδης (Ilom. 'Ατρείδης), son of Atreus, from 'Ατρεύς, gen. 'Ατρέ-ως; ΙΙηλείδης (Hom. Πηλείδης), son of Peleus,

from  $\Pi\eta\lambda\epsilon\dot{\omega}$ s, gen.  $\Pi\eta\lambda\dot{\epsilon}\cdot\omega$ s, Hom. also  $\Pi\eta\lambda\eta\iota\dot{\alpha}\delta\eta$ s (as it from a form  $\Pi\eta\lambda\dot{\eta}\iota\sigma$ s).

- 847. N. Occasionally patronymics are formed by the suffix τονor των- (nom. των); as Κρονίων, gen. Κρονίωνος or Κρονίονος (to suit the metre), son of Cronos (Κρόνο-ς).
- 848. (Gentiles.) 1. These designate a person as belonging to some country or town, and are formed by the following suffixes:—
- ευ- (nom. εύς, masc.): Ἐρετρι-εύς, Ēretrian (Ἐρετρία); Μεγαρεύς, Megarian (Μέγαρα, pl.); Κολωνεύς, of Colonos (Κολωνός).
- τα- (nom. της, masc. parox.): Τεγεά-της, of Tegea (Τεγεά), Ήπειρώ-της, of Epirus (\*Ηπειρος), Σικελιώ-της, Sicilian Greek (Σικελία). (See 829.)
- 2. Feminine stems in ιδ- (nom. ls, gen. lδos) correspond to masculines in ευ-; as Μεγαρίς, Megarian woman; and feminines in τιδ- (nom. τις, gen. τιδος), to masculines in τα-, as Σικελιώ-τις, Sicilian woman.

#### ADJECTIVES.

- 849. 1. The simplest suffixes by which primitive adjectives (like nouns) are formed from roots or stems are o- and  $\bar{a}$  (nonness. os; fem.  $\eta$ ,  $\bar{a}$ , or os; neut. ov):  $\sigma \circ \phi \cdot \circ \circ$ ,  $\sigma \circ \phi \cdot \eta$ ,  $\sigma \circ \phi \circ \circ$ , wise; kak-os, bad;  $\lambda \circ \iota \pi \circ \circ$ , remaining ( $\lambda \cdot \iota \pi \circ \circ$ ,  $\lambda \circ \iota \pi \circ \circ$ ).
- 2. Some have v- (nom.  $\dot{v}$ ,  $\hat{\epsilon ia}$ ,  $\dot{v}$ ), added only to roots:  $\dot{\eta}\delta \cdot \dot{v}$ , sweet, from  $\dot{\eta}\delta \cdot (\ddot{\eta}\delta o\mu a\iota$ , be pleased);  $\beta ap \cdot \dot{v}$ , heavy (root  $\beta ap$ , cf.  $\beta \dot{ap}$ -os, weight);  $\tau a\chi \cdot \dot{v}$ , swift (root  $\tau a\chi$ -, cf.  $\tau \dot{a}\chi os$ , swiftness).
- 3. Some have εσ- (nom. ης, ες): ψευδής (ψευδεσ-), false (ψεύδομαι, lie); σαφ-ής (σαφεσ-), plain (root σαφ-).

Most adjectives in ns are compounds (881).

- 4. Some expressing inclination or tendency have μον- (nom. μων, μον): μνή-μων, mindful, from μνα- (μέ-μνη-μαι); τλή-μων, suffering, from τλα- (see τλάω); ἐπι-λήσ-μων, forgetful, from λαθ- (λανθάνω).
- 850. Adjectives signifying belonging or related in any way to a person or thing are formed from noun stems by the suffix co-(nom.  $\cos$ ):  $\text{ov}_{\rho a'}\cos$ , heavenly ( $\text{ov}_{\rho a}\cos$ , oikelos, domestic (olkos, see 829);  $\delta(\kappa a \cos$ , just ( $\delta(\kappa \bar{a})$ , 'A $\theta \eta \nu a \cos$ , Athenian ('A $\theta \hat{\eta} \nu a$ , stem 'A $\theta \eta \nu a$ ).
- 851. 1. Denominatives formed by  $\iota\kappa o$  (nom.  $\iota\kappa o$ s) denote relation, like adjectives in  $\iota o$ s (850), sometimes fitness or ability. Stems in  $\iota$  drop  $\iota$  before  $\iota\kappa o$ . E.q.

'Αρχικός, fit for rule (ἀρχή, rule); πολεμικός, warlike, of war (πόλεμος); φυσικός, natural (φυσι); βασιλικός, kingly (βασιλεύς); γραφικός, capable of writing or drawing (γραφή).

2. Similar adjectives are formed directly from verb stems by

τικο- (11011). τικος): πράκ-τικός, sit for action, practical, from πράγ- (πράσσω); αἰσθη-τικός, capable of feeling.

- 852. Adjectives denoting material are formed by
- ινο- (nom. ινος, proparoxytone), as λίθ-ινος, of stone (λίθος);
- το- (nom. τος, contr. ους), as χρύστος, χρύσους, golden (χρύσος).
- 853. N. Adjectives in ινός (oxytone) denote time, as ἐαρ. ινός, vernal (ἔαρ, spring), νυκτερ-ινός, by night (νύξ, night, νύκτερος, by night).
- 854. Those denoting fulness (chiefly poetic) are formed by εντ(nom. εις, εσσα, εν); χαρίεις, graceful (χάρι-ς), gen. χαρί-εντος; 
  υλή-εις (872), woody; cf. 829. Latin gratiosus, silvosus.
- - 856. N. Most adjectives in vos, los, and pos are oxytone.
- 857. All participles are primitive (verbal) adjectives: so the verbals in  $\tau_{OS}$  and  $\tau_{COS}$ .
- 858. Comparatives and superlatives in  $\tau\epsilon\rho$  and  $\tau\alpha\tau\sigma$ s are denominatives; but those in  $\bar{\iota}\omega\nu$  and  $\iota\sigma\tau\sigma$ s are primitives, adding these terminations directly to the root (357, 2).

#### ADVERBS.

- 859. Most adverbs are formed from adjectives (see 365-367).
- 860. Adverbs may be formed also from the stems of nouns or verbs by the following suffixes: —
- 1. δόν (or δά), ηδόν: ἀνα-φαν-δόν, openly (ἀνα-φαίνω, φαν-), poet. also ἀναφανδά; κυν-ηδόν, like a dog (κύων, gen. κυν-όs).
- 2. δην οτ άδην: κρύβ-δην, secretly (κρύπτω, conecal); συλλήβ-δην, collectively (συλλαμβάνω, λαβ-, 611); σπορ-άδην, scatteredly (σπείρω, sow, scatter, stem σπερ-); άνε-δην, profusely (άν-ίημι, let out, stem ε-).
  - 3. τί: δνομασ-τί, hy name (δνομάζω); έλληνισ-τί, in Greek (έλληνίζω).
  - 4. See also the local endings  $\theta_i$ ,  $\theta_{\ell\nu}$ ,  $\delta_{\ell}$ , etc. (292-296).

# DENOMINATIVE VERBS.

861. A verb whose stem is derived from the stem of a noun or adjective is called a *denominative* (824). The following are the principal terminations of such verbs in the present indicative active:—

- 1. aω (stem in a-): τιμάω, honor, from noun τιμή (τιμα-), honor.
- 2. εω (ε-): ἀριθμέω, count, from ἀριθμό-ς, number (829).
- 3. οω (o-): μισθόω, let for hire, from μισθό-ς, pay.
- 4. ευω (ευ-): βασιλεύω, be king, from βασιλεύ-s, king (see 863).
- 5. aζω (aδ.): δικάζω, judge, from δίκη (δικά-), justice (862).
- 6.  $\zeta \omega$  ( $\delta$ ):  $\delta \lambda \pi i \zeta \omega$ , hope, from  $\delta \lambda \pi i \varsigma$  ( $\delta \lambda \pi i \delta$ ), hope (862).
- 7. αινω (αν.): σημαίνω, signify, from σήμα (σηματ.), sign (865).
- 8. vww (uv-): hove, sweeten, from hoirs, sweet (Sti).
- **862.** Verbs in  $\alpha \zeta \omega$ ,  $\alpha \zeta \omega$ ,  $\alpha \iota \nu \omega$ , and  $\vartheta \nu \omega$  are of the fourth class: for their formation, see 579-596. Some denominatives of this class end in  $\lambda \lambda \omega$ ,  $\alpha \iota \rho \omega$ ,  $\alpha \iota \rho \omega$ , and  $\vartheta \rho \omega$ ; as  $d \gamma \gamma \epsilon \lambda \lambda \omega$  ( $d \gamma \gamma \epsilon \lambda \sigma \varsigma$ ), announce,  $\kappa \alpha \theta \alpha \iota \rho \omega$  ( $\kappa \alpha \theta \alpha \rho \sigma \varsigma$ ), purify,  $l \mu \epsilon \iota \rho \omega$  ( $l \mu \epsilon \rho \sigma \varsigma$ ), long for,  $\mu \alpha \rho \tau \nu \rho \omega$  ( $\mu \alpha \rho \tau \nu \sigma \varsigma$ ), stem  $\mu \alpha \rho \tau \nu \rho \sigma \omega$ ), call to witness.
- **863.** Many verbs in  $\epsilon\nu\omega$  are formed merely by the analogy of those (like  $\beta\alpha\sigma(\lambda\epsilon\dot{\nu}-\omega)$ ) with stems in  $\epsilon\nu$ : thus  $\beta\sigma(\lambda\epsilon\dot{\nu}-\omega)$ , take counsel, from  $\beta\sigma\nu\lambda\dot{\eta}$ ;  $\dot{\alpha}\lambda\eta\theta\epsilon\dot{\nu}\omega$ , be truthful, from  $\dot{\alpha}\lambda\eta\theta\dot{\eta}s$ .
- **864.** Likewise many in  $ij\omega$  and most in  $aj\omega$  merely follow the analogy of those like  $\ell\lambda\pi ij\omega$  ( $\ell\lambda\pi i\delta$ -) and  $\phi\rho\dot{a}j\omega$  ( $\phi\rho\dot{a}\delta$ -), which have actual stems in  $\delta$  (see 587).
- **865.** The stems in  $\alpha\nu$  and  $\nu\nu$  of verbs in  $\alpha\nu\omega$  and  $\bar{\nu}\nu\omega$  come from nominal stems without  $\nu$ : see the examples above.
- **866.** Some verbs in εω come from adjectives in ης by dropping εσof the stem; as εὐτυχέω, be fortunate, from εὐτυχής (εὐτυχεσ-).
- 867. N. Verbs formed from the same noun stem with different endings sometimes have different meanings; as πολεμέω and (poetic) πολεμίζω, make war, πολεμέω, make Losiile, both from πόλεμο-s, war; δουλόω, enslave, δουλεύω, be a slave, from δούλο-s, slave.
- **868.** (Desideratives.) 1. Verbs expressing a desire to do anything are sometimes formed from other verbs and from nouns by the ending  $\sigma_{\epsilon i \omega}$  (stem in  $\sigma_{\epsilon i \cdot}$ ), sometimes  $\sigma_{\epsilon i \omega}$  ( $\sigma_{\epsilon i \cdot}$ ); as  $\delta \rho \bar{\sigma} \cdot \sigma_{\epsilon i \cdot} \omega$ , desire to do ( $\delta \rho \dot{\sigma} \cdot \omega$ );  $\gamma \epsilon \lambda \sigma_{\epsilon i \cdot} \omega$ , desire to laugh ( $\gamma \epsilon \lambda \dot{\sigma} \cdot \omega$ );  $\phi_{\epsilon i \cdot} \omega$ , be blood-thirsty ( $\phi_{\epsilon i \cdot} \omega$ );  $\kappa \lambda \sigma_{\epsilon i \cdot} \omega$ , desire to weep ( $\kappa \lambda \sigma_{\epsilon i \cdot} \omega$ ), stem  $\kappa \lambda \sigma_{\epsilon i \cdot} \omega$ ).
- 2. Some verbs in ιωω denote a bodily condition; as ὀφθυλμιώω, have diseased eyes (ophthalmia), ώχριώω, he pale, ἐρυθριώω, blush.

# COMPOUND WORDS.

- 869. In a compound word we have to consider (1) the first part of the compound, (2) the last part, and (3) the meaning of the whole.
- 870. N. The modifications which are necessary when a compound consists of more than two parts will suggest themselves at once.

#### I. FIRST PART OF A COMPOUND WORD.

- 871. 1. When the first part of a compound is a noun or adjective, only its stem appears in the compound.
- 2. Before a consonant, stems of the first declension generally change final  $\tilde{a}$  to o; those of the second declension retain o; and those of the third add o. Before a vowel, stems of the first and second declensions drop  $\tilde{a}$  or o. E.q.

Θαλασσο-κράτωρ (θαλασσα-), ruler of the sea, χορο-διδάσκαλος (χορο-), chorus-teacher, παιδο-τρίβης (παιδ-), trainer of boys, κεφαλαλγής (κεφαλα-), causing headache, χορ-ηγός (χορο-), (orig.) chorus-director; so iχθυο-φάγος (iχθυ-), fish-eater, φυσιο-λόγος, enquiring into nature. The analogy of the second (or o-) declension prevails throughout.

- 872. N. There are many exceptions. Sometimes  $\eta$  takes the place of  $\sigma$ ; as  $\chi \circ \eta \cdot \phi \circ \rho \circ \sigma$  ( $\chi \circ \eta$ , libation), bringer of libations, ilaph-bolos (ëlaphos), deer-slayer. Stems in  $\epsilon \sigma$  (226) often change  $\epsilon \sigma$  to  $\sigma$ ; as  $\tau \epsilon \iota \chi \circ \iota \mu a \chi (a (\tau \epsilon \iota \chi \epsilon \sigma))$ , wall-fighting. The stems of  $\iota \alpha \circ \sigma$ , ship, and  $\beta \circ \sigma$ , ox, generally appear without change ( $\iota \alpha \circ \iota \iota \iota \sigma$ ); as  $\iota \alpha \circ \iota \iota \iota \iota \iota \iota \iota \sigma$ ), four-kolos, herdsman. Sometimes a noun appears in one of its cases, as if it were a distinct word; as  $\iota \iota \iota \iota \iota \sigma \circ \iota \sigma$ , ship-house,  $\iota \iota \iota \sigma \circ \iota \sigma$ , traversed by ships.
- 873. Compounds of which the first part is the stem of a verb are chiefly poetic.
- 1. Here the verbal stem sometimes appears without change before a vowel, and with  $\epsilon$ ,  $\iota$ , or o added before a consonant. E.g.

Πείθ-apχos, obedient to authority; μεν-ε-πτόλεμος, steadfast in battle; άρχι-τέκτων, master-huilder; λιπ-ό-γαμος, marriage-leaving (adulterous).

2. Sometimes  $\sigma_i$  (before a vowel  $\sigma$ ) is added to the verb stem. E.g.

 $\Lambda \bar{\nu}$ - $\sigma$ (- $\pi$ ovos, toil-relieving;  $\sigma$ τρεψί-δικος ( $\sigma$ τρεφ-), justice-twisting; τερψί-νοος ( $\tau$ ερπ-), soul-delighting;  $\pi\lambda$ ήξ- $\iota\pi\pi$ ος ( $\pi\lambda$ ηγ-), horse-lashing.

- 874. 1. A proposition or an adverb may be the first part of a compound word; as in προ-βάλλω, throw before (882, 1), ἀα-λογία, continual talking, εὐ-γενής, well-born.
- 2. Here no change of form occurs, except when a final vowel is elided, or when  $\pi\rho\delta$  contracts  $\rho$  with a following  $\epsilon$  or  $\rho$  into  $\rho$ 0, as in  $\pi\rho\rho\delta\chi\omega$  ( $\pi\rho\delta$ ,  $\xi\chi\omega$ ), hold before;  $\pi\rho\rho\delta\rho\rho$ 0 ( $\pi\rho\delta$ ,  $\xi\rho\gamma\rho\nu$ ), forward,  $\rho$ 0,  $\rho$
- Euphonic changes occur here as usual; as in ἐγχώριος (ἐν and χώρα): see 78.

- 875. The following inseparable prefixes are never used alone:—
- 1. av- (a- before a consonant), called alpha privative, with a negative force, like English un-, Latin in-. It is prefixed to noun, adjective, and verb stems, to form adjectives; as ἀν-ελειθερος, unfree, ἀν-αιδής, shameless, ἀν-όμοιος, unlike, ἄ-παις, childless, ἄ-γραφος, unwritten, ἄ-θεος, godless, ἄ-(ρ)οινος, wineless.

δυσ-, ill (opposed to εὐ, well), denoting difficulty or trouble;
 as δύσ-πορος, hard to pass (opposed to εὐ-πορος); δυσ-τυχής, unfor-

tunate (opposed to ev-ruyns).

3. νη- (Latin ne), a poetic negative prefix; as νή-ποινος, unavenged; νη-μερτής, unerring (for νη-αμερτής).

4. ήμι- (Latin semi-), half; as ήμί-θεος, demiyod.

- 876. N. A few intensive prefixes are found in poetry, ἀρι, ἐρι, δα, ζα, as ἀρίγνωτος, well-known; δα-φοινός, bloody.
- 877. N. The prefix  $\alpha$  is sometimes copulative (denoting union); as in  $\tilde{a}$ - $\lambda$ o $\chi$ os, bedfellow (from  $\lambda$ é $\chi$ os).

# H. LAST PART OF A COMPOUND WORD.

878. At the beginning of the last part of a compound noun or adjective, a,  $\epsilon$ , or o (unless it is long by position) is very often lengthened to  $\eta$  or  $\omega$ . E.g.

Στρατ-ηγός (στρατό-ς, ἄγω), general; ὑπ-ήκοος (ὑπό, ἀκούω), obedient; κατ-ηρεφής (κατά, ἐρέφω), covered; ἐπ-ώνυμος (ἐπί, ὁνομα), naming or named for; κατ-ήγορος (κατά, ἀγορά), accuser; but ἄν-ολβος, unblest.

879. The last part of a compound noun or adjective is often changed in form before the suffix. This takes place especially in compound adjectives, and when an abstract noun forms the last part of a compound noun. E.g.

Φιλότιμος (τῖμή), honor-lowing; εἴ-φρων (φρήν), joyous; πολυπράγμων (πράγμα), meddlesome; λιθο βολία (λίθος, βολή), stone-throwing, ναν-μαχία (ναΰς, μάχη), sea-fight; εὐ-πραξία (πραξίς), success (doing well).

- 880. N. An abstract noun compounded with a preposition may retain its form; as προ-βουλή, forethought.
- 881. Compound adjectives in  $\eta_S$  (849, 3) are especially frequent.
  - 1. The last part may be a noun, generally a neuter in os (stem

in εσ-); as εὐγενής (γένος), well born, δεκα-ετής (έτος), of ten years; εὐτυχής (τύχη), fortunate.

2. The last part may be formed from a verb stem; as ά-φαν-ής (φαν), unscen, ημι-θανής (θαν), half-dead.

882. 1. A compound verb can be formed directly only by prefixing a preposition to a verb; as  $\pi \rho o \sigma$ -áy $\omega$ , bring to.

2. Indirect compounds (denominatives) are formed from

compound nouns or adjectives. E.g.

Λιθοβολέω, throw stones, denom. from λιθοβόλος, stone-thrower; νομοθετίω, make laws, from νομοθέτης, law-maker; ἀπειθίω, disobey, from ἀπειθής, disobedient; κατηγορέω, accuse, from κατ-ήγορος (878), accuser. See 543.

#### III. MEANING OF COMPOUNDS.

883. Compound nouns and adjectives are of three classes, distinguished by the relation of the parts of the compound to each other and to the whole.

884. (1) Objective compounds are those composed of a noun and a verb, adjective, or preposition, in which the noun (as first or second part) stands to the other part in some relation (commonly that of object) which could be expressed by an oblique case of the noun. E.g.

Λογο-γράφος, speech-writer (λόγους γράφων); μισ-άνθρωπος, manhating (μισῶν ἀνθρώπους); λῦσί-πονος, toil-relieving; στρατ-ηγός, general (army-leading, στρατὸν ἄγων); ἀξιό-λογος, worthy of mention (ἄξιος λόγου): ἀμαρτ-έ-νοος (873, 1), erring in mind (ἀμαρτῶν νοῦ); ἰσό-θεος, goillike (ἴσος θεῷ); τερπ-ι-κέραυνος (873, 1), delighting in thunder (τερπόμενος κεραυνῷ); διο-τρεφής, reared by Zeus (cf. διπετής, fallen or sent from Zeus, and Δι-τρεφής, a proper name). So with a preposition: έγ-χώριος, native (ἐν χώρι); ἐφ-ίππιος, belonging on a horse (ἐφ' ἴππω); ἐφ-έστιος, on the hearth (ἐφ' ἐστίι).

- 885. N. When the last part of an objective compound is a transitive verbal in of formed by the suffix of (832), it generally accents the penult if this is short, otherwise the last syllable. But if the last part is intransitive or passive (in sense), the accent is recessive. Thus  $\lambda o \gamma o \gamma \rho a \phi o \sigma$ , speech-writer;  $\lambda i \theta o \beta b \lambda o \sigma$ , thrower of stones, but  $\lambda i \theta \delta \beta o \lambda o \sigma$ , pelted with stones;  $\mu n \tau \rho o \kappa \tau b v o \sigma$ , matricide, matricidal; but  $\sigma \tau \rho a \tau \eta \gamma \delta \sigma$ , general;  $\lambda o \gamma o \pi o \delta \sigma$ , story-maker.
- 886. (2) Determinative compounds are nouns or adjectives in which the first part, generally as adjective or adverb, qualifies (or determines) the second part. E.g.

- 'Ακρό-πολις, citadel (ἀκρὰ πόλις); μεσ-ημβρία (μεσὴ ἡμέρα, 66), mid-day; ψευδό-μαντις, false prophet; ὁμό-δουλος, fellow-slave (ὁμοῦ δουλεύων); δυσ-μαθής, learning with difficulty; ἀκυ-πέτης, swift-flying; προ-βουλή, forethought; ἀμφι-θέατρον, amphitheatre (theatre extending all round); ἄ-γραφος, unwritten. Here belong adjectives like μελι-ηδής (ἡδύς), honey-sweet, 'Αρηί-θοος, swift as Ares (Ares-swift).
- 887. N. Here belong a few compounds sometimes called copulative, made of two nouns or two adjectives, and signifying a combination of the two things or qualities. Strictly, the first part limits the last, like an adjective or adverb. Such are largo-μαντις, physician-prophet (a prophet who is also a physician); ξιφο-μάχαιρα, sword-sabre; ἀνδρδ-παις, man-child; γλυκύ-πικρος, sweetly bitter; θεό-ταυρος, god-hull (of Zeus changed to a bull).
- 888. (3) Possessive or attributive compounds are adjectives in which the first part qualifies the second (as in determinatives), and the whole denotes a quality or attribute belonging to some person or thing. E.g.
- \*Aργυρό-τοξος, with silver-bow (ἀργυροῦν τύξον ἔχων); κακο-δαίμων, ill-fated (κακὸν δαίμονα ἔχων); πικρό-γαμος, wretchedly married (πικρὸν γάμον ἔχων); δμό-νομος, having the same laws; ἐκατογ-κέφαλος, hundred-headed; δεκα-ετής, of ten years (duration); ἀγαθο-ειδής, having the appearance (είδος) of good; ἔν-θεος, inspired (having God within); ἀκύ-πους, swift-footed (ωκεῖς πύδας ἔχων), but ποδ-ώκης (πόδας ωκύς), foot-swift, is a determinative.
- 889. N. In compound verbs, the original verb remains the fundamental part, modified more or less in meaning by the preposition prefixed. Other compounds than those here mentioned present no difficulties in respect to meaning.

# PART IV.

# SYNTAX.

#### DEFINITIONS.

- 890. (Subject and Predicate.) Every sentence must contain two parts, a subject and a predicate. The subject is that of which something is stated. The predicate is that which is stated of the subject. Thus in the sentence  $\Delta a \rho \epsilon \hat{i} \circ \beta a \sigma \iota \lambda \epsilon \acute{\nu} \epsilon \iota \tau \hat{a} \nu$   $\Pi \epsilon \rho \sigma \hat{a} \nu$ , Darius is king of the Persians,  $\Delta a \rho \epsilon \hat{i} \circ \varsigma$  is the subject and  $\beta a \sigma \iota \lambda \epsilon \acute{\nu} \epsilon \iota \tau \hat{a} \nu$   $\Pi \epsilon \rho \sigma \hat{a} \nu$  is the predicate.
- 2. Elμí, however, can form a complete predicate, as in εἰσὶ θεοί, Gods exist.
- 892. (Object.) That upon which the action of a verb is exerted is called the object. The object may be either direct or indirect: thus, in  $\tilde{\epsilon}\delta\omega\kappa\epsilon$   $\tau \tilde{a}$   $\chi\rho\dot{\eta}\mu\alpha\tau a$   $\tau\hat{\omega}$   $d\nu\delta\rho\dot{\iota}$ , he gave the money to the man,  $\chi\rho\dot{\eta}\mu\alpha\tau a$  is the direct object and  $d\nu\delta\rho\dot{\iota}$  is the indirect (or remote) object.
- 893. Verbs which can have a direct object are called transitive; those which cannot are called intransitive.

# SUBJECT AND PREDICATE.

#### SUBJECT.

- 894. The subject of a finite verb (446) is in the nominative; as  $\delta \hat{a}\nu\hat{\eta}\rho \hat{\eta}\lambda\theta\epsilon\nu$ , the man came.
- 895. 1. The subject of the infinitive is in the accusative; as  $\phi\eta\sigma$ i τοὺς ἄνδρας ἀπελθεῖν, he says that the men went away.
- 2. But the subject of the infinitive is generally omitted when it is the same as the subject or the object (direct or indirect) of the leading verb; as  $\beta o i \lambda \epsilon \tau a i \pi \epsilon \lambda \theta \epsilon i \nu$ , he wishes to go away;  $\phi \eta \sigma i \gamma \rho i \phi \epsilon \iota \nu$ , he says that he is writing;  $\pi a \rho a \iota \nu o i \mu \epsilon \nu \epsilon \iota \nu$ , we advise you to remain.
- 3. So when it is the same with any important adjunct of the leading verb; as κακούργου ἐστὶ κριθέντ ἀποθανεῖν, it is like a malefactor to die by sentence of the law (428, 2), D. 4, 47.
- 896. The subject nominative of the first or second person is omitted, except when special emphasis is required.
  - 897. The nominative of the third person is omitted: --
- When it is expressed or implied in the context; as δ Κῦρος πράσσει ἄ βούλεται, Cyrus does what he (Cyrus) pleases;
- 2. When it is a general word for persons; as λέγουσι, they say, it is said;
- 3. When it is indefinite; as in  $\delta\psi\hat{\epsilon}$   $\tilde{\eta}\nu$ , it was late;  $\kappa\alpha\lambda\hat{\omega}_{\delta}$   $\tilde{\epsilon}\chi\epsilon\iota$ , it is well;  $\delta\eta\lambda\hat{\omega}_{\delta}$ , it is evident (the case shows): so in the impersonal construction with the verbal in  $\tau\hat{\epsilon}\omega\nu$ , as in  $\pi\epsilon\iota\sigma\tau\hat{\epsilon}\omega\nu$  ( $\hat{\epsilon}\sigma\tau\hat{\iota}$ )  $\tau\hat{\omega}$   $\nu\hat{\omega}\mu$ , we must obey the law (1597).
- 4. When the verb implies its own subject, as κηρύσσει, the herald (κῆρυξ) proclaims, ἐσάλπιγξε, the trumpeter sounded the trumpet, κωλύει, a hindrance occurs. In passive expressions like παρεσκεύασταί μοι, preparation has been made by me (I am prepared), the subject is really the idea of preparation etc. contained in the verb. See 1240.
- 5. With verbs like  $\tilde{v}\epsilon\iota$ , it rains,  $\tilde{a}\sigma\tau\rho\tilde{a}\pi\tau\epsilon\iota$ , it lightens,  $\sigma\epsilon\tilde{\iota}\epsilon\iota$ , there is an earthquake (it shakes), where, however, some subject like Z $\epsilon\tilde{v}$ s or  $\theta\epsilon\tilde{o}s$  was originally supplied.
- 898. Many verbs in the third person singular have an infinitive or a sentence as their subject. These are called impersonal

verbs. Such are πρέπει and προσήκει, it is proper, ενεστι and εξεστι, it is possible, δοκεί, it seems good, συμβαίνει, it happens, and the like; as εξεστιν ύμιν τοῦτο ποιείν, it is in your power to do this (to do this is possible for you). So also δεί and χρή, it is required, we ought; as δεί ήμας απελθείν, we must yo away.

The name impersonal is applied with greater propriety (though less frequently) to the verbs of 897, 3 and 4.

#### SUBJECT NOMINATIVE AND VERB.

- 899. 1. A verb agrees with its subject nominative in number and person; as  $(\epsilon\gamma\dot{\omega})$   $\lambda\dot{\epsilon}\gamma\omega$ , I say, oùtos  $\lambda\dot{\epsilon}\gamma\epsilon\iota$ , this man says, oi arboes  $\lambda\dot{\epsilon}\gamma \epsilon \nu \upsilon$ , the men say.
- 2. But a nominative in the neuter plural regularly takes a singular verb; as ταῦτα ἐγένετο, these things happened, τὰ οἰκήματα ἔπεσεν, the buildings fell. So ἀδύνατά ἐστι (or ἀδύνατόν ἐστι), it is impossible.

Exceptions sometimes occur, especially with nouns denoting persons. Several are found in Xenophon; as in  $A.1,7^{17}$ .

- 900. A singular collective noun denoting persons may take a plural verb; as τὸ πληθος ἐψηφίσαντο πολεμεῖν, the majority voted for war, T.1,125.
- 901. N. When several subjects are connected by and, they generally have a plural verb. But the verb may agree with one of the subjects (generally the nearest), and be understood with the rest. The latter generally happens when they are connected by or or nor. E.g.

Σοφοὶ ἐγώ τε καὶ σὰ ημεν, you and I were wise, P. Th. 154<sup>d</sup>; μαχούμεθα κοινη ἐγώ τε καὶ σὰ, you and I will fight together, P. Rp. 335°; οὰ σὰ μόνος οἰδὲ οἱ σοὶ φίλοι πρῶτον ταύτην δόξαν ἔσχετε, it was not you alone nor your friends who first took up this notion. P. Lg. 988<sup>b</sup>. Ἐμὲ οὕτε καιρὸς οὕτ ἐλπὶς οὕτε φόβος οὕτ ἄλλο οὐδὲν ἐπῆρεν, neither opportunity nor hope nor fear nor anything else incited me, I. 18. 298.

- 902. N. If the subjects are of different persons, the verb is in the first person rather than the second or third, and in the second rather than the third. (See examples under 901.)
- 903. N. A verb in the dual may follow two subjects in the singular, or even a plural subject denoting two persons or things. But even a subject in the dual may have a verb in the plural. (See Il. 4, 453; 5, 10, 275; 16, 218.)

- 904. N. Sometimes a verb agrees with the predicate nominative; as ai δè εἰσφοραὶ καὶ χορηγίαι εὐδαιμονίας ἰκανὸν σημεῖόν εστιν, his taxes and payments for choruses are a sufficient sign of prosperity, Ant. 2, γ. 8.

See also the phrases έστιν οι etc., 1029.

906. N. A preposition with a numeral may represent the subject of a verb; as ἀπέθανον αὐτῶν περὶ τριακοσίους, about three hundred of them perished, X. H.4, 611.

## PREDICATE NOUN AND ADJECTIVE.

907. With verbs signifying to be, to become, to appear, to be named, chosen, made, thought or regarded, and the like, a noun or adjective in the predicate is in the same case as the subject. E.g.

Οὐτός ἐστι βασιλεύς, this man is king; 'Αλέξανδρος θεὸς ωνομάζετο, Alexander was named a God; ἡρέθη στρατηγός, he was chosen general; ἡ πόλις φρούριον κατέστη, the city became a fortress, T.7,28; οὐτός ἐστιν εὐδαίμων, this man is happy; ἡ πόλις μεγάλη ἐγένετο, the city became great; ηὕξηται μέγας, he has grown (to be) great; νομίζεται σοφός, he is thought wise.

- 908. The verbs which are here included with the copula  $\partial \mu^i$  (891, 1) are called *copulative* verbs. The predicate nominative with the passive verbs of this class represents the predicate accusative of the active construction (1077).
- 909. The predicate adjective with these verbs agrees with the subject in gender and number, as well as in case. (See 919.)
- 910. The predicate of an infinitive with its subject accusative expressed (895, 1) is in the accusative; as βούλεται τὸν νίὸν εἶναι σοφόν, he wishes his son to be wise. So when the participle is used like the infinitive in indirect discourse (1494); as ήδεσαν τὸν Κῦρον βασιλέα γενόμενον, they knew that Cyrus had become king.

For such a predicate with the subject omitted, see 927 and 928.

# APPOSITION.

911. A noun annexed to another noun to describe it, and denoting the same person or thing, agrees with it in case. This is called apposition, and the noun thus used is called an appositive. E.g.

Δαρείος ὁ βασιλεύς, Darius the king. 'Αθήναι, μεγάλη πόλις, Athens, a great city. 'Υμᾶς τοὺς σοφούς, you, the wise ones. 'Ημῶν τῶν 'Αθηναίων, of us, the Athenians. Θεμιστοκλῆς ἦκω (sc. ἐγὼ) παρὰ σέ, I, Themistocles, am come to you, T.1,137. Φιλήσιος καὶ Λύκων οἱ 'Αχαιοί, Philesius and Lycon, the Achaeans,  $X.A.5,6^{27}$ .

- 912. N. A noun in apposition with two or more nouns is generally plural (or dual); as ῦπνος πόνος τε, κύριοι ξυνωμόται, sleep and toil, lordly conspirators, A. Eu. 127; θάρρος καὶ φόβον, ἄφρονε ξυμβούλω, daring and fear, two senseless counsellors, P. Ti. 69<sup>d</sup>.
- 913. N. An adjective may have a genitive in apposition with a genitive which it implies; as  $A\theta\eta\nu\alpha\hat{a}os$   $\hat{\omega}\nu$ ,  $\pi\delta\lambda\epsilon\omega s$   $\tau\hat{\eta}s$   $\mu\epsilon\gamma(\sigma\tau\eta s$ , being (a citizen) of Athens, the greatest city, P. Ap. 29<sup>d</sup>.

For a genitive in apposition with the genitive implied in a

possessive pronoun, see 1001.

- 914. N. A noun which might stand in the partitive genitive (1088) sometimes takes the case of the words denoting its parts, especially when the latter include the whole of the former; as οἰκίαι αἰ μὲν πολλαὶ πεπτώκεσαν, ὀλίγαι δὲ περιῆσαν, most of the houses had fallen, but a few remained (where we might have τῶν οἰκιῶν), Τ.1, 89. So οὖτοι ἄλλος ἄλλα λέγει, these men all say different things, X. A.2, 116. This is called partitive apposition.
- 915. N. A noun may be in apposition with a whole sentence, being in the nominative when it is closely connected in thought with the subject of the sentence, elsewhere in the accusative; as κείνται πεσόντες, πίστις οὐ σμικρὰ πόλει, they lie prostrate, no small (cause of) confidence to the city, Ε. Rh. 415. Έλένην κτάνωμεν, Μενέλεω λύπην πικράν, let us kill Helen, (which will be) a bitter grief to Menelaus, Ε. Or. 1105.
- 916. N. A noun may be in apposition with the subject or the object of a sentence, where we use as or a like word; as ἔπποι ἤγοντο θῦμα τῷ Ἡλίῳ, horses were brought as an offering to the Sun (in active, ἔππους ἄγειν θῦμα, to bring horses as an offering), X. C. 8, 3½; ἔξεστιν ὑμῖν ἡμᾶς λαβεῖν ξυμμάχους, you can gain us as allies, X. A. 5, 46. So τιχεῖν τινος φίλου, to gain some one as a friend; χρῶμαι τούτῳ φίλῳ, I treat him as a friend. So τίνος διδάσκαλοι ἦκετε; as teachers of what are you come? P. Eu. 287\*. See 1080.

917. N. Homer often adds an appositive denoting a part to a noun or pronoun denoting a person; as Δηιοπίτην οὖτασεν ὧμον, he wounded D. in the shoulder, Il. 11, 420; άλλ' οὖκ 'Ατρείδη 'Αγαμέμνονι ἥνδανε θυμῷ, but he was not pleasing to the heart of Agamemnon, son of Atreus (lit. to A., his heart), Il. 1, 24.

For  $\delta \delta \hat{\epsilon}$  in Homer followed by a noun in apposition, see 937, 1.

# AGREEMENT OF ADJECTIVES.

918. Adjectives agree with their nouns in gender, number, and case. This applies also to the article and to adjective pronouns and participles. E.g.

'Ο σοφὸς ἀνήρ, the wise man; τοῦ σοφοῦ ἀνδρός, τῷ σοφῷ ἀνδρί, τὸν σοφὸν ἄνδρα, τῶν σοφῶν ἀνδρῶν, etc. Οὖτος ὁ ἀνήρ, this man; τούτου τοῦ ἀνδρός, τούτων τῶν ἀνδρῶν. Αἱ πρὸ τοῦ στόματος νῆςς ναυμαχοῦσαι, the ships engaged in battle before the mouth (of the harbor), T.7,23.

This includes predicate adjectives with copulative verbs, the case of which has already been considered (907); as al ἄρισται δοκοῦσαι εἶναι φύσεις, the natures which seem to be best, X. M. 4, 13.

919. The adjective may be either attributive or predicate. An attributive adjective simply qualifies the noun, without the intervention of any verbal form (like all the adjectives in 918, except ἄρισται). The predicate adjective may be connected with its noun by the copula (891) or by a copulative verb (908); as ὁ ἀνὴρ ἀγαθός ἐστιν, the man is good: καλεῖται ἀγαθός, he is called good. It may stand to its noun in any relation which implies some part of εἰμί; as πτηνὰς διώκεις τὰς ἐλπίδας, you are pursuing hopes which are winged (i.e. hopes being winged), E.frag. 273; ἀθάνατον τὴν μνήμην καταλείψουσιν, immortal is the memory they will leave hehind them (i.e. τὴν μνήμην οὖσαν ἀθάνατον), I.9,3; ποιεῖ τοὺς Μήδους ἀσθενεῖς, he makes the Medes (to be) weak. Every adjective which is not attributive is classed as a predicate.

A predicate adjective is often known by its position with respect to the article; see 971, and the examples.

- **920.** N. A collective noun in the singular denoting persons may take a plural participle; as Τροίαν ἐλόντες ᾿Αργείων στόλος, the Argives' army having taken Troy, A. Ag. 577.
- **921.** N. An adjective may conform to the *real* rather than the grammatical gender of a noun denoting a person; as φίλε τέκνον, dear child! 11.22,84.

- 922. N. Δύο, two, is often used with a plural noun; as εθρος δύο πλέθρων (1085, 5), of two plethra in breadth, X. A.1, 228.
- **923.** N. An attributive adjective belonging to several nouns generally agrees with the nearest or the most prominent one, and is understood with the rest; as τὸν καλὸν κάγαθὸν ἄνδρα καὶ γυναῖκα, the honorable man and woman, P. G. 470°; παντὶ καὶ λόγφ καὶ μηχανῆ, by every word and device.
- **924.** N. (a) A predicate adjective (like a verb, 901) is regularly plural if it belongs to several singular nouns, or dual if it belongs to two. If the nouns are of different genders, the adjective is commonly masculine if one of the nouns denotes a male person, and commonly neuter if all denote things. Thus, είδε πατέρα τε καὶ μητέρα καὶ άδελφοὺς καὶ τὴν ἐαυτοῦ γυναῖκα αἰχμαλώτους γεγενημένους, he saw that both his father and his mother, his brothers, and his own wife had been made captives, X. C. 3, 17; δόξα δὴ καὶ ἐπιμέλεια καὶ νοῦς καὶ τέχνη καὶ νόμος σκληρῶν καὶ μαλακῶν πρότερα ἂν είη, Γ. Lq. 892°.
- (b) But it sometimes follows both the gender and number of the nearest or most prominent noun; as πρόρριζος αὐτὸς, ή γυνη, τὰ παιδία, κάκιστ' ἀπολοίμην, may I perish most wretchedly root and branch, myself, my wife, my children, Ar. R. 587.
- 925. N. A masculine or feminine noun in the singular, denoting a class rather than an individual, may have a neuter predicate adjective, which is used as a noun; as  $\kappa \alpha \lambda \delta \nu \dot{\eta} \dot{\eta} \delta \lambda \dot{\eta} \theta \epsilon \omega$ , a beautiful thing is truth, P. Lg. 663°;  $\dot{\alpha} \theta \dot{\alpha} \nu \tau \dot{\nu} \nu \tau \dot{\eta}$ ; is the soul then immortal (an immortal thing)? P. Ph. 105°.
- 926. N. A predicate adjective is sometimes used where we should use an adverb or adverbial phrase; as ἐκόντες ἦλθον, they came willingly; ὅρκιος δέ σοι λέγω, I say it to you on my oath, S. An. 305; πρῶτος δ' ἐξερέεινε Νέστωρ, and first, Nestor inquired, II. 10, 543. There is often, however, a great distinction between the adjective and the adverb; as πρῶτος αὐτος εἶδον, I was the first to see them; πρώτους αὐτος εἶδον, they were the first whom I saw; πρῶτον (adv.) αὐτος εἶδον, first (of all that I did) I saw them.

# ADJECTIVES BELONGING TO THE OMITTED SUBJECT OF AN INFINITIVE.

927. When the subject of an infinitive is omitted because it is the same as the subject nominative of the leading verb (895, 2), adjective words and nouns which would agree

with the omitted subject are assimilated to the preceding nominative. E.q.

Βούλεται σοφὸς εἶναι, he wishes to be wise; Πέρσης ἔφη εἶναι, he said he was a Persian, X.Λ.4,417. Οὐχ ὁμολογήσω ἄκλητος ήκειν, I shall not admit that I am come unbidden, P.Sy.1744; οὐκ ἔφη αὐτὸς άλλ' ἐκεῖνον στρατηγεῖν, he (Cleon) said that not (he) himself, but he (Nicias) was general; he said οὐκ (ἐγὼ) αὐτὸς (στρατηγῶ) ἀλλ' ἐκεῖνος στρατηγεῖ, αὐτός being adjective (989, 1) and ἐκεῖνος substantive; T.4,28. Such adjective words or nouns may be in the predicate with copulative verbs (907) or in other constructions. The assimilating nominative may be either expressed or understood.

- 928. But when the subject of an infinitive is omitted because it is the same as the object or other adjunct (895, 3) of the leading verb,—
- 1. If this adjunct is a dative, adjective words and nouns may either be assimilated to the dative, or stand in the accusative in agreement with the omitted subject of the infinitive. E.g.

Πρέπει σοι εἶναι προθύμω (οτ πρόθυμον), it becomes you to be zealous; νῦν σοι ἔξεστιν ἀνδρὶ γενέσθαι, now it is in your power to show yourself a man, X.  $A.7,1^{21}$ ; παντὶ προσήκει ἄρχοντι φρονίμω εἶναι, it becomes every ruler to be prudent, X. Hip. 7,1; συμφέρει αὐτοῖς φίλους εἶναι, it is for their interest to be friends, X. Oe. 11,23. Ἑδοξεν αὐτοῖς συσκευασαμένοις ἄ εἶχον καὶ ἔξοπλισαμένοις προιένωι, they decided to pack up what they had and arm themselves completely, and to advance, X.  $A.2.1^2$ ; but ἔδοξεν αὐτοῖς προφυλακὰς καταστήσαντας συγκαλεῖν τοὺς στρατιώτας, they decided to station pickets and to assemble the soldiers (ib.  $3,2^1$ ); in  $1,2^1$ , we find two datives and an accusative.

2. If the adjunct is a genitive, predicate adjectives are generally assimilated to it; but other adjective words and all nouns stand in the accusative. E.g.

Κύρου ἐδέοντο ὡς προθυμοτάτου γενέσθαι, they asked Cyrus to be as devoted to them as possible,  $X.H.1,5^2$ ; but (with a noun) 'Αθηναίων ἐδεήθησαν σφίσι βοηθοὺς γενέσθαι, they asked the Athenians to become their helpers, 11d.6,100; κακούργου ἐστὶ κριθέντ' ἀποθανεῖν, στρατηγοῦ δὲ μαχόμενον τοῖς πολεμίοις, it is like a malefactor to die by the sentence of a court, but like a general (to die) fighting the enemy, D.4.47; δέομαι ὑμῶν μεμνημένους τῶν εἰρημένων τὰ δίκαια ψηφίσασθαι, I beg of you to remember what has been said, and to vote what is just, I.19,51.

- 929. Words in the construction of 928 which refer to a preceding accusative are of course in the accusative; as allows  $\pi \epsilon \pi \epsilon \kappa \kappa \alpha \sigma \nu \mu \mu \alpha \theta \eta \tau \dot{\alpha} s$   $\mu \omega \phi \omega \tau \dot{\alpha} v$ , I have induced others to go as my fellow-pupils, P. Eu. 272c.
- 930. N. The principles of 927 and 928 apply also to a predicate with ων or with the participle of a copulative verb; as ήδεσαν σοφοί ὄντες, they knew that they were wise (but ήδεσαν τούτους σοφούς ὄντας, they knew that these men were wise).
- 931. N. When an infinitive depends on a participle which supplies its omitted subject, predicate words take the case of the participle; as ηλθον ἐπί τινα τῶν δοκούντων εἶναι σοφῶν, I went to one of those who seemed to be wise, P. Ap. 21b; τῶν προσποιουμένων εἶναι σοφιστῶν τινας, some of those who profess to be sophists, I.15, 221. So τοῖς δοκοῦσιν εἶναι σοφοῖς, to those who seem to be wise.

## ADJECTIVE USED AS A NOUN.

- 932. 1. An adjective or participle, generally with the article, may be used as a noun. E.g.
- Ο δίκαιος, the just man; δ ἐχθρός, the enemy; φίλος, a friend; κακή, a base woman; τὸ μόσον οτ μόσον, the middle; οἱ κακοί, the bad; τοῖς ἀγαθοῖς, to the good; τῶν κρατούντων, of those in power; κακά, evils; τὰ θνητά, mortal things: οἱ γραψάμενοι Σωκράτην, the accusers of Socrates.
- 2. In some cases, a noun is distinctly implied; as τη ὖστεραῖα (sc. ἡμέρα), on the next day; ἡ δεξιά (sc. χείρ), the right hand; ἡ εὐθεῖα (sc. ὁδός), the straight road; ὁ ἄκρατος (sc. οἶνος), unmixed wine; ἐς τὴν ἑἀυτῶν (sc. γῆν), into their own land.
- 933. The neuter singular of an adjective with the article is often used as an abstract noun; as τὸ καλόν, beauty (= κάλλος), τὸ δίκαιον, justice (= δικαιοσύνη).
- 934. N. The participle, which is a verbal adjective, is occasionally thus used for the infinitive, which is a verbal noun; as  $\tau \delta$  dedos, fear  $(=\tau \delta \delta \epsilon \delta \iota \epsilon \nu a \iota \lambda)$ , T.1,36;  $\epsilon \nu \tau \omega \mu \mu \mu \epsilon \lambda \epsilon \tau \omega \nu \iota$ , in the want of practice (in the not practising)  $(=\epsilon \nu \tau \omega \mu \mu \mu \epsilon \lambda \epsilon \tau \omega \nu)$ , T.1,142. So in Latin, opus est maturato, there is need of haste.

## THE ARTICLE.

#### HOMERIC USE OF THE ARTICLE.

935. In Homer the article appears generally as a demon-

strative or personal pronoun; sometimes (in the forms beginning with  $\tau$ ) as a relative. E.g.

- Τὴν δ' ἐγὼ οὐ λύσω, but I will not free her, Il.1,29; τοῦ δὲ κλύε Φοῖβος 'Απόλλων, and Phoebus Apollo heard him, Il.1,43; δ γὰρ ἡλθε θοὰς ἐπὶ νῆας 'Αχαιῶν, for he came to the swift ships of the Achaeans, Il.1,12. As relative, πυρὰ πολλὰ τὰ καίετο, many fires which were burning, Il.10,12; δῶρα τά οἱ ξεῖνος δῶκε, gifts which a stranger gave him, Od.21, 13.
- 936. N. Even in Homer, adjectives and participles used as nouns (932, 1) have the article, as in Attic Greek; as οἱ γὰρ ἄριστοι ἐν νηυσὰν κέαται, for the bravest sit by the ships, Il. 11,658; οἱ ἄλλοι, the others; τά τ' ἐόντα τά τ' ἐσσόμενα, both things that are and things that are to be, Il. 1,70.
- **937.** 1. When the article is used with nouns in Homer, it is generally a pronoun (especially  $\delta$   $\delta \dot{\epsilon}$ ), with which the noun is in apposition; as  $\delta$   $\delta'$   $\ddot{\epsilon}\beta\rho\alpha\chi\epsilon$   $\chi\dot{\alpha}\lambda\kappa\epsilon\sigma$  "Apps, and he, brazen Ares, roared, Il. 5, 859;  $\dot{\eta}$   $\delta'$   $\dot{\alpha}\dot{\epsilon}\kappa\sigma\sigma'$   $\ddot{\alpha}\mu\alpha$   $\tau\sigma\dot{\alpha}\sigma$   $\gamma\nu\nu\dot{\gamma}$   $\kappa\dot{\epsilon}\nu$ , and she, the woman, went with them unwilling, Il. 1, 348.
- Nearer the Attic use of the article are examples like these: αὐτὰρ ὁ τοῖσι γέρων ὁδὸν ἡγεμόνευεν, but he, the old man, showed them the way, Od. 24, 225; τὸν δ' οἶον πατέρ' εὖρον, and they found him, the father, alone, ib. 226.
- 3. Hardly, if at all, to be distinguished from the Attic article is that found in examples like these: ὅτε δη την νησον ἀφικόμεθ, when now we came to the island, Od. 9, 543; τό τε σθένος 'Ωρίωνος, and the might of Orion, Il. 18, 486; at δε γυναῖκες ἱστάμεναι θαύμαζον, and the women stood and wondered, Il. 18, 495.
- 4. It is, therefore, often difficult to decide the exact force of an article in early Greek. The above examples show a gradual transition, even in Homer, from the original pronoun to the true definite article.
- **938.** N. The examples in 937, 3, are exceptional; and in such cases the nouns usually stand without the article in Homer, as in Latin. Thus  $\delta \epsilon \iota \nu \dot{\eta}$   $\delta \dot{\epsilon}$   $\kappa \lambda \alpha \gamma \gamma \dot{\eta}$   $\gamma \dot{\epsilon} \nu \epsilon \dot{\epsilon}$   $\delta \dot{\epsilon}$
- 939. Herodotus generally uses the forms of the article beginning with  $\tau$  in the place of the ordinary relative, of which he uses only the forms  $\delta s$ ,  $\tilde{\eta}$ ,  $o\tilde{t}$ , and  $a\tilde{t}$ , except after prepositions. Thus  $\tilde{a}\lambda\lambda os$   $\tilde{o}\rho\nu is$   $\tilde{t}\rho ds$ ,  $\tau \hat{\omega}$   $\tilde{o}\tilde{v}\nu o\mu a$   $\Phi o\hat{v}\nu \xi$ , another sacred bird, whose name is Phoenix, 2, 73. In other respects, he uses the article as it is used in Attic prose.

940. N. The lyric poets follow the Homeric usage with respect to the article more closely than Herodotus; and the tragic poets, especially in the lyric chorus, admit the Homeric use of the article as a relative or a personal pronoun.

#### ATTIC USE OF THE ARTICLE.

- 941. In Attic Greek the article generally corresponds to our article the; as ὁ ἀνήρ, the man; τῶν πόλεων, of the cities; τοῖς "Ελλησιν, to the Greeks; τὰ δέκα ἔτη, the (well known) ten years (at Troy), T.1,11.
- 942. The Greek may use the article in certain cases in which the English omits it. Such are the following (943-951):—
- 943. Proper names may take the article; as δ Σωκράτης or Σωκράτης, Socrates.
- **944.** Abstract nouns often take the article; as  $\hat{\eta}$  are  $\hat{\eta}$ , virtue,  $\hat{\eta}$  diracoving, justice;  $\hat{\eta}$  eddábeta, caution. But are  $\hat{\eta}$  etc. are also used in the same sense.
- 945. 1. Nouns qualified by a demonstrative pronoun regularly take the article; as ούτος & ἀνήρ, this man; ἐν ταῖσδε ταῖς πόλεσιν, in these cities. (For the position, see 974.)
- 2. But this article may be omitted with proper names, as οὐτος Νεοπτόλεμος, this Neoptolemus, D. 18, 114; also where the demonstrative is equivalent to here or there, as ὁρῶμεν ὀλίγους το ύτους ἀνθρώπους, we see few men here, X. A. 4, 75; so οὑτοσὶ ἀνήρ, this man here, and οὖτος ἀνήρ used contemptuously; see also νῆες ἐκείναι ἐπιπλέουσι, ships are sailing up yonder, T. 1, 51.
  - 3. The tragedians often omit this article with demonstratives.
- **946.** 1. Nouns with a possessive pronoun take the article when they refer to definite individuals, but not otherwise; as  $\delta \in \mu \delta s$   $\pi a \tau \eta \rho$ , my father,  $\delta = \sigma \delta s$  kolvorós, your partner, D. 18, 21; but  $\sigma \delta s$  kolvorós would mean a partner of yours. (For predicates, see 956.)
- 2. So also with nouns on which a possessive genitive of a personal, demonstrative, or reflexive pronoun depends; as δ πατήρ μου, my father; δ έμαυτοῦ πατήρ, my own father; δ τούτων πατήρ, their father; ἡ έαυτῶν γῆ, their own land. But παῖς έαυτοῦ, a child of his own.
- 947. Τοιοῦτος, τοσοῦτος, τοιόσδε, τοσόσδε, and τηλικοῦτος may take the article; as τὸν τοιοῦτον ἄνδρα, such a man. It is always used with δεῦνα, such a one (420).

- 948. A numeral may have the article, (a) to distinguish a part of a number; (b) to express a round number, especially with ἀμφί, περί, ὑπέρ, οτ εἰς; (c) to express merely a number in the abstract. Thus, τῶν πέντε τὰς δύο μοίρας νέμονται, they hold two of the five parts, T.1,10; ἔμειναν ἡμέρας ἀμφὶ τὰς τριάκοντα, they remained about thirty days, X. A. 4, 8<sup>22</sup>; ὅπως μὴ ἐρεῖς ὅτι ἐστὶ τὰ δώδεκα δὶς ἔξ, don't say that twelve is twice six, P. Rp. 337<sup>b</sup>.
- 949. The article is often used, where we use a possessive pronoun, to mark something as belonging to a person or thing mentioned in the sentence; as ξρχεται αὐτή τε ή Μανδάνη πρὸς τὸν πατέρα καὶ τὸν Κῦρον ὸν νίὸν ἔχουσα, Mandane comes to her father (lit. to the father) herself, and with her son Cyrus, X. C. 1, 31.
- 950. The article may have a generic force, marking an object as the representative of a class; as  $\delta \delta \nu \theta \rho \omega \pi \sigma s$ , man (in general);  $\delta \nu \nu \phi \rho \sigma \tau \sigma s$ , the aged (as a class).
- 951. The article sometimes has a distributive force, where we should use each or a; as ὑπισχνεῖται δώσειν τρία ἡμιδαρεικὰ τοῦ μηνὸς τῷ στρατιώτη, he promises to give three half-daries a month to each soldier, X. A. 1, 321.
- 952. I. An adverb, a preposition with its case, or any similar expression, may be used with the article to qualify a noun, like an attributive adjective; as οἱ τότε ἄνθρωποι, the men of that time; τοῦ πάλαι Κάδμου, of ancient Cadmus, S. O.T.1; οἱ ἐν ἄστει Αθηναῖοι, the Athenians in the city.
- 2. Here a noun denoting men or things is often omitted; as of èv ἄστει, those in the city; τοις τότε, to those of that time; οἱ ἀμφὶ Πλάτωνα, those about Plato (generally Plato and his school, or simply Plato).
- 954. Instead of repeating a noun with new adjuncts in the same sentence, it may be sufficient to repeat its article; as οἱ τῶν πολιτῶν παίδες καὶ οἱ τῶν ἄλλων, the children of the citizens and those of the others.

955. 1. The infinitive, as a verbal noun (1516), may take a neuter article; as τὸ εἰδέναι, the knowing; σοὶ τὸ μὴ σιγῆσαι λοιπὸν ην, it remained for you not to be silent, D.18, 23.

[955

- 2. In like manner, a neuter article may precede a whole clause considered as a noun; as τὸ γνῶθι σαυτὸν πανταχοῦ 'στι χρήσιμον, the saying "know thyself" is everywhere useful.
- 956. A predicate noun or adjective seldom has the article; as νὺξ ἡ ἡμέρη ἐγένετο, the day became night, Hd.1,103; καλεῖται ἡ ἀκρόπολις ἔτι ὑπ' ᾿Αθηναίων πόλις, the citadel is still called "city" by the Athenians, T.2,15. So when it has a possessive pronoun; as οὖτος ἐμὸς ἐταῖρος ἡν, he was my companion, P.Ap.21\*.

But when the predicate refers definitely to distinct persons or things, it may have the article; as εἰσὶ δ' ούτοι οἱ εἰδότες τάληθές; and are these those (whom I mean) who know the truth? P. H. M. 284.

- 957. N. Βασιλεύς is generally used without the article to designate the king of Persia; as τούτους ἀποπέμπει βασιλεί, he sends these to the King, T.1,128. But the article is sometimes found: compare 1.4,166 and 179. So sometimes μέγας βασιλεύς; as μεγάλου βασιλέως βασίλεια, a palace of the Great King, X. A. 1,28.
- 958. N. The article is often omitted in some familiar expressions of time and place, which are probably older than the Attic use of the article; as  $\tilde{a}\mu\alpha$   $\tilde{\epsilon}\omega$ , at daybreak; νυκτός, by night;  $\tilde{a}\mu\alpha$   $\tilde{\eta}\rho\iota$ , at the opening of spring;  $\tilde{\epsilon}\nu$   $\tilde{a}\gamma\rho\rho\tilde{a}$ , in the market-place; κατ  $\tilde{a}\gamma\rho\nu$ , in the country; κατὰ  $\gamma\tilde{\eta}\nu$ , by land; κατὰ θάλασσαν, by sea;  $\tilde{\epsilon}\kappa$  δεξίας. from the right; etc.

# POSITION OF THE ARTICLE.

- 959. (Attributive Position.) 1. An attributive adjective which qualifies a noun with the article commonly stands between the article and the noun; as  $\delta$   $\sigma \circ \phi \circ \delta \circ d \circ \gamma \circ \phi$ , the wise man;  $\tau \hat{\omega} \nu \mu \epsilon \gamma \hat{\alpha} \lambda \omega \nu \pi \hat{\alpha} \lambda \epsilon \omega \nu$ , of the great cities.
- 2. The noun with the article may be followed by the adjective with the article repeated. The first article is sometimes omitted. In these cases the noun has greater emphasis than in the preceding form (1). E.g.
- 'O ἀνὴρ ὁ σοφός, sometimes ἀνὴρ ὁ σοφός, the wise man (but not ὁ ἀνὴρ σοφός, see 971); αὶ πόλεις αὶ δημοκρατούμεναι, the states which are under democracies; ἄνθρωποι οἱ ἀδικώτατοι, men who are the most unjust; πῶς ἡ ἄκρατος δικαιοσύνη πρὸς ἀδικών τὴν ἄκρατον ἔχει, (the question) how pure justice is related to pure injustice, P. Rp. 545.

- 960. This applies to possessive pronouns and all expressions which have the force of attributive adjectives, when they are preceded by the article (952, 1), and to dependent genitives (except partitives and the genitive of the personal pronoun); as δ ἐμὸς πατήρ, my father; ἡ τὴ μήτηρ, thy mother; ὁ ἐμαυτοῦ πατήρ, my own father (but ὁ πατήρ μου, my father, see 977); οἱ ἐν ἄστει ἄνθρωποι οι ἐν ἄστει, the men in the city; οὐδοὶς τῶν τότε Ἑλλήνων, none of the Greeks of that time, τὸ τῷ ὄντι ψεῦδος, the real falsehood; εἰς τὴν ἐκείνων πόλιν, into their city; οἱ τῶν Θηβαίων στρατηγοί, the generals of the Thebans, ἐν τῆ ἀναβάσει τῆ μετὰ Κύρου, in the upward march with Cyrus, X. A. 5, 1¹. For participles, see 969.
- **961.** N. Two or even three articles may thus stand together; as  $\tau \hat{\alpha} \gamma \hat{\alpha} \rho \tau \hat{\eta} \hat{s} \tau \hat{\omega} \nu \tau \sigma \lambda \lambda \hat{\omega} \nu \psi \nu \chi \hat{\eta} \hat{s} \delta \mu \mu \alpha \tau \alpha$ , the eyes of the soul of the multitude, P. So. 254.
- 962. An adjective in either of these positions with reference to the article (959) is said to be in the attributive position, as opposed to the predicate position (see 971).
- 963. N. Of the three attributive positions, the first (e.g. ὁ σοφὸς ἀνήρ) is the most common and the most simple and natural; the second (ὁ ἀνὴρ ὁ σοφός) is the most formal; the third (ἀνὴρ ὁ σοφός) is the least common.
- **964.** N. The article at the heginning of a clause may be separated from its noun by  $\mu \acute{\epsilon} \nu$ ,  $\delta \acute{\epsilon}$ ,  $\tau \acute{\epsilon}$ ,  $\gamma \acute{\epsilon} \rho$ ,  $\delta \acute{\eta}$ , où $\nu$ , and by  $\tau \wr \varsigma$  in Herodotus.
- **965.** The partitive genitive (1088) rarely stands in either of the attributive positions (962), but either precedes or follows the governing noun and its article; as οἱ κακοὶ τῶν πολιτῶν, οι τῶν πολιτῶν οἱ κακοἱ, the bad among the citizens (rarely οἱ τῶν πολιτῶν κακοί).

Even the other forms of the adnominal genitive occasionally have this position, as διὰ τὸν δλεθρον τῶν συστρατιωτῶν ὀργιζόμενοι, angered by the death of their fellow soldiers, X.A.1,226.

- **966.** 1. O āllos in the singular generally means the rest, seldom the other; of āllo means the others: as  $\hat{\eta}$  āllo  $\hat{\eta}$   $\hat{\eta}$  allow, the rest of the state (but āllo  $\hat{\eta}$   $\hat{\eta}$  allows, another state); of āllo Ellows, the other Greeks.
- 2. Both δ ἄλλος and ἄλλος (rarely ἔτερος) may have the meaning of besides; as εὐδιμονιζόμενος ὑπὸ τῶν πολιτῶν καὶ τῶν ἄλλων ξένων, congratulated by the citizens and the foreigners besides, P.G. 473°; οὐ γὰρ ἡν χορτὸς οὐδὲ ἄλλο οὐδὲν δένδρον, for there was no grass, neither any tree (lit. nor any other tree), X. A. 1. 5.6.

- **967.** N. Holós with the article generally (though not always) means the greater part, especially in of  $\pi o \lambda \lambda o i$ , the multitude, the majority, and  $\tau o \pi o \lambda o i$ , the greater part. So of  $\pi \lambda \epsilon i o \tau o v$ , the majority,  $\tau o \pi \lambda \epsilon i o v$ , the greater part, of  $\pi \lambda \epsilon i o \tau o v$ , the greatest number or part.
- 968. N. When a noun has two or more qualifying words, each of them may take an article and stand in either attributive position (959), or all may stand between one article and its noun; as κατὰ τὴν ᾿Αττικὴν τὴν παλαιὰν φωνήν, according to the old Attic dialect, P. Crat. 398d; τὰ τείχη τὰ ἐαντῶν τὰ μακρά, their own long walls, Τ. 1, 108; πέμποιτες εἰς τὰς ἄλλης ᾿Αρκαδικὰς πόλεις, sending to the other Arcadian cities, X. H. 7, 48%; τὴν ὑπ ᾿Αρετῆς Ἡρακλέους παίδευσιν, the instruction of Hercules by Virtue, X. M. 2, 184. Occasionally one stands between the article and the noun, while another follows the noun without an article; as οἱ ἀπὸ τῶν ἐν τῆ ᾿Ασία πόλεων Ἑλληνίδων, those (coming) from the Greek cities in Asia, X. H. 4, 315.
- 970. N. The Greeks commonly said the Euphrates river, τὸν Εὐφράτην ποταμόν, etc., rather than the river Euphrates. So sometimes with names of mountains (rarely with those of cities or islands).
- 971. (Predicate Position.) When an adjective either precedes the article, or follows the noun without taking an article, it is always a predicate adjective (see 919). E.g.
- 'Ο ανήρ σοφός or σοφός ὁ ανήρ (sc. ἐστίν), the man is wise, or wise is the man; πολλοὶ οἱ πανοῦργοι, many are the enil-doers; ἐφημέρους γε τὰς τύχας κεκτήμεθα, we possess our fortunes for a day (sc. οὕσας), Gnom.
- 972. N. The predicate force of such adjectives must often be expressed by a periphrasis; as  $\pi \tau \eta \nu \lambda s$  διώκεις τὰς ἐλπίδας, the hopes you are pursuing are winged, lit. you are pursuing hopes (being) winged, E.frag.273; ἡγούμενοι αὐτονόμων τῶν ξυμμάχων, being leaders of allies who were independent, T.1,97; ψιλὴν ἔχων τὴν κεφαλήν, having his head bare, X. A.1,8°. So πόσον ἄγει τὸ στράτευμα; how great is the army he is bringing?

- 973. The position of such an adjective (971) with reference to the article is called the predicate position.
- 974. A noun qualified by a demonstrative pronoun regularly takes the article, and the pronoun stands in the predicate position (971). E.g.

Οὖτος ὁ ἀνήρ, this man, οι ὁ ἀνηρ οὖτος (never ὁ οὖτος ἀνήρ). Περὶ τούτων τῶν πῶλεων, about these cities. (See 945, 1-3.)

- 975. N. But if an adjective or other qualifying word is added, the demonstrative may stand between this and its noun; as ή στενη αυτη δδός, this narrow road, X.A.4,26; τῷ ἀφικομένω τούτω ξένω, to this stranger who has come, P.Pr.313b. (See 977, 2.)
- 976. N. Έκαστος, ἐκάτερος, ἄμφω, and ἀμφύτερος have the predicate position like a demonstrative, as ἐκάστη ἡ ἡμέρα, each day; but with ἔκαστος the article may be omitted. Τοιοῦτος, τοιόσδε, τοσόσδε and τηλικοῦτος, when they take the article, have the first attributive position (959, 1).
- 977. 1. A dependent genitive of the personal pronoun (whether partitive or not) has the predicate position (971), while that of other pronouns (unless it is partitive) has the first attributive position (959, 1); as ἡμῶν ἡ πόλις οτ ἡ πόλις ἡμῶν, our city (not ἡ ἡμῶν πόλις); ἡ τούτων πόλις, these men's city (not ἡ πόλις τούτων); μετεπέμψατο 'Αστυάγης τὴν ἐαυτοῦ θυγατέρα καὶ τὸν παίδα αὐτῆς, Astyages sent for his own daughter and her son, X. C.1,31.
- 2. But if a qualifying word is added, the personal pronoun may stand between this and the noun; as ή δοκοῦσα ἡμῶν πρότερον σωφροσύνη, what previously seemed to be our modesty, T.1,32. (See 975.)
- 978. 1. The adjectives ἄκρος, μέσος, and ἔσχατος, when they are in the predicate position (971), mean the top (or extremity), the middle, the last, of the thing which their nouns denote; as ἡ ἀγορὰ μέση οr μέση ἡ ἀγορὰ, the middle of the market (while ἡ μέση ἀγορὰ would mean the middle market); ἄκρα ἡ χείρ, the extremity of the hand.
- 2. When no article is used, as in the older poetry, the context must decide the meaning. Compare summus, medius, extremus, and ultimus in Latin.
- 979. Has and  $\sigma \dot{\nu} \mu \pi a s$ , all, and olos, whole, generally have the predicate position; as  $\pi \dot{a} \nu \tau \epsilon s$  of  $\ddot{a} \nu \delta \rho \epsilon s$  or of  $\ddot{a} \nu \delta \rho \epsilon s$   $\pi \dot{a} \nu \tau \epsilon s$ , all the men; old  $\ddot{\eta}$   $\pi \dot{\alpha} \lambda \iota s$  or  $\ddot{\eta}$   $\pi \dot{\alpha} \lambda \iota s$  old, all the city. But they can also be used like attributive adjectives, preceded by the article; as  $\ddot{\eta}$   $\pi \ddot{\alpha} \alpha a$   $\Delta \iota \kappa \epsilon \lambda \dot{\alpha} a$ , the whole of Sicily.  $\tau \dot{\alpha}$  old  $\gamma \dot{\alpha} \nu s$ , the entire race.

The distinction here was probably no greater than that between all the city and the whole city in English. We find even of  $\pi$ áντες ἄνθρωποι, all mankind, X.A.5,6.

980. Aὐτός as an intensive pronoun, ipse (989, 1), has the predicate position; as aὐτὸς ὁ ἀνήρ, the man himself. But ὁ aὐτὸς ἀνήρ, the same man (989, 2).

#### PRONOMINAL ARTICLE IN ATTIC GREEK.

981. In Attic prose the article retains its original demonstrative force chiefly in the expression  $\delta \mu \delta \nu \ldots \delta \delta \delta$ , the one  $\ldots$  the other. E.g.

Οἱ μὲν αὐτῶν ἐτόξευον, οἱ δ' ἐσφενδόνων, some of them shot with bows, and others used slings, X. A. 3, 3<sup>τ</sup>. Δεῖ τοὺς μὲν εἶναι δυστυχεῖς, τοὺς δ' εὐτυχεῖς, some must be imfortunate, and others fortunate, E. frag. 207. Τῶν πόλεων αἱ μὲν τυραννοῦνται, αἱ δὲ δημοκρατοῦνται, αἱ δὲ ἀριστοκρατοῦνται, some states are governed by tyrants, others by democracies, and others by aristocracies, P. Rp. 3364.

- 982. N. The neuter  $\tau \delta \mu \epsilon \nu \dots \tau \delta \delta \epsilon$  may be used adverbially, partly ... partly. For  $\tau \delta \tau \delta \epsilon \nu \dots \tau \delta \tau \delta \epsilon$  in this sense, see 1010.
- 983. N. (a) 'O δέ etc. sometimes mean and he, but he, etc., even when no δ μέν precedes; as 'Ινάρως 'Αθηναίους ἐπηγάγετο · οἱ δὲ ἢλθον, Inaros called in Athenians; and they came, T.1, 104.
- (b) With prepositions these expressions are generally inverted; as πολλὰ μὲν . . . ἐν δὲ τοῖς, P. Eu. 303°; παρὰ μὲν τοῦ ξύλα, παρὰ δὲ τοῦ σίδηρος, X. Rp. A. 2, 11.
- 984. A few other relics of the demonstrative meaning of the article are found in Attic, chiefly the following:—

Tor καὶ τόν, this man and that; τὸ καὶ τό, this and that; τὰ καὶ τά, these and those; as ἔδει γὰρ τὸ καὶ τὸ ποιῆσαι, καὶ τὸ μὴ ποιῆσαι, for we ought to have done this thing and that, and not to have done the other, D.9,68.

Πρὸ τοῦ (or προτοῦ), before this, formerly.

Kaì τόν or καὶ τήν, before an infinitive; as καὶ τὸν κελεθσαι δοθναι (sc. λέγεται), and (it is said) he commanded him to give it, X. C. 1, 39.

So occasionally  $\tau \hat{\omega}$ , therefore, which is common in Homer.

<sup>&</sup>lt;sup>1</sup> In this use, and in other pronominal uses of the article (as in Homer), the forms  $\delta$ ,  $\dot{\eta}$ , oi, and  $\alpha i$  were probably exytone  $(\delta, \ddot{\eta}, oi, ai)$ . They are printed here without accents in conformity with the prevailing usage in school editions of Greek authors. See 139.

## PRONOUNS.

#### PERSONAL AND INTENSIVE PRONOUNS.

- 985. The nominatives of the personal pronouns are seldom used, except for emphasis. (See 896.)
- **986.** The forms  $\dot{\epsilon}\mu\hat{o\nu}$ ,  $\dot{\epsilon}\mu\hat{o\iota}$ , and  $\dot{\epsilon}\mu\dot{\epsilon}$  are more emphatic than the enclities  $\mu\hat{o\nu}$ ,  $\mu\hat{o\iota}$ ,  $\mu\dot{\epsilon}$ . The latter seldom occur after prepositions, except in  $\pi\hat{\rho}\hat{o}$ s  $\mu\epsilon$ .
- 987. Of the personal pronouns of the third person, ot, ot, etc. (389), only of and the plural forms in  $\sigma\phi$  are used in Attic prose. There they are generally indirect reflexives, that is, in a dependent clause (or joined with an infinitive or participle in the leading clause) referring to the subject of the leading verb. E.q.

"Ελεξαν ὅτι πέμψειε σφᾶς ὁ Ἰνδῶν βασιλεύς, they said that the king of the Indians had sent them, X. C. 2, 41. Ἐπρεσβεύοντο ἐγκλήματα ποιούμενοι, ὅπως σφίσιν ὅτι μεγίστη πρόφασις εἴη τοῦ πολεμεῖν, they sent embassies, making charges, that they might have the strongest possible ground for war, Τ. 1, 126. Ἐνταῦθα λέγεται Απόλλων ἐκδεῖραι Μαρσύαν νικήσας ἐρίζοντά οἱ περὶ σοφίας, here Αροllo is said to have flayed Marsyas, having beaten him in a contest (with himself, οἱ) in skill, X. A. 1, 28.

For the restricted use of these pronouns in Attic Greek, see also 392.

988. In Homer and Herodotus, and when they occur in the Attic poets, all these pronouns are generally personal pronouns, though sometimes (direct or indirect) reflexives.

E.g.

Έκ γάρ σφεων φρένας είλετο Παλλάς 'Αθήνη, for Pallus Athena bereft them of their senses, Il.18,311; τον κριὸν ἀπὸ ἔο (144, 4) πέμπε θήραζε, he sent the ram forth from himself through the door, Od.9,461. Αἰπίκα δε οἱ εῦδοντι ἐπέστη ὅνειρος, and soon a dream came to him in his sleep, Hd.1,34; οὐδαμοῖσι τῶν νῦν σφεας περιοκεόντων εἰσὶ ὁμόγλωσσοι, they have the same speech with none of their present neighbors, Ild.1,57. Τίνι τρόπω θανεῖν σφε φῆς; in what manner do you say she died? S. Tr.878.

- 989. Αὐτός has three uses:—
- 1. In all its cases it may be an intensive adjective pronoun, himself, herself, itself, themselves (like ipse). E.g.

A vròs o στρατηγός, the general himself; èn' α vroîs τοις αίγια-λοις, on the very coasts, T.1,7; επιστήμη α vrή, knowledge itself.

2. Αὐτός in all its cases, when preceded by the article, means the same (idem). E.a.

'Ο αὐτὸς ἀνήρ, the same man; τὸν αὐτὸν πόλεμον, the same war; τωτά, the same things (42).

3. The oblique cases of abtos are the ordinary personal pronouns of the third person, him, her, it, them. E.g.

Στρατηγὸν αὐτὸν ἀπέδειξε, he designated him as general. See four other examples in X.A.1,1,2&3.

It will be noticed that the nominative of acros is never a personal pronoun.

For  $\sigma\phi\dot{\epsilon}$ ,  $\sigma\phi\dot{\nu}$ ,  $\nu\dot{\nu}$ , and  $\mu\dot{\nu}$ , see 394 and 395.

- 990. N. A pronoun with which αὐτός intensive agrees is often omitted; as ταῦτα ἐποιεῖτε αὐτοί (sc. ὑμεῖς), you did this yourselves; πλευστέον εἰς ταύτας αὐτοῖς ἐμβῶσιν (sc. ὑμῖν), you must sail, embarking on these yourselves (in person), D.4,16. So αὐτὸς ἔφη (ipse dixit), himself (the master) said it.
- 991. N. Aὐτός with an ordinal numeral (372) may designate a person as the chief of a given number; as ήρέθη πρεσβευτής δέκατος αὐτός, he was chosen ambassador as the chief of ten (himself the tenth), X. H.2, 217.
- 992. N. The oblique cases of αὐτός are often used where the indirect reflexives (987) might stand, and sometimes even where the direct reflexives (993) would be allowed; as ἀπλῶς τὴν ἐαυτοῦ γνώμην ἀπεφαίνετο Σωκράτης πρὸς τοὺς ὁμιλοῦντας αὐτῷ, Socrates used to declare his own opinion plainly to those who conversed with him, X. M. 4,71, where οἱ might have been used; but in 1,23, we have ἐλπίζειν ἐποίει τοὺς συνδιατρίβοντας ἐαυτῷ. The union of an intensive and a personal pronoun in αὐτός explains this freedom of usage.

# REFLEXIVE PRONOUNS.

993. The reflexive pronouns (401) refer to the subject of the clause in which they stand. Sometimes in a dependent clause they refer to the subject of the leading verb,—that is, they are indirect reflexives (987). E.g.

Γνωθι σαυτόν, know thyself; ἐπέσφαξεν ἐαυτόν, he slew himself. Δίδωμί σοι ἐμαυτὸν δοῦλον, I give myself to you as a slave, X. C. 4,62. Οἱ ἡττώμενοι ἐαυτούς τε καὶ τὰ ἐαυτῶν πάντα ἀποβάλλουσιν, the vanquished lose both themselves and all that belongs to

- them, X. C.3, 345. Επεισεν 'Αθηναίους εαυτ ον κατάγειν, he persuaded the Athenians to restore him (from exile), T.1, 111.
- **994.** N. Occasionally a reflexive refers to some emphatic word which is neither the leading nor a dependent subject; as  $d\pi \delta$   $\sigma a v \tau o \hat{v}$  'y\u00e9  $\sigma \epsilon \delta v \delta a \xi \omega$ , I will teach you from your own case (from yourself), Ar. N.385. In fact, these pronouns correspond almost exactly in their use to the English reflexives, myself, thyself, himself, etc.
- 995. N. The third person of the reflexive is sometimes used for the first or second; as δει ήμις ερέσθαι εαυτούς, we must ask ourselves, P. Ph. 78b.
- **996.** N. The reflexive is sometimes used for the reciprocal (404);  $\eta \mu \hat{\imath} \nu \alpha \hat{\imath} \tau \alpha \hat{\imath}_{S} \delta \omega \lambda \delta \dot{\iota} \epsilon \dot{\iota} \omega \dot{\iota}_{S}$ , we will discourse with one another (i.e. among ourselves), D.48,6.
- 997. N. A reflexive may be strengthened by a preceding αὐτός; as οἶος τε αὐτὸς αὐτῷ βοηθεῖν, able (himself) to help himself, P. G. 483<sup>h</sup>. Τὸ γιγνώσκειν αὐτὸν ἐαυτόν, for one (himself) to know himself, P. Ch. 165<sup>h</sup>.

For the personal pronouns ov, ot, etc. as direct and indirect reflexives, see 987 and 988.

## POSSESSIVE PRONOUNS.

- 998. 1. The possessive pronouns (406) are generally equivalent to the possessive genitive (1085, 1) of the personal pronouns. Thus  $\delta$   $\delta \delta \delta \kappa$   $\pi a \tau \eta \rho = \delta \kappa a \tau \eta \rho \sigma \sigma v$ , your father.
  - For the article with possessives, see 946, 1.
- 2. For  $\dot{\epsilon}\mu\dot{o}s$  and  $\dot{\sigma}o\dot{s}$  here the enclitic forms  $\mu\dot{o}v$  (not  $\dot{\epsilon}\mu\dot{o}v$ ) and  $\dot{\sigma}o\dot{v}$  may be used;  $\dot{\eta}\mu\dot{\omega}\nu$  and  $\dot{v}\mu\dot{\omega}\nu$  for  $\dot{\eta}\mu\dot{\epsilon}\tau\dot{\epsilon}\rho\sigma$ s and  $\dot{v}\mu\dot{\epsilon}\tau\dot{\epsilon}\rho\sigma$ s are less frequent. These genitives have the predicate position as regards the article (971).
- **999.** The possessive is occasionally equivalent to the objective genitive of the personal pronoun; as  $\hat{\eta} \in \mu \hat{\eta} \in \nu$  which commonly means my good-will (towards others), rarely means good-will (shown) to me; as  $\hat{\epsilon} \nu \nu \hat{\nu} \hat{\alpha} \hat{\gamma} \hat{\alpha} \hat{\rho} \in \nu \hat{\alpha} \hat{\gamma} \hat{\alpha} \hat{\gamma} \hat{\beta}$ , for I shall speak out of good-will to you, P. G. 486\* (See 1085, 3.)
- 1000. N. Σφέτερος, their, and (poetic) őς, his, her, its, are regularly (directly or indirectly) reflexive.
- 1001. N. An adjective or an appositive in the genitive may refer to the genitive implied in a possessive; as τάμα δυστήνου

κακά, the woes of me, unhappy one, S.O.C.344; την υμετέραν των σοφιστων τέχνην, the art of you Sophists, P. H. M. 2814. See 913.

- 1002. N. By the possessive pronouns and the possessive genitive, the words my father can be expressed in Greek in five forms:  $\delta$   $\dot{\epsilon}\mu\dot{\delta}s$   $\pi\alpha\tau\dot{\eta}\rho$ ,  $\dot{\delta}$   $\pi\alpha\tau\dot{\eta}\rho$   $\dot{\delta}$   $\dot{\epsilon}\mu\dot{\delta}s$ ,  $\pi\alpha\tau\dot{\eta}\rho$   $\dot{\delta}$   $\dot{\epsilon}\mu\dot{\delta}s$ ,  $\dot{\delta}$   $\pi\alpha\tau\dot{\eta}\rho$   $\mu$ ou, and (after another word)  $\mu$ ou  $\dot{\delta}$   $\pi\alpha\tau\dot{\eta}\rho$  (as  $\dot{\epsilon}\phi\eta$   $\mu$ ou  $\dot{\delta}$   $\pi\alpha\tau\dot{\eta}\rho$ ). So  $\dot{\delta}$   $\sigma\dot{\delta}s$   $\pi\alpha\tau\dot{\eta}\rho$ , etc.
- 1003. N. (a) Our own, your own (plural), and their own are generally expressed by ἡμέτερος, ὑμέτερος, and σφέτερος, with αὐτῶν (989, 1) strengthening the ἡμῶν, ὑμῶν, οι σφῶν implied in the possessive; as τὸν ἡμέτερον αὐτῶν πατέρα, our own father; τῆ ὑμετέρα αὐτῶν μητρί, to your own mother; τοὺς σφετέρους αὐτῶν παΐδας, their own children. For the third person plural ἐαυτῶν can be used; as τοὺς ἐαυτῶν παΐδας (also σφῶν αὐτῶν παΐδας, without the article); but we seldom find ἡμῶν (οι ὑμῶν) αὐτῶν.
- (b) Expressions like τον ξμον αὐτοῦ πατέρα for τον ξμαυτοῦ πατέρα, etc., with singular possessives, are poetic. In prose the genitive of the reflexive (ξμαυτοῦ, σεαυτοῦ, οι ξαυτοῦ), in the attributive position (959), is the regular form; as μετεπέμψατο τὴν ξαυτοῦ θυγατέρα, he sent for his (own) daughter, X. C.1, 31.

# DEMONSTRATIVE PRONOUNS.

- 1004. Ovros and  $\delta\delta\epsilon$ , this, generally refer to what is near in place, time, or thought;  $\epsilon\kappa\epsilon\hat{\imath}\nu\sigma$ , that, refers to what is more remote.
- 1005. N. The distinction between οὖτος and ὄδε, both of which correspond to our this, must be learned by practice. In the historians, οὖτος (with τοιοῦτος, τοσοῦτος, and οὖτως) frequently refers to a speech just made, while ὄδε (with τοιόσδε, τοσόσδε, and ὧδε) refers to one about to be made; as τάδε εἶπεν, he spoke as follows, but ταῦτα εἶπεν, thus he spoke (said after the speech): see T.1,72 and 79, 85, and 87. But elsewhere οὖτος (especially in the neuter) often refers to something that follows; as ῥαρον γὰρ το ὑτ ων προειρημένων μαθήσει, for you will more easily understand it when this (the following) is premised, P. Rp. 510<sup>b</sup>.
- 1006. N. Οὖτος is sometimes exclamatory, as οὖτος, τί ποιεῖς; You there! what are you doing? A.R.198.
- 1007. N. The Greek has no word exactly corresponding to the unemphatic demonstrative which is often used in English as the antecedent of a relative, as I saw those who were present. Here a participle with the article is generally used; as είδον τοὺς παρόντας;

if a demonstrative is used (είδον τούτους οι παρησαν, I saw these men who were present), it has special emphasis (1030). A relative with omitted antecedent sometimes expresses the sense required; as είδον ους έλαβεν, I saw (those) whom he took (1026).

- 1008. N. The demonstratives, especially  $\delta\delta\epsilon$ , may call attention to the presence or approach of an object, in the sense of here or there;  $\delta\delta\epsilon$  yap  $\delta\eta$   $\beta a\sigma i\lambda\epsilon v$   $\chi \omega \rho as$ , for here now is the king of the land, S. An. 155; for  $i\eta\epsilon s$   $i\kappa\epsilon ival$  (T.1,51) see 945, 2.
- 1009. N. Οὖτος sometimes repeats a preceding description for emphasis in a single word; as δ γὰρ τὸ σπέρμα παρασχών, οὖτος τῶν ψύντων αἴτιος, for he who supplied the seed—that man is responsible for the harvest, D.18, 159.
- 1010. Ν. Τοῦτο μέν . . . τοῦτο δέ, first . . . secondly, partly . . . partly, is used nearly in the sense of τὸ μέν . . . τὸ δέ (982), especially by Herodotus.

For ούτοσί, όδί, ἐκεινοσί, ούτωσί, ώδί, etc., see 412.

#### INTERROGATIVE PRONOUN.

- 1011. The interrogative  $\tau(s)$ ; who? what? may be either substantive or adjective; as  $\tau(vas)$   $\epsilon(\delta ov)$ ; whom did I see? or  $\tau(vas)$  and  $\delta(as)$  and  $\delta(as)$  what men did  $\delta(as)$ ?
- 1012. Τίς may be used both in direct and in indirect questions; as τί βούλεται; what does he want? ἐρωτῷ τί βούλεσθε, he asks what you want.
- 1013. N. In indirect questions, however, the relative ὅστις is more common; as ἐρωτᾶ ὅ τι βούλεσθε (1600).
- 1014. N. The same principles apply to the pronominal adjectives  $\pi \delta \sigma \sigma s$ ,  $\pi \delta \tilde{\sigma} \sigma s$ , etc. (429).

#### INDEFINITE PRONOUN.

- 1015. 1. The indefinite τès (enclitic) generally means some, any, and may be either substantive or adjective; as τοῦτο λέγει τις, some one says this; ἄνθρωπός τις, some man.
- 2. It is sometimes nearly equivalent to the English a or an; as  $\epsilon i\delta o\nu \ \ \ddot{a}\nu\theta\rho\omega\pi\dot{o}\nu \ \tau\iota\nu a$ , I saw a certain man, or I saw a man.
  - 1016. N. Tis sometimes implies that the word to which it is

joined is not to be taken in its strict meaning; as κλέπτης τις ἀναπέφανται, he has been shown up as a sort of thief, P. Rp. 334°; μέγας τις, rather large; τριάκοντά τινας ἀπέκτειναν, they killed some thirty, T. 8, 73.

So with the adverbial τὶ (1060); as σχέδον τι, very nearly, T.3,68.

- 1017. N. Occasionally τis means every one, like πôs τις; as εὖ μέν τις δόρυ θηξάσθω, let every one sharpen well his spear, Il. 2, 382.
- 1018. N. The neuter τ may mean something important; as στονταί τι είναι, όντες ούδενὸς ἄξιοι, they think they are something, when they are worth nothing, P. Ap. 41°.

#### RELATIVE PRONOUNS.

1019. A relative agrees with its antecedent in gender and number; but its case depends on the construction of the clause in which it stands. E.g.

Είδον τοὺς ἄνδρας οι ήλθον, I saw the men who came; οι ἄνδρες οῦς είδες ἀπήλθον, the men whom you saw went away.

- 1020. N. The relative follows the person of the antecedent; as  $\delta \mu \epsilon i s$  or  $\tau o i \tau o \pi o \iota \epsilon i \tau \epsilon$ , you who do this;  $\epsilon \gamma \omega$  os  $\tau o i \tau o \epsilon \pi o i \eta \sigma a$ , I who did this.
- 1021. N. (a) A relative referring to several antecedents follows the rule given for predicate adjectives (924); as  $\pi \epsilon \rho \hat{i} \pi \sigma \lambda \hat{\epsilon} \mu \rho \nu \kappa \alpha \hat{i}$  εἰρήνης, à μεγίστην ἔχει δύναμιν ἐν τῷ βίω τῶν ἀνθρώπων, about war and peace, which have the greatest power in the life of men, I.8,2; ἀπαλλαγέντες πολέμων καὶ κινδύνων καὶ ταραχῆς, εἰς ἡ ν νῦν πρὸς ἀλλήλους καθέσταμεν, freed from wars, dangers, and confusion, in which we are now involved with one another, I.8, 20.
- (b) The relative may be plural if it refers to a collective noun (900); as πλήθει οἶπερ δικάσουσιν, to the multitude who are to judge, P. Philr. 260°.
- (c) On the other hand, ὅστις, whoever, may have a plural antecedent; as πάντα ὅ τι βούλονται, everything, whatsoever they want.
- 1022. N. A neuter relative may refer to a masculine or feminine antecedent denoting a thing; as διὰ τὴν πλεονεξίαν. ὁ πᾶσα φύσις διώκειν πέφυκεν, for gain, which every nature naturally follows, P. Rp. 359°. (Sec 925.)
- 1023. 1. In Homer the forms of the relative are sometimes used as demonstrative pronouns, like the article (935); as δς γὰρ δεύτατος ἡλθεν, for he came second, Od.1,286; δ γὰρ γέρας ἐστὶ θανόντων, for this is the right of the dead, Il.23, 9.

- 2. A few similar expressions occur in Attic prose, especially the Platonic  $\tilde{\eta}$   $\delta$   $\tilde{o}$ s, said he (where  $\tilde{\eta}$  is imperfect of  $\tilde{\eta}\mu$ i, say). So kai  $\tilde{o}$ s, and he, kai  $\tilde{o}$ i, and they, and (in Ildt.)  $\tilde{o}$ s kai  $\tilde{o}$ s, this man and that. (Compare  $\tau$ or kai  $\tau$ or, 984.) So also  $\tilde{o}$ s  $\mu$ er...  $\tilde{o}$ s  $\tilde{o}$ s, in the oblique cases, are occasionally used tor  $\tilde{o}$   $\mu$ er...  $\tilde{o}$   $\tilde{o}$ s; as  $\pi$ ore  $\tilde{o}$ tess  $\tilde{o}$ s  $\tilde{$
- 1024. N. (a) In the epic and lyric poets  $\tau \epsilon$  is often appended to relative words without affecting their meaning; as our dies  $\tilde{\alpha}$   $\tau \epsilon$   $\phi \eta \sigma \iota \theta \epsilon \dot{\alpha}$ ; dost thou not hear what the Goddess says? II.15,130. Sometimes it seems to make the relative more indefinite, like  $\tau \iota s$  in  $\delta \sigma \tau \iota s$ , whoever, quicumque.
- (b) But olós  $\tau\epsilon$  in Attic Greek means able, capable, like δυνατόs, being originally elliptical for  $\tau$ οιοῦτος olos, such as,  $\tau\epsilon$  having no apparent force.
- 1025. (Preposition omitted.) When the relative and its antecedent would properly have the same preposition, it is usually expressed only with the antecedent; as  $d\pi\dot{v}$   $\tau\dot{\eta}s$   $d\dot{v}\tau\dot{\eta}s$   $d\dot{v}s$   $d\dot{v}\tau\dot{\eta}s$   $d\dot{v}\tau\dot{$

#### OMISSION OF THE ANTECEDENT.

1026. The antecedent of a relative may be omitted when it can easily be supplied from the context, especially if it is indefinite (1426). E.g.

"Ελαβεν ἃ ἐβούλετο, he took what he wanted; ἔπειθεν ὁπόσους ἐδύνατο, he persuaded as many as he could. "A μὴ οἶδα οὐδὲ οἴομαι εἰδέναι, what I do not know I do not even think I know, P. Ap. 21<sup>d</sup>. Έγὼ καὶ ὧν ἐγὼ κρατῶ μενοῦμεν παρὰ σοί, I and those whom I command will remain with you, X.C. 5, 1<sup>26</sup>.

- 1028. N. Most relative adverbs regularly omit the antecedent; as  $\tilde{\eta}\lambda\theta\epsilon\nu$   $\tilde{\sigma}\tau\epsilon$   $\tau \tilde{\sigma}\tilde{\nu}\tau$ 0  $\epsilon \tilde{\iota}\delta\epsilon\nu$ , he came when he saw this (for then, when).
- 1029. N. The following expressions belong here:  $-\epsilon \sigma \tau \iota \nu$  of  $(\bar{\omega}\nu, ois, ois)$ , some (903), more common than the regular  $\epsilon i \sigma i \nu$  oi, sunt qui, there are (those) who;  $\epsilon \sigma \tau \iota \nu$  oitures (especially in questions);  $\epsilon \nu \iota o \iota$  (from  $\epsilon \nu \iota$ ,  $= \epsilon \nu \epsilon \sigma \tau \iota$  or  $\epsilon \nu \epsilon \iota \sigma$ , and oi), some;  $\epsilon \nu \iota o \tau \epsilon$  ( $\epsilon \nu \iota$  and  $\delta \tau \epsilon$ ), sometimes;  $\epsilon \sigma \tau \iota \nu$  ov, somewhere;  $\epsilon \sigma \tau \iota \nu$   $\delta \tau$ , in some way;  $\epsilon \sigma \tau \iota \nu$   $\delta \tau$   $\omega s$ , somehow.
- 1030. N. When a clause containing a relative with omitted antecedent precedes the leading clause, the latter often contains a demonstrative referring back with emphasis to the omitted antecedent; as α ἐβούλετο ταῦτα ἔλαβεν, what he wanted, that he took, entirely different from ταῦτα ᾶ ἐβούλετο ἔλαβεν, he took these (definite) things, which he wanted; α ποιεῖν αἰσχρὸν, ταῦτα νόμιζε μηδὲ λέγειν εἶναι καλόν, what it is base to do, this believe that it is not good even to say, I. 1, 15 (here ταῦτα is not the antecedent of ã, which is indefinite and is not expressed). See 1007.

#### ASSIMILATION AND ATTRACTION.

1031. When a relative would naturally be in the accusative as the object of a verb, it is generally assimilated to the case of its antecedent if this is a genitive or dative. E.g.

Έκ τῶν πόλεων ὧν ἔχει, from the cities which he holds (for åς ἔχει); τοῖς ἀγαθοῖς οῖς ἔχομεν, with the good things which we have (for å ἔχομεν). Αξιοι τῆς ἐλευθερίας ῆς κέκτησθε, worthy of the freedom which you have,  $X.A.1.7^8$ ; εἰ τῷ ἡγεμόνι πιστεύσομεν ῷ åν Κῦρος διδῷ, if we shall trust the guide whom Cyrus may give us,  $X.A.1.7^{30}$ . This assimilation is also called attraction.

1032. N. When an antecedent is omitted which (if expressed) would have been a genitive or dative, the assimilation still takes place; and a preposition which would have belonged to the antecedent passes over to the relative; as ἐδήλωσε τοῦτο οἶς ἔπραττε, he showed this by what he did (like ἐκείνοις ἄ); σὺν οἶς μάλιστα φιλεῖς, with those whom you most love (σὺν ἐκείνοις οὖς), Χ. Α. 1,928; ἀμελήσας ὧν με δεῖ πράττειν, having neglected what (ἐκείνων ἄ) I ought to do, Χ. C. 5, 18; οἷς εὐτυχήκεσαν ἐν Λεύκτροις οὐ μετρίως ἐκέχρηντο, they had not used moderately the successes which they had gained at Leuctra (τοῖς εὐτυχήμασιν α εὐτυχήκεσαν, see 1054), D. 18, 18.

- 1033. N. A relative is seldom assimilated from any other construction than that of the object accusative, or into any other case than the genitive or dative. Yet exceptions occur; as  $\pi a \rho$  w  $\beta o \eta \theta \epsilon \hat{i} s$  our anolyhet  $\chi \acute{a} \rho \nu$ , you will get no thanks from those whom  $(\pi a \rho)$  exerver of s) you help, Aesch. 2, 117. Even the nominative may be assimilated; as  $\beta \lambda \acute{a} \pi \tau \epsilon \sigma \theta a$  if  $\psi$  if  $\psi$  in  $\psi$  is a perfection to be injured by what has been prepared by us (like  $\mathring{a} \pi$  exercise  $\mathring{a}$ ), T.7,67.
- 1034. N. A like assimilation takes place in relative adverbs; as διεκομίζοντο εὐθὺς ὅθεν ὑπεξέθεντο παίδας καὶ γυναῖκας, they immediately brought over their children and women from the places in which they had placed them for safety (where ὅθεν, from which, stands for ἐκεῖθεν οῖ, from the places whither), T.1,89.
- 1035. N. The antecedent occasionally is assimilated to the case of the relative, when this immediately follows; as ξλεγον ὅτι πάντων ὧν δίονται πεπραγότες εἶεν, they said that they had done all things which (πάντα ὧν) they needed, Χ. Η. 1,  $4^2$ . Τὴν οὐσίαν ἡν κατέλιπε οὖ πλείονος ἀξία ἐστὶν ἡ τεττάρων καὶ δέκα ταλάντων, the estate which he left is not worth more than fourteen talents, L. 19, 47. Compare urbem quam statuo vestra est, Verg. Λen. 1, 573. Such expressions involve an anacoluthon.

This inverted assimilation takes place in οὐδεὶς ὅστις οὐ, everybody, in which οὐδείς follows the case of the relative; as οὐδενι ὅτω οὐκ ἀποκρινόμενος (for οὐδείς ἐστιν ὅτω), replying to everybody, 1'. Men. 70°.

- 1036. Ν. A peculiar assimilation occurs in certain expressions with οίος; as χαριζόμενον οίφ σοι ἀνδρί, pleasing a man like you (for τοιούτφ οίος σύ), Χ.  $M.2,9^3$ ; πρὸς ἄνδρας τολμηροὺς οίους καὶ 'Αθηναίους, against bold men like the Athenians, T.7,21.
- 1037. The antecedent is often attracted into the relative clause, and agrees with the relative. E.g.

Mỳ ἀφέλησθε ὑμῶν αὐτῶν ἣν διὰ παντὸς ἀεὶ τοῦ χρόνου δόξαν κέκτησθε καλήν, do not take from yourselves the good reputation which (what good reputation) you have always had through all time (for τὴν καλὴν δόξαν ἣν κέκτησθε), D.20,142: notice the omission of the article, which regularly occurs.

The subject of a verb is rarely thus attracted; as οἴχεται φεύγων ον εἶχες μάρτυρα, the witness whom you had (for ὁ μάρτυς ον εἶχες) has run away, Ar. Pl. 933.

1038. N. This attraction may be joined with assimilation (1031); as ἀμαθέστατοί ἐστε ὧν ἐγὼ οίδα Ἑλλήνων, you are the most

ignorant of the Greeks whom I know (for  $\tau \hat{\omega} v$  E $\lambda \lambda \hat{\eta} \nu \omega v$  ods of  $\delta a$ ), T. 6, 40;  $\dot{\epsilon} \xi$   $\dot{\eta} s$   $\dot{\tau} \dot{\omega}$   $\dot{\tau} \dot{\omega} v$  exceptions, from the wife which he took first, D. 57, 37;  $\dot{\epsilon} \pi o \rho \epsilon \dot{\omega} \epsilon \tau o$  our  $\dot{\eta}$   $\dot{\epsilon} \dot{\tau} \chi \epsilon \dot{\omega} \dot{\omega} \dot{\omega} \epsilon u$ , he marched with the force which he had (for  $\dot{\omega} \dot{v} \tau \dot{\eta} \dot{\omega} \dot{\omega} \dot{\omega} \dot{\omega} \dot{\omega} \dot{\omega} \dot{\omega}$ ), X. II. 4, 1<sup>28</sup>.

#### RELATIVE IN EXCLAMATIONS.

1039. Οἴος, ὅσος, and ὡς are used in exclamations; as ὅσα πράγματα ἔχεις, how much trouble you have! X.C.1,3\*; ὡς ἀστεῖος, how witty!

#### RELATIVE NOT REPEATED.

**1040.** A relative is seldom repeated in a new case in the same sentence, but a personal or demonstrative pronoun commonly takes its place. *E.g.* 

Έκεινοι τοίνυν, οις οὐκ ἐχαρίζονθ οἱ λέγοντες οὐδ ἐφίλουν αὐτοὺς ὅσπερ ὑμᾶς οὐτοι νῦν, those men, then, whom the orators did not try to gratify, and whom they did not love as these now love you (lit. nor did they love them as etc.), D. 3, 24. Here αὐτούς is used to avoid repeating the relative in a new case, οὕς.

1041. N. Sometimes, however, a new case of the relative is understood in the latter part of a sentence; as 'Αριαίος δὲ, δν ἡμεῖς ἡθέλομεν βασιλέα καθιστάναι, καὶ ἐδώκαμεν καὶ ἐλάβομεν πιστά, and Ariaeus, whom we wished to make king, and (to whom) we gave and (from whom) we received pledges, etc., X. A.3, 26.

## THE CASES.

1042. The Greek is descended from a language which had eight cases, — an ablative, a locative, and an instrumental, besides the five found in Greek. The functions of the ablative were absorbed chiefly by the genitive, partly by the dative; those of the instrumental and locative chiefly by the dative.

#### NOMINATIVE AND VOCATIVE.

- 1043. The nominative is used chiefly as the subject of a finite verb (894), or in the predicate after verbs signifying to be, etc. (907).
- 1044. The vocative, with or without &, is used in addressing a person or thing; as & ἄνδρες 'Αθηναῖοι, men of Athens! ἀκούεις, Λίσχίνη; dost thou hear, Aeschines?

1045. N. The nominative is sometimes used in exclamations, and even in other expressions, where the vocative is more common; as ὅμοι ἐγὼ δειλός, Ο wretched me! So ἡ Πρόκνη ἔκβαινέ, Proche, come out! Ar. Av. 665.

223

#### ACCUSATIVE.

1046. The primary purpose of the accusative is to denote the nearer or direct object of a verb, as opposed to the remoter or indirect object denoted by the dative (892). It thus bears the same relation to a verb which the objective genitive (1085, 3) bears to a noun. The object denoted by the accusative may be the external object of the action of a transitive verb, or the internal (cognate) object which is often implied in the meaning of even an intransitive verb. But the accusative has also assumed other functions, as will be seen, which cannot be brought under this or any other single category.

## ACCUSATIVE OF DIRECT (EXTERNAL) OBJECT.

- 1047. The direct object of the action of a transitive verb is put in the accusative; as τοῦτο σώζει ἡμᾶς, this preserves us; ταῦτα ποιοῦμεν, we do these things.
- 1048. N. Many verbs which are transitive in English, and govern the objective case, take either a genitive or a dative in Greek. (See 1099; 1160; 1183.)
- 1050. N. Verbal adjectives and even verbal nouns occasionally take an object accusative instead of the regular objective genitive (1142; 1085, 3), as ἐπιστήμονες ήσαν τὰ προσήκοντα, they were acquainted with what was proper, X. C.3, 39. So τὰ μετέωρα φροντιστής, one who ponders on the things above (like φροντίζων), P. Ap. 186.

## COGNATE ACCUSATIVE (INTERNAL OBJECT).

1051. Any verb whose meaning permits it may take an accusative of kindred signification. This accusative

repeats the idea already contained in the verb, and may follow intransitive as well as transitive verbs. E.g.

Πάσας ήδονας ήδεσθαι, to enjoy all pleasures, P. Phil. 63\*. Εὐτύχησαν τοῦτο τὸ εὐτύχημα, they enjoyed this good fortune, X. A. 6, 3\*. So πεσεῖν πτώματα, to suffer (to fall) falls, A. Pr. 919. Νόσον νοσεῖν οτ νόσον ἀσθενεῖν οτ νόσον κάμνειν, to suffer under a disease; ἀμάρτημα ἀμαρτάνειν, to commit an error (to sin a sin); δουλείαν δουλεύειν, to be subject to slavery; ἀρχὴν ἄρχειν, to hold an office; ἀγῶνα ἀγωνίζεσθαι, to undergo a contest; γραφὴν γράφεσθαι, to bring an indictment; γραφὴν διώκειν, to prosecute an indictment; δίκην ὀφλεῖν, to lose a lawsuit; νίκην νικᾶν, to gain a victory; μάχην νικᾶν, to gain a battle; πομπὴν πέμπειν, to form or conduct a procession; πληγὴν τύπτειν, to strike a blow; ἐξῆλθον ἐξόδους, they went out on expeditions, X. H. 1, 217.

1052. N. It will be seen that this construction is far more extensive in Greek than in English. It includes not only accusatives of kindred formation and meaning, as νίκην νικᾶν, to gain a victory; but also those of merely kindred meaning, as μάχην νικᾶν, to gain a battle. The accusative may also limit the meaning of the verb to one of many applications; as 'Ολύμπια νικᾶν, to gain an Olympic victory, T.1,126; ἐστιᾶν γάμους, to give a wedding feast, At. Av. 132; ψήφισμα νικᾶ, he carries a decree (gains a victory with a decree), Aesch. 3, 68; βοηδρόμια πέμπειν, to celebrate the Boedromia by a procession, D. 3, 31. So also (in poetry) βαίνειν (or ἐλθεῖν) πόδα, to step (the foot): see E. Al. 1153.

. For the cognate accusative becoming the subject of a passive verb, see 1240..

1053. The cognate accusative may follow adjectives or even nouns. E.g.

Κακοὶ πάσαν κακίαν, bad with all badness, P. Rp. 490<sup>d</sup>; δοῦλος τὰς μεγίστας δουλείας, a slave to the direct slavery, ibid. 579<sup>d</sup>.

1054. A neuter adjective sometimes represents a cognate accusative, its noun being implied in the verb. E.g.

Μεγάλα ἀμαρτάνειν (sc. ἀμαρτήματα), to commit great faults; ταὐτὰ λυπεῖσθαι καὶ ταὐτὰ χαίρειν, to have the same griefs and the same joys, D.18,292. So τί χρήσομαι τούτ $\psi$ ; (= τίνα χρείαν χρήσομαι;), what use shall I make of this? and οὐδὲν χρήσομαι τούτ $\psi$ , I shall make no use of this (1183). So χρήσιμος οὐδέν, good for nothing (1053). See 1060.

1055. 1. Here belongs the accusative of effect, which

expresses a result beyond the action of the verb, which is effected by that action. E.g.

Πρεσβεύειν την εἰρήνην, to negotiate a peace (as ambassadors, πρέσβεις), D. 19, 134; but πρεσβεύειν πρεσβείαν, to go on an embassy. Compare the English breaking a hole, as opposed to breaking a stick.

2. So after verbs of looking (in poetry); as  $^*A \rho \eta \delta \epsilon \delta \rho \rho \kappa \epsilon \nu a$ , to look war (Ares) (see A. Se. 53);  $\dot{\eta}$  bound  $\dot{\epsilon} \beta \lambda \epsilon \psi \epsilon \nu \hat{a} \pi \nu$ , the Senate looked mustard, Ar. Eq. 631.

1056. N. For verbs which take a cognate accusative and an ordinary object accusative at the same time, see 1076.

1057. N. Connected with the cognate accusative is that which follows verbs of motion to express the ground over which the motion passes; as ὁδὸν ἰέναι (ἐλθεῖν, πορεύεσθαι, etc.), to go (over) a road; πλεῖν θάλασσαν, to sail the sea; ὅρος καταβαίνειν, to descend a mountain; etc. These verbs thus acquire a transitive meaning.

# ACCUSATIVE OF SPECIFICATION. — ADVERBIAL ACCUSATIVE.

1058. The accusative of specification may be joined with a verb, adjective, noun, or even a whole sentence, to denote a part, character, or quality to which the expression refers. E.g.

Τυφλὸς τὰ ὅμματ' εῖ, you are blind in your eyes, S.O.T.371; καλὸς τὸ εἶδος, beautiful in form; ἄπειροι τὸ πλῆθος, infinite in number; δίκαιος τὸν τρόπον, just in his character; δεινοὶ μάχην, mighty in battle; κάμνω τὴν κεφαλήν, I have a pain in my head; τὰς φρένας ὑγιαίνειν, to be sound in their minds; διαφέρει τὴν φύσιν, he differs in nature. Ποταμὸς, Κύδνος ὅνομα, εὖρος δύο πλέθρων, a river, Cydnus hy name, of two plethra in breadth (922), X.A.1,  $2^{20}$ . Έλληνές εἰσι τὸ γένος, they are Greeks by race. Γένεσθε τὴν διάνοιαν μὴ ἐν τῷ δικαστηρίῳ, ἀλλ' ἐν τῷ θεάτρῳ, imagine yourselves (become in thought) not in court, but in the theatre, Aesch. 3, 153. Ἐπίστασθέ (με) οὐ μόνον τὰ μεγάλα ἀλλὰ καὶ τὰ μικρὰ πειρώμενον ἀεὶ ἀπὸ θεῶν ὑρμᾶσθαι, you know that, not only in great but even in small things, I try to begin with the Gods, X.C.1,  $5^{14}$ .

1059. N. This is sometimes called the accusative by synecdoche, or the limiting accusative. It most frequently denotes a part; but it may refer to any circumstance to which the meaning of the expression is restricted. This construction sometimes resembles that of 1239, with which it must not be confounded.

1060. An accusative in certain expressions has the ferce of an adverb. E.g.

Τοῦτον τὸν τρόπον, in this way, thus; τὴν ταχίστην (sc. ὁδόν), in the quickest way; (τὴν) ἀρχήν, at first (with negative, not at all): τέλος, finally; προῖκα, as a gift, gratis; χάριν, for the sake of, δίκην, in the manner of; τὸ πρῶτον οι πρῶτον, at first; τὸ λοιπόν, for the rest; πάντα, in all things; τἄλλα, in other respects; οὐδέν, in nothing, not at all; τί; in what, why? τὶ, in any respect, at all; ταῦτα, in respect to this, therefore. So τοῦτο μέν... τοῦτο δέ (1010).

1061. N. Several of these (1060) are to be explained by 1058, as τάλλα, τί; why? ταῦτα, τοῦτο (with μέν and δέ), and sometimes οἰδέν and τὶ. Some are to be explained as cognate accusatives (see 1053 and 1054), and some are of doubtful origin.

#### ACCUSATIVE OF EXTENT.

1062. The accusative may denote extent of time or space. E.g.

Αἰ σπονδαὶ ἐνιαντὸν ἔσονται, the truce is to be for a year, Τ.4, 118. Εμεινεν ἡ μέρας πέντε, he remained five days. ᾿Απέχει ἡ Πλάταια τῶν Θηβῶν σταδίους ἐβδομήκοντα, Plataea is seventy stades distant from Thebes, Τ.2,5. ᾿Απέχοντα Συρακουσῶν οὕτε πλοῦν πολὺν οὕτε ὁδόν, (Megara) not a long sail or land-journey distant from Syracuse, Τ.6, 49.

- 1063. N. This accusative with an ordinal number denotes how long since (including the date of the event); as έβδόμην ἡμέραν τῆς θυγατρὸς αὐτῷ τετελευτηκνίας, when his daughter had died six days before (i.e. this being the seventh day), Aesch. 3, 77.
- 1064. N. A peculiar idiom is found in expressions like  $\tau \rho i \tau \sigma v$  etos  $\tau \sigma v \tau i$  (this the third year), i.e. two years ago; as  $a \pi \eta \gamma \gamma i \lambda \theta \eta$   $\Phi i \lambda \iota \pi \pi \sigma s$   $\tau \rho i \tau \sigma v$   $\dot{\eta}$   $\tau \epsilon \tau a \rho \tau \sigma v$   $\dot{\epsilon} \tau \sigma s$   $\tau \sigma v \tau i$  Hraîov  $\tau \epsilon i \chi \sigma s$   $\tau \sigma \lambda \iota \sigma \rho \kappa \hat{\omega} v$ , two or three years ago Philip was reported to be besieving Heraion Teichos, D. 3, 4.

## TERMINAL ACCUSATIVE (POETIC).

1065. In poetry, the accusative without a preposition may denote the place or object towards which motion is directed. E.g.

Μνηστήρας ἀφίκετο, she come to the suitors, Od. 1,332. 'Ανέβη μέγαν οὐρανὸν Οὕλυμπόν τε, she ascended to great heaven and

Olympus, It. 1,497. Το κοίλον \*Αργος βάς φυγάς, going as an exile to the hollow Argos, S. O. C. 378.

In prose a preposition would be used here.

## ACCUSATIVE IN OATHS WITH vij AND µå.

- 1066. The accusative follows the adverbs of swearing  $\nu \eta$  and  $\mu \dot{a}$ , by.
- 1067. An oath introduced by  $\nu\dot{\eta}$  is affirmative; one introduced by  $\mu\dot{a}$  (unless  $\nu a\dot{i}$ , yes, precedes) is negative; as  $\nu\dot{\eta}$   $\tau\dot{o}\nu$   $\Delta\dot{i}a$ , yes, by Zeus;  $\mu\dot{a}$   $\tau\dot{o}\nu$   $\Delta\dot{i}a$ , no, by Zeus; but  $\nu a\dot{i}$ ,  $\mu\dot{a}$   $\Delta\dot{i}a$ , yes, by Zeus.
- 1068. N. Má is sometimes omitted when a negative precedes; as οῦ, τόνδ' "Ολυμπον, no, by this Olympus, S. An. 758.

#### TWO ACCUSATIVES WITH ONE VERB.

1069. Verbs signifying to ask, to demand, to teach, to remind, to clothe or unclothe, to conceal, to deprive, and to take away, may take two object accusatives. E.g.

- Οὐ τοῦτ' ἐρωτῶ σε, I am not asking you this, Ar. N.641; οὐδένα τῆς συνουσίας ἀργύριον πράττει, you demand no fee for your teaching from any one, X. M. 1,  $6^{11}$ ; πύθεν ἤρξατό σε διδάσκειν τὴν στρατηγίαν; with what did he begin to teach you strategy? ibid. 3,  $1^6$ ; τὴν ξυμμαχίαν ἀναμιμνήσκοντες τοὺς 'Αθηναίους, reminding the Athenians of the alliance, T. 6, 6; τὸν μὲν ἐαυτοῦ (χιτῶνα) ἐκεῖνον ἡμφίεσε, he put his own (tunic) on the other boy, X. Cy. 1,  $3^{11}$ ; ἐκδύων ἐμὲ χρηστηρίαν ἐσθῆτα, stripping me of my oracular garb, A. Ay. 1269; τὴν θυγατέρα ἔκρυπτε τὸν θάνατον τοῦ ἀνδρός, he concealed from his daughter her husband's death, L. 32, 7; τούτων τὴν τιμὴν ἀποστερεῖ με, he cheats me out of the price of these, D. 28, 13; τὸν πάντα δ' δλβον ἡμαρ ἔν μ' ἀφείλετο, but one day deprived me of all my happiness, E. Hec. 285.
- 1070. N. In poetry some other verbs have this construction; thus χρόα νίζετο ἄλμην, he washed the dried spray from his skin, Od. 6, 224; so τιμωρείσθαί τινα αίμα, to punish one for blood (shed), see E. Al. 733.
- 1071. N. Verbs of this class sometimes have other constructions. For verbs of depriving and taking away, see 1118. For the accusative and genitive with verbs of reminding, see 1106.
- 1072. N. The accusative of a thing with some of these verbs is really a cognate accusative (1076).

1073. Verbs signifying to do anything to or to say anything of a person or thing take two accusatives. E.g.

Tautí με ποιούσιν, they do these things to me; τί μ' εἰργάσω; what didst thou do to me? Κακὰ πολλὰ ἔοργεν Τρῶας, he has done many evils to the Trojans, Il. 16, 424. Ἐκεῖνόν τε καὶ τοὺς Κορινθίους πολλά τε καὶ κακὰ ἔλεγε, of him and the Corinthians he said much that was bad, Hd. 8, 61; οὐ φροντιστέον τί ἐροῦσιν οἱ πολλοὶ ἡμᾶς, we must not consider what the multitude will say of us, P. Cr. 48.

1074. These verbs often take εὖ or καλῶς, well, or κακῶς, ill, instead of the accusative of a thing; τούτους εὖ ποιεῖ, he does them good; ὑμᾶς κακῶς ποιεῖ, he does you harm; κακῶς ἡμᾶς λέγει, he speaks ill of us.

For εὖ πάσχειν, εὖ ἀκούειν, etc., as passives of these expressions,

see 1241.

- 1075. N. Πράσσω, do, very seldom takes two accusatives in this construction, ποιέω being generally used. Εὖ πράσσω and κακῶς πράσσω are intransitive, meaning to be well off, to be budly off.
- 1076. A transitive verb may have a cognate accusative (1051) and an ordinary object accusative at the same time. E.q.

Μέλητός με εγράψατο τὴν γραφὴν ταίτην, Meletus brought this indictment against me, P. Ap. 19<sup>b</sup>; Μιλτιάδης ὁ τὴν εν Μαραθῶνι μάχην τοὺς βαρβάρους νικήσας, Miltiades, who gained the battle at Marathon over the barbarians, Aesch. 3, 181; ὧρκωσαν πάντας τοὺς στρατιώτας τοὺς μεγίστους ὅρκους, they made all the soldiers swear the strongest oaths, T. 8, 75.

On this principle (1076) verbs of dividing may take two accusatives; as τὸ στράτευμα κατένειμε δώδεκα μέρη, he made twelve divisions of the army, X. C.7, 518.

1077. Verbs signifying to name, to choose or appoint, to make, to think or regard, and the like, may take a predicate accusative besides the object accusative. E.g.

Τί τὴν πόλιν προσαγορεύεις; what do you call the state? Τὴν τοιαύτην δύναμιν ἀνδρείαν ἔγωγε καλῶ, such a power I call courage,  $P.Rp.430^{b}$ . Στρατηγὸν αὐτὸν ἀπέδειξε, he appointed him general,  $X.A.1,1^{2}$ ; εὐεργέτην τὸν Φίλιππον ἡγοῦντο, they thought Philip a benefactor, D.18,43; πάντων δεσπότην έαυτὸν πεποίηκεν, he has made himself master of all,  $X.C.1,3^{18}$ .

1078. This is the active construction corresponding to the passive with copulative verbs (908), in which the object accusative

becomes the subject nominative (1234) and the predicate accusative becomes a predicate nominative (907). Like the latter, it includes also predicate adjectives; as τοὺς συμμάχους προθύμους ποιείσθαι, to make the allies eager; τὰς ἀμιρτίας μεγάλας ἦγεν, he thought the faults great.

- 1079. N. With verbs of naming the infinitive εἶναι may connect the two accusatives; as σοφιστὴν ὀνομάζουσι τὸν ἄνδρα εἶναι, they name the man (to be) a sophist, P. Pr. 311.
- 1080. N. Many other transitive verbs may take a predicate accusative in apposition with the object accusative; as  $\tilde{\epsilon}\lambda\alpha\beta\epsilon$   $\tau o\tilde{\nu}\tau o\delta\hat{\omega}\rho o\nu$ , he took this as a gift;  $7\pi\pi o\nu$ s  $\tilde{\epsilon}\gamma\epsilon\nu$   $\theta\hat{\nu}\mu\alpha$   $\tau\hat{\varphi}$  'H $\lambda(\varphi)$ , to bring horses as an offering to the Sun, X. C.S,  $3^{12}$  (see 916). Especially an interrogative pronoun may be so used; as  $\tau(\nu\alpha)$   $\tau o\hat{\nu}\tau o\nu$   $\tau o\hat{\nu}$   $\tau o\hat{\nu}$  who are these whom I see? lit. I see these, being whom? (See 919; 972.)
- 1081. N. A predicate accusative may denote the effect of the action of the verb upon its direct object; as παιδεύειν τινὰ σοφόν (or κακόν), to train one (to be) wise (or bad); τοὺς υίεις ἱππότας εδίδαξεν, he taught his sons to be horsemen. See 1055.
- 1082. N. For one of two accusatives retained with the passive, see 1239.

For the accusative absolute, see 1569.

#### GENITIVE.

1083. As the chief use of the accusative is to limit the meaning of a verb, so the chief use of the genitive is to limit the meaning of a noun. When the genitive is used as the object of a verb, it seems to depend on the nominal idea which belongs to the verb: thus ἐπιθυμῶ involves ἐπιθυμῶν (as we can say ἐπιθυμῶν ἐπιθυμῶν, 1051); and in ἐπιθυμῶν τούτου, I have a desire for this, the nominal idea preponderates over the verbal. So βασιλεύει τῆς χώρας (1109) involves the idea βασιλεύς ἐστι τῆς χώρας, he is king of the country. The Greek is somewhat arbitrary in deciding when it will allow either idea to preponderate in the construction, and after some verbs it allows both the accusative and the genitive (1108). In the same general sense the genitive follows verbal adjectives. It has also uses which originally belonged to the ablative; for example, with verbs of separation and to express source. (See 1042.)

GENITIVE AFTER NOUNS (ATTRIBUTIVE GENITIVE).

1084. A noun in the genitive may limit the meaning of another noun, to express various relations, most of

which are denoted by of or by the possessive case in English.

- 1085. The genitive thus depending on a noun is called attributive (see 919). Its most important relations are the following:—
- 1. Possession or other close relation: as  $\hat{\eta}$  τοῦ πατρὸς οἰκία, the futher's house;  $\hat{\eta}$ μῶν  $\hat{\eta}$  πατρίς, our country; τὸ τῶν ἀνδρῶν γένος, the lineage of the men. So  $\hat{\eta}$  τοῦ Διός, the daughter of Zeus; τὰ τῶν θεῶν, the things of the Gods (953). The Possessive Genitive.
- 2. The Subject of an action or feeling: as ή τοῦ δήμου εὖνοια, the good-will of the people (i.e. which the people feel). The Subjective Genitive.
- 4. Material or Contents, including that of which anything consists: as βοῶν ἀγέλη, a herd of cattle; ἄλσος ἡμέρων δένδρων, a grove of cultivated trees, Χ.Α.5,3<sup>12</sup>; κρήνη ἡδέος ῦδατος, a spring of fresh water, Χ.Α.6,4<sup>4</sup>; δύο χούνικες ἀλφίτων, two quarts of meal. Genitive of Material.
- 5. Μελκύπε, of space, time, or value: as τριών ήμερων όδός, a journey of three days; δκτω σταδίων τείχος, a wall of eight stades (in length); τριάκοντα ταλάντων οὐσία, an estate of thirty talents; μισθός τεττάρων μηνών, μιμ for four months; πράγματα πολλών ταλάντων, affairs of (i.e. involving) many talents, Ar. N. 472. Genitive of Measure.
- 6. Cause of Origin: μεγάλων άδικημάτων δργή, unger at great offences; γραφη ἀσεβείας, an indictment for implety. The Causal Genitive.
- 7. The Whole, after nouns denoting a part: as πολλοὶ τῶν ἡητόρων, many of the orators; ἀνὴρ τῶν ἐλευθέρων, a man (i.e. one) of the freemen. The Partitive Genitive. (See also 1088.)

These seven classes are not exhaustive; but they will give a general idea of these relations, many of which it is difficult to classify.

- 1086. N. Examples like  $\pi \delta \lambda \iota_5$  "Appois, the city of Argos, Ar. Eq. 813, Tpoints  $\pi \tau \circ \lambda \iota \epsilon \theta points$ , the city of Troy, Od. 1, 2, in which the genitive is used instead of apposition, are poetic.
- 1087. Two genitives denoting different relations may depend on one noun; as ἶππου δρόμου ἡμέρας, within a day's run for a horse, D.19,273; διὰ τὴν τοῦ ἀνέμου ἄπωσιν αὐτῶν ἐς τὸ πέλαγος, by the wind's driving them (the wrecks) out into the sea, T.7,34.
- 1088. (Partitive Genitive.) The partitive genitive (1085, 7) may follow all nouns, pronouns, adjectives (especially superlatives), participles with the article, and adverbs, which denote a part. E.g.
- Oi dynθοί των dνθρώπων, the good among the men; 6 ημισυς τοῦ ἀριθμοῦ, the half of the number; ἄνδρα οίδα τοῦ δήμου, I know a man of the people; rois θρανίταις των ναυτων, to the upper benches of the sailors, T. 6.31: obsers Two maiswy, no one of the children: πάντων των ρητόρων δεινότατος, the most eloquent of all the orators; ο Βουλόμενος και άστων και ξένων, any one who pleases of both citizens and strangers, T.2,31; Sia yuvalkav, divine among women, Od.4. 305; που της γης; ubi terrarum? where on the earth? τίς των πολιτων; who of the citizens? δίς της ημέρας, twice a day; είς τοῦτο avolas, to this pitch of folly: επὶ μέγα δυνάμεως, to a great degree of power, T. 1, 118; έν τούτω παρασκευής, in this state of preparation. "A μεν διώκει τοῦ ψηφίσματος ταῦτ' ἐστίν, the parts of the decree which he prosecutes are these (lit. what parts of the decree he prosecutes, etc.), D.18,56. Ευφημότατ άνθρώπων, in the most plausible way possible (most plausibly of men), 1). 19, 50. "Ore Servéτατος σαυτού ταύτα ήσθα, when you were at the height of your power in these matters, X. M. 1, 246. (Sec 965.)
- 1089. The partitive genitive has the predicate position as regards the article (971), while other attributive genitives (except personal pronouns, 977) have the attributive position (959).

#### GENITIVE AFTER VERBS.

#### PREDICATE GENITIVE.

- 1093. As the attributive genitive (1084) stands in the relation of an attributive adjective to its leading substantive, so a genitive may stand in the relation of a predicate adjective (907) to a verb.
- 1094. Verbs signifying to be or to become and other copulative verbs may have a predicate genitive expressing any of the relations of the attributive genitive (1085). E.g.
- (Possessive.) 'Ο νόμος ἐστὰν οδτος Δράκοντος, this law is Draco's, D.23,51. Πενών φέρειν οὐ παντὸς, ἀλλ' ἀνδρὸς σοφοῦ, to hear poverty is not in the power of every one, but in that of a wise man, Men. Mon. 463. Τοῦ θεῶν νομίζεται (ὁ χῶρος); to what God is the place held sacred! S. O. C. 38.
- 2. (Subjective.) Οξιμα αὐτὸ (τὸ ἡῆμα) Περιάνδρου εἶναι, I think it (the saying) is Periander's, P. Rp. 3364.
- 3. (Objective.) Οὐ τῶν κακυύργων οἶκτος, ἀλλὰ τῆς δίκης, pity is not for evil doers, but for justice, E.frag. 272.
- 4. (Material.) Ερυμα λίθων πεποιημένον, a wall built of stones. T.4,31. Οἱ θεμέλιοι παντοίων λίθων ὑπόκεινται, the foundations are laid (consisting) of all kinds of stones, T.1,93.
- 5. (Measure.) (Τὰ τείχη) σταδίων ἢν ὀκτώ, the walls were eight stades (in length), Τ.4,66. Ἐπειδάν ἐτῶν ἢ τις τριάκοντα, when one is thirty years old, P.Ly.721\*.
- 6. (Origin.) Τοιούτων έστε προγόνων, from such ancestors are you sprung, X. A. 3, 214.
- (Partitive.) Τούτων γενοῦ μοι, become one of these for my sake, Ar. N. 107. Σόλων τῶν ἐπτὰ σοφιστῶν ἐκλήθη, Solon was called one of the Seven Wise Men, 1.15,235.
  - 1095. Verbs signifying to name, to choose or appoint,

to make, to think or regard, and the like, which generally take two accusatives (1077); may take a genitive in place of the predicate accusative. E.g.

Την 'Ασίαν έαυτῶν ποιοῦνται, they make Asia their own, X. Ay. 1,33. Έμὲ θὲς τῶν πεπεισμένων, put me down as (one) of those who are persuaded, P. Rp.  $424^{\circ}$ . (Τοῦτο) της ἡμετέρας ἀμελείας ἄν τις θείη δικαίως, any one might justly regard this as belonging to our neglect, D. 1, 10.

1096. These verbs (1095) in the passive are among the copulative verbs of 907, and they still retain the genitive. See the last example under 1094, 7.

#### GENITIVE EXPRESSING A PART.

1097. 1. Any verb may take a genitive if its action affects the object only in part. E.g.

Πέμπει των Λυδων, he sends some of the Lydians (but πέμπει τους Λυδούς, he sends the Lydians). Πίνει του οίνου, he drinks of the wine. Τῆς γῆς ἔτεμον, they ravaged (some) of the land, Τ.1,30.

2. This principle applies especially to verbs signifying to share (i.e. to give or take a part) or to enjoy. E.y.

Μετείχον τῆς λείας, they shared in the hooty; so often μεταποιείσθαί τινος, to claim a share of anything (cf. 1090); ἀπολαύομεν τῶν ἀγαθῶν, we enjoy the blessings (i.e. our share of them); οὕτως ὅναισθε τούτων, thus may you enjoy these, D.28,20. So οὐ προσήκει μοι τῆς ἀρχῆς, I have no concern in the government; μέτεστί μοι τούτου, I have a share in this (1161).

1098. N. Many of these verbs also take an accusative, when they refer to the whole object. Thus  $\xi \lambda a \chi \epsilon$   $\tau o \nu \tau o \nu$  means he obtained a share of this by lot, but  $\xi \lambda a \chi \epsilon$   $\tau o \nu \tau o$ , he obtained this by lot. Meté $\chi \omega$  and similar verbs may regularly take an accusative like  $\mu \epsilon \rho o s$ , part; as  $\tau \omega \nu$  keu  $\delta \nu \nu \omega \nu$   $\pi \lambda \epsilon i \sigma \tau o \nu$   $\nu \epsilon \rho o s$   $\nu \epsilon o \epsilon v$  will have the greatest share of the dangers, I.6,3 (where  $\mu \epsilon \rho o v s$  would mean that they have only a part of a share). This use of  $\mu \epsilon \rho o s$  shows the nature of the genitive after these verbs.

In συντρίβειν τῆς κεφαλῆς, to bruise his head, and κατεαγέναι τῆς κεφαλῆς, to have his head broken, the genitive is probably partitive. See Ar. Ach. 1180, Pa. 71; 1.18, 52. These verbs take also the accusative.

GENITIVE WITH VARIOUS VERBS.

1099. The genitive follows verbs signifying to take

hold of, to touch, to claim, to aim at, to hit, to attain, to miss, to make trial of, to begin. E.g.

Ἐλάβετο τῆς χειρὸς αὐτοῦ, he took his hand, X. II.4,  $1^{38}$ ;  $\pi v ρ$ ὸς ἔστι θιγόντα μὴ εὐθὺς καίεσθαι, it is possible to touch fire and not be burned immediately, X. C.5,  $1^{16}$ ; τῆς ξυνέσεως μεταποιεῖσθαι, to lay claim to sagacity, T.1, 140; ἤκιστα τῶν ἀλλοτρίων ὁρέγονται, they are least eager for what is another's, X. Sy. 4, 42; οὐδὲ μὴν ἄλλου στοχαζόμενος ἔτυχε τούτου, nor did he aim at another man and hit this one, Λιιι. 2a, 4; τῆς ἀρετῆς ἐφικέσθαι, to attain to virtue, I. 1, 5; δδοῦ εὐπόρου τυχεῖν, to find a passable road, X. II. 6,  $5^{52}$ ; πολλῶν καὶ χαλεπῶν χωρίων ἐπελάβοντο, they took possession of many rough places, ibid.; ταύτης ἀποσφαλέντα τῆς ἐλπίδος, disappointed in this hope, IId. 6, 5; σφαλεὶς τῆς ἀληθείας, having missed the truth, P. Rp.  $451^{\circ}$ ; τὸ ἐψεῦσθαι τῆς ἀληθείας, to be cheated out of the truth, ibid.  $413^{\circ}$ ; πειράσαντες τοῦ χωρίου, having made an attempt on the place, T. 1, 61; εἰκὸς ἄρχειν με λόγου, it is proper that I should speak first, X. C. 6,  $1^{\circ}$ .

- 1100. N. Verbs of taking hold may have an object accusative, with a genitive of the part taken hold of; as ξλαβον της ζώνης τὸν Ορόνταν, they seized Orontas by his girdle, X. A. 1, 610.
- 1101. 1. The poets extend the construction of verbs of taking hold to those of pulling, dragging, leading, and the like; as allow  $\mu \tilde{\epsilon} \nu \chi \lambda a i \nu \eta s \tilde{\epsilon} \rho i \omega v$  allow  $\delta \tilde{\epsilon} \chi \iota \tau \tilde{\omega} \nu \sigma s$ , pulling one by the cloak, another by the tanic, H.22,493;  $\beta \tilde{\omega} \nu \tilde{\epsilon} \gamma i \gamma \nu \kappa \epsilon \rho i \omega v$ , the two led the heifer by the horns, Od.3,439.
- So even in prose: τὰ νήπια ποιδία δίουσι τοῦ ποδὸς σπάρτφ, they tie the infants by the foot with a cord, Hd. 5, 16; μήποτε ἄγειν τῆς ἡνίας τὸν ἴππον, never to lead the horse by the bridle, X. Eq. 6, 9.
- 3. Under this head is usually placed the poetic genitive with verbs of imploring, denoting the part grasped by the suppliant; as ἐμὲ λισσέσκετο γούνων, she implored me by (i.e. clasping) my knees, 11.9,451. The explanation is less simple in λίσσομαι Ζηνὸς 'Ολυμπίου, 1 implore by Olympian Zeus, Od.2,68: compare νῦν δέσε πρὸς πατρὸς γουνάζομαι, and now 1 implore thee by thy father, Od.13,324.
- 1102. The genitive follows verbs signifying to taste, to smell, to hear, to perceive, to comprehend, to remember, to forget, to desire, to care for, to spare, to neglect, to wonder at, to admire, to despise. E.g.

Έλευθερίης γευσώμενοι, having tasted of freedom, Hd. 6,5; κρομμύων δσφραίνομαι, I smell onions, Ar. R. 654; φωνης ακούειν

- μοι δοκῶ, methinks I hear a voice, Ar.Pa.61; αἰσθάνεσθια, μεμνῆσθια, οτ ἐπιλανθάνεσθαι τούτων, to perceive, remember, or forget these; ὅσοι ἀλλήλων ξυνίεσαν, all who comprehended each other's speech, T.1,3 (1104); τούτων τῶν μαθημάτων ἐπιθυμῶ, I long for this learning, X.M.2.630; χρημάτων φείδεσθαι, to be sparing of money, ibid.1,222; τῆς ἀρετῆς ἀμελεῖν, to neglect virtue, I.1,48; εἰ ἄγασαι τοῦ πατρός, if you admire your father, X. C.3,115. Μηδενὸς οῦν ὁλιγωρεῖτε μηδὲ καταφρονεῖτε τῶν προστεταγμένων, do not then neglect or despise any of my injunctions, I.3,48. Τῶν κατηγόρων θανμάζω, I am astonished at my accusers, L.25,1. (For a causal genitive with verbs like θανμάζω, see 1126.)
- 1103. N. Verbs of hearing, learning, etc. may take an accusative of the thing heard etc. and a genitive of the person heard from; as τούτων τοιούτων ἀκούω λόγους, I hear such sayings from these men; πυθέσθαι τοῦτο ἑμῶν, to learn this from you. The genitive here belongs under 1130. A sentence may take the place of the accusative; as τούτων ἄκουε τί λέγουσιν, hear from these what they say. See also ἀποδέχομαι, accept (a statement) from, in the Lexicon.
  - 1104. N. Verbs of understanding, as ἐπάσταμαι, have the accusative. Συνόμμ, quoted above with the genitive (1102), usually takes the accusative of a thing.
  - 1105. The impersonals  $\mu \epsilon \lambda \epsilon \iota$  and  $\mu \epsilon \tau a \mu \epsilon \lambda \epsilon \iota$  take the genitive of a thing with the dative of a person (1161); as  $\mu \epsilon \lambda \epsilon \iota$  μου τούτου, I care for this;  $\mu \epsilon \tau a \mu \epsilon \lambda \epsilon \iota$  σοι τούτου, thou repentest of this. Προσήκει, it concerns, has the same construction, but the genitive belongs under 1097, 2.
  - 1106. Causative verbs of this class take the accusative of a person and the genitive of a thing; as  $\mu\eta' \mu'$  drampigns kakov, do not remind me of evils (i.e. cause me to remember them), E. Al. 1045; toos vaidas yevotéon almitos, we must make the children taste blood, P. Rp. 537a.

But verbs of reminding also take two accusatives (1069).

- 1107. N. Οζω, emit smell (smell of), has a genitive (perhaps by an ellipsis of δσμήν, odor); as δζουσ δμβροσίας καὶ νέκταρος, they smell of ambrosia and nectur, Ar. Ach. 196. A second genitive may be added to designate the source of the odor; as εὶ τῆς κεφαλῆς δζω μύρου, if my head smells of perfume, Ar. Eccl. 524.
- 1108. N. Many of the verbs of 1099 and 1102 may take also the accusative. See the Lexicon.

1109. The genitive follows verbs signifying to rule, to lead, or to direct. E.g.

Έρως των θεων βασιλεύει, Love is king of the Gods, P. Sy. 195°; Πολυκράτης Σάμου τυραννών, Polycrates, while he was tyrant of Samos, T. 1, 13; Μίνως τῆς νῦν Ἑλληνικῆς θαλάσσης ἐκράτησε καὶ τῶν Κυκλάδων νήσων ἦρξε, Minos became master of what is now the Greek sea, and ruler of the Cyclades, T. 1, 4; ἡδονῶν ἐκράτει, he was master of pleasures, X. M. 1, 5°; ἡγούμενοι αὐτονόμων τῶν ξυμμάχων, leading their allies (who were) independent (972), T. 1, 97.

- 1110. N. This construction is sometimes connected with that of 1120. But the genitive here depends on the idea of king or ruler implied in the verb, while there it depends on the idea of comparison (see 1083).
- 1111. N. For other cases after many of these verbs, see the Lexicon. For the dative in poetry after ἡγίομαι and ἀνάσσω, see 1164.
- 1112. Verbs signifying fulness and want take the genitive of material (1085, 4). E.g.

Χρημάτων εὐπόρει, he had abundance of money, D.18,235; σεσαγμένος πλούτου την ψυχην ἔσομαι, I shall have my soul loaded with wealth, X. Sy. 4, 64. Οὐκ ἃν ἀποροῖ παραδειγμάτων, he would be at no loss for examples, P. Rp. 557d; οὐδὲν δεήσει πολλῶν γραμμάτων, there will be no need of many writings, I.4,78.

1113. Verbs signifying to fill take the accusative of the thing filled and the genitive of material. E.g.

Δακρύων επλησεν εμέ, he filled me with tears, E. Or. 368.

- 1114. N. Δέομαι, I want, besides the ordinary genitive (as τούτων ἐδόοντο, they were in want of these), may take a cognate accusative of the thing; as δεήσομαι ὑμῶν μετρίαν δέησιν, I will make of you a moderate request, Aesch. 3, 61. (See 1076.)
- 1115. N.  $\Delta \epsilon \hat{i}$  may take a dative (sometimes in poetry an accusative) of the person besides the genitive; as  $\delta \epsilon \hat{i}$   $\mu$  or  $\tau$  ov  $\tau$  ov, I need this; a  $\dot{\tau}$  ov  $\dot{\tau}$  or  $\dot{\tau}$  or  $\dot{\tau}$  or  $\dot{\tau}$  or  $\dot{\tau}$  or thou thyself needest a Prometheus, A. Pr. 86 (cf. où  $\delta \epsilon \hat{i}$   $\mu \epsilon$   $\dot{\epsilon} \lambda \theta \epsilon \hat{i} \gamma$ ).
- 1116. N. (a) Besides the common phrases  $\pi \circ \lambda \lambda \circ \hat{v}$   $\delta \epsilon \hat{i}$ , it is far from it,  $\delta \lambda i \gamma \circ v$   $\delta \epsilon \hat{i}$ , it wants little of it, we have in Demosthenes  $\circ \hat{v} \delta \hat{\epsilon} \pi \circ \lambda \lambda \circ \hat{v}$   $\delta \epsilon \hat{i}$  (like  $\pi a \nu \tau \delta s$   $\delta \epsilon \hat{i}$ ), it wants everything of it (lit. it does not even want much).
- (b) By an ellipsis of δεῖν (1534), ὀλίγου and μκροῦ come to mean almost; as ὀλίγου πάντες, almost all, P. Rp. 552<sup>d</sup>.

#### GENITIVE OF SEPARATION AND COMPARISON.

1117. The genitive (as ablative) may denote that from which anything is separated or distinguished. On this principle the genitive follows verbs denoting to remove, to restrain, to release, to cease, to fail, to differ, to give up, and the like. E.g.

H νησος οὐ πολὺ διέχει τῆς ἡπείρου, the island is not far distant from the main-land. Έπιστήμη χωριζομένη δικαιοσύνης, knowledge separated from justice, Γ. Menex. 246 $^{ε}$ ; λῦσόν με δεσμῶν, release me from chains; ἐπέσχον τῆς τειχήσεως, they ceased from building the wall; τούτους οὐ παύσω τῆς ἀρχῆς, I will not depose these from their authority, X. C.8, 6 $^{3}$ ; οὐ παύεσθε τῆς μοχθηρίας, you do not cease from your rascality; οὐκ ἐψεύσθη τῆς ἐλπίδος, he was not disappointed in his hope, X. H.7,  $^{24}$ ; οὐδὲν διοίσεις Χαιρεφῶντος, you will not differ from Chaerephon, Ar. N.  $^{503}$ ; τῆς ἐλευθερίας παραχωρῆσαι Φιλίππω, to surrender freedom to Philip, D. 18, 68. So εἶπον (αὐτῶ) τοῦ κήρυκος μὴ λείπεσθαι, they told him not to be left behind the herald (i.e. to follow close upon him), T. 1, 131; ἡ ἐπιστολὴ ἡν οὖτος ἔγραψεν ἀπολειφθεὶς ἡμῶν, the letter which this man wrote without our knowledge (lit. separated from us), D. 19, 36.

Transitive verbs of this class may take also an accusative.

- 1118. Verbs of depriving may take a genitive in place of the accusative of a thing, and those of taking away a genitive in place of the accusative of a person (1069; 1071); as  $\tilde{\epsilon}\mu\tilde{\epsilon}$   $\tau\tilde{\omega}\nu$   $\pi\alpha\tau\rho\tilde{\omega}\omega$   $\tilde{\epsilon}\pi\epsilon\sigma\tau\tilde{\epsilon}\rho\eta\kappa\epsilon$ , he has deprived me of my paternal property, D. 29, 3;  $\tau\tilde{\omega}\nu$   $\tilde{\epsilon}\lambda\lambda\omega\nu$  dealpoimevol conjugate, taking away property from the others, X. M.1, 53;  $\pi\tilde{\omega}\sigma\omega\nu$  descripted accurately  $\tilde{\epsilon}\eta\sigma\theta\epsilon$ , of how much have you been bereft! D. 8, 63.
- 1119. N. The poets use this genitive with verbs of motion; as  $O\dot{v}\lambda\dot{v}\mu\pi\sigma\iota\sigma$  κατήλθομεν, we descended from Olympus, Il.20,125;  $Hv\theta\hat{\omega}v\sigma$ ς έβας, thou didst come from Pytho, S. O. T. 152. Here a preposition would be used in prose.
- 1120. The genitive follows verbs signifying to surpass, to be inferior, and all others which imply comparison. E.g.

("Ανθρωπος) ξυνέσει ύπερέχει των ἄλλων, man surpasses the others in sagacity, P. Menex. 2374; ἐπιδείξαντες τὴν ἀρετὴν τοῦ πλήθους περιγιγνομένην, showing that bravery proves superior to numbers, I.4,91; δρων ὑστερίζουσαν τὴν πόλιν των καιρων, seeing the city too late for its opportunities, D.18, 102; ἐμπειρία πολὺ προέχετε των

ἄλλων, in experience you far excel the others, X.H.7, 14; οὐδὲν πλήθει γε ἡμῶν λειφθέντες, when they were not at all inferior to (left behind by) us in numbers, X.A.7,731. So τῶν ἐχθρῶν νικᾶσθαι (or ἡσσᾶσθαι), to be overcome by one's enemies; but these two verbs take also the genitive with ὑπό (1234). So τῶν ἐχθρῶν κρατεῖν, to prevail over one's enemies, and τῆς θαλάσσης κρατεῖν, to be muster of the sea. Compare the examples under 1100, and see 1110.

GENETIVE WITH VERBS OF ACCUSING ETC.

1121. Verbs signifying to accuse to prosecute, to convict, to acquit, and to condemn take a genitive denoting the crime, with an accusative of the person. E.g.

Αἰτιῶμαι αὐτὸν τοῦ φόνου, I accuse kim of the murder: ἐγράψατο αὐτὸν παρανόμων, he indicted him for an illegal proposition: διώκει με δώρων, he prosecutes me for bribery (for gifts). Κλίωνα δώρων έλώντες καὶ κλοπῆς, having convicted Cleon of bribery and theft, Ar. N.591. Ἔφευγε προδοσίας, he was brought to trial for treachery, but ἀπέφυγε προδοσίας, he was acquitted of treachery. Ψευδομαρτυριῶν ἀλώσεσθαι προσδοκῶν, expecting to be convicted of falsewitness, D.39, 18.

- 1122. Όφλισκάνω, lose a suit, has the construction of a passive of this class (1239); as  $\ddot{\omega}\phi\lambda\epsilon$  κλοπης, he was convicted of theft. It may also have a cognate accusative; as  $\ddot{\omega}\phi\lambda\epsilon$  κλοπης δίκην, he was convicted of theft (1051). For other accusatives with  $\dot{\omega}\phi\lambda\iota\sigma\kappa\dot{\omega}\nu\omega$ , as  $\mu\omega\rho\dot{\omega}\nu$ , folly,  $\dot{\omega}\sigma\chi\dot{\nu}\nu\gamma\nu$ , shame,  $\chi\rho\dot{\gamma}\mu\alpha\tau\alpha$ , money (fine), see the Lexicon.
- 1123. Compounds of κατά of this class, including κατηγορῶ (882, 2), commonly take a genitive of the person, which depends on the κατά. They may take also an object accusative denoting the crime or punishment. E.g.

Οὐδεὶς αὐτὸς αὐτοῦ κατηγόρησε πώποτε, no man ever himself accused himself, D.38,26; κατεβόων των Αθηναίων, they decried the Athenians, T.1,67; θάνατον κατέγνωσαν αὐτοῦ, they condemned him to death, T.6,61; ὑμῶν δέομαι μη καταγνώναι δωροδοκίαν ἐμοῦ, I beg you not to declare me quilty of taking bribes, 1.21,21; τὰ πλείστα κατεψεύσατό μου, he told the most lies against me, D.18,9; λέγω πρὸς τοὺς ἐμοῦ καταψηφισαμένους θάνατον, I speak to those who noted to condemn me to death, P. Ap. 384.

1124. N. Verbs of condemning which are compounds of κατά may take three cases; as πολλων οι πατέρες ήμων μηδισμού θάνατον κατέγνωσαν, our fathers condemned many to death for Medism, I.4, 157.

For a genitive (of value) denoting the penalty, see 1133.

1125. N. The verbs of 1121 often take a cognate accusative (1051) on which the genitive depends; as γραφὴν γράφεσθαι ὕβρεως, to bring an indictment for outrage; γραφὴν (οτ δίκην) ὑπέχειν, φεύγειν, ἀποφεύγειν, ὀφλεῖν, ἀλῶνοι, etc. The force of this accusative scens to be felt in the construction of 1121.

#### GENITIVE OF CAUSE AND SOURCE.

1126. The genitive often denotes a cause, especially with verbs expressing emotions, as admiration, wonder, affection, hatred, pity, anger, enny, or revenge. E.g.

(Υούτους) τῆς μὲν τόλμης οὐ θαυμάζω, τῆς δὲ ἀξυνεσίας, I wonder not at their boldness, but at their folly, Τ.6,36; πολλάκις σε εὐδαιμόνισα τοῦ τρόπου, I often counted you happy for your character, P. Cr. 43b; ζηλῶ σε τοῦ νοῦ, τῆς δὲ δειλίας στυγῶ, I envy you for your mind, but loathe you for your cowardice, S. El. 1027; μή μοι φθοιήσης τοῦ μαθήματος, don't grudge me the knowledge, P. Eu. 297b; συγγιγνώσκειν αὐτοῖς χρὴ τῆς ἐπιθυμίας, we must forgive them for their desire, ibid. 300°; καί σφεας τιμωρήσομαι τῆς ἐνθάδε ἀπίξιος, and I shall punish them for coming hither, Hd. 3, 145. Τούτους οἰκτίρω τῆς νόσου, I pity these for their disease, X. Sy. 4³¹; τῶν ἀδικημάτων ὀργίζεσθαι, to be angry at the offences, L. 31, 11.

Most of these verbs may take also an accusative or dative of the person.

- 1127. N. The genitive sometimes denotes a purpose or motive (where ἔνεκα is generally expressed); as τῆς τῶν Ἑλλήνων ἐλευθερώς, for the liberty of the Greeks, D.18,100; so 19,76. (See 1548.)
- 1128. N. Verbs of disputing take a causal genitive; as οὐ βασιλεῖ ἀντιποιούμεθα τῆς ἀρχῆς, we do not dispute with the King about his dominion, X. A.2,  $3^{23}$ ; Εὔμολπος ἡμφισβήτησεν Ἐρεχθεῖ τῆς πόλεως, Eumolpus disputed with Erechtheus for the city (i.e. disputed its possession with him), 1.12,193.
- 1129. The genitive is sometimes used in exclamations, to give the eause of the astonishment. E.g.
- <sup>\*</sup>Ω Πόσειδον, της τέχνης, Ο Poseidon, what a trade! Ar. Eq. 144. <sup>\*</sup>Ω Ζεῦ βασιλεῦ, της λεπτότητος τῶν φρενῶν! Ο King Zeus! what subtlety of intellect! Ar. N. 153.
- 1130. 1. The genitive sometimes denotes the source. E.g. Τοῦτο ἔτυχών σου, I obtained this from you. Μάθε μου τάδε, learn this from me, X. C.1, 64. Add the examples under 1103.

2. So with γίγνομαι, in the sense to be born; as Δαρείου καὶ Παρυσάτιδος γίγιονται παίδες δύο, of Darius and Parysatis are born

1131. In poetry, the genitive occasionally denotes the agent after a passive verb, or is used like the instrumental dative (1181). E.g.

Έν \* Αιδα δη κείσαι, σᾶς ἀλόχου σφαγείς Αιγίσθου τε, thou liest now in Hades, slain by thy wife and Aegisthus, Ε. Ε. 122. Πρησαι πυρὸς δηίσιο θύρετρα, to burn the gates with destructive fire, Il. 2, 415.

These constructions would not be allowed in prose.

#### GENITIVE AFTER COMPOUND VERBS.

1132. The genitive often depends on a preposition included in a compound verb. E.g.

Πρόκειται τῆς χώρας ἡμῶν ὅρη μεγάλα, high mountains lie in front of our land, X. M. 3,  $5^{25}$ ; ὑπερεφάνησαν τοῦ λόφου, they appeared above the hill, T. 4, 93; οὖτως ὑμῶν ὑπεραλγῶ, I grieve so for you, Ar. Av. 466; ἀποτρέπει με τούτου, it turns me from this, P. Ap.  $31^d$ ; τῷ ἐπιβάντι πρώτω τοῦ τείχους, to him who should first mount the wall, T. 4, 116; οὖκ ἀνθρώπων ὑπερεφρόνει, he did not despise men, X. Ag. 11, 2.

For the genitive after verbs of accusing and condemning, compounds of  $\kappa \alpha \tau \acute{a}$ , see 1123.

#### GENITIVE OF PRICE OR VALUE.

1133. The genitive may denote the price or value of a thing. E.g.

Τεύχε ἄμειβεν, χρύσεα χαλκείων, έκατόμβοι ἐννεαβοίων, he gave gold armor for bronze, armor worth a hundred oxen for that worth nine oxen, Il. 6,235. Δύξα χρημάτων οὐκ ὧνητή (sc. ἐστίν), glory is not to be bought with money, 1.2,32. Πόσου διδάσκει; πέντε μνῶν. For what price does he teach? For five minae. P. Ap. 20<sup>b</sup>. Οὐκ ἄν ἀπεδόμην πολλοῦ τὰς ἐλπίδας, I would not have sold my hopes for a great deal, P. Ph. 96<sup>b</sup>; μείζονος αὐτὰ τιμῶνται, they value them more, X. C. 2, 113. (But with verbs of valuing περί with the genitive is more common.)

In judicial language, τιμῶν τινί τινος is said of the court's judgment in estimating the penalty, τιμῶσθαί τινί τινος of either party to the suit in proposing a penalty; as ἀλλὰ δὴ Φυγῆς τιμήσωμα; ἴσως γὰρ ἄν μοι τούτου τιμήσαιτε, but now shall I propose exile as my punishment?—you (the court) might perhaps fix my penalty at this, P. Ap. 37?. So τιμᾶται δ' οὖν μοι ὁ ἀνὴρ θανάτου, so the man estimates my punishment at death (i.e. proposes death as my punish-

ment), P. Ap. 36<sup>b</sup>. So also Σφοδρίαν ὑπῆγον θανάτου, they impeached Sphodrias on a capital charge (cf. 1124), X. H. 5, 4<sup>24</sup>.

- 1134. The thing bought sometimes stands in the genitive, either by analogy to the genitive of price, or in a causal sense (1126); as τοῦ δώδεκα μνᾶς Πασία (sc. ὀφείλω); for what (do I owe) twelve minue to Pasias? Ar. N.22; οὐδένα τῆς συνουσίας ἀργύριον πράττει, you ask no money of anybody for your teaching, X.M.1,611.
- 1135. The genitive depending on ἄξιος, worth, worthy, and its compounds, or on ἀξιόω, think worthy, is the genitive of price or value; as ἄξιός ἐστι θανάτου, he is worthy of death; οὐ Θεμιστοκλέα τῶν μεγίστων δωρεῶν ἡξίωσαν; did they not think Themistocles worthy of the highest gifts? I.4,154. So sometimes ἄτιμος and ἀτιμάζω take the genitive. (See 1140.)

#### GENITIVE OF TIME AND PLACE.

1136. The genitive may denote the time within which anything takes place. E.g.

Ποίου χρόνου δὲ καὶ πεπόρθηται πόλις; well, how long since (within what time) was the city really taken? A. Ag. 278. Τοῦ ἐπιγιγνομένου χειμῶνος, during the following winter,  $\Upsilon.8,29$ . Ταῦτα τῆς ἡ μέρας ἐγένετο, this happened during the day,  $X.A.7,4^{14}$  (τὴν ἡμέραν would mean through the whole day, 1062). Δέκα ἐτῶν οὐχ ῆξουσι, they will not come within ten years,  $P. Lg. 642^{\circ}$ . So δραχμὴν ἐλάμβανε τῆς ἡμέρας, he received a drachma a day (951).

1137. A similar genitive of the place within which or at

which is found in poetry. E.g.

H οὐκ Aργεος ἦεν Άχαιικοῦ; was he not in Achaean Argos? Od. 3, 251; Οἴη νῦν οὐκ ἔστι γυνἢ κατ 'Αχαιίδα γαῖαν, οὕτε Π ύλον ἱερῆς οὕτ' Αργεος οὕτε Μυκήνης, a woman whose like there is not in the Achaean land, not at sacred Pylos, nor at Argos, nor at Mycenae, Od. 21, 107. So in the Homeric πεδίοιο θέειν, to run on the plain (i.e. within its limits), Il. 22, 23, λούεσθαι ποτα μοῖο, to bathe in the river, Il. 6, 508, and similar expressions. So ἀριστερῆς χειρός, on the left hand, even in Hdt. (5,77).

#### GENITIVE WITH ADJECTIVES.

[1139

- 1139. The *objective* genitive follows many verbal adjectives.
- 1140. These adjectives are chiefly kindred (in meaning or derivation) to verbs which take the genitive. E.g.

Μέτοχος σοφίας, partaking of wisdom, P. Lg. 689<sup>d</sup>; Ισύμοιροι τῶν πατρώων, sharing equally their father's estate, Isac. 6, 25. (1097, 2.)

Έπιστήμης επήβολοι, having attained knowledge, P. Eu. 2891; θαλάσσης εμπειρότατοι, most experienced in the sea (in naviga-

tion), T. 1, 80. (1099.)

Ύπήκοος των γον έων, obedient (hearkening) to his parents, P. Rp. 463<sup>d</sup>; άμνήμων των κινδύνων, unmindful of the dangers, Ant. 2a, 7; ἄγευστος κακων, without a taste of erils, S. An. 582; ἐπιμελὴς ἀγαθων, ἀμελὴς κακων, caring for the good, neglectful of the bad; φειδωλοί χρημάτων, sparing of money, P. Rp. 548<sup>h</sup>. (1102.)

Τῶν ἡδονῶν πασῶν ἐγκρατέστατος, most perfect master of all pleasures, X. M. 1, 214; νε ως ἀρχικός, fit to command a ship, P. Rp. 4884; ἐαυτοῦ ὧν ἀκράτωρ, not heing master of himself, ibid. 579c. (1109.)

Μεστὸς κακῶν, full of evils; ἐπιστήμης κενός, void of knowledge, P. Rp. 486°; λήθης ὧν πλέως, being full of forgetfulness, ibid.; πλείστων ἐνδεέστατος, most wanting in most things, ibid. 579°; ἡ ψυχὴ γυμνὴ τοῦ σώματος, the soul stript of the body, P. Crat. 403°; καθαρὰ πάντων τῶν περὶ τὸ σῶμα κακῶν. free (pure) from all the evils that belong to the body, ibid. 403°; τοιούτων ἀνδρῶν ὀρφανή, hereft of such men, L.2.60; ἐπιστήμη ἐπιστήμης διάφορος, knowledge distinct from knowledge, P. Phil. 61°; ἔτερον τὸ ἡδῦ τοῦ ἀγαθοῦ, the pleasant (is) distinct from the good, P. G. 500°. (1112; 1117.)

\*Eroχos δειλίας, chargeable with cowardice, L. 14,5; τούτων αίτιος, responsible for this, P. G. 447°. (1121.)

"A $\xi$ cos  $\pi$  o  $\lambda \lambda \hat{\omega} \nu$ , worth much, genitive of value (1135).

- 1141. Compounds of alpha privative (875, 1) sometimes take a genitive of kindred meaning, which depends on the idea of separation implied in them; as ἄπαις ἀρρόνων παίδων, destitute (childless) of male children, X. C.4, 62; τιμής ἄτιμος πάσης, destitute of all honor, P. Lg. 774<sup>h</sup>; χρημάτων ἀδωρότατος, most free from taking bribes, T.2, 65; ἀπήνιμον πάντων χιιμώνων, free from the blasts of all storms, S.O. C. 677, ἀψόφητος ὁξέων κωκυμάτων, without the sound of shrill wailings, S. Aj. 321.
- 1142. Some of these adjectives (1139) are kindred to verbs which take the accusative. E.g.

Έπιστήμων της τ έχνης, understanding the art, P. G. 448b (1104);

ξπιτήδευμα πόλεως άνατρεπτικόν, a practice subversive of a state, P. Rp. 359° κακούργος των άλλων, έαυτοῦ δὲ πολὺ κακουργότερος, doing evil to the others, but fur greater evil to himself, X. M.1, 5° ς συγγνώμων των άνθρωπίνων άμαρτημάτων, considerate of human faults, X. C. 6, 1° ς σύμψηφός σοί εἰμι τούτου τοῦ νόμου, I vote with you for this law, P. Rp. 380°.

1143. The possessive genitive sometimes follows adjec-

tives denoting possession. E.g.

Oi κίνδυνοι των έφεστηκότων ιδιοι, the dangers belong to the commanders, D.2,28; ίερὸς ὁ χώρος τῆς `Aρτέμιδος, the place is sacred to Artemis,  $X.A.5,3^{18}$ ; κοινόν πάντων, common to all,  $P.Sy.205^a$ .

For the dative with such adjectives, see 1174.

1144. 1. Such a genitive sometimes denotes mere connection; as συγγενής αὐτοῦ, a relative of his, X.C.4,122; Σωκράτους δμώνυμος, a namesake of Secretes, P. So.218b.

The adjective is here really used as a substantive. Such adjec-

tives naturally take the dative (1175).

- 2. Here probably belongs έναγης τοῦ ᾿Απόλλωνος, accursed (one) of Apollo, Aesch. 3, 110; also έναγεῖς καὶ ἀλιτήριοι τῆς θεοῦ, accursed of the Goddess, T.1, 126, and ἐκ τῶν ἀλιτηρίων τῶν τῆς θεοῦ, Ar. Eq. 415: ἐναγής etc. being really substantives.
- 1146. N. Some adjectives of place, like ἐναντίος, opposite, may take the genitive instead of the regular dative (1174), but chiefly in poetry: as ἐναντίοι ἔσταν 'Α χαιῶν, they stood opposite the Achaeans, 11.17,343.

See also τοῦ Πόντου ἐπικάρσιαι, at an angle with the Pontus, 11d.7, 36.

#### GENITIVE WITH ADVERBS.

1147. The genitive follows adverbs derived from adjectives which take the genitive. E.g.

Οι έμπείρως αὐτοῦ έχουτες, those who are acquainted with him, ἀναξίως τῆς πόλεως, in a manner unworthy of the state. Των ἄλλων

'A θηναίων ἀπάντων διαφερόντως, beyond all the other Athenians, P. Cr. 52b. Εμάχοντο ἀξίως λόγου, they (the Athenians at Marathon) fought in a manner worthy of note, Hd. 6, 112. So εναντίον (1146).

1148. The genitive follows many adverbs of place. E.g.

Εἴσω τοῦ ἐρύματος, within the fortress; ἔξω τοῦ τείχους, outside of the wall; ἐκτὸς τῶν ὅρων, without the boundaries; χωρὶς τοῦ σώματος, apart from the body; πέραν τοῦ ποταμοῦ, heyond the river, T.6,101; πρόσθεν τοῦ στρατοπέδου, in front of the camp,  $X.H.4,1^{22}$ ; ἀμφοτέρωθεν τῆς ὁδοῦ, on both sides of the road, ibid.  $5,2^6$ ; εὐθὺ τῆς Φασήλιδος, straight towards Phasēlis, T.S,88.

- 1149. N. Such adverbs, besides those given above, are chiefly  $\ell\nu\tau\dot{o}s$ , within;  $\delta\dot{\chi}d$ , apart from;  $\dot{\epsilon}\gamma\gamma\dot{o}s$ ,  $\ddot{a}\gamma\chi\iota$ ,  $\pi\dot{\epsilon}\lambda as$ , and  $\pi\lambda\eta\sigma\dot{\epsilon}o\nu$ , near;  $\pi\dot{o}\rho\rho\omega$  ( $\pi\rho\dot{o}\sigma\omega$ ), far from;  $\ddot{o}\pi\iota\sigma\theta\epsilon\nu$  and  $\kappa\alpha\tau\dot{o}\pi\iota\nu$ , behind; and a few others of similar meaning. The genitive after most of them can be explained as a partitive genitive or as a genitive of separation; that after  $\epsilon\dot{v}\theta\dot{v}$  resembles that after verbs of aiming at (1099).
- 1150. N. Λάθρα (Ionic λάθρη) and κρύφα, without the knowledge of, sometimes take the genitive; as λάθρη Λαυμέδοντος, without the knowledge of Laomedon, Il. 5, 269; κρύφα των 'Αθηναίων, Τ. 1, 101.
- 1151. N. Aνευ and ἄτερ, without, ἄχρι and μέχρι, until, ἔνεκα (οὖνεκα), on account of, μεταξύ, between, and πλήν, except, take the genitive like prepositions. See 1220.

#### GENITIVE ABSOLUTE.

1152. A noun and a participle not grammatically connected with the main construction of the sentence may stand by themselves in the genitive. This is called the genitive absolute. E.g.

Ταῦτ' ἐπράχθη Κόνωνος στρατηγοῦντος, this was done when Conon was general, I.9,56. Οὐδὲν τῶν δεόντων ποιούντων ὑμῶν κακῶς τὰ πράγματα ἔχει, affairs are in a had state while you do nothing which you ought to do, D.4,2. Θεῶν διδόντων οἰκ αν ἐκφύγοι κακά, if the Gods should grant (it to be so), he could not escape evils, A. Se.719. "Οντος γε ψεύδους ἔστιν ἀπάτη, when there is falsehood, there is deceit, P. So. 260°.

See 1568 and 1563.

## GENITIVE WITH COMPARATIVES.

1153. Adjectives and adverbs of the comparative degree take the genitive (without  $\eta$ , than). E.g.

Κρείττων ἐστὶ τούτων, he is better than these. Νέοις τὸ σιγᾶν κρεῖττόν ἐστι τοῦ λαλεῖν, for youth silence is better than prating, Men. Mon. 387. (Πονηρία) θᾶττον θανάτου θεῖ, wickedness runs faster than death, P. Ap. 394.

- 1154. N. All adjectives and adverbs which imply a comparison may take a genitive: as ἔτεροι τούτων, others than these; ὕστεροι τῆς μάχης, too late for (later than) the battle; τῆ ὑστεροία τῆς μάχης, on the day after the battle. So τριπλάσιον ἡμῶν, thrice as much as we.
- 1155. N. The genitive is less common than  $\eta$  when, if  $\eta$  were used, it would be followed by any other case than the nominative or the accusative without a preposition. Thus for  $\xi\xi\epsilon\sigma\tau$ :  $\delta$   $\eta\mu\hat{a}\nu$   $\mu\hat{a}\lambda\lambda\rho\nu$   $\epsilon\tau\epsilon\rho\omega\nu$ , and we can (do this) better than others (T.1,85),  $\mu\hat{a}\lambda\lambda\rho\nu$   $\hat{\eta}$   $\epsilon\tau\epsilon\rho\omega$ s would be more common.
- 1156. N. After  $\pi\lambda \acute{e}ov$  ( $\pi\lambda \acute{e}iv$ ), more, or  $\acute{e}\lambda\alpha\sigma\sigma\sigma\nu$  ( $\mu\acute{e}i\sigma\nu$ ), less,  $\mathring{\eta}$  is occasionally omitted before a numeral without affecting the case; as  $\pi\acute{e}\mu\psi\omega$   $\acute{o}pn\ddot{s}$   $\acute{e}\pi$   $\acute{a}\mathring{v}\mathring{r}\acute{o}\nu$ ,  $\pi\lambda \acute{e}i\nu$   $\acute{e}\xi\alpha\kappa\sigma\sigma\acute{e}vs$   $\acute{r}\acute{o}v$   $\acute{a}pi\theta\mu\acute{o}v$ , I will send birds against him, more than six hundred in number, Ar. Av. 1251.

#### DATIVE.

1157. The primary use of the dative case is to denote that to or for which anything is or is done: this includes the dative of the remote or indirect object, and the dative of advantage or disadvantage. It also denotes that by which or with which, and the time (sometimes the place) in which, anything takes place,—i.e. it is not merely a dative, but also an instrumental and a locative case. (See 1042.) The object of motion after to is not regularly expressed by the Greek dative, but by the accusative with a preposition. (See 1065.)

## DATIVE EXPRESSING TO OR FOR.

DATIVE OF THE INDIRECT OBJECT.

1158. The indirect object of the action of a transitive verb is put in the dative. This object is generally introduced in English by to. E.g.

Δίδωσι μισθόν τῷ στρατεύματι, he gives pay to the army; ὑπισχνεῖταί σοι δέκα τάλαντα, he promises ten talents to you (or he promises you ten talents); βοήθειαν πέμψομεν τοῖς συμμάχοις, we will send aid to our allies; ἔλεγον τῷ βασιλεῖ τὰ γεγενημένα, they told the king what had happened.

1159. Certain intransitive verbs take the dative, many

of which in English may have a direct object without to. E.g.

Τοις θεοις εύγομαι, Ι pray (to) the Gods, D. 18,1; λυσιτελούν τώ Exovτι, advantageous to the one having it, P. Rp. 392°; είκουσ' ἀνάγκη τήδε, yielding to this necessity, A. Aq. 1071; τοις νόμοις πείθοντοι, they are obedient to the laws (they obey the laws), X. M. 4, 415; Bonbeiv δικαιοσύνη, to assist justice, P. Rp. 427. Εὶ τοῖς πλέοσιν άρέσκοντές έσμεν, τοισδ' αν μόνοις οικ όρθως απαρέσκοιμεν, if we are pleasing to the majority, it cannot be right that we should be displeasing to these alone, T.1,38. Επίστευον αυτώ αι πόλεις, the cities trusted him, X. A. 1,98. Tois 'A θηναίοις παρήνει, he used to advise the Athenians, Τ. 1,93. Τον μάλιστα επιτιμώντα τοις πεπραγμένοις noises ar epointy, I should like to ask the man who censures most severely what has been done, D.18, 64. Τι έγκαλων ήμεν έπιχειρείς ήμας ἀπολλύναι; what fault do you find with us that you try to destroy us? P. Cr. 500. Τούτοις μέμφει τι; have you anything to blame these for? ibid. Έπηρεάζουσιν άλλήλοις και φθονούσιν έαυτοίς μάλλον η τοις άλλοις άνθρώποις, they revile one another, and are more malicious to themselves than to other men, X. M. 3, 516. Exaléπαινον τοις στρατηγοίς, they were angry with the generals, X.A.1, 412; έμοι δργίζονται they are angry with me, P. Ap. 23c. So πρέπει μοι λέγειν, it is becoming (to) me to speak; προσήκει μοι, it belongs to me; δοκεί μοι, it seems to me; δοκώ μοι, methinks.

- 1160. The verbs of this class which are not translated with to in English are chiefly those signifying to benefit, serve, obey, defend, assist, please, trust, satisfy, advise, exhort, or any of their opposites; also those expressing friendliness, hostility, blame, abuse, reproach, envy, anger, threats.
- 1161. N. The impersonals  $\delta \epsilon \hat{i}$ ,  $\mu \epsilon \tau \epsilon \sigma \tau i$ ,  $\mu \epsilon \lambda \epsilon i$ ,  $\mu \epsilon \tau a \mu \epsilon \lambda \epsilon i$ , and  $\pi \rho o \sigma \eta \kappa \epsilon i$  take the dative of a person with the genitive of a thing; as  $\delta \epsilon \hat{i}$   $\mu o i \tau o \iota \tau o \iota \tau o i$ , I have need of this;  $\mu \epsilon \tau \epsilon \sigma \tau \hat{i}$   $\mu o i \tau o \iota \tau o \iota \tau o i$ , I have a share in this;  $\mu \epsilon \lambda \epsilon i$   $\mu o i \tau o \iota \tau o \iota \tau o i$ , I am interested in this;  $\pi \rho o \sigma \eta \kappa \epsilon i$   $\mu o i \tau o \iota \tau o \iota \tau o i$ , I am concerned in this. (For the genitive, see 1097, 2; 1105; 1115.) \*E $\xi \epsilon \sigma \tau i$ , it is possible, takes the dative alone.
- 1162. N.  $\Delta \hat{\alpha}$  and  $\chi \rho \hat{\eta}$  take the accusative when an infinitive follows. For  $\delta \hat{\alpha}$  (in poetry) with the accusative and the genitive, see 1115.
- 1163. N. Some verbs of this class (1160) may take the accusative; as obsers uptobs  $\epsilon \mu \epsilon \mu \phi \epsilon \tau o$ , no one blamed them, X. A.2, 630. Others, whose meaning would place them here (as  $\mu u \tau \epsilon \omega$ , hate), take only the accusative.  $\Lambda o \delta o \rho \epsilon \omega$ , revile, has the accusative, but

λοιδορέομαι (middle) has the dative. Όνειδίζω, reproach, and ἐπιτιμῶ, censure, have the accusative as well as the dative; we have also δνειδίζειν (ἐπιτιμῶν) τί τινι, to cust any reproach (or censure) on any one. Τιμωρεῖν τινι means regularly to avenge some one (to take vengeance for him); τιμωρεῖσθαι (rarely τιμωρεῖν) τινα, to punish some one (to avenge oneself on him): see X. C. 4,68, τιμωρήσειν σοι τοῦ παιδὸς τὸν φονέα ὑπισχνοῦμαι, I promise to avenge you on the murderer of your son (or for your son, 1126).

- 1164. 1. Verbs of ruling (as ἀνάσσω), which take the genitive in prose (1109), have the dative in poetry, especially in Homer; as πολλήσιν νήσοισι καὶ "Αργεϊ παντὶ ἀνάσσειν, to rule over many islands and all Argos, Il. 2, 108; δαρὸν οὐκ ἄρξει θεοῖς, he will not rule the Gods long, A. Pr. 940. Κελεύω, to command, which in Attie Greek has only the accusative (generally with the infinitive), has the dative in Homer: see Ii. 2, 50.
- 2. Ήγέσμαι, in the sense of guide or direct, takes the dative even in prose; as οὐκέτι ἡμῖν ἡγήσεται, he will no longer be our guide,  $X.A.3,2^{20}$ .

#### DATIVE OF ADVANTAGE OR DISADVANTAGE.

1165. The person or thing for whose advantage or disadvantage anything is or is done is put in the dative (dativus commodi et incommodi). This dative is generally introduced in English by for. E.g.

Πῶς ἀνὴρ αὐτ ῷ πονεῖ, every man labors for himself, S. Aj. 1366. Σόλων `Α θηναίοις νόμους ἔθηκε, Solon made laws for the Athenians. Καιροὶ προείνται τῷ πόλει, lit. opportunities have been sacrificed for the state (for its disadvantage), D. 19, 8. 'Ηγεῖτο αὐτῶν ἔκαστος οὐχὶ τῷ πατρὶ καὶ τῷ μητρὶ μόνον γεγενῆσθει, ἀλλὰ καὶ τῷ πατρίὸι, each of them believed that he was born not merely for his father and mother, but for his country also, D. 18, 205.

- 1166. N. A peculiar use of this dative is found in statements of time; as τῷ ἦδη δύο γενειὰ ἐφθίωτο, two generations had already passed away for him (i.e. he had seen them pass away), 1l. 1,250. Ἡμέραι μάλιστα ἦσαν τῷ Μυτιλήνη ἐαλωκυίᾳ ἐπτά, for Mitylene captured (i.e. since its capture) there had been about seven days, T. 3,29. Ἡν ἡμέρα πέμπτη ἐπιπλέουσι τοῖς 'Aθηναίοις, it was the fifth day for the Athenians sailing out (i.e. it was the fifth day since they began to sail out), X. H.2, 127.
- 1167. N. Here belong such Homeric expressions as τοίσι δ' ἀνάστη, and he rose up for them (i.e. to address them), Il.1,68; τοίσι μύθων ἦρχεν, he began to speak before them (for them), Od.1,28.

- 1168. N. In Homer, verbs signifying to ward off take an accusative of the thing and a dative of the person; as Δαναοῖσι λοιγὸν ἄμυνον, ward off destruction from the Danai (lit. for the Danai), Il. 1,456. Here the accusative may be omitted, so that Δαναοῖσι ἀμύνειν means to defend the Danai. For other constructions of ἀμύνω, see the Lexicon.
- 1169. N.  $\Delta \epsilon_{\chi o \mu a l}$ , receive, takes a dative in Homer by a similar idiom; as  $\delta \epsilon_{u l}^{\epsilon}$  of  $\sigma \kappa \hat{\eta} \pi \tau \rho o \nu$ , he took his sceptre from him (lit. for him), 11.2, 186.
- 1170. N. Sometimes this dative has a force which seems to approach that of the possessive genitive; as  $\gamma\lambda\hat{\omega}\sigma\sigma\alpha$   $\delta\epsilon$  of  $\delta\epsilon\delta\epsilon\tau\alpha\iota$ , and his tongue is tied (lit. for him), Theog. 178; of  $\tilde{\iota}\pi\pi\iota$   $\alpha \tilde{\iota}\tau \tilde{$
- 1171. N. Here belongs the so-called cthical dative, in which the personal pronouns have the force of for my sake ctc., and sometimes cannot easily be translated; as τί σοι μαθήσομαι; what am I to learn for you? Ar. N.111; τούτω πάνυ μοι προσέχετε τὸν νοῦν, to this, I beg you, give your close attention, D.18,178.

For a dative with the dative of Boulóµενος etc., see 1584.

#### DATIVE OF RELATION.

1172. 1. The dative may denote a person to whose case a statement is limited, — often belonging to the whole sentence rather than to any special word. E.q.

καντα τῷ φοβουμένω ψοφεῖ, everything sounds to one who is afraid, S. frag. 58. Σφῷν μὲν ἐντολὴ Διὸς ἔχει τέλος, as regards you two, the order of Zeus is fully executed, A. Pr. 12. Ύπολαμβάνειν δεῖ τῷ τοιούτῳ, ὅτι εὖήθης τις ἄνθρωπος, with regard to such a one we must suppose that he is a simple person, P. Rp. 5984. Τέθνηχ ὑμῖν πάλαι, I have long been dead to you, S. Ph. 1030.

2. So in such expressions as these: ἐν δεξιῷ ἐσπλέοντι, on the right as you sail in (with respect to one sailing in), T.1,24; συνελόντι, or ὡς συνελόντι εἰπεῖν, concisely, or to speak concisely (lit. for one having made the matter concise). So ὡς ἐμοῖ, in my opinion.

#### DATIVE OF POSSESSION.

1173. The dative with  $\epsilon i \mu i$ ,  $\gamma i \gamma \nu o \mu a \iota$ , and similar verbs may denote the possessor. E.g.

Εἰσὶν ἐμοὶ ἐκεῖ ξένοι, I have (sunt mihi) friends there, P. Cr. 45°; τίς ξύμμαχος γενήσεταί μοι; what ally shall I find? Ar. Eq. 222; ἄλλοις μὲν χρήματα ἐστι πολλὰ, ἡ μῖν δὲ ξύμμαχοι ἀγαθοί, others have plenty of money, but we have good allies, T. 1, 86.

#### DATIVE WITH ADJECTIVES AND ADVERBS.

1174. The dative follows many adjectives and adverbs and some verbal nouns of kindred meaning with the verbs of 1160 and 1165. E.g.

 $\Delta v \sigma \mu \epsilon v \dot{\eta} s$  φίλοις, hastile to friends, E. Me. 1151;  $\ddot{v} \pi o \chi o s$  το  $\dot{v} \dot{o} \mu o \iota s$ , subject to the laws;  $\dot{\epsilon} \pi \iota \kappa \dot{\iota} v \dot{\delta} v v v v \tau \dot{\eta} \pi \dot{o} \lambda \epsilon \iota$ , dangerous to the state;  $\beta \lambda a \beta \epsilon \rho \dot{o} v \tau \dot{\omega} \sigma \dot{\omega} \mu a \tau \iota$ , hurtful to the body;  $\dot{\epsilon} \ddot{v} v v v s \dot{\epsilon} a v \tau \dot{\omega}$ , kind to himself;  $\dot{\epsilon} v a v \tau \dot{\iota} o s a \dot{v} \tau \dot{\omega}$ , opposed to him (cf. 1146);  $\dot{\tau} o \dot{\iota} \sigma \dot{\delta} \dot{\sigma} \dot{\sigma} a \sigma \iota \kappa o \iota v \dot{v} v$ , common to all these, A. Ag. 523.  $\Sigma v \mu \phi \epsilon \rho \dot{o} v \tau \dot{\omega} s \dot{\tau} \dot{\omega}$ , profitably to himself;  $\dot{\epsilon} \mu \pi o \dot{\delta} \dot{\omega} v \dot{\epsilon} \mu o \dot{\iota}$ , in my way.

(With Nouns.) Τὰ παρ' ἡμῶν δῶρα τοῖς θεοῖς, the gifts (given) by us to the Gods, P. Ευτηγρή. 15. So with an objective genitive and a dative; as ἐπὶ καταδουλώσει τῶν Ἑλλήνων Αθηναίοις, for the

subjugation of the Greeks to Athenians, T.3, 10.

#### DATIVE OF RESEMBLANCE AND UNION.

1175. The dative is used with all words implying likeness or unlikeness, agreement or disagreement, union or approach. This includes verbs, adjectives, adverbs, and nouns. E.g.

Σκιαίς ξοικότες, like shadows; τὸ ὁμοιοῦν ξαυτὸν ἄλλω, to make himself like to another, P. Rp. 393c; τούτοις ομοιότατον, most like these, P. G. 513b; ωπλισμένοι τοις αυτοις Κύρω οπλοις, armed with the same arms as Cyrus, X. C.7,  $1^2$ ;  $\hat{\eta}$  omogov ovtos to vois  $\hat{\eta}$ aνομοίου, being either like or unlike these, P. Ph. 74°; δμοίως δίκαιον άδίκω βλάψειν, that he will punish a just and an unjust man alike, P. Rp. 364°; lival additions arousiws, to move unlike one another, P. Ti. 36d; τον δμώνυμον έμαυτώ, my namesake, D. 3.21. Ούτε έαυτοις ούτε άλλήλοις ομολογούσιν, they agree neither with themselves nor with one another, P. Phdr. 237c; αμφισβητούσι οἱ φίλοι τοις φιλοίς, ερίζουσι δε οι έχθροι αλλήλοις, friends dispute with friends, but enemies quarrel with one another, P. Pr. 3376; tois πονηροίς διαφέρευθαι, to be at variance with the bad, X. M.2,98; ην αὐτῷ ὁμογνώμων, he was of the same mind with him, T.8,92. Κακοίς ομιλών, associating with bad men, Men. Mon. 274; τοίς Φρονιμωτάτοις πλησίαζε, draw near to the wisest, I.2, 13; ψύφοις πλησιάζειν (τὸν ἴππον), to bring him near to noises, X. Eq. 2, 5; άλλοις κοινωνείν, to share with others, P. Rp. 369e; τὸ έαυτοῦ έργον ἄπασι κοινον κατατιθέναι, to make his own work common to all, ihid.; δεόμενοι τους φεύγοντας ξυναλλάξαι σφίσι, asking to bring the exiles

to terms with them, T.1.24;  $\beta$ oύλομαί σε αὐτῷ διαλέγεσθαι, I want you to converse with him, P. Lys. 211.

(With Nouns.) "Ατοπος ή όμοιότης τούτων ἐκείνοις, the likeness of these to those is strange, P. Th. 158°; ἔχει κοινωνίαν ἀλλήλοις, they have something in common with each other, P. So. 257°; προσβολάς ποιούμενοι τῷ τείχει, making attacks upon the wall, ἐπιδρομὴν τῷ τειχίσματι, an assault on the wall, V.4,23; Διὸς βρονταίσιν εἰς ἔριν. in rivalry with the thunderings of Zeus, E. Cyc. 328; ἐπανάστασις μέρους τινὸς τῷ ὅλῳ τῆς ψυχῆς, a rebellion of one part of the soul against the whole, P. Rp. 444°.

- 1176. The dative thus depends on adverbs of place and time; as  $\tilde{a}\mu\alpha + \tilde{\eta} \hat{\eta}\mu\dot{\epsilon}\rho\alpha$ , at daybreak, X.A.2,12;  $\tilde{v}\delta\omega\rho$   $\delta\mu\sigma\hat{v}$   $\tilde{\tau}\tilde{\eta}$   $\tilde{\tau}\eta\lambda\hat{\phi}$   $\tilde{\eta}\mu\alpha\tau\omega\mu\dot{\epsilon}\nu\sigma\nu$ , water stained with blood together with the mud, T.7,84;  $\tilde{\tau}\tilde{\alpha}$   $\tau\sigma\hat{v}\tau\sigma\iota\varsigma\hat{\epsilon}\psi\dot{\epsilon}\xi\hat{\eta}\varsigma$ , what comes next to this, P. T. 30°;  $\tau\sigma\hat{\iota}\sigma\delta\hat{s}$   $\tilde{\epsilon}\gamma\gamma\dot{\nu}\varsigma$ , near these, F. Her. 37 ( $\tilde{\epsilon}\gamma\gamma\dot{\nu}\varsigma$  generally has the genitive, 1149).
- 1177. To this class belong μάχομαι, πολεμέω, and others signifying to contend or quarrel with; as μάχεσθαι τοῖς Θηβαίοις, to fight with the Thebans; πολεμοῦσιν ἡμῖν, they are at war with us. So ἐς χεῖρας ἐλθεῖν τινι, ω ἐς λόγους ἐλθεῖν τινι, to come to a conflict (or to words) with any one; also διὰ φιλίας ἱέναι τινί, to be friendly (to go through friendship) with one: see T.7,44: 8,48; X.A.3,28.
- 1178. N. After adjectives of likeness an abridged form of expression may be used; as  $\kappa \delta \mu \omega = \chi \Delta \rho (\tau \epsilon \sigma \sigma \iota \nu \delta \mu \delta \omega)$ , that af) the Graces, II.17,51;  $\tau \Delta s = \kappa \Delta \eta \gamma \Delta \gamma \Delta s = \kappa \Delta \eta \gamma \Delta s = \kappa \Delta \gamma \gamma \Delta s = \kappa \Delta \eta \gamma \Delta s = \kappa \Delta \eta \gamma \Delta s = \kappa \Delta \gamma \gamma \Delta \gamma \Delta s = \kappa \Delta \gamma \gamma \Delta$

### · DATIVE AFTER COMPOUND VERBS.

1179. The dative follows many verbs compounded with  $\hat{\epsilon}\nu$ ,  $\sigma\hat{\nu}\nu$ , or  $\hat{\epsilon}\pi\hat{\iota}$ ; and some compounded with  $\pi\rho\hat{\iota}\varsigma$ ,  $\pi\alpha\rho\hat{\iota}$ ,  $\pi\epsilon\rho\hat{\iota}$ , and  $\hat{\iota}\pi\hat{\iota}$ . E.g.

Τοῖς ὅρκοις ἐμμίνει ὁ δῆμος, the people abide by the oaths, X. II.  $2,4^{43}$ ; αί... ἡδοναὶ ψυχῷ ἐπιστήμην οἰδεμίαν ἐμποιοῦσιν, (such) pleasures produce no knowledge in the soul, X. M.  $2,1^{20}$ ; ἐνέκειντο τῷ Περικλεῖ, they pressed hard on Pericles, T. 2,59; ἐμαυτῷ συνήδη οἰδὲν ἐπισταμένῳ, I was conscious to myself that I know nothing (lit. with myself), P. Ap.  $22^{4}$ ; ἥδη ποτέ σοι ἐπῆλθεν; did it ever occur to you? X. M.  $4,3^{3}$ ; προσέβαλλον τῷ τειχίσματι, they attacked the fortification, T. 4,11; ἀδελφὸς ἀνδρὶ παρείη, let a brother stand by a man (i.e. let a man's brother stand by him), P. Rp.  $362^{4}$ ; τοῖς κακοῖς περιπίπτουσαν, they are involved in evils, X. M.  $4,2^{27}$ ; ὑπόκειται τὰ πεδίον τῷ ἱερῷ, the plain lies below the temple, Aesch. 3,118.

1180. N. This dative sometimes depends strictly on the preposition, and sometimes on the idea of the compound as a whole.

#### CAUSAL AND INSTRUMENTAL DATIVE.

1181. The dative is used to denote cause, manner, and means or instrument. E.g.

Cause: Νόσω ἀποθανών, having died of disease, T.8,84; οἰ γὰρ κακονοία τοῦτο ποιεῖ, ἀλλ' ἀγνοία, for he does not do this from ill-will, but from ignorance, X. C.3,186; βιαζόμενοι τοῦ πιεῖν ἐπιθυμία, forced by a desire to drink, T.7,81; αἰσχύνομαί τοι ταῖς πρότερον ἀμαρτίαις, I am ashamed of (because of) my former faults, Ar. N. 1355. Manner: Δρόμω ἔεντο ἐς τοὺς βαρβάρους, they rushed against the barbarians on the run, IId. 0,112; κρανγή πολλή ἐπίισιν, they will advance with a lond shout, X. A.1,74. Τή ἀληθεία, in truth; τῷ ὄντι, in reality: βία, forcibly; ταύτη, in this manner, thus; λόγω, in word, ἔργω, in deed; τῆ ἐμῆ γνώμη, in my judgment; ἰδία, privately; δημοσία, publicly; κοινή, in common. Means or Instrument: Όρωμεν τοῖς ὀφθαλμοῖς, we see with our eyes; γνωσθέντες τῆ σκευή τῶν ὅπλων, recognized by the fashion of their arms, T.1,8; κακοῖς ἱασθα κακά, to cure evils by evils, S. frag.75; οὐδείς ἔπαινον ἡδοναῖς ἐκτήσατο, no one gains praise by pleasures, Stob.29, 31.

1182. N. The dative of respect is a form of the dative of manner; as τοις σώμασιν ἀδύνατοι,... ταις ψυχαις ἀνόητοι, incapable in their bodies,... senseless in their minds, X.M.2, 131; ὕστερον ὁν τῆ τάξει, πρότερον τῆ δυνάμει και κρείττον ἐστιν, although it is later in order, it is prior and superior in power, D.3, 15. So πόλις, Θάψακος ὀνόματι, a city, Thapsacus by name, X.A.1, 411.

This dative often is equivalent to the accusative of specification (1058).

1183. Χράομαι, to use (to serve one's self by), takes the dative of means; as χρώνται άργυρίω, they use money. A neuter pronoun (e.g. τί, τὶ, ὅ τι, οτ τοῦτο) may be added as a cognate accusative (1051); as τί χρήσεταί ποτ' αὐτῷ; what will he do with him? (lit. what use will be make of him?), Ar. Ach. 935. Νομίζω has sometimes the same meaning and construction as χράομαι.

1184. The dative of manner is used with comparatives to denote the degree of difference. E.g.

 $\Pi$  ολλ $\hat{\omega}$  κρεῖττόν ἐιτιν, it is much better (hetter by much); ἐὰν τ $\hat{\eta}$  κε $\varphi$ αλ $\hat{\eta}$  μείζονά τινα φης εἶναι καὶ ἐλάττω, if you say that anyone is a head taller or shorter (lit. by the head), P. Ph. 101\*.  $\Pi$  όλι λογίμω  $\hat{\eta}$  Έλλας γέγονε ἀσθενεστέρη, Greece has become weaker by one

illustrious city, Hd. 6, 106. Τοσούτω ήδιον ζῶ, I live so much the more happily, X. C. 8,  $3^{40}$ ; τέχνη δ' ἀνάγκης ἀσθενεστέρα μακρῷ, and art is weaker than necessity by far, A. Pr. 514.

1185. So sometimes with superlatives, and even with other expressions which imply comparison; as δρθότατα μακρφ, most correctly by far, P. Lg. 768°; σχεδὸν δέκα ἔτεσι πρὸ τῆς ἐν Σαλαμῖνι ναυμαχίας, about ten years before the sea-fight at Salamis, ibid. 698°.

#### DATIVE OF AGENT.

1186. The dative sometimes denotes the agent with the perfect and pluperfect passive, rarely with other passive tenses. E.g.

Έξετάσαι τί πέπρακται τοις ἄλλοις, ιο ask what has been done by the others, D.2,27; ἐπειδη αὐτοις παρεσκεύαστο, when preparation had been made by them (when they had their preparation made), T.1,46; πολλαι θεραπείαι τοις ιατροίς ευρηνται, many cures have been discovered by physicians, I.S,39.

- 1187. N. Here there seems to be a reference to the agent's interest in the result of the completed action expressed by the perfect and pluperfect. With other tenses, the agent is regularly expressed by  $\acute{v}$  $\acute{v}$  $\acute{v}$  ctc. and the genitive (1234); only rarely by the dative, except in poetry.
- 1188. With the verbal adjective in  $-\tau \acute{e}os$ , in its personal construction (1595), the agent is expressed by the dative; in its impersonal construction (1597), by the dative or the accusative.

#### DATIVE OF ACCOMPANIMENT.

1189. The dative is used to denote that by which any person or thing is accompanied. E.g.

Έλθόντων Περσών παμπληθεῖ στόλω, when the Persians came with an army in full force,  $X.A.3, 2^{11}$ ; ήμεῖς καὶ ἴπποις τοῖς δυνατωτάτοις καὶ ἀνδράσι πορευώμεθα, let us march both with the strongest horses and with men,  $X.C.5, 3^{35}$ ; οἱ Λακεδαιμόνιοι τῷ τε κατὰ γῆν στρατῷ προσέβαλλον τῷ τειχίσματι καὶ ταῖς ναυσίν, the Lacedaemonians attacked the wall both with their land army and with their ships, T.4, 11.

1190. This dative is used chiefly in reference to military forces, and is originally connected with the dative of means. The last example might be placed equally well under 1181.

1191. This dative sometimes takes the dative of αὐτός for emphasis; as μίαν (ναῦν) αὐτοῖς ἀνδράσιν είλον, they took one (ship) men and all, T.2,90. Here no instrumental force is seen, and the dative may refer to any class of persons or things; as χαμαὶ βάλε δίνδρεα μακρὰ αὐτῆσιν ῥίζησι καὶ αὐτοῖς ἄνθεσι μήλων, he threw to the ground tall trees, with their very roots and their fruit-blossoms, Il.9,541.

#### DATIVE OF TIME.

1192. The dative without a preposition often denotes time when. This is confined chiefly to nouns denoting day, night, month, or year, and to names of festivals. E.g.

Τη αὐτη ἡμέρα ἀπέθανεν, he died on the same day; (Ἑρμαῖ) μιᾶ νυκτὶ οἱ πλεῖστοι περιεκόπησαν, the most of the Hermae were mutilated in one night, T.6,27; οἱ Σάμιοι ἐξεπολιορκήθησαν ἐνάτω μηνί, the Samians were taken by siege in the ninth month, T.1,117; δεκάτω ἔτει ξυνέβησαν, they came to terms in the tenth year, T.1, 103; ώσπερεὶ Θεσμοφορίοις νηστεύομεν, we fast as if it were (on) the Thesmophoria, Ar.Av.1519. So τῆ ὑστεραία (sc. ἡμέρα), on the following day, and δευτέρα, τρίτη, on the second, third, etc., in giving the day of the month.

- 1193. N. Even the words mentioned, except names of festivals, generally take  $\hat{\epsilon}_{\nu}$  when no adjective word is joined with them. Thus  $\hat{\epsilon}_{\nu}$  νυκτί, at night (rarely, in poetry, νυκτί), but  $\mu \hat{\mu}$  νυκτί, in one night.
- 1194. N. A few expressions occur like δστέρω χρόνω, in after time; χειμῶνος ώρη, in the winter season; νουμηνία (new-moon day), on the first of the month; and others in poetry.
- 1195. N. With other datives expressing time  $\dot{\epsilon}\nu$  is regularly used; as  $\dot{\epsilon}\nu$   $\tau\hat{\varphi}$  adv $\hat{\varphi}$   $\chi\epsilon\iota\mu\hat{\omega}\nu\iota$ , in the same winter, T.2,34. But it is occasionally omitted.

#### DATIVE OF PLACE.

1196. In poetry, the dative without a preposition often denotes the place where. E.g.

Έλλάδι οἰκία ναίων, inhabiting dwellings in Hellas, Il.16,595; alθέρι ναίων, dwelling in heaven, Il.4,166; οὖρεσι, on the mountains, Il.13,390; τόξ ὤμοισιν ἔχων, having his bow on his shoulders, Il.1,45; μίμνει ἀγρῷ, he remains in the country, Od.11,188. Ἦσθαι δόμοις, to sit at home, A.Ay.862. Νῦν ἀγροῖσι τυγχάνει (sc. ὧν), now he happens to be in the country, S. El.313.

1197. In prose, the dative of place is chiefly confined to the names of Attic demos; as ή Μαραθώνι μάχη, the battle at Marathon (but ἐν ᾿Αθήναις): see μὰ τοὺς Μαραθώνι προκινδυνεύσαντας τῶν προγόνων καὶ τοὺς ἐν Πλαταίαις παραταξαμένους καὶ τοὺς ἐν Σαλαμῖνι ναυμαχήσαντας, no, by those of our ancestors who stood in the front of danger at Marathon, and those who arrayed themselves at Plataea, and those who fought the sea-fight at Salamis, D.18,208.

Still some exceptions occur.

1198. N. Some adverbs of place are really local datives; as ταύτη, τῆδε, here; οἴκοι, at home. So κύκλω, in a circle, all around. (See 436.)

### PREPOSITIONS.

- 1199. The prepositions were originally adverbs, and as such they appear in composition with verbs (see 882, 1). They are used also as independent words, to connect nouns with other parts of the sentence.
- 1200. Besides the prepositions properly so called, there are certain adverbs used in the same way, which cannot be compounded with verbs. These are called *improper* prepositions. For these see 1220.
- 1201. 1. Four prepositions take the genitive only: ἀντί, ἀπό,  $\xi\xi$  ( $\xi\kappa$ ),  $\pi\rho\dot{\phi}$ ,— with the improper prepositions ἄνευ, ἄτερ, ἄχρι, μέταξύ, ἔνεκα, πλήν.

2. Two take the dative only: iv and our.

- 3. Two take the accusative only: dvá and dis or ds, with the improper preposition as. For dvá in poetry with the dative, see 1203.
- 4. Four take the genitive and accusative: διά, κατά, μετά, and δπέρ. For μετά with the dative in Homer, see 1212, 2.
- 5. Six take the genitive, darive, and accusative: ἀμφί (rare with genitive), ἐπί, παρά, περί, πρός, and ὑπό.

#### USES OF THE PREPOSITIONS.1

- 1202. ἀμφί (Lat. amb., compare ἄμφω, both), originally on both sides of; hence about. Chiefly poetic and lonic. In Attie prose περί is generally used in most senses of ἀμφί.
  - with the generive (very rare in prose), about, concerning: aμφί γυναικός, about a woman, Λ. Ag. 62.
- <sup>1</sup> Only a general statement of the various uses of the prepositions is given here. For the details the Lexicon must be consulted.

- with the hative (only poetic and Ionic), about, concerning, on account of: ἀμφ' ὅμοισι, about his shoulders, Il. 11, 527; ἀμφὶ τῷ νόμφ τούτφ, concerning this law, IId. 1, 140; ἀμφὶ φόβφ, through fear, E. Or. 825.
- with the Accesative, about, near, of place, time, number, etc.: dµφ' äλα, by the sea, H. 1,409; ἀμφὶ δείλητ, near evening, X.C. 5,410; ἀμφὶ Πλειάδων δύσιν, about (the time off the Pleiads' setting, Λ.Αy. 826. - (b) by aid of: σὺν θεώ, with God's help, Il.9, 49.
- (c) in accordance with: oùr blkq, with justice, Pind. Py. 9, 96.
- (d) sometimes instrumental (like simple dative): μέγαν πλοῦτον ἐκτήσω ξὸν alχμῆ, thou didst gain great wealth by (with) thy spear, A. Pe. 755.

In comp.: with, together, altogether.

# 1218. ὑπέρ (Hom. also ὑπείρ), over (Lat. super).

- 1. with the generive:
  - (a) of place: στη ὑπὲρ κεφαλης, it stood over (his) head,
     Il.2,20; of motion over: ὑπὲρ θαλάσσης καὶ χθονὸς ποτωμένοις (sc. ἡμῶν), as we flit over sea and land, Λ.Αμ.576.
  - (b) for, in behalf of (opposed to κατά): θυδμένα ὑπὲρ τῆς πόλεως, sacrificed in behalf of the city, X. M. 2, 2<sup>13</sup>; ὑπὲρ πάντων ἀγών, a struggle for our all, Λ. Pe. 405. Sometimes with τοῦ and infin., like ἕνα with subj.: ὑπὲρ τοῦ τὰ συνήθη μὴ γίγνεσθαι, to prevent what is customary from being done, Aesch. 3, 1.
  - (c) chiefly in the orators, concerning (like περί): την ύπερ τοῦ πολέμου γνώμην έχοντας, having such an opinion about the war, D. 2.1.
- with the accusative, over, beyond, exceeding: ὑπὲρ οὐδὸν ἐβήσετο δώματος, he stepped over the threshold of the house, Od.7, 135; ὑπὲρ πλα, over the sea, Od.3, 73; ὑπὲρ τὸ βέλτιστον, beyond what is best, A. Ag.378; ὑπὲρ δύναμιν, beyond its power. T. 6, 16.

In comp.: over, above, beyond, in defence of, for the sake of.

# 1219. ὑπό (Hom. also ὑπαί), under (Lat. sub), by.

- 1. with the genitive:
  - (a) of PLACE: τὰ ὑπὸ γῆς, things under the earth, P. Ap. 18b. Sometimes from under (chiefly poetic): οὖς ὑπὸ χθονὸς ἦκε φὸωσδε, whom he sent to light from beneath the earth, Hes. Th. 669.
  - (b) to denote the agent with passive verbs: et τις έτιματο ὑπὸ τοῦ δήμου, if any one was honored by the people, X. II.2, 315.
  - (c) of CAUSE: ὑπὸ δέους, through fear; ὑφ' ἡδονῆς, through pleasure; ὑπ' ἀπλοίας, by detention in port, T.2,85.
- with the dative (especially poetic): τῶν ὑπὸ ποσσί, beneath their feet, Il.2,784; τῶν βανόντων ὑπ᾽ Ἰλίφ, of those who fell under (the walls of) Ilium, E. Hec. 704; ὑπὸ τῆ ἀκροπόλι, under the acropolis, Hd. 6, 105; οἱ ὑπὸ βασιλεῖ ὅντες, those who are under the king, X.C.8, io.
- 3. with the accusative:
  - (a) of PLACE, under, properly to (a place) under: ὑπὸ σπόος ἤλασε μῆλα, he drives (drove) the sheep into (under) a cave,

- 11.4,279;  $\hbar\lambda\theta\epsilon\theta$   $\dot{\nu}\pi\dot{\sigma}$  Tpolyv, you came to Troy (i.e. to besiege it), Od. 4,146;  $\tau\dot{\alpha}\delta\epsilon$   $\pi\dot{\alpha}\nu\tau\dot{\alpha}$   $\dot{\nu}\pi\dot{\sigma}$   $\sigma\phi\hat{\alpha}s$   $\pi\dot{\sigma}\iota\epsilon\hat{\iota}\sigma\theta\dot{\alpha}\iota$ , to bring all these under their sway, T. 4,60.
- (b) of time, towards (entering into): ὑπὸ τὑκτα, at nightfall (Lat. sub noctem), T. 1, 115. Sometimes at the time of, during: ὑπὸ τὸν σεισμόν, at the time of the earthquake, T.2, 27.

In comp.: under (in place or rank), underhand, slightly, gradually (like sub).

- 1220. (Improper Prepositions.) These are ἄνευ, ἄτερ, ἄχρι, μέχρι, μεταξύ, ἔνεκα, πλήν, and ώς (see 1200). All take the genitive except ώς, which takes the accusative. They are never used in composition.
- 1. Then, without, except, apart from: Even Exolovidon, without an attendant,  $P.Sy.217^a$ ; Even  $\tau o \hat{v}$  kalpy  $\delta \delta \xi$  aver  $\xi v \in \gamma \kappa \epsilon \hat{v}$ , apart from (besides) bringing good reputation, 10.18,89.
- 2. ἄτερ, without, apart from (poetic): ἄτερ Ζηνός, without (the help of) Zeus, 11.15,292.
- 3. αχρι, until, as far as: αχρι της τελευτης, until the end, D.18, 179.
- 4.  $\mu$ éxpi, until, as far as:  $\mu$ éxpi  $\tau$  $\hat{\eta}$ s  $\pi$ bhews, as far as the city, T.6, 96.
- 5.  $\mu\epsilon\tau\alpha\xi\dot{\nu}$ , between:  $\mu\epsilon\tau\alpha\xi\dot{\nu}$  soplas kai  $\dot{a}\mu\alpha\theta las$ , between wisdom and ignorance, P.  $Sg.\,202^{a}$ .
- G. Evera or Every (Ionic equera, equerey), on account of, for the sake of (generally after its noun): übpios equera though, on account of this outrage, 11.1,214; modera kodakedely evera modes, to flatter no one for a raward, X,H.5,117. Also object (of Evera) for evera, chiefly in the dramatists.
- 7. πλήν, except: πλήν γ' έμοῦ και σοῦ, except myself and you, S. El. 909.
- 8. ώς, to, used with the accusative like εis, but only with personal objects: ἀφίκετο ώς Περδίκκαν και ες την Χαλκιδικήν, he came to Perdiccas and into Chalcidice, T.4, 79.
- 1221. 1. In general, the accusative is the case used with prepositions to denote that towards which, over which, along which, or upon which motion takes place; the genitive, to denote that from which anything proceeds; the dative, to denote that in which anything takes place.
- 2. It will be noticed how the peculiar meaning of each case often modifies the expression by which we translate a given preposition: thus  $\pi$ apá means near, by the side of; and we have  $\pi$ apá  $\tau$ o $\hat{\nu}$   $\beta$ a $\sigma$ i $\lambda$ éws, from the neighborhood of the king;  $\pi$ apà  $\tau$  $\hat{\omega}$   $\beta$ a $\sigma$ i $\lambda$ éi, in the neighborhood of the king:  $\pi$ apà  $\tau$  $\hat{\nu}$  $\nu$   $\beta$ a $\sigma$ i $\lambda$ éa, into the neighborhood of the king.

- 1222. 1. The original adverbial use of the prepositions sometimes appears when they are used without a noun; this occurs especially in the older Greek, seldon in Attic prose. Thus  $\pi\epsilon\rho\dot{i}$ , round about or exceedingly, in Homer; and  $\pi\rho\dot{o}s$ ,  $\delta\dot{\epsilon}$  or kai  $\pi\rho\dot{o}s$ , and besides;  $\dot{\epsilon}v$   $\delta\dot{\epsilon}$ , and among them;  $\dot{\epsilon}\pi\dot{i}$   $\delta\dot{\epsilon}$ , and upon this;  $\mu\epsilon\tau\dot{a}$   $\delta\dot{\epsilon}$ , and next; in Herodotus.
- 2. The preposition of a compound verb may also stand separately, in which case its adverbial force plainly appears; as ἐπὶ κνέφας ἢλθεν (κνέφας ἐπῆλθεν), darkness came on, H. 1,475; ἡμῶν ἀπὸ λοιγὸν ἀμῶναι (ἀπαμῶναι), to ward off destruction from us, H. 1,67.

This is called tness, and is found chiefly in Homer and the early poets.

- 1223. A preposition sometimes follows its case, or a verb to which it belongs; as νεῶν ἄπο, παιδὸς πέρι; ὀλέσας ἄπο (for ἀπολέσας), Od. 9, 534. For the change of accent (anastrophe), see 116, 1.
- 1224. N. A few prepositions are used adverbially, with a verb (generally ἐστί) understood; as πάρα for πάρεστι, ἔπι and μέτα (in Homer) for ἔπεστι and μέτεστι. So ἔνι for ἔνεστι, and poetic ἄνα, up! for ἀνάστα (ἀνάστηθι). For the accent, see 116, 2.
- 2. So ἐν with the dative sometimes occurs with verbs of motion, referring to rest which follows the motion; as ἐν τῷ ποταμῷ ἔπεσον, they fell (into and remained) in the river, X. Ay. 1, 32: ἐν γούνασι πίπτε Διώνης, she fell on Dione's knees, Il. 5, 370: see S. El. 1476.

These (1 and 2) are instances of the so-called constructio prac gnans.

1226. N. Adverbs of place are sometimes interchanged in the same way (1225); as  $\delta\pi$  or  $\kappa\alpha\theta\epsilon\sigma\tau\alpha\mu\epsilon\nu$ , where we are standing, lit. whither having come we are standing, S.O.C.23;  $\tau$ is dyvoil  $\tau$ ov  $\epsilon\kappa\epsilon\theta\epsilon\nu$   $\pi$ ode $\mu\nu$   $\delta\epsilon\theta\rho\sigma$   $\eta$ forta; who does not know that the war that is there will come hither? D. 1, 15.

So ἔνθεν καὶ ἔνθεν, on this side and on that, like ἐκ δεξιᾶς (a dextra), on the right.

1227. A preposition is often followed by its own case when it is part of a compound verb. E.g.

Παρεκομίζοντο τὴν Ἰταλίαν, they sailed along the coast of Italy, Τ. 6, 44; ἐσῆλθέ με, ѝ occurred to me, Hd. 7, 46; ἐξελθέτω τις δωμάτων, lct some one come forth from the house, A. Ch. 663; ξυνέπρασσον αὐτῷ ᾿Αμφισσῆς, Amphisseans assisted him, T. 3, 101. For other examples of the genitive, see 1132; for those of the dative, see 1179.

# ADVERBS.

1228. Adverbs qualify verbs, adjectives, and other adverbs. E.g.

Οὕτως εἶπέν, thus he spoke; ὡς δύναμαι, as I am able; πρῶτον ἀπῆλθε, he first went away; τὸ ἀληθῶς κακόν, that which is truly evil; αὐταί σ' ὁδηγήσουσι καὶ μάλ' ἀσμένως, these will guide you even most qladly,  $\Lambda$ .  $P\tau$ . 728.

1229. N. For adjectives used as adverbs, see 926. For adverbs preceded by the article, and qualifying a noun like adjectives, see 952. For adverbs with the genitive or dative, see 1088; 1092; 1148; 1174; 1175. For adverbs used as prepositions, see 1220.

## THE VERB.

#### VOICES.

#### ACTIVE.

- 1230. In the active voice the subject is represented as acting; as  $\tau \rho \epsilon \pi \omega$   $\tau o \nu s$   $\delta \phi \theta a \lambda \mu o \nu s$ , I turn my eyes;  $\delta \pi a \tau \eta \rho$   $\phi \iota \lambda \epsilon \hat{\iota}$   $\tau \delta \nu$   $\pi a \hat{\iota} \delta a$ , the father loves the child;  $\delta \tilde{\iota} \pi \pi \sigma s$   $\tau \rho \epsilon \chi \epsilon \iota$ , the horse runs.
- 1231. The form of the active voice includes most intransitive verbs; as τρέχω, run. On the other hand, the form of the middle or passive voice includes many deponent verbs which are active and transitive in meaning; as βούλομαι τοῦτο, I want this. Some transitive verbs have certain intransitive tenses, which generally have the meaning of the middle voice, as ἔστηκα, I stand, ἔστην, I stand, from ἴστημι, place; others have a passive force, as ἀνίστησαν ὑπ' αἰποῦ, they were driven out by him, T.1, 8.
  - 1232. The same verb may be both transitive and intransitive;

as ἐλαύνω, drive (trans. or intrans.) or march; ἔχω, have, sometimes hold or stay (as ἔχε δή, stay now, Γ. Pr. 349d); with adverbs, he, as εὖ ἔχει, it is well, bene se habet. So πράττω, do, εὖ (or κακῶς) πράττω, I am well (or badly) off, I do well (or badly). The intransitive use sometimes arose from the omission of a familiar object; as ἐλαύνειν (ἵππον ον ἄρμα), to drive, τελευτᾶν (τὸν βίον), to end (life) or to die. Compare the English verbs drive, turn, move, increase, etc.

#### PASSIVE.

- 1234. The object of the active becomes the subject of the passive. The subject of the active, the personal agent, is generally expressed by  $\acute{v}\pi\acute{o}$  with the genitive in the passive construction.
- 1235. The dative here, as elsewhere, generally expresses the inanimate instrument; as  $\beta \acute{a}\lambda\lambda o\nu\tau a\iota \lambda \acute{t}\theta o\iota s$ , they are pelted by stones.
- 1236. Even a genitive or dative depending on a verb in the active voice can become the subject of the passive; as καταφρονείται ὑπ' ἐμοῦ, he is despised by me (active, καταφρονῶ αὐτοῦ, 1102); πιστεύεται ὑπὸ τῶν ἀρχομένων, he is trusted by his subjects (active, πιστεύουσιν αὐτῷ, 1160); ἄρχονται ὑπὸ βασιλέων, they are ruled by kings (active, βασιλεῖς ἄρχουσιν αὐτῶν). Ύπὸ ἀλλοφύλων μᾶλλον ἐπεβουλεύοντο, they were more plotted against by men of other races, T. 1, 2 (active, ἐπεβούλευον αὐτοῖς).
- 1237. N. Other prepositions than  $\delta\pi\delta$  with the genitive of the agent, though used in poetry, are not common in Attic prose: such are  $\pi\alpha\rho\dot{\alpha}$ ,  $\pi\rho\dot{\delta}$ s,  $\delta\kappa$ , and  $\delta\pi\dot{\delta}$ . (See 1209, c.)
- 1238. 1. The perfect and pluperfect passive may have the *dative* of the agent.
- 2. The personal verbal in  $-\tau \acute{\epsilon}os$  takes the dative (1596), the impersonal in  $-\tau \acute{\epsilon}o\nu$  the dative or accusative, of the agent (1597).
- 1239. When the active is followed by two accusatives, or by an accusative of a thing and a dative of a person, the case denoting a person is generally made the subject of

the passive, and the other (an accusative) remains unchanged. E.q.

Οὐδὲν ἄλλο διδάσκεται ἄνθρωπος, a man is taught nothing else (in the active, οὐδὲν ἄλλο διδάσκουσι ἄνθρωπον), P. Men. 87°. "Αλλο τι μεῖζον ἐπιταχθήσεσθε, you will have some other greater command imposed on you (active, ἄλλο τι μεῖζον ὑμῖν ἐπιτάξουσιν, they will impose some other greater command on you), T.1, 140. Οἱ ἐπιτετραμμένοι τὴν ψυλακήν, those to whom the guard has been intrusted (active, ἐπιτρέπειν τὴν ψυλακὴν τούτοις), T.1, 126. Διφθέραν ἐνημμένος, clad in a leathern jerkin (active, ἐνάπτειν τί τινι, to fit a thing on one), Ar. N. 72. So ἐκκόπτεσθαι τὸν ὀψθαλμόν, to have his eye cut out, and ἀποτέμνεσθαι τὴν κεφαλήν, to have his head cut off, etc., from possible active constructions ἐκκόπτειν τί τινι, and ἀποτέμνειν τί τινι. 'This construction has nothing to do with that of 1058.

The first two examples are cases of the cognate accusative (1051) of the thing retained with the passive, while the accusative or dative

of the person is made the subject.

1240. 1. A cognate accusative (1051) of the active form, or a neuter pronoun or adjective representing such an accusative, may become the subject of the passive. E.g.

Ο κίνδυνος κινδυνεύεται, the risk is run (active, τον κίνδυνον κινδυνεύει, he runs the risk): see P. Lach. 1876. Εἰ οὐδὲν ἡμάρτηταί μοι, if no fault has been committed by me (active, οὐδὲν ἡμάρτηκα), And. 1, 33.

- 2. The passive may also be used impersonally, the cognate subject being implied in the verb itself; as ἐπειδη αὐτοῖς παρεσκεψ αστο, when preparation had been made, T. 1, 46; οὖτε ἡσέβηται οὖτε ὡμολόγηται (sc. ἐμοί), no sacrilege has been done and no confession has been made (by me), And, 1,71.
- 3. This occurs chiefly in such neuter participial expressions as τὰ σοὶ κὰμοὶ βεβιωμένα, the lives passed by you and by me, D.18, 265; αἱ τῶν πεπολιτευμένων εὖθυνα, the accounts of their public acts, D.1,28; so τὰ ἡσεβημένα, the impious acts which have been done; τὰ κινδυνευθέντα, the risks which were run; τὰ ἡμαρτημένα, the errors which have been committed, etc. Even an intransitive verb may thus have a passive voice.
- 1241. N. Some intransitive active forms are used as passives of other verbs. Thus εὖ ποιεῖν, to benefit, εὖ πάσχειν, to be benefited; εὖ λέγειν, to praise, εὖ ἀκούειν (poet. κλύειν), to be praised; αἰρεῖν, to capture, ἀλῶνωι, to be captured; ἀποκτείνειν, to kill, ἀποθυήσκειν, to be killed; ἐκβάλλειν, to cast out, ἐκπίπτειν, to be cast out; διώκειν, to prosecute, φεύγειν, to be prosecuted (to be a defendant); ἀπολύω, to acquit, ἀποφεύγω, to be acquitted.

#### MIDDLE.

- 1242. In the middle voice the subject is represented as acting upon himself, or in some manner which concerns himself.
  - 1. As acting on himself. E.g.

Έτράποντο πρὸς ληστείων, they turned themselves to piracy, Γ.1,5. So παύομαι, cease (stop one's self), πείθεσθαι, trust (persuade one's self), φαίνομαι, appear (show one's self). This most natural use of the middle is the least common.

- 2. As acting for himself or with reference to himself. E.a.
- 'Ο δημος τίθεται νόμους, the people make laws for themselves, whereas τίθησι νόμους would properly be said of a lawgiver; τοῦτον μεταπέμπομιι, I sewl for him (to come to me); ἀπεπέμπετο αὐτούς, he dismissed them; προβάλλεται την ἀσπίδα, he holds his shield to protect himself.
- As acting on an object belonging to himself. L.g.
   <sup>†</sup>Hλθε λυσόμενος θύγατρα, he came to ransom his (own) daughter,
   11.1, 13.
- 1243. N. The last two uses may be united in one verb, as in the last example.
- 1244. N. Often the middle expresses no more than is implied in the active; thus  $\tau\rho\delta\pi\alpha\omega\nu$   $l\sigma\tau\alpha\sigma\theta\alpha\iota$ , to raise a trophy for themselves, generally adds nothing but the expression to what is implied in  $\tau\rho\delta\pi\alpha\omega\nu$   $l\sigma\tau\dot{\alpha}\nu\alpha\iota$ , to raise a trophy; and either form can be used. The middle sometimes appears not to differ at all from the active in meaning; as the poetic  $l\delta\epsilon\sigma\theta\alpha\iota$ , to see, and  $l\delta\epsilon\dot{\nu}$ .
- 1245. N. The middle sometimes has a causative meaning; as εδιδαξάμην σε, I had you taught, Ar. N. 1338; but εδιδαξάμην means also I learned.

This gives rise to some special uses of the middle; as in δανείζω, lend, δανείζομα, borrow (cause somebody to lend to one's self); μισθώ, let, μισθούμα, hire (cause to be let to one's self); let myself for pay is έμαυτον μασθώ. So τίνω, pay a penalty, τίνομα, punish (make another pay a penalty).

1246. N. The middle of certain verbs is peculiar in its meaning. Thus, αἰρῶ, take, αἰροῦμαι, chuose; ἀποδίδωμι, give back, ἀποδίδομαι, sell; ἄπτω, fasten, ἄπτομαι, cling to (fasten myself to), so ἔχομαι, hold to, both with genitive; γαμῶ τινα, marry (said of a man), γαμοῦμαί

τινι, marry (said of a woman); γράφω, write or propose a vote, γράφωμαι, indict; τιμωρῶ τινι, I avenge a person, τιμωροῦμαί τινα, I avenge myself on a person or I punish a person; φυλάττω τινά, I guard some one, φυλάττομαί τινα, I am on my guard against some one.

- 1247. N. The passive of some of these verbs is used as a passive to both active and middle; thus  $\gamma \rho \alpha \phi \hat{\eta} \nu \alpha \iota$  can mean either to be written or to be indicted, alped $\hat{\eta} \nu \alpha \iota$  either to be taken or to be chosen.
- 1248. N. The future middle of some verbs has a passive sense; as ἀδικῶ, I wrong, ἀδικήσομαι, I shall be wronged.

#### TENSES.

1249. The tenses may express two relations. They may designate the time of an action as present, past, or future; and also its character as going on, as simply taking place, or as finished. The latter relation appears in all the moods and in the infinitive and participle; the former appears always in the indicative, and to a certain extent (hereafter to be explained) in some of the dependent moods and in the participle.

### I. TENSES OF THE INDICATIVE.

- 1250. The tenses of the indicative express action as follows:—
- 1. Present, action going on in present time: γράφω, I am writing.
- 2. IMPERFECT, action going on in past time: ἔγραφον, I was writing.
- 3. Perfect, action finished in present time: γέγραφα, I have written.
- Pluperfect, action finished in past time: ἐγεγράφη, I had written.
- 5. Aorist, action simply taking place in past time: ἔγραψα, I wrote.
- 6. Future, future action (either in its progress or in its mere occurrence):  $\gamma \rho \dot{a} \psi \omega$ , I shall write or I shall be writing.
- 7. Future Perfect, action to be finished in future time: γεγράψεται, it will have been written.

1251.	This	is	shown	in	the	folle	owing	table: -
-------	------	----	-------	----	-----	-------	-------	----------

	Present Time.	Past Time.	Future Time.
Action going }	PRESENT	IMPERFECT	FUTURE
Action simply } taking place }		Aorist	Future
Action }	Perfect	PLUPERFECT	Fut. Perfect

For the present and the agrist expressing a general truth (qnomic), see 1292.

1252. In narration, the present is sometimes used vividly for the aorist. E.g.

 $\mathbf{K}$  ελεύει πέμψαι ἄνδρας· ἀποστέλλουσιν οὖν, καὶ περὶ αὐτῶν ὁ Θεμιστοκλῆς κρύφα πέμπει, he bids them send men: accordingly they dispatch them, and Themistocles sends secretly about them, T.1,91.

This is called the Historic Present.

- 1253. 1. The present often expresses a customary or repeated action in present time; as οὖτος μὰν ΰδωρ, ἐγὼ δὲ οἶνον πίνω, he drinks water, and I drink wine, D. 19, 46. (See 1292.)
- 2. The imperfect likewise may express customary or repeated past action; as Σωκράτης ωσπερ εγίγνωσκεν οῦτως έλεγε, as Socrates thought, so he used to speak, X. M. 1, 14.
- 1254. The present  $\mu \acute{\epsilon} \lambda \lambda \omega$ , with the present or future (seldom the aorist) infinitive, forms a periphrastic future, which sometimes denotes intention or expectation; as  $\mu \acute{\epsilon} \lambda \lambda \epsilon \iota \tau o \hat{\nu} \tau o \pi o \epsilon \hat{\epsilon} \nu$  (or  $\pi o \iota \acute{\gamma} \tau o \epsilon \iota \nu$ ), he is about to do this;  $\epsilon \iota \iota \mu \acute{\epsilon} \lambda \lambda \epsilon \iota \dot{\gamma} \pi o \lambda \iota \tau \epsilon \acute{\iota} a \sigma \dot{\omega} \zeta \epsilon \sigma \theta a \iota$ , if the constitution is to be saved, P. Rp. 412\*.
- 1255. The present and especially the imperfect often express an attempted action; as  $\pi\epsilon i\theta o v \sigma i v v \mu \hat{a}s$ , they are trying to persuade you, Isae. 1, 26; 'Aldrigov  $\dot{\epsilon}\delta i\delta o v$ , he offered (tried to give) Halonnesus, Aesch. 3, 83;  $\hat{a}$   $\dot{\epsilon}\pi\rho \hat{a}\sigma\sigma\hat{\epsilon}\tau o o v \hat{\epsilon}\gamma\hat{\epsilon}v\hat{\epsilon}\tau o$ , what was attempted did not happen, T. 6, 74.
- 1256. The presents  $\tilde{\eta} \kappa \omega$ , I am come, and  $\tilde{\sigma}_{\chi 0} \mu \alpha \iota$ , I am gone, have the force of perfects; the imperfects having the force of pluperfects.
- 1257. The present  $\epsilon l\mu$ , l am going, with its compounds, has a future sense, and is used as a future of  $\epsilon \rho \chi o \mu a \iota$ ,  $\epsilon \lambda \epsilon \iota \sigma o \mu a \iota$  not being in good use in Attic prose. In Homer  $\epsilon l \mu$  is also present in sense.

- 1259. 1. The aorist takes its name (åόριστος, unlimited, unqualified) from its denoting a simple past occurrence, with none of the limitations (ὅροι) as to completion, continuance, repetition, etc., which belong to the other past tenses. It corresponds to the ordinary preterite in English, whereas the Greek imperfect corresponds to the forms I was doing, etc. Thus, ἐποίει τοῦτο is he was doing this or he did this habitually; πεποίηκε τοῦτο is he has already done this; ἐπεποιήκει τοῦτο is he had already (at some past time) done this; but ἐποίησε τοῦτο is simply he did this, without qualification of any kind. The aorist is therefore commonly used in rapid narration, the imperfect in detailed description. The aorist is more common in pegative sentences.
- 2. As it is not always important to distinguish between the progress of an action and its mere occurrence, it is occasionally indifferent whether the imperfect or the aorist is used; compare  $\tilde{\epsilon}\lambda\epsilon\gamma\nu\nu$  in T.1,72 (end) with  $\epsilon\tilde{t}\pi\nu\nu$ ,  $\tilde{\epsilon}\lambda\epsilon\xi\alpha\nu$ , and  $\tilde{\epsilon}\lambda\epsilon\xi\epsilon$  in 1,79. The two tenses show different views (both natural views) of the same act of speaking.
- 1260. The agrist of verbs which denote a state or condition may express the entrance into that state or condition; as  $\pi\lambda o \nu \tau \hat{\omega}$ , I om rich;  $\vec{\epsilon}\pi\lambda o \nu \tau o \nu$ , I was rich;  $\vec{\epsilon}\pi\lambda o \nu \tau o \tau o \nu$ . So  $\vec{\epsilon}\beta a \sigma \vec{\epsilon}\lambda \epsilon \nu \sigma \epsilon$ , he became king;  $\vec{\tau}\rho \xi \epsilon$ , he took office (also he held office).
- 1261. After  $i\pi\epsilon i$  and  $i\pi\epsilon i\delta \eta$ , after that, the agrict is generally to be translated by our pluperfect; as  $i\pi\epsilon i\delta \eta$   $i\pi\eta\lambda\theta\sigma\nu$ , after they had departed. Compare postquam venit.
- 1262. N. The agrist (sometimes the perfect) participle with  $\xi \chi \omega$  may form a periphrastic perfect, especially in Attic poetry; as  $\theta av\mu \dot{\alpha}\sigma as \ \ddot{\epsilon}\chi \omega \ \tau \dot{\delta}\delta\epsilon$ , I have wondered at this, S. Ph. 1362. In prose,  $\xi \chi \omega$  with a participle generally has its common force; as  $\tau \dot{\gamma} \nu \ \pi \rho o \dot{\kappa} \alpha \ \ddot{\epsilon}\chi \epsilon \lambda \alpha \beta \dot{\omega} \nu$ , he has received and has the dowry (not simply he has taken it), D. 27, 17.
- 1263. N. Some perfects have a present meaning; as  $\theta \nu \hat{\eta} \sigma \kappa \epsilon \nu$ , to die,  $\tau \epsilon \theta \nu \eta \kappa \hat{\epsilon} \nu a$ , to be dead;  $\gamma \hat{\epsilon} \gamma \nu \epsilon \sigma \theta a$ , to become,  $\gamma \epsilon \gamma \sigma \nu \hat{\epsilon} \nu a$ , to be;  $\mu \iota \mu \nu \hat{\eta} \sigma \kappa \epsilon \iota \nu$ , to remind,  $\mu \epsilon \mu \nu \hat{\eta} \sigma \theta a \iota$ , to remember;  $\kappa a \lambda \hat{\epsilon} \hat{\nu}$ , to call,  $\kappa \epsilon \kappa \lambda \hat{\eta} \sigma \theta a \iota$ , to be called. So of  $\delta a$ , I know, novi, and many others. This is usually explained by the meaning of the verb.

In such verbs the pluperfect has the force of an imperfect; as  $\eta \delta \eta$ , I knew.

- 1264. N. The perfect sometimes refers vividly to the future; as εἴ με αἰσθήσεται, ὅλωλα, if he shall perceive me, I am ruined (perií), S. Ph. 75. So sometimes the present, as ἀπόλλυμαι, I perish! (for I shall perish), L. 12, 14; and even the acrist, as ἀπωλόμην εἴ με λείψεις, I perish if you leave me, E. Al. 386.
- 1265. N. The second person of the future may express a permission, or even a command; as  $\pi \rho \hat{a} \xi \epsilon \iota s$  ofor  $\hat{a} \nu \theta \hat{\epsilon} \lambda g s$ , you may act as you please, S. O. C. 956;  $\pi \hat{a} \nu \tau \omega s$  de  $\tau \hat{o} \hat{\nu} \tau \hat{o} \delta \rho \hat{a} \sigma \epsilon \iota s$ , and by all means do this (you shall do this), Ar. N. 1352. So in imprecations; as  $\hat{a} \pi \hat{o} \lambda \hat{\epsilon} \hat{o} \theta \hat{e}$ , to destruction with you! (lit. you shall perish).

For the periphrastic future with  $\mu \hat{\epsilon} \lambda \lambda \omega$  and the infinitive, see 1254.

- 1266. N. The future perfect is sometimes merely an emphatic future, denoting that a future act will be immediate or decisive; as  $\phi \rho \delta \zeta \epsilon$ ,  $\kappa a \tilde{\iota} \pi \epsilon \pi \rho \delta \xi \epsilon \tau a \epsilon$ , speak, and it shall be (no somer said than) done, Ar. Pl. 1027. Compare the similar use of the perfect infinitive, 1275.
- 1267. 1. The division of the tenses of the indicative into primary (or principal) and secondary (or historical) is explained in 448.
- 2. In dependent clauses, when the construction allows both subjunctive and optative, or both indicative and optative, the subjunctive or indicative regularly follows primary tenses, and the optative follows secondary tenses. E.g.

Η ράττουσιν & αν βούλωνται, they do whatever they please; ξπραττον & βούλοιντο, they did whatever they pleased. Λέγουσιν ότι τοῦτο βούλοινται, they say that they wish for this; ξλέξαν ότι τοῦτο βούλοιντο, they said that they wished for this.

These constructions will be explained hereafter (1431; 1487).

- 1268. N. The guomic agrist is a primary tense, as it refers to present time (1292); and the historic present is secondary, as it refers to past time (1252).
- 1269. The only exception to this principle (1267, 2) occurs in indirect discourse, where the form of the direct discourse can always be retained, even after secondary tenses. (See 1481, 2).
- 1270. 1. The distinction of primary and secondary tenses extends to the dependent moods only where the tenses there keep the same distinction of time which they have in the indicative, as in the optative and infinitive of indirect discourse (1280).

2. An optative of future time generally assimilates a dependent conditional relative clause or protasis to the optative when it might otherwise be in the subjunctive: thus we should generally have πράττοιεν ἃν ἃ βούλοιντο, they would do whatever they might please. See 1439. Such an optative seldom assimilates the subjunctive or indicative of a final or object clause (1362) in prose; but oftener in poetry. It very rarely assimilates an indicative of indirect discourse, although it may assimilate an interrogative subjunctive (1358).

## II. TENSES OF THE DEPENDENT MOODS.

### A. NOT IN INDIRECT DISCOURSE.

- 1271. In the subjunctive and imperative, and also in the optative and infinitive when they are not in indirect discourse (1279), the tenses chiefly used are the present and agrist.
- 1272. 1. These tenses here differ only in this, that the present expresses an action in its duration, that is, as going on or repeated, while the acrist expresses simply its occurrence, the time of both being otherwise precisely the same. E.g.

'Eàν ποιῆ τοῦτο, if he shall be doing this, or if he shall do this (habitually), ἐὰν ποιήση τοῦτο, (simply) if he shall do this; εἰ ποιοίη τοῦτο, if he should be doing this, or if he should do this (habitually), εἰ ποιήσειε τοῦτο, (simply) if he should do this; ποίει τοῦτο, do this (habitually), ποίησον τοῦτο, (simply) do this. Οὕτω νικήσαιμί τ' ἐγὼ καὶ νομιζοίμην σοφός, on this condition may I gain the victory (aor.) and be thought (pres.) wise, Ar.N. 520. Βούλεται τοῦτο ποιεῖν, he wishes to be doing this or to do this (habitually), βούλεται τοῦτο ποιῆσαι, (simply) he wishes to do this.

2. This is a distinction entirely unknown to the Latin, which has (for example) only one form, si faciat, corresponding to εἰ ποιοίη and εἰ ποιήσειεν.

1273. The perfect, which seldom occurs in these constructions, represents an action as finished at the time at which the present would represent it as going on. E.g.

Δέδοικα μὴ λήθην πεποιήκη, I fear lest it may prove to have caused forgetfulness (μὴ ποιή would mean lest it may cause), D. 19,3. Μηδενὶ βοηθεῖν ὅς ἄν μὴ πρότερος βεβοηθηκῶς ὑμῖν ἢ, to help no one who shall not previously have helped you (ὅς ἄν μὴ ... βοηθη would mean who shall not previously help you), D. 19, 16. Οὐκ ἄν διὰ

- τοῦτό γ' εἶεν οὖκ εὖθὺς δεδωκότες, they would not (on enquiry) prove to have failed to pay immediately on this account (with διδοῖεν this would mean they would not fail to pay), D.30,10. Οὖ βουλεύεσθαι ἔτι ώρα, ἀλλὰ βεβουλεῦσθαι, it is no longer time to be deliberating, but (it is time) to have finished deliberating, P. Cr. 464.
- 1275. N. The perfect infinitive sometimes expresses decision or permanence (like the imperative, 1274), and sometimes it is merely more emphatic than the present; as  $\epsilon \tilde{t} \pi \sigma \nu \tau \tilde{\eta} \nu \theta \tilde{\nu} \rho \alpha \nu \kappa \epsilon \kappa \lambda \epsilon \tilde{\iota} \sigma \theta \alpha \iota$ , they ordered the gate to be shut (and kept so), X. H.  $\tilde{o}$ ,  $\tilde{4}^{\dagger}$ . Hlauvev  $\tilde{\epsilon} \pi \tilde{\iota}$  took Mévwors,  $\tilde{\omega} \sigma \tau$   $\tilde{\epsilon} \kappa \epsilon (\nu o v \tilde{\epsilon} \kappa \pi \epsilon \pi \lambda \tilde{\eta} \chi \theta \alpha \iota \kappa \alpha \iota \tau \rho \tilde{\epsilon} \chi \epsilon \iota \nu \tilde{\epsilon} \pi \iota \tau \tilde{\alpha} \tilde{\sigma} \lambda \alpha$ , so that they were (once for all) thoroughly frightened and ran to arms, X. A. 1, 518. The regular meaning of this tense, when it is not in indirect discourse, is that given in 1273.
- 1276. The future infinitive is regularly used only to represent the future indicative in indirect discourse (1280).
- 1277. It occurs occasionally in other constructions, in place of the regular present or agrist, to make more emphatic a future idea which the infinitive receives from the context. E.g.

Έδεήθησαν των Μεγαρέων ναυσὶ σφως ξυμπροπέμψειν, they asked the Megarians to escort them with ships, T.1,27. Οὐκ ἀποκωλύσειν δυνατοὶ ὄντες, not being able to prevent, T.3,28. In all such cases the future is strictly exceptional (see 1271).

1278. One regular exception to the principle just stated is found in the periphrastic future (1254).

#### B. IN INDIRECT DISCOURSE.

1279. The term indirect discourse includes all clauses depending on a verb of saying or thinking which contain the thoughts or words of any person stated indirectly, i.e. incorporated into the general structure of the sentence. It includes of course all indirect quotations and questions.

1280. When the optative and infinitive stand in indirect discourse, each tense represents the corresponding tense of the same verb in the direct discourse. E.g.

Έλεγεν ὅτι γράφοι, he said that he was writing (he said γράφω, I am writing); ἔλεγεν ὅτι γράψοι, he said that he would write (he said γράψω, I will write); ἔλεγεν ὅτι γράψειεν, he said that he had written (he said ἔγραψα); ἔλεγεν ὅτι γεγραφώς ἔτη, he said that he had already written (he said γέγραφα). "Ηρετο εἴ τις ἐμοῦ εἴη σοφώτερος, he asked whether any one was wiser than I (he asked ἔστι τις;), I'. Ap. 212.

Φησὶ γράφειν, he says that he is writing (he says γράφω); φησὶ γράψειν, he says that he will write (γράψω); φησὶ γράψαι, he says that he wrote (ἔγραψα); φησὶ γεγραφέναι, he says that he has

written (γέγραφα). For the participle, see 1288.

Εἶπεν ὅτι ἄνδρα ἄγοι ὁν εἶρξαι δέοι, he said that he was bringing a man whom it was necessary to confine (he said ἄνδρα ἄγω ὃν εἶρξαι δεῖ), Χ. Π. 5, 48. Ἐλογίζοντο ὡς, εἶ μὴ μάχοιντο, ἀποστήσοιντο αἰ πόλεις, they considered that, if they should not fight, the cities would revolt (they thought ἐὰν μὴ μαχώμεθα, ἀποστήσονται, if we do not fight, they will revolt), ibid. 6, 49.

- 1281. N. These constructions are explained in 1487, 1494, and 1497. Here they merely show the force of the tenses in indirect discourse. Compare especially the difference between φητὶ γράφειν and φητὶ γράψαι above with that between βούλεται ποιεῖν and βούλεται ποιῆσαι under 1272. Notice also the same distinction in the present and agrist optative.
- 1282. N. The construction of 1280 is the strictly proper use of the future infinitive (1276; 1277).
- 1283. N. The future perfect infinitive is occasionally used here, to express future completion; as νομίζετε ἐν τῆδε τῆ ἡμέρα ἐμὲ κατακεκόψεσθαι, believe that on that day I shall have been already (i.e. shall be the same as) cut in pieces, X.A.1, 516.
- 1284. N. The future perfect participle very rarely occurs in a similar sense (see T.7, 25).
- 1285. 1. The present infinitive may represent the imperfect as well as the present indicative; as τίνας εὐχὰς ὑπολαμβάνετ' εὐχεσθαι τὸν Φιλιππον ὅτ' ἔσπενδεν; what prayers do you suppose Philip made when he was pouring libations? (i.e. τίνας ηὕχετο;), D.19,130. The perfect infinitive likewise represents both perfect and pluperfect. In such cases the time of the infinitive must always be shown by the context (as above by ὅτ' ἔσπενδεν). See 1289.

2. For the present optative representing the imperfect, see 1488.

1286. Verbs of hoping, expecting, promising, swearing, and a few others, form an intermediate class between verbs which take the infinitive in indirect discourse and those which do not (see 1279); and though they regularly have the future infinitive (1280), the present and agrist are allowed. E.g.

"Hλπιζον μάχην ἔσεσθαι, they expected that there would be a battle, T.4,71; but α οὖποτε ῆλπισεν παθεῖν, what he never expected to suffer, E. H. F.746. Xenophon has ὑπέσχετο μηχανὴν παρέξειν, C.6,121, and also ὑπέσχετο βουλεύσασθαι, A.2,320. 'Ομόσαντες ταύτως ἐμμενεῖν, having sworn to abide by these, X. H. 5,326; but ὁμόσαι εἶναι μὲν τὴν ἀρχὴν κοινὴν, πάντας δ' ὑμῖν ἀποδοῦναι τὴν χώραν, to swear that the government should be common, but that all should give up the land to you, D.23, 170.

In English we can say I hope (expect or promise) to do this, like ποιών οr ποιήσωι; or I hope I shall do this, like ποιήσων.

1287. N. The future optative is never used except as the representative of the future indicative, either in indirect discourse (see 1280), or in the construction of 1372 (which is governed by the principles of indirect discourse). Even in these the future indicative is generally retained. See also 1503.

#### III. TENSES OF THE PARTICIPLE.

1288. The tenses of the participle generally express the same time as those of the indicative; but they are present, past, or future relatively to the time of the verb with which they are connected. E.g.

Αμαρτάνει τοῦτο ποιῶν, he errs in doing this: ἡμάρτανε τοῦτο ποιῶν, he erred in doing this; ἁμαρτήσεται τοῦτο ποιῶν, he will err in doing this. (Here ποιῶν is first present, then past, then future, absolutely; but always present to the verb of the sentence.) So in indirect discourse: οίδα τοῦτον γράφοντα (γράψαντα, γράψοντα, οτ γεγραφότα), I know that he is writing (that he wrote, will write, or has written). Οὖ πολλοὶ φαίνονται ἐλθόντες, not many appear to have gone (on the expedition), T.1,10. (For other examples, see 1588.)

Ταῦτα εἰπόντες, ἀπῆλθον, having said this, they departed. Ἐπήνεσαν τοὺς εἰρηκότας, they praised those who had (already) spoken. Τοῦτο ποιήσων ἔρχεται, he is coming to do this; τοῦτο ποιήσων ἤλθεν, he came to do this. Ἦπελθε ταῦτα λαβών, take this and be off (λαβών being past to ἄπελθε, but absolutely future).

1289. The present may here also represent the imperfect; as

οίδα κάκείνω σωφρονοῦντε, ἔστε Σωκράτει συνήστην, I know that they both were temperate as long as they associated with Socrates (i.e. ἐσωφρονείτην), X. M. 1, 218. (See 1285.)

1290. N. The agrist participle in certain constructions (generally with a verb in the agrist) does not denote time past with reference to the leading verb, but expresses time coincident with that of the verb. See examples in 1563, 8; 1585; 1586. See Greek Moods, §§ 144-150.

## IV. GNOMIC AND ITERATIVE TENSES.

1291. The present is the tense commonly used in Greek, as in English, to denote a general truth or an habitual action. E.g.

Τίκτει τοι κόρος υβριν, όταν κακώ όλβος έπηται, satisty begets insolence, whenever prosperity follows the wicked, Theog. 153.

1292. In animated language the agrist is used in this sense. This is called the *gnomic agrist*, and is generally translated by the English present. E.g.

"Ην τις τούτων τι παραβαίνη, ζημίαν αὐτοις ἐπέθεσαν, i.e. they impose a penalty on all who transgress, X. C. 1, 22. Μί ἡμέρα τὸν μὲν καθείλεν ὑψόθεν, τὸν δ' ἡρ' ἀνω, one day (often) brings down one man from a height and raises another high, E. frag. 424.

- 1293. N. Here one case in past time is vividly used to represent all possible cases. Examples containing such adverbs as πολλάκις, often, ήδη, already, ούπω, never yet, illustrate the construction; as δθυμούντες ἄνδρες ούπω τρόπαιον ἔστησαν, disheartened men never yet raised (i.e. never raise) a trophy, P. Critias, 108c.
- 1294. N. An agrist resembling the gnomic is found in Homeric similes; as  $\tilde{\eta}\rho\iota\pi\epsilon \delta$  is  $\tilde{\delta}\tau\epsilon$  its  $\delta\rho\hat{v}s$   $\tilde{\eta}\rho\iota\pi\epsilon\nu$ , and he fell, as when some oak falls (lit. as when an oak once fell), 1l. 13, 389.
- 1295. The perfect is sometimes gnomic, like the agrist. E.g.
- To δε μη εμποδών ανανταγωνίστω ευνοία τετίμηται, but those who are not before men's eyes are honored with a good will which has no rivalry, T.2,45.
- 1296. The imperfect and agrist are sometimes used with the adverb  $\tilde{a}_{\nu}$  to denote a customary action. E.g.

Διηρώτων αν αυτούς τί λέγοιεν, Î used to ask them (I would often ask them) what they said, P. Ap. 22°. Πολλάκις ήκούσα μεν αν υμας, we used often to hear you, Ar. Lys. 511.

- 1297. N. This iterative construction must be distinguished from that of the potential indicative with  $\tilde{a}\nu$  (1335). It is equivalent to our phrase he would often do this for he used to do this.
- 1298. N. The Ionic has iterative forms in  $-\sigma\kappa\rho\nu$  and  $-\sigma\kappa\rho\mu\eta\nu$  in both imperfect and agrist. (See 778.) Herodotus uses these also with  $d\nu$ , as above (1296).

## THE PARTICLE "AN.

- 1299. The adverb  $\tilde{a}\nu$  (epic  $\kappa\epsilon$ , Doric  $\kappa\acute{a}$ ) has two distinct uses.
- 1. It may be joined to all the secondary tenses of the indicative (in Homer also to the future indicative), and to the optative, infinitive, or participle, to denote that the action of the verb is dependent on some circumstances or condition, expressed or implied. Here it belongs strictly to the verb.
- 2. It is joined regularly to  $\epsilon l$ , if, to all relative and temporal words, and sometimes to the final particles  $\dot{\omega}_{S}$ ,  $\ddot{\upsilon}\pi\omega_{S}$ , and  $\ddot{\upsilon}\phi\rho\alpha$ , when these are followed by the subjunctive. Here, although as an adverb it qualifies the verb, it is always closely attached to the particle or relative, with which it often forms one word, as in  $\dot{\epsilon}\acute{\alpha}\nu$ ,  $\ddot{\upsilon}\tau\alpha\nu$ ,  $\dot{\epsilon}\pi\epsilon\iota\delta\acute{\alpha}\nu$ .
- 1300. N. There is no English word which can translate αν. In its first use it is expressed in the would or should of the verb (βούλοιτο αν, he would wish; έλοίμην αν, I should choose). In its second use it generally has no force which can be made apparent in English.
- 1301. N. The following sections (1302-1309) enumerate the various uses of  $\tilde{a}\nu$ : when these are explained more fully elsewhere, reference is made to the proper sections.
  - 1302. The present and perfect indicative never take av.
- 1303. The future indicative sometimes takes  $\tilde{a}_{\nu}$  (or  $\kappa \hat{\epsilon}$ ) in the early poets, especially Homer; very rarely in Attic Greek. E.g.

Καί κέτις ώδ ερέει, and some one will (or may) thus speak, 11.4, 176; ἄλλοι οι κέ με τιμήσουσι, others who will (perchance) honor me,

- II. 1,174. The future with  $\tilde{a}\nu$  seems to be an intermediate form between the simple future, will honor, and the optative with  $\tilde{a}\nu$ , would honor. One of the few examples in Attic prose is in P. Ap. 29°.
- 1304. 1. The past tenses of the indicative (generally the imperfect or agrist) are used with  $\tilde{a}_{\nu}$  in a potential sense (1335), or in the apodosis of an unfulfilled condition (1397). E.g.

Οὐδεν ἃν κακὸν ἐποίησαν, they could (or would) have done no harm; ἦλθεν ἃν εἰ ἐκέλευσα, he would have come if I had commanded him.

- 2. The imperfect and agrist indicative with  $\tilde{a}\nu$  may also have an iterative sense. (See 1296.)
- 1305. 1. In Attic Greek the subjunctive is used with  $\tilde{a}\nu$  only in the dependent constructions mentioned in 1299, 2, where  $\tilde{a}\nu$  is attached to the introductory particle or relative word.

See 1367; 1376; 1382; 1428, 2.

2. In epic poetry, where the independent subjunctive often has the sense of the future indicative (1355), it may take  $\kappa \epsilon$  or  $\tilde{a}\nu$ , like the future (1303). E.g.

El δί κε μὴ δώησιν, ἐγὼ δί κεν αὐτὸς ἔλωμαι, and if he does not give her up, I will take her myself, Il. 1, 324.

- 1306. The optative with  $\check{a}\nu$  has a potential sense (1327), and it often forms the apodosis of a condition expressed by the optative with  $\epsilon i$ , denoting what would happen if the condition should be fulfilled (1408).
  - 1307. N. The future optative is never used with av (1287).
- 1308. 1. The present and agrist (rarely the perfect) infinitive and participle with  $\tilde{a}_{\nu}$  represent the indicative or optative with  $\tilde{a}_{\nu}$ ; each tense being equivalent to the corresponding tense of one of these moods with  $\tilde{a}_{\nu}$ ,—the present representing also the imperfect, and the perfect also the pluperfect (1285; 1289).
- 2. Thus the present infinitive or participle with a may represent either an imperfect indicative or a present optative with a; the agrist, either an agrist indicative or an

aorist optative with  $\tilde{a}_{\nu}$ ; the perfect, either a pluperfect indicative or a perfect optative with  $\tilde{a}_{\nu}$ . E.g.

(Pres.) Φησὶν αὐτοὺς ἐλευθέρους ἄν εἶναι, εἰ τοῦτο ἔπραξαν, he says that they would (now) be free (ἦσαν ἄν), if they had done this; φησὶν αὐτοὺς ἐλευθέρους ἄν εἶναι, εἰ τοῦτο πράξειαν, he says that they would (hereafter) be free (εἶεν ἄν), if they should do this. Οἶδα αὐτοὺς ἐλευθέρους ἄν ὄντας, εἰ τοῦτο ἔπραξαν, I know that they would (now) be free (ἦσαν ἄν), if they had done this; οἶδα αὐτοὺς ἐλευθέρους ἄν ὄντας, εἰ ταῦτα πράξειαν, I know that they would (hereafter) be free (εἶεν ἄν), if they should do this. Πολλ' ἄν ἔχων ἕτερ' εἰπεῖν, although I might (= ἔχοιμι ἄν) say many other things, I. 18.258.

(Aor.) Φασίν αὐτὸν ἐλθεῖν ἃν (or οἶδα αὐτὸν ἐλθόντα ἃν), εἰ τοῦτο ἐγένετο, they say (or I know) that he would have come (ἤλθεν ἄν), if this had happened; φασίν αὐτὸν ἐλθεῖν ἃν (or οἶδα αὐτὸν ἐλθόντα ἃν), εἰ τοῦτο γένοιτο, they say (or I know) that he would come (ἔλθοι ἄν), if this should happen. 'Paδίως ἃν ἀφεθεὶς, προείλετο ἀποθανεῖν, whereas he might easily have been acquitted (ἀφείθη ἄν), he preferred to die, X.M.4.44.

(Perf.) Εὶ μὴ τὰς ἀρετὰς ἐκείνας παρέσχοντο, πάντα ταθθ ὑπὸ τῶν βαρβάρων ἃν ἑαλωκ έναι (φήσειεν ἄν τις), had they not exhibited those exploits of valor, we might say that all this would have been captured by the barbacians (ἐαλώκει ἄν), D.19,312. Οὖκ ἃν ἡγοῦμαι αὐτοὺς δίκην ἀξίαν δεδωκέναι, εἰ αὐτῶν καταψηφίσαισθε, I do not think they would (then, in the future, prove to) have suffered proper punishment (δεδωκότες ἃν εἶεν), if you should condown them, 1, 27, 9.

The context must decide in each case whether we have the equivalent of the indicative or of the optative with  $\tilde{a}\nu$ . In the examples given, the form of the protasis generally settles the question.

1309. The infinitive with  $\tilde{a}_{r}$  is used chiefly in indirect discourse (1494); but the participle with  $\tilde{a}_{r}$  is more common in other constructions (see examples above).

As the early poets who use the future indicative with  $\tilde{a}\nu$  (1303) seldom use this construction, the future infinitive and participle with  $\tilde{a}\nu$  are very rare.

1310. When  $\tilde{a}_{\nu}$  is used with the subjunctive (as in 1299, 2), it is generally separated from the introductory word only by monosyllable particles like  $\mu \acute{e}_{\nu}$ ,  $\delta \acute{e}$ ,  $\tau \acute{e}$ ,  $\gamma \acute{e}_{\nu}$ , etc.

1311. When  $\tilde{a}_T$  is used with the indicative or optative, or in any other potential construction, it may either be placed next to its verb, or be attached to some other emphatic word (as a negative example).

1312. In a long apodosis  $\tilde{a}_{\nu}$  may be used twice or even three times with the same verb. E.g.

Οὐκ ἃν ἡγεῖσθ' αὐτὸν κᾶν ἐπιδραμεῖν; do you not think that he would even have rushed thither? D.27,56. In T.2,41, ἄν is used three times with  $\pi$ αρέχεσθαι.

1313. "A $\nu$  may be used elliptically with a verb understood. E.g.

Οἱ οἰκέται ῥέγκουσιν ἀλλ' οὐκ ἄν πρὸ τοῦ (sc. ἔρρεγκον), the slaves are snoring; but in old times they would n't have done so, Ar. N.5. So in φοβούμενος ισπερ ἃν εἰ παῖς, fearing like a child (ισπερ ἃν ἐφοβεῖτο εἰ παῖς ην), P. G. 479.

1314. When an apodosis consists of several co-ordinate verbs,  $\tilde{a}_{\nu}$  generally stands only with the first. E.g.

Οιδεν αν διάφορον τοῦ ἐτέρου ποιοῖ. ἀλλ' ἐπὶ ταὐτὸν τοιεν ἀμφότεροι, he would do nothing different from the other, but both would aim at the same object (ἄν belongs also to τοιεν), P. Rp. 860°.

1315. "Av never begins a sentence or a clause.

1316. N. The adverb  $\tau \dot{\alpha} \chi \alpha$ , quickly, soon, readily, is often prefixed to  $\tilde{\alpha} \nu$ , in which case  $\tau \dot{\alpha} \chi^*$   $\tilde{\alpha} \nu$  is nearly equivalent to  $i\sigma \omega s$ , perhaps. The  $\tilde{\alpha} \nu$  here always belongs in its regular sense (1299,1) to the verb of the sentence; as  $\tau \dot{\alpha} \chi^*$   $\tilde{\alpha} \nu$   $\tilde{\epsilon} \lambda \theta \omega$ , perhaps he would come;  $\tau \dot{\alpha} \chi^*$   $\tilde{\alpha} \nu$   $\tilde{\gamma} \lambda \theta \dot{\nu}$ , perhaps he would (or might) have come.

### THE MOODS.

- 1317. The indicative is used in simple, absolute assertions, and in questions which include or concern such assertions; as γράφει, he writes; ἔγραψεν, he wrote; γράψει, he will write; γέγραφεν, he has written; τί ἐγράψετε; what did you write? ἔγραψε τοῦτο; did he write this?
- 1318. The indicative has a tense to express every variety of time which is recognized by the Greek verb, and thus it can state a supposition as well as make an assertion in the past, present, or future. It also expresses certain

other relations which in other languages (as in Latin) are generally expressed by a different mood. The following examples will illustrate these uses:—

281

Εὶ τοῦτο ἀληθές ἐστι, χαίρω, if this is true, I rejoice (1390); εὶ ἔγραψεν, ἢλθον ἄν, if he had written, I should have come (1397); εὶ γράψει, γνώσομαι, if he shall write (or if he writes), I shall know (1405). Ἐπιμελεῖται ὅπως τοῦτο γενήσεται, he takes care that this shall happen (1372). Λέγει ὅτι τοῦτο ποιεῖ, he says that he is doing this; sometimes, εἶπεν ὅτι τοῦτο ποιεῖ, he said that he was doing this (he said ποιῶ). (1487.) Εἴθε με ἔκτεινας, ὡς μήποτε τοῦτο ἐποίησα, O that thou hadst killed me, that I might never have done this! (1511; 1371). Εἴθε τοῦτο ἀληθὲς ἢν, O that this were true! (1511).

1319. N. These constructions are explained in the sections referred to. Their variety shows the impossibility of including all the actual uses even of the indicative under any single fundamental idea.

1320. The various uses of the subjunctive are shown by the following examples:—

Ίωμεν, let us go (1344). Μὴ θαυμάσητε, do not wonder (1346). Τί εἴπω; what shall I say? (1358). Οὐ μὴ τοῦτο γένηται, this (surely) will not happen (1360). Οὐδὲ ἴδωμαι (Homeric), nor shall I see (1355).

Έρχεται ΐνα τοῦτο ἴδη, he is coming that he may see this (1365);  $\phi$ οβεῖται μὴ τοῦτο  $\gamma$ ένηται, he fears lest this may happen (1378). Ἐὰν ἔλθη, τοῦτο ποιήσω, if he comes (or if he shall come), I shall do this (1403); ἐἀν τις ἔλθη, τοῦτο ποιῶ, if any one (ever) comes, I (always) do this (1393,1). "Όταν ἔλθη, τοῦτο ποιήσω, when he comes (or when he shall come), I shall do this (1434); ὅταν τις ἔλθη, τοῦτο ποιῶ, when any one comes, I (always) do this (1431,1).

1321. N. The subjunctive, in its simplest and apparently most primitive use, expresses simple futurity, like the future indicative; this is seen in the Homeric independent construction, ἴδωμαι, I shall see; εἴπησί τις, one will say. Then, in exhortations and prohibitions it is still future; as ἴωμεν, let us go; μὴ ποιήσητε τοῦτο, do not do this. In final and object clauses it expresses a future purpose or a future object of fear. In conditional and conditional relative sentences it expresses a future supposition; except in general conditions, where it is indefinite (but never strictly present) in its time.

1322. The various uses of the optative are shown by the following examples:—

Εὐτυχοίης, may you be fortunate; μη γένοιτο, may it not be done; είθε μη ἀπόλοιντο, Ο that they may not perish (1507).

"Ελθοι äv, he may go, or he might go (1327). .

\*Hλθεν ΐνα τοῦτο ἴδοι, he came that he might see this (1365); ἐφοβεῖτο μὴ τοῦτο γένοιτο, he feared lest this should happen (1378). Εἰ ἔλθοι, τοῦτ ἀν ποι ήσαιμι, if he should come, I should do this (1408); εἴ τις ἔλθοι, τοῦτ ἀποίουν, if any one (ever) came, I (always) did this (1393, 2). "Ότε ἔλθοι, τοῦτ ἄν ποι ήσαιμι, whenever he should come (at any time when he should come), I should do this (1436); ὅτε τις ἔλθοι, τοῦτ ἐποίουν, whenever any one came, I (always) did this (1431, 2). "Επεμελεῖτο ὅπως τοῦτο γεν ήσοιτο, he took care that this should happen (1372). Εἴπεν ὅτι τοῦτο ποιοίη (ποι ήσοι ον ποι ήσειε), he said that he was doing (would do or had done) this (1487).

1323. N. The optative in many of its uses is a vaguer and less distinct form of expression than the subjunctive, indicative, or imperative, in constructions of the same general character. This appears especially in its independent uses; as in the Homeric Έλένην άγοιτο, he may take Helen away, 11.4,19 (see γυναίκα άγέσθω, 11.3,72, referring to the same thing, and καί ποτέ τις είπησιν, and sometime one will say, 1303, above); ίσιμεν, may we go (cf. loper, let us yo); μη γένοιτο, may it not happen (cf. μη γένηται, let it not happen); έλοιτο αν (Hom. sometimes έλοιτο alone), he would take (cf. 11om. Edyrai sometimes with ke, he will take). So in future conditions; as & yévorto, if it should happen (cf. cav yérman, if it shall happen). In other dependent clauses it is generally a correlative of the subjunctive, sometimes of the indicative; here it represents a dependent subjunctive or indicative in its changed relation when the verb on which it depends is changed from present or future to past time. The same change in relation is expressed in English by a change from shall, will, may, do, is, etc. to should, would, might, did, was, etc. To illustrate these last relations, compare έρχεται ίνα ίδη, φοβείται μη γίνηται, έάν τις έλθη τούτο ποιώ, επιμελείται όπως τυύτο γενήσεται, and λέγει ότι τούτο ποιεί, with the corresponding forms after past leading verbs given in 1322.

For a discussion of the whole relation of the optative to the subjunctive and the other moods, and of the original meaning of the subjunctive and optative, see *Moods and Tenses*, pp. 371-389.

1324. The imperative is used to express commands and prohibitions; as τοῦτο ποίει, do this; μη φεύγετε, do not fly.

- 1325. The infinitive, which is a verbal noun, and the participle and the verbal in  $-\tau i o s$ , which are verbal adjectives, are closely connected with the moods of the verb in many constructions.
- 1326. The following sections (1327-1515) treat of all constructions which require any other form of the finite verb than the indicative in simple assertions and questions (1317). The infinitive and participle are included here so far as either of them is used in indirect discourse, in protasis or apodosis, or after  $\tilde{\omega}\sigma\tau\epsilon$  ( $\dot{\omega}s$ ,  $\dot{\epsilon}\phi'$   $\dot{\phi}$  or  $\dot{\epsilon}\phi'$   $\dot{\psi}\tau\epsilon$ ) and  $\pi\rho\dot{\psi}$ . These constructions are divided as follows:—
  - I. Potential Optative and Indicative with av.
  - Imperative and Subjunctive in commands, exhortations, and prohibitions. Subjunctive and Indicative with μή or μὴ οὐ in eautious Assertions. ΤΟπως and ὅπως μή with the independent Future Indicative.
  - III. Independent Homeric Subjunctive, like Future Indicative. Interrogative Subjunctive.
  - IV. Où μή with Subjunctive and Future Indicative.
  - V. Final and Object Clauses with "να, ως, ὅπως, ὅφρα, and μή.
  - VI. Conditional Sentences.
  - VII. Relative and Temporal Sentences, including consecutive sentences with ωστε etc.
- VIII. Indirect Discourse or Oratio Obliqua.
  - 1X. Causal Sentences.
    - X. Expressions of a Wish.

# 1. POTENTIAL OPTATIVE AND INDICATIVE WITH &v.

#### POTENTIAL OPTATIVE.

1327. The optative with  $\tilde{a}_{\nu}$  expresses a future action as dependent on circumstances or conditions. Thus  $\tilde{\epsilon}\lambda\theta\omega$   $\tilde{a}_{\nu}$  is he may go, he might (could or would) go, or he would be likely to go, as opposed to an absolute statement like he will go. E.g.

Έτι γάρ κεν ἀλύξαιμεν κακὰν ήμιρ, for (perhaps) we may still escape the evil day, Od. 10, 269. Πῶν γὰρ ἄν πύθοιό μου, for you

1329. The potential optative can express every degree of potentiality from the almost absolute future of the last example to the apodosis of a future condition expressed by the optative with & (1408), where the form of the condition is assimilated to that of the conclusion. The intermediate steps may be seen in the following examples:—

Οὐκ ἄν δικαίως ἐς κακὸν πέσοιμί τι, I could not justly fall into any trouble, S. An. 240, where δικαίως points to the condition if justice should be done. Οὖτε ἐσθίουσι πλείω ἢ δύνανται φέρειν · διαρραγεῖεν γὰρ ἄν, nor do they eat more than they can carry, for (if they did) they would burst, X. C.8,  $2^{21}$ , where εὶ ἐσθίοιεν is implied by the former clause.

- 1331. N. The potential optative may express what may hereafter prove to be true or to have been true; as ἡ ἐμὴ (σοφία) φαύλη τις ἄν εἴη, my wisdom may turn out to be of a mean kind,

P. Sy.  $175^{\epsilon}$ ;  $\pi o \hat{v}$   $\delta \hat{\eta} \tau$   $\hat{a} \nu$   $\epsilon \hat{i} \epsilon \nu$  of  $\hat{\xi} \epsilon \nu o i$ ; where may the strangers be? (i.e. where is it likely to prove that they are)? S. El. 1450;  $\epsilon \hat{i} \eta \sigma a \nu \delta$   $\hat{a} \nu$  ov $\hat{\tau} o i$  Kp $\hat{\eta} \hat{\tau} \epsilon s$ , and these would probably prove to be (or to have been) Cretans, IId. 1,2; a  $\hat{v} \hat{\tau} a \iota$   $\delta \hat{\epsilon}$  ov $\hat{\kappa}$   $\hat{a} \nu$   $\pi o \lambda \lambda a \iota$   $\epsilon \hat{\iota} \eta \sigma a \nu$ , and these (the islands) would not prove to be many, T. 1,9.

- 1332. N. Occasionally αν is omitted with the potential optative, chiefly in Homer; as οὖ τι κακώτερον ἄλλο πάθοιμι, I could suffer nothing else that is worse, Il. 19, 321.
- 1333. N. The Attic poets sometimes omit ἄν after such indefinite expressions as ἔστιν ὅστις, ἔστιν ὅπως, ἔστιν ὅπως ἀποι, etc.; as ἔστ οὖν ὅπως Ἄλκηστις ἐς γῆρας μόλοι; is it possible then that Alcestis can come to old age? E. Al. 52; so 113, and A. Pr. 292.
- 1334. N. For the potential optative in Homer referring to past time, see 1399.

#### POTENTIAL INDICATIVE.

- 1335. The past tenses of the indicative with  $\tilde{a}\nu$  express a past action as dependent on past circumstances or conditions. Thus, while  $\tilde{\eta}\lambda\theta\epsilon\nu$  means he went,  $\tilde{\eta}\lambda\theta\epsilon\nu$  a means he would have gone (under some past circumstances).
- 1336. This is called the potential indicative; and it probably arose as a past form of the potential optative, so that, while ἴλθω ἄν meant originally he may go or he would be likely to go, ἢλθεν ἄν meant he may have gone or he would have been likely to go. It is the equivalent of the Latin forms like diceres, you would have said, crederes, you would have believed, cerneres, putares, etc., which are past potential forms corresponding to dicas, credas, cernas, putes, etc. (1328). Thus putet and putaret are equivalent to σίοιτο ἄν, he would be likely to think, and φέτο ἄν, he would have been likely to think.
- 1337. The potential indicative sometimes expresses (in its original force) what mould have been likely to happen, i.e. might have happened (and perhaps did happen) with no reference to any definite condition. E.g.

Ύπό κεν ταλασίφρονά περ δέος είλεν, fear might have seized (i.e. would have been likely to seize) even a man of stout heart, Il.4,421. Ήλθε τοῦτο τοῦνειδος τάχ αν δργή βιασθέν, this disgrace may perhaps have come from violence of wrath, S.O.T. 523. Ἐν ταύτη τή ήλικία λέγοντες πρὸς ὑμᾶς ἐν ή αν μάλιστα ἐπιστεύσατε, talking to you at that age at which you would have been most likely to put trust in them, P. Ap. 18°.

1338. Generally, however, the potential indicative implies a reference to some circumstances different from the real ones, so that  $\tilde{\eta}\lambda\theta\epsilon\nu$  are commonly means he would have gone (if something had not been as it was). The unreal past condition here may be as vague and indefinite as the future condition to which the potential optative refers (1328). E.g.

Οὐ γάρ κεν δυνάμεσθα (impf.) θυράων ἀπώσασθαι λίθον, for we could not have moved the stone from the doorway, Od. 9, 304. Compare οὐδὰν ἃν κακὸν ποιήσειαν, they could do no harm (if they should try), with οὐδὰν ἄν κακὸν ἐποίησαν, they could have done no harm (if they had tried). Τούτου τίς ἄν σοι τἀνδρὸς ἀμείνων εὐρέθη; who could have been found better than this man? S. Aj. 119. 'Οψὲ ἢν, καὶ τὰς χείρας οὐκ ἃν καθεώρων, it was late, and they would not have seen the show of hands, X. H. 1.7?. Ποίων ἄν ἔργων ἀπέστησαν; from what labors would they have shrunk? 1.4.83.

1339. When no definite condition is understood with the potential indicative, the imperfect with  $\tilde{a}v$  is regularly past, as it always is in Homer (1398). See the examples in 1338.

The imperfect with  $\delta \nu$  referring to present time, which is common in apodosis after Homer (1397), appears seldom in purely potential expression, chiefly in  $\epsilon \beta o \nu \lambda \delta \mu \eta \nu \delta \nu$ , vellem, I should wish, I should like (which can mean also I should have wished); as  $\epsilon \beta o \nu \lambda \delta \mu \eta \nu \delta \nu$  autous  $\delta \lambda \eta \theta \hat{\eta} \lambda \epsilon \gamma \epsilon \nu$ , I should like it if they spoke the truth, L. 12, 22.

1340. The potential indicative may express every degree of potentiality from that seen in 1337 to that of the apodosis of an unfulfilled condition actually expressed. (Compare the potential optative, 1329.) Here, after Homer, the imperfect with av may express present time (see 1397). The intermediate steps to the complete apodosis may be seen in the following examples:—

"Hyere την εἰρήνην ὅμως οὐ γὰρ ἡν ὅ τι αν ἐποιεῖτε, you still kept the peace; for there was nothing which you could have done (if you had not), D. 18, 43. Πολλοῦ γὰρ αν τὰ ὄργανα ἡν ἄξια, for the tools would be worth much (if they had this power), P. Rp. 3744.

For the full conditional sentences, see 1397.

1341. N. For a peculiar potential expression formed by imperfects denoting obligation etc., like  $\delta \delta \omega$ ,  $\chi \rho \hat{\eta} \nu$ , etc., with the infinitive, see 1400.

- II. IMPERATIVE AND SUBJUNCTIVE IN COMMANDS, EXHORTATIONS, AND PROHIBITIONS. SUBJUNCTIVE AND INDICATIVE WITH μή OR μἡ οὐ IN CAUTIOUS ASSERTIONS. "Οπως ΑΝΟ ὅπως μή WITH FUTURE INDICATIVE IN COMMANDS AND PROHIBITIONS.
- 1342. The imperative expresses a command, exhortation, or entreaty; as λέγε, speak thou; φεῦγε, begone! ελθέτω, let him come; χαιρόντων, let them rejoice.
- 1343. N. A combination of a command and a question is found in such phrases as of  $\sigma\theta'$  of  $\delta\mu\hat{a}\sigma\sigma\nu$ ; dost thou know what to do? Ar. Av. 51, where the imperative is the verb of the relative clause. So of  $\sigma\theta a \nu \bar{\nu}\nu \tilde{a} \mu \omega \gamma \epsilon \nu \epsilon \sigma \theta \omega$ ; do you know what must be done for me? E. I. T. 1203.
- 1344. The first person of the subjunctive (generally plural) is used in exhortations. Its negative is  $\mu \dot{\eta}$ . E.g.

Ίωμεν, let us go; ἴδωμεν, let us see; μὴ τοῦτο ποιῶμεν, let us not do this. This supplies the want of a first person of the imperative.

- 1345. N. Both subjunctive and imperative may be preceded by  $\tilde{\alpha}\gamma\epsilon$  ( $\tilde{\alpha}\gamma\epsilon\tau\epsilon$ ),  $\phi\epsilon\rho\epsilon$ , or  $\tilde{\iota}\theta\iota$ , come! These words are used without regard to the number or person of the verb which follows; as  $\tilde{\alpha}\gamma\epsilon$   $\mu\dot{\iota}\mu\nu\epsilon\tau\epsilon$   $\pi\dot{\alpha}\nu\tau\epsilon\varsigma$ , H.2,331.
- 1346. In prohibitions, in the second and third persons, the present imperative or the acrist subjunctive is used with  $\mu \dot{\eta}$  and its compounds. E.g.

Mη ποίει τοῦτο, do not do this (habitually), or do not go on doing this; μη ποιήσης τοῦτο, (simply) do not do this. Μη κατὰ τοῦς νόμους δικάσητε· μη βοηθήσητε τῷ πεπονθότι δεινά· μη εὐορκεῖτε, "do not judge according to the laws; do not help him who has suffered outrages; do not abide by your oaths," D.21, 211.

The two forms here differ merely as present and aorist (1272).

- 1347. N. The third person of the agrist imperative sometimes occurs in prohibitions; the second person very rarely.
- 1348. In Homer the independent subjunctive with  $\mu\eta$  (generally in the third person) may express fear or anxiety, with a desire to avert the object of the fear. E.g.

Mỳ δỳ vậas  $\tilde{\epsilon}\lambda \omega \sigma \iota$ , may they not seize the ships (as I fear they may), II. 16, 128. Μή τι χολωσάμενος  $\tilde{\rho} \epsilon \tilde{\xi} \eta$  κακὸν υἶμς 'Αχαιῶν, may he not (as I fear he may) in his wrath do any harm to the sons of the Achaeans, II.2, 195.

- 1349. N. This usage occurs also in Euripides and Plato. See Moods and Tenses, §§ 261-264.
- 1350. An independent subjunctive with  $\mu\dot{\eta}$  may express a cautious assertion, or a suspicion that something may be true; and with  $\mu\dot{\eta}$  où a cautious negation, or a suspicion that something may not be true. This is a favorite usage with Plato. E.g.

Mỳ ἀγροικότερον ἢ τὸ ἀληθὲς εἰπεῖν, I suspect that the truth may be too rude a thing to tell, P. G. 462°. `Αλλὰ μὴ οὐ τοῦτ' ἢ χαλεπόν but I rather think that this may not be a difficult thing, P. A p. 39°.

1351. The indicative may be thus used (1350) with  $\mu \dot{\eta}$  or  $\mu \dot{\eta}$ 

où, referring to present or past time. E.g.

'Αλλὰ μὴ τοῦτο οὐ καλῶς ὧμολογήσαμεν, but perhaps we did not do well in assenting to this, P. Men. 89°. (Compare φοβοῦμαι μὴ ἔπαθεν, I fear that he suffered, 1380.)

1352. In Attic Greek  $\tilde{o}\pi\omega_s$  and  $\tilde{o}\pi\omega_s$   $\mu\dot{\eta}$  are used colloquially with the future indicative in commands and prohibitions. E.g.

Νῦν οὖν ὁπως σώσεις με, so now save me, Ar. N. 1177. Κατάθου τὰ σκεύη, χῶπως ἐρεῖς ἐνταῦθα μηδὲν ψεῦδος, put down the packs, and tell no lies here, Ar. R. 627. "Οπως οὖν ἔσεσθε ἄξιοι τῆς ἐλευθερίας, (see that you) prove yours-lives worthy of freedom, X. Λ. 1, 73. "Οπως μοι μὴ ἐρεῖς ὅτι ἔστι τὰ δώδεκα δὶς ἔξ, see that you do not tell me that twelve is twice six, P. Rp. 337 $^{\text{b}}$ .

- 1353. N. The construction of 1352 is often explained by an ellipsis of *σκόπει* or *σκοπείτε* (see 1372).
- 1354. N. The subjunctive occasionally occurs here with  $\delta\pi\omega_{S}$   $\mu\dot{\eta}$ , but not with  $\delta\pi\omega_{S}$  alone.

# III. HOMERIC SUBJUNCTIVE LIKE FUTURE INDICATIVE. - INTERROGATIVE SUBJUNCTIVE.

- 1355. In Homer, the subjunctive in independent sentences sometimes has the force of a future indicative. E.g.
- Oὐ γάρ πω τοίους ἴδον ἀνέρας, οὐδὲ ἴδωμαι, for I never yet saw nor shall I ever see such men, Il. 1,262. Καί ποτέ τις εἴπησιν, and one will (or may) some time say, Il. 6,459.
- 1356. N. This subjunctive may, like the future indicative, take so or dv in a potential sense. (See 1305, 2.)

13611

1357. N. The question τί πάθω; what will become of me? or what harm will it do me? (literally, what shall I undergo?) carries this use even into Attic Greek. E.g.

289

"Ω μοι έγω, τί πάθω; Od. 5, 465. Τί πάθω τλήμων; what will become of me, wretched one? Λ. P. 912. Το μέλλον, εί χρη, πείσομαι τί γαρ πάθω; I shall suffer what is to come, if it must be; for what harm can it do me? E. Ph. 895.

1358. The first person of the subjunctive may be used in questions of appeal, where a person asks himself or another what he is to do. The negative is  $\mu \hat{\eta}$ . It is often introduced by  $\beta o \hat{\iota} \lambda \epsilon \iota$  or  $\beta o \hat{\iota} \lambda \epsilon \sigma \theta \epsilon$  (in poetry  $\theta \hat{\epsilon} \lambda \epsilon \iota \varsigma$  or  $\theta \hat{\epsilon} \lambda \epsilon \tau \epsilon$ ). E.g.

Είπω ταῦτα; shall I say this? Οι βούλει εἴπω ταῦτα; do you wish that I should say this? Ποι τράπωμαι; ποι πορευθῶ; whither shall I turn? whither shall I go? Ε. Hec. 1099. Ποῦ δη βούλει καθιζόμενοι ἀναγνωμεν; where now wilt thou that we sit down and read? P. Phdr. 228.

1359. N. The third person is sometimes found in these questions, chiefly when  $\tau i_5$  has the force of we; as  $Ti \tau i_5$  elval  $\tau o \hat{v} \tau o \hat{\tau} \hat{\tau} \hat{\tau}$ , what shall we say this is ? D. 19, 88.

## IV. Οὐ μή WITH SUBJUNCTIVE AND FUTURE INDICATIVE.

1360. The subjunctive (generally the aorist) and sometimes the future indicative are used with the double negative  $o\dot{v}$   $\mu\dot{\eta}$  in the sense of an emphatic future indicative with  $o\dot{v}$ . E.g.

Οὐ μὴ πίθηται, he will not obey, S. Ph. 103. Οὖτε γὰρ γίγνεται οὖτε γέγονεν, οὐδὲ οὖν μὴ γένηται, for there is not, nor has there been, nor will there ever he, etc., P. Rp. 492°. Οὖ ποτ' ἐξ ἐμοῦ γε μὴ πάθης τόδε, you never shall suffer this at my hands, S. El. 1029. Οὖ τοι μἡποτέ σε . . . ἄκοντά τις ἄξει, no one shall ever take you against your will, etc., S. O. C. 176.

1361. In the dramatic poets, the second person singular of the future indicative (occasionally of the agrist subjunctive) with of  $\mu\dot{\eta}$  may express a strong prohibition. E.g.

Οὐ μὴ καταβήσει, don't come down (you shall not come down), Ar. V. 397. Οὐ μὴ τάδε γηρύσει, do not speak out in this way, E. Hip. 213. Οὐ μὴ σκώψης, do not jeer, Ar. N. 296.

This construction is not interrogative.

## V. FINAL AND OBJECT CLAUSES AFTER ἵνα, ὡς, ὅπως, ὅφρα, AND μή.

1362. The final particles are  $\tilde{v}u$ ,  $\dot{\omega}s$ ,  $\tilde{\sigma}\pi\omega s$ , and (epic and lyric)  $\tilde{\sigma}\phi\rho a$ , that, in order that. To these must be added  $\mu\dot{\eta}$ , lest or that, which became in use a negative final particle. The clauses which are introduced by these particles may be divided into three classes:—

- 1. Pure final clauses, expressing a purpose or motive; as ἔρχεται ΐνα τοῦτο ἴδη, he is coming that he may see this. Here all the final particles are used (see 1368).
- 2. Object clauses with ὅπως after verbs signifying to strive for, to care for, to effect; as σκόπει ὅπως τοῦτο γενήσεται, see to it that this is done.
- 3. Clauses with  $\mu\dot{\eta}$  after verbs of fear or caution; as  $\phi \circ \beta \epsilon \hat{\imath} \tau a \iota \ \mu\dot{\eta} \ \tau \circ \hat{\imath} \tau \circ \gamma \epsilon \nu \eta \tau a \iota$ , he fears that (or lest) this may happen.
- 1363. The first two classes are to be specially distinguished. The object clauses in 2 are the direct object of the leading verb, and can even stand in apposition to an object accusative like τοῦτο; as σκόπει τοῦτο, ὅπως μή σε ὄψεται, see to this, namely, that he does not see you. But a final clause could stand in apposition only to τούτου ἔνεκα, for the sake of this, or διὰ τοῦτο, to this end; as ἔρχεται τούτου ἔνεκα, ἴνα ἡμῶς ἴδη, he is coming for this purpose, namely, that he may see us.

For the origin of the clauses in 3, and the development of final clauses, see *Moods and Tenses*, §§ 307-316.

1364. The negative in all these clauses is  $\mu \dot{\eta}$ ; except after  $\mu \dot{\eta}$ , lest, where of is used.

#### I. PURE FINAL CLAUSES.

1365. Final clauses take the subjunctive after primary tenses, and the optative after secondary tenses. E.g.

Δοκεί μοι κατακαύσαι τὰς ιξμάξας, ἴνα μὴ τὰ ζεύγη ἡμῶν στρατηγῆ, I think we should hurn our wagons, that our cattle may not be our commanders, X. A.3, 2<sup>m</sup>. Εἴπω τι δῆτα κάλλ', ἴν' ὁργίση πλέον; shall I speak still further, that you may be the more angry? S. O. T. 364. Παρακαλεῖς ἰατροὺς, ὅπως μὴ ἀποθάνη, you call in physicians, that he may not die, X. M. 2, 10<sup>2</sup>. Λυσιτελεῖ ἐῦσαι ἐν τῷ παρόντι, μὴ

καὶ τοῦτον πολέμιον προιτθώμεθα, it is expedient to allow it for a time, lest we add him to the number of our enemies, X. C.2, 412 Φίλος εβούλετο είναι τοις μέγιστα δυναμένοις, ινα άδικων μη διδοίη δίκην, he wished to be a friend to the most powerful, that he might do wrong and not be punished, X. A. 2, 621. Τούτου ένεκα Φίλων ωετο δείσθαι, ώς συνέργους έχοι, he thought he needed friends for this purpose, namely, that he might have helpers, X. A. 1,921. 'Αφικόμην, όπως σοῦ πρὸς δόμους έλθύντος εὐ πράξαιμί τι, I came that I might quin some good by your return home, S. O. T. 1005.

Κεφαλή κατανεύσομαι, όφρα πεποίθης, I will not my assent, that νου may trust me, 11.1,522. "Ενθα κατέσχετ', όφρ' έταρον θάπτοι, he tarried there, that he might bury his companion, Od. 3, 284.

- 1366. N. The future indicative is rarely found in final clauses after ὅπως, ὅφρα, ώς, and μή. This is almost entirely confined to poetry. See Od. 1, 56, 4, 163; 11, 20, 301; Ar. Eccl. 495.
- 1367. N. The adverb  $\tilde{a}\nu$  ( $\kappa\dot{\epsilon}$ ) is sometimes joined with  $\omega_s$ , όπως, and όφρα before the subjunctive in final clauses; as ώς αν μάθης, ἀντάκουσον, hear the other side, that you may learn, X. A. 2, 516.

For this use, see Moods and Tenses, §§ 325-28. The final optative with dv is probably always potential (1327).

- 1368. N. Oppa is the most common final particle in Homer, ws in tragedy, and wa in comedy and prose. But onws exceeds wa in Thucydides and Xenophon. 'Os was never in good use in prose, except in Xenophon.
- 1369. As final clauses express the purpose or motive of some person, they admit the double construction of indirect discourse (1481, 2; 1503). Hence, instead of the optative after past tenses, we can have the mood and tense which would be used when a person conceived the purpose; that is, we can say either  $\eta \lambda \theta \epsilon \nu$  in idea, he came that he might see (1365), or ηλθεν ίνα ίδη, because the person himself would have said Epyopai iva iom, I come that I may see. E.g.

Ευνεβούλευε τοις άλλοις έκπλευσαι, όπως έπι πλέον ὁ σίτος åντίσχη, he advised the rest to sail away, that the provisions might hold out longer, T. 1, 65. Τὰ πλοία κατέκαυσεν, ΐνα μη Κύρος δια βή, he burned the vessels, that Cyrus might not pass over, X. A. 1, 418.

1370. N. The subjunctive is even more common than the optative after past tenses in certain authors, as Thucydides and Herodotus; but much less so in others, as Homer and Xenophon.

[1371

1371. The past tenses of the indicative are used in final clauses with  $i\nu a$ , sometimes with  $\delta \pi \omega s$  or  $\omega s$ , to denote that the purpose is dependent on some act which does not or did not take place (as on some unfulfilled condition or some unaccomplished wish), and therefore is not or was not attained. E.g.

Τί μ' οὐ λαβων ἔκτεινας εὐθὺς, ὡς ἔδειξα μήποτε, κ.τ.λ.; why did you not take me and kill me at once, that I might never have shown (as I have done), etc.? S.O. T. 1391. Φεῦ, φεῦ, τὸ μὴ τὰ πράγματ ἀνθρώποις ἔχειν φωνὴν, ἴν' ἢσαν μηδὲν οἱ δεινοὶ λόγοι, Alas! alus! that the facts have no voice for men, so that words of eloquence might be as nothing, E. frag. 442.

# II. OBJECT CLAUSES WITH $\ddot{o}\pi\omega\varsigma$ AFTER VERBS OF STRIVING, ETC.

1372. Object clauses depending on verbs signifying to strive for, to care for, to effect, regularly take the future indicative with  $\tilde{\sigma}\pi\omega_{S}$  or  $\tilde{\sigma}\pi\omega_{S}$   $\mu\dot{\eta}$  after both primary and secondary tenses.

The future optative may be used after secondary tenses, as the correlative of the future indicative, but commonly the indicative is retained on the principle of 1369. E.g.

Φρόντιζ' ὅπως μηδὲν ἀνάξιον τῆς τιμῆς ταύτης πράξεις, take heed that you do nothing unworthy of this honor, I.2, 37. Ἐπεμελεῖτο ὅπως μὴ ἄσιτοί ποτε ἔσοιντο, he took care that they should never be without food, X. C.8, 148 (here ἔσονται would be more common). Ἔπρασσον ὅπως τις βοήθεια ἤξει, they were trying to effect (this), that some assistance should come, Τ.3, 4.

For ὅπως and ὅπως μή with the future indicative in commands and prohibitions, often explained by an ellipsis of σκόπει or σκοπεῖτε in this construction, see 1352.

- 1373. The future indicative with ὅπως sometimes follows verbs of exhorting, entreating, commanding, and forbidding, which commonly take an infinitive of the object; as διακελεύονται ὅπως τιμωρήσεται πάντας τοὺς τοιούτους, they exhort him to take vengeance on all such, P. Rp. 549°. (See 1377.)
- 1374. 1. Sometimes the present or agrist subjunctive and optative is used here, as in final clauses. E.g.

"Αλλου του ἐπιμελήσει ἢ ὅπως ὅ τι βέλτιστοι πολίται ὧμεν; will you care for anything except that we may be the best possible citizens?  $P.G.515^b$ . Έπεμέλετο αὐτῶν, ὅπως ἀεὶ ἀνδράποδα διατελοῖεν, he took care that they should always remain slaves, X.C.8,144.

2. Xenophon allows ws with the subjunctive or optative here.

1375. N. Mή, lest, may be used for  $\tilde{o}\pi\omega_{S}$   $\mu\dot{\eta}$  with the subjunctive.

1376. N. " $A_{\nu}$  or  $\kappa \epsilon$  can be used here, as in final clauses (1367), with  $\delta \pi \omega_{S}$  or  $\omega_{S}$  and the subjunctive.

1377. In Homer the construction of 1372 with  $\tilde{o}\pi\omega_{S}$  and the future is not found; but verbs signifying to plan, consider, and try take  $\tilde{o}\pi\omega_{S}$  or  $\tilde{\omega}_{S}$  and the subjunctive or optative. E.g.

Φραζώμεθ' ὅπως ὅχ' ἄριστα γένηται, let us consider how the very best may be done, Od.13,365. Φράσσεται ῶς κε νέηται, he will plan for his return, Od.1,205. Βούλευον ὅπως ὅχ' ἄριστα γένοιτο, they deliberated that the very best might be done, Od.9,420. So rarely with λίσσομαι, entrcat (see 1373).

# III. CLAUSES WITH $\mu\eta'$ AFTER VERBS OF FEARING, ETC.

1378. After verbs denoting fear, caution, or danger,  $\mu\dot{\eta}$ , that or lest, takes the subjunctive after primary tenses, and the optative after secondary tenses. The subjunctive may also follow secondary tenses, to retain the mood in which the fear originally occurred to the mind. The negative form is  $\mu\dot{\eta}$  ov (1364). E.g.

Φοβοῦμαι μὴ τοῦτο γένηται (vereor ne accidat), I fear that this may happen; φοβοῦμαι μὴ οὐ τοῦτο γένηται (vereor ut accidat), I fear that this may not happen (1364). Φροντίζω μὴ κράτιστον ἢ μοι σιγᾶν, I am anxious lest it may be best for me to be silent, X. M. 4,2%. Οὐκέτι ἐπετίθεντο, δεδιότες μὴ ἀποτμηθείησαν, they no longer made attacks, fearing lest they should be cut off, X. A. 3,4%. Έφοβοῦντο μή τι πάθη, they feared lest he should suffer anything (1369), X. Sy. 2, 11.

1379. N. The future indicative is very rarely used after  $\mu\eta$  in this construction. But  $\delta\pi\omega_s$   $\mu\dot{\eta}$  is sometimes used here, as in the object clauses of 1372, with both future indicative and subjunctive; as δέδοικα  $\delta\pi\omega_s$   $\mu\dot{\eta}$  ἀνάγκη γενήσεται, I fear that there may come a necessity, D.9,75. Όπως  $\mu\dot{\eta}$  here is the equivalent of  $\mu\dot{\eta}$ , that or lest, in the ordinary construction.

1380. Verbs of fearing may refer to objects of fear which are present or past. Here  $\mu\dot{\eta}$  takes the present and past tenses of the indicative. E.a.

Δέδοικα μὴ πληγῶν δέει, I fear that you need blows, Ar. N. 493. Φοβούμεθα μὴ ἀμφοτέρων ἄμα ἡ μαρτήκαμεν, we fear that we have missed both at once, T. 3, 53. Δείδω μὴ δὴ πάντα θεὰ νημερτέα εἶπεν, I fear that all which the Goddess said was true, Od. 5, 300. "Ορα μὴ παίζων ἔλεγεν, beware lest he was speaking in jest, P. Th. 145.

#### VI. CONDITIONAL SENTENCES.

1381. In conditional sentences the clause containing the condition is called the protasis, and that containing the conclusion is called the apodosis. The protasis is introduced by some form of  $\epsilon i$ , if.

Ai for a is sometimes used in Homer.

- 1382. The adverb  $\tilde{\alpha}\nu$  (epic  $\kappa\dot{\epsilon}$  or  $\kappa\dot{\epsilon}\nu$ ) is regularly joined to  $\epsilon\dot{\epsilon}$  in the protasis when the verb is in the subjunctive;  $\epsilon\dot{\epsilon}$  with  $\tilde{\alpha}\nu$  forming  $\dot{\epsilon}\dot{\alpha}\nu$ ,  $\tilde{\alpha}\nu$ , or  $\tilde{\eta}\nu$ . (See 1299, 2.) The simple  $\epsilon\dot{\epsilon}$  is used with the indicative and optative. The same adverb  $\tilde{\alpha}\nu$  is used in the apodosis with the optative, and also with the past tenses of the indicative when it is implied that the condition is not fulfilled.
- 1383. 1. The negative adverb of the protasis is regularly  $\mu\eta$ , that of the apodosis is  $o\dot{\nu}$ .
- 2. When où stands in a protasis, it generally belongs to some particular word (as in où  $\pi o\lambda \lambda o\iota$ , few, où  $\phi \eta \mu \mu$ , I deny), and not to the protasis as a whole; as èau  $\tau \epsilon$  où kal Auutos où  $\phi \hat{\eta} \tau \epsilon$  èau  $\tau \epsilon$   $\phi \hat{\eta} \tau \epsilon$ , both if you and Anytus deny it and if you admit it, P. Ap. 25°.
- 1384. 1. The supposition contained in a protasis may be either particular or general. A particular supposition refers to a definite act or to several definite acts, supposed to occur at some definite time or times; as if he (now) has this, he will give it; if he had it, he gave it; if he had had the power, he would have helped me; if he shall receive it (or if he receives it), he will give it; if he should receive it, he would give it. A general supposition refers indefinitely to any act or acts of a given class, which may be supposed to

occur or to have occurred at any time; as if ever he receives anything, he (always) gives it; if ever he received anything, he (always) gave it; if (on any occasion) he had had the nower. he would (always) have helped me; if ever any one shall (or should) wish to go, he will (or would) always be permitted.

295

2. Although this distinction is seen in all classes of conditions (as the examples show), it is only in the present and past conditions which do not imply non-fulfilment, i.e. in those of class I. (below), that the distinction affects the construction. Here, however, we have two classes of conditions which contain only general suppositions.

### CLASSIFICATION OF CONDITIONAL SENTENCES.

1385. The classification of conditional sentences is based partly on the time to which the supposition refers, partly on what is implied with regard to the fulfilment of the condition, and partly on the distinction between particular and general suppositions explained in 1384.

1386. Conditional sentences have four classes, two (I. and II.) containing present and past suppositions, and two (III. and IV.) containing future suppositions. Class I. has two forms, one (a) with chiefly particular suppositions (present and past), the other (b) with only general suppositions (1. present, 2. past).

1387. We have thus the following forms: -

I. Present and past suppositions implying nothing as to fulfilment of condition:

(a) Chiefly Particular: ( (protasis) a with indicative; (apodosis) any form of the verb. Εὶ πράσσει τοῦτο, καλῶς έχει, if he is doing this, it is well. Εὶ ἔπραξε τοῦτο, καλῶς ἔχει, if he did this, it is well. (See 1390.) - In Latin: si hoc facit, bene est.

(1. (prot.) čáv with subjunctive; (apod.) present indicative. Εάν τις κλέπτη, κολάζεται, if any one (ever) steals, he is (always) punished. (Sec 1393, 1.)

(b) General: 2. (prot.) is with optative; (apod.) imperfect indicative. Εξ τις κλέπτοι, εκολάζετο, if any one ever stole, he was (always) punished. (See 1393, 2.) - For the Latin. see 1388.

II. Present and past suppositions implying that the condition is not fulfilled:

(protasis) εὶ with past tense of indicative; (apodosis) past tense of indicative with ἄν. Εὶ ἔπραξε τοῦτο, καλῶς ἄν ἔσχεν, if he had done this, it would have been well. Εὶ ἔπρασσε τοῦτο, καλῶς ἄν εἶχεν, if he were doing this, it would (now) be well, or if he had done this, it would have been well. (See 1397.)

In Latin: si hoc faceret, bene esset (present); si hoc fecisset, bene fuisset (past).

III. Future suppositions in more vivid form:

(prot.) ἐάν with subjunctive (sometimes εἰ with future indicative); (apod.) any future form. Ἐὰν πράσση (or πράξη) τοῦτο, καλῶς ἔξει, if he shall do this (or if he does this), it will be well (sometimes also εἰ πράξει τοῦτο, etc.). (See 1403 and 1405.)

In Latin: si hoc faciet (or fecerit), bene erit.

IV. Future suppositions in less vivid form:

(prot.)  $\epsilon i$  with optative; (apod.) optative with  $\delta v$ . Et  $\pi \rho \acute{a} \sigma \sigma o \iota$  (or  $\pi \rho \acute{a} \xi \epsilon \iota \epsilon$ )  $\tau o \hat{v} \tau o$ ,  $\kappa a \lambda \hat{\omega}_s \delta v \xi \alpha \iota$ , if he should do this, it would be well. (See 1408.)

In Latin: si hoc faciat, bene sit.

- 1388. N. The Latin commonly agrees with the English in not marking the distinction between the general and the particular present and past conditions by different forms, and uses the indicative in both alike. Occasionally even the Greek does the same (1395).
- 1389. N. In external form ( $\delta \acute{a} \nu$  with the subjunctive) the general present condition agrees with the more vivid future condition. But in sense there is a much closer connection between the general and the particular present condition, which in most languages (and sometimes even in Greek) coincide also in form (1388). On the other hand,  $\delta \acute{a} \nu$  with the subjunctive in a future condition agrees generally in sense with  $\delta l$  and the future indicative (1405), and is never interchangeable with  $\delta l$  and the present indicative.

# I. PRESENT AND PAST CONDITIONS WITH NOTHING IMPLIED.

- (a) SIMPLE SUPPOSITIONS, CHIEFLY PARTICULAR.
- 1390. When the protasis simply states a present or

past particular supposition, implying nothing as to the fulfilment of the condition, it has the indicative with  $\epsilon l$ . Any form of the verb may stand in the apodosis. E.g.

Εἰ ἡσυχίαν Φίλιππος ἄγει, οὐκέτι δεῖ λέγειν, if Philip is keeping peace (with us), we need talk no longer, D.8,5. Εἰ ἐγὼ Φαίδρον ἀγνοῶ, καὶ ἐμαυτοῦ ἐπιλέλησμαι ἀλλὰ γὰρ οὐδέτερα ἐστι τούτων, if I do not know Phaedrus, I have forgotten myself; but neither of these is so, P. Phdr. 228. Εἰ θεοῦ ἦν, οὐκ ἦν αἰσχροκερδής, if he was the son of a God, he was not avaricious, P. Rp. 408. ἀλλὶ εἰ δοκεί, πλέωμεν, but if it pleases you, let us sail, S. Ph. 526. Κάκιστ ἀπολοίμην, Ξανθίαν εἰ μὴ φιλῶ, may I die most wretchedly, if I do not love Xanthias, Ar. R. 579.

- 1391. N. Even the future indicative can stand in a protasis of this class if it expresses merely a present intention or necessity that something shall hereafter be done; as alpe  $\pi\lambda\eta\kappa\tau\rho\nu$ , if  $\mu\alpha\chi\epsilon\hat{i}$ , raise your spur, if you are going to fight, Ar. Av. 759. Here id  $\mu\dot{\epsilon}\lambda\lambda\epsilon\iota\varsigma$   $\mu\dot{\epsilon}\chi\epsilon\sigma\theta\alpha$  would be the more common expression in prose. It is important to notice that a future of this kind could never be changed to the subjunctive, like the ordinary future in protasis (1405).
- 1392. N. For present or past conditions containing a potential indicative or optative (with  $\tilde{a}\nu$ ), see 1421, 3.
  - (b) PRESENT AND PAST GENERAL SUPPOSITIONS.
- 1393. In general suppositions, the apodosis expresses a customary or repeated action or a general truth in present or past time, and the protasis refers in a general way to any of a class of acts.
- 1. Present general suppositions have  $\ell\acute{a}\nu$  with the subjunctive in the protasis, and the present indicative (or some other present form denoting repetition) in the apodosis. E.q.

\*Ην έγγὺς ἔλθη θάνατος, οὐδεὶς βούλεται θνήσκειν, if death comes near, no one is (coer) willing to die, Ε. ΛΙ. 671. \*Απας λόγος, αν ἀπή τὰ πράγματα, μάταιόν τι φαίνεται καὶ κενόν, all speech, if deeds are wanting, appears a vain and empty thing, D. 2, 12.

2. Past general suppositions have  $\epsilon l$  with the optative in the protasis, and the imperfect indicative (or some other form denoting past repetition) in the apodosis. E.g.

Εἴ τινας θορυβουμένους αἴσθοιτο, κατασβεννύναι τὴν ταραχὴν ἐπειρᾶτο, if he saw any falling into disorder (or whenever he saw, etc.), he (always) tried to quiet the confusion, Χ. С. 5, 365. Εἴ τις ἀντείποι, εὐθὺς τεθνήκει, if any one refused, he was immediately put to death, Τ. 8, 66. This construction occurs only once in Homer.

- 1394. N. The gnomic agrist, which is a primary tense (1268), can always be used here in the apodosis with a dependent subjunctive; as  $\tilde{\eta}v$  tis  $\pi a \rho a \beta a \hat{\iota}v \eta$ ,  $\zeta \eta \mu \hat{\iota} a v$  a  $\hat{\iota}\tau a \hat{\iota}\tau a$
- 1395. N. The indicative is occasionally used in the place of the subjunctive or optative in general suppositions; that is, these sentences may follow the construction of ordinary present and past suppositions (1390), as in Latin and English; as εί τις δύο ἢ καὶ πλέους τις ἡμέρας λογίζεται, μάταιός ἐστιν, if any one counts on two or even more days, he is a fool, S. Tr. 944.
- 1396. N. Here, as in future conditions (1406),  $\epsilon \ell$  (without  $\tilde{a}\nu$ ) is sometimes used with the subjunctive in poetry. In Homer this is the more frequent form in *general* conditions.

## 11. PRESENT AND PAST CONDITIONS WITH SUPPOSI-TION CONTRARY TO FACT.

1397. When the protasis states a present or past supposition, implying that the condition is not or was not fulfilled, the secondary tenses of the indicative are used in both protasis and apodosis. The apodosis has the adverb av.

The imperfect here refers to present time or to an act as going on or repeated in past time, the agrist to a simple occurrence in past time, and the (rare) pluperfect to an act completed in past or present time. E.g.

Ταῦτα οὐκ ἃν ἐδύναντο ποιεῖν, εἰ μὴ διαίτη μετρία ἐχρῶντο, they would not he able (as they are) to do this, if they did not lead an abstemious life,  $X.C.1, 2^{16}$ . Πολὺ ἃν θαυμαστότερον ἦν, εἰ ἐτιμῶντο, it would be far more wonderful, if they were honored,  $P.Rp.489^{\text{th}}$ . Εἰ ἦσαν ἄνδρες ἀγαθοὶ, ώς σὰ φὴς, οὐκ ἄν ποτε ταῦτα ἔπασχον, if they had been good men, as you say, they would never have suffered these things (referring to several cases),  $P.G.516^{\text{c}}$ . Καὶ ἴσως ἄν ἀπέθανον, εἰ μὴ ἡ ἀρχὴ κατελύθη, and perhaps I should have perished, if the government had not been put down,  $P.Ap.32^{\text{d}}$ . Εἰ

åπεκρίνω, ίκανως αν ήδη εμεμαθήκη, if you had answered, 1 should already have learned enough (which now I have not done), P. Euthyph. 14°. Εὶ μὴ ὑμεῖς ἡλθετε, ἐπορευόμεθα αν ἐπὶ τὸν βασιλέα, if you had not come (aor.), we should now be on our way (impf.) to the King, X. A. 2, 1°.

1398. N. In Homer the imperfect in this class of sentences is always past (see II.7,273; 8,130); and the present optative is used where the Attic would have the imperfect referring to present time; as  $\epsilon i \mu \acute{e}\nu \tau is \tau \acute{o}\nu \acute{o}\nu \iota \rho \nu \acute{e}\nu  

1399. N. In Homer the optative with κέ is occasionally past in apodosis; as καί νύ κεν ἐνθ' ἀπόλοιτο Λὶνείας, εὶ μὴ νόησε ᾿Αφροδίτη, and now Aeneas would there have perished, had not Aphrodite perceived him, Il. 5, 311. (Here ἀπώλετο would be the regular form in Homer, as in other Greek.)

Homer has also a past potential optative: see Il.5, 85.

1400. 1. The imperfects  $\xi \delta \epsilon_i$ ,  $\chi \rho \hat{\eta} \nu$  or  $\xi \chi \rho \hat{\eta} \nu$ ,  $\xi \xi \hat{\eta} \nu$ , eleds  $\hat{\eta} \nu$ , and others denoting obligation, propriety, possibility, and the like, are often used with the infinitive to form an apodosis implying the non-fulfilment of a condition.  $A\nu$  is not used here, as these phrases simply express in other words what is usually expressed by the indicative with  $\tilde{a}\nu$ .

Thus,  $\xi \delta \epsilon \iota$   $\sigma \epsilon \tau \circ \hat{\nu} \tau \circ \psi \iota \lambda \epsilon \hat{\iota} \nu$ , you ought to love him (but do not), or you ought to have loved him (but did not), is substantially equivalent to you would love him, or would have loved him ( $\xi \phi (\lambda \epsilon \iota s \ a \nu \tau \circ \hat{\nu} \tau \circ \nu)$ , if you did your duty ( $\tau a \delta \epsilon \circ \nu \tau \circ \iota$ ). So  $\xi \xi \hat{\eta} \nu$  so  $\tau \circ \hat{\nu} \tau \circ \tau \circ \iota \hat{\eta} \sigma a \iota$ , you might have done this (but you did not do it);  $\epsilon \iota \kappa \circ s \mathring{\eta} \nu \sigma \epsilon \tau \circ \hat{\nu} \tau \circ \tau \circ \iota \hat{\eta} \sigma a \iota$ , you would properly ( $\epsilon \iota \kappa \circ \tau \circ \iota \circ \iota \circ \iota \circ \iota \circ \iota \circ \iota \circ \iota$ ) have done this. The actual apodosis is here always in the infinitive, and the reality of the action of the infinitive is generally denied.

2. When the present infinitive is used, the construction refers to the present or to continued or repeated action in the past; when the agrist is used, it refers to the past. E.g.

Τούσδε μη ζην έδει, these ought not to be living (as they are), S. Ph. 418. Μένειν γὰρ ἐξῆν, for he might have stood his ground (but did not), D. 3, 17. Θανεῖν σε χρῆν πάρος τέκνων, you ought to have died before your children, E. And 1208. Εὶ ἐβούλετο δίκοιος εἶναι, ἐξῆν αὐτῷ μισθῶσαι τὸν οἶκον, he might have let the house, if he had wished to be just, L. 32, 23.

1401. N. When the actual apodosis is in the verb of obligation,

- etc., έδει ἄν can be used; as εἰ τὰ δέοντα οὖτοι συνεβούλευσαν, οἰδὲν ἄν ὑμᾶς νῦν ἔδει βουλεύεσθαι, if these men had given you the advice you needed, there would now be no need of your deliberating, D.4.1.
- 1402. 1. Other imperfects, especially  $\epsilon \beta o \nu \lambda \delta \mu \eta \nu$ , sometimes take the infinitive without  $\delta \nu$  on the same principle with  $\delta \delta \epsilon$  etc.; as  $\epsilon \beta o \nu \lambda \delta \mu \eta \nu$  obs  $\epsilon \rho i \zeta \epsilon \iota \nu \delta i \delta \epsilon$ , I would I were not contending here (as I am), or I would not be contending here, Ar. R. 866.
- So ωφέλον or ωφέλλον, ought, agrist and imperfect of ὀφέλλω, one (epic for ὀφέλλω), in Homer; whence comes the use of ωφέλον in wishes (1512); as ωφέλε Κῦρος ζῆν, would that Cyrus were alive, X. A. 2, 14.
- 3. So ξμελλον with the infinitive; as φθίσεσθαι ξμελλον, εἰ μὴ ξειπες, I should have perished (was about to perish), if thou hadst not spoken, Od. 13, 383. So D. 19, 159.

### III. FUTURE CONDITIONS, MORE VIVID FORM.

SUBJUNCTIVE IN PROTASIS WITH FUTURE APODOSIS.

1403. When a supposed future case is stated distinctly and vividly (as in English, if I shall go, or if I go), the protasis has the subjunctive with  $i \dot{\alpha} \nu$  (epic  $\epsilon i \kappa \epsilon$ ), and the apodosis has the future indicative or some other form of future time. E.g.

El μέν κεν Μενέλαον 'Αλέξανδρος καταπέφνη, αὐτὸς ἔπειθ 'Ελένην ἐχέτω καὶ κτήματα πάντα, if Alexander shall slay Menelaus, then let him have Helen and all the goods himself, Il. 3, 281. "Αν τις ἄνθιστῆται, πειρασόμεθα χειροῦσθαι, if any one shall stand opposed to us, we shall try to overcome him, X.A.7, 311. 'Εὰν οὖν ἴης νῦν, πότε ἔσει οἰκοι; if therefore you go now, when will you be at home? X.C.5, 327.

- 1404. N. The older English forms if he shall go and if he go both express the force of the Greek subjunctive and future indicative in protests; but the ordinary modern English uses if he goes even when the time is clearly future.
- 1405. The future indicative with  $\epsilon l$  is very often used for the subjunctive in future conditions, as a still more vivid form of expression, especially in appeals to the feelings, and in threats and warnings. E.g.

El μη καθέξεις γλώσσαν, ξαται σοι κακά, if you do not (shall not) restrain your tongue, you will have trouble, E. frag. 5. This common use of the future must not be confounded with that of 1391.

- 1406. N. In Homer  $\epsilon i$  (without  $\check{a}_V$  or  $\kappa \acute{\epsilon}$ ) is sometimes used with the subjunctive in future conditions, apparently in the same sense as  $\epsilon i$   $\kappa \epsilon$  or  $\check{\eta}_V$ ; as  $\epsilon i$   $\delta \epsilon$   $v \check{\eta}^{\prime}$   $\dot{\epsilon} \theta \dot{\epsilon} \lambda \eta$   $\dot{\delta} \lambda \dot{\epsilon} \sigma a \iota$ , but if he shall wish to destroy our ship, Od. 12,348. This is more common in general conditions in Homer (see 1396). The same use of  $\epsilon i$  for  $\dot{\epsilon} \dot{a}_V$  is found occasionally even in Attic poetry.
- 1407. N. For the Homeric subjunctive with  $\kappa \dot{\epsilon}$  in the apodosis of a future condition, see 1305.2.

### IV. FUTURE CONDITIONS, LESS VIVID FORM.

OPTATIVE IN BOTH PROTASIS AND APODOSIS.

1408. When a supposed future case is stated in a less distinct and vivid form (as in English, if I should go), the protasis has the optative with  $\epsilon l$ , and the apodosis has the optative with  $\check{a}\nu$ . E.g.

Εἴης φορητὸς οὐκ ἃν, εἰ πράσσοις καλῶς, you would not be endurable, if you should be in prosperity, A.  $P\tau$ . 979. Οὐ πολλὴ ἃν ἀλογία εἴη, εἰ φοβοῖτο τὸν θάνατον ὁ τοιοῦτος; would it not be a great absurdity, if such a man should fear death? P. Ph. 68. Οἶκος δ' αὐτὸς, εἰ φθογγὴν λάβοι, σαφέστατ' ἃν λέξειεν, but the house itself, if it should find a voice, would speak most plainly, A. Ag. 37.

- **1409.** The optative with  $\Delta \nu$  in apodosis is the potential optative: see 1329.
- 1410. N. The future optative cannot be used in protasis or apodosis, except in indirect discourse representing the future indicative after a past tense (see the second example under 1497, 2).
- 1411. N. Εἴ κε is sometimes found with the optative in Homer, in place of the simple εἰ (1408); as εἰ δέ κεν Ἄργος ἰκοίμεθ, . . . γαμβρός κέν μοι ἔοι, and if we should ever come to Argos, he would be my son-in-law, Il.9, 141.
- 1412. N. For the Homeric optative used like the past tenses of the indicative in unreal conditions, see 1398 and 1399.

#### PECULIAR FORMS OF CONDITIONAL SENTENCES.

ELLIPSIS AND SUBSTITUTION IN PROTASIS OR APODOSIS.

1413. The protasis sometimes is not expressed in its regular form with  $\epsilon i$  or  $\epsilon a \nu$ , but is contained in a participle, or implied in an adverb or some other part of the sentence. When a participle represents the protasis,

its tense is always that in which the verb itself would have stood in the indicative, subjunctive, or optative,—the present (as usual) including the imperfect. E.g.

Πῶς δίκης οὖ σης ὁ Ζεὺς οὖκ ἀπόλωλεν; how is it that Zeus has not been destroyed, if Justice exists? (εἰ δίκη ἐστίν), Ar. N.904. Σὲ δὲ κλ ὑων εἴσει τάχα, but you will soon know, if you listen (= ἐὰν κλύης), Ar. Av. 1390. ᾿Απολοῦμαι μὴ τοῦτο μα θών, I shall be ruined unless I learn this (ἐὰν μὴ μάθω). Τοιαῦτά τἃν γυναιξὶ συνναίων ἔχοις, such things would you have to endure if you should dwell among women (i.e. εἰ συνναίωις), A. Se. 195. Ἡπίστησεν ἄν τις ἀκούσας, any one would have dishelieved (such a thing) if he had heard it (i.e. εἰ ἤκουσεν), Τ.7,28. Μαμμᾶν δ' ἄν αἰτήσαντος (sc. σοῦ) ἦκόν σοι φέρων ἄν ἄρτον, and if you (ever) cried for food (εἰ αἰτήσειας, 1393, 2), I used to come to you with bread (1296), Ar. N. 1383.

Διά γε ύμᾶς αὐτοὺς πάλαι ἄν ἀπολώλειτε, if it had depended on yourselves, you would long ago have been ruined, D.18,49. Οὔτω γὰρ οὐκέτι τοῦ λοιποῦ πάσχοιμεν ἄν κακῶς, for in that case we should no longer suffer harm (the protasis being in οὖτω), X. A.1,110. Οὐδ' ἄν δικαίως ἐς κακὸν πέσοιμί τι, nor should I justly (i.e. if I had justice) fall into any trouble, S. An. 240.

1414. 1. There is a (probably unconscious) suppression of the verb of the protasis in several phrases introduced by εἰμή, except. E.g.

Tis τοι άλλος όμοιος, εἰ μη Πάτροκλος; who else is like you, except Patroclus (i.e. unless it is P.)? Il.17,475. Εἰ μὴ διὰ τὸν πρύτανιν, ενέπεσεν ἄν, had it not been for the Prytanis (except for the P.), he would have been thrown in (to the Pit), P. G.516.

2. The protasis or the apodosis, or both, may be suppressed with the Homeric ως εί or ως εί τε; as των νέες ωκείαι ως εί πτέρον ης νόημα, their ships are swift as a wing or thought (as they would be if they were, etc.), Od.7,36.

For the double ellipsis in ωσπερ άν εί, see 1313.

- 1415. N. In neither of the cases of 1414 is it probable that any definite verb was in the speaker's mind.
- 1416. N. The apodosis is sometimes entirely suppressed for rhetorical effect; as εἰ μὲν δώσουσι γέρας, if they shall give me a prize,—very well, 11.1,135; cf.1,580.
- 1417. N. El  $\delta \epsilon \mu \hat{\eta}$  without a verb often has the meaning otherwise, even where the clause would not be negative if completed, or where the verb if supplied would be a subjunctive; as  $\mu \hat{\eta} \pi o i \hat{\eta} \sigma \eta s$   $\tau a \hat{\tau} \tau a \cdot \epsilon i \delta \hat{\epsilon} \mu \hat{\eta}$ ,  $a \hat{\tau} \tau \hat{a} v \tau \hat{\epsilon} \epsilon u s$ , do not do this; otherwise (if you do not do what I say) you will be blamed, X. An. 7, 18.

1418. The apodosis may be expressed by an infinitive or participle in indirect discourse, each tense representing its own tenses of the indicative or optative (1280; 1285). If the finite verb in the apodosis would have taken  $\tilde{a}\nu$ , this particle is used with the infinitive or participle. E.g.

Ἡγοῦμαι, εἰ τοῦτο ποιεῖτε, πάντα καλῶς ἔχειν, Ι believe that, if you are doing this, all is well; ἡγοῦμαι, ἐὰν τοῦτο ποιῆτε, πάντα καλῶς ἔξειν, Ι believe that, if you (shall) do this, all will be well; οίδα ὑμᾶς, ἐὰν ταῦτα γένηται, εὐ πράξοντας, Ι know that you will prosper if this is (shall be) done. For examples of the infinitive and participle

with av, see 1308.

1419. The apodosis may be expressed in an infinitive not in indirect discourse (1271), especially one depending on a verb of wishing, commanding, advising, etc., from which the infinitive receives a future meaning. E.g.

Βούλεται  $\dot{\epsilon}\lambda \theta \dot{\epsilon} \dot{\imath}\nu$  τοῦτο γένηται, he wishes to go if this (shall) be done: κελεύω bμᾶς έὰν δόνησθε ἀπελθεῖν, I command you to depart if you can. For the principle of indirect discourse which appears in the protasis here after past tenses, see 1502, 1.

1420. N. Sometimes the apodosis is merely implied in the context, and in such cases  $\epsilon l$  or  $\ell \acute{a} \nu$  is often to be translated supposing that, in case that, if perchance, or if happy. E.g.

"Aκουσον καὶ ἐμοῦ, ἐάν σοι ταὐτὰ δοκ ŷ, hear me also, in case the same shall please you (i.e. that then you may assent to it), P. Rp. 3586. So πρὸς τὴν πόλιν, εἰ ἐπιβοηθοῖεν, ἐχώρουν, they marched towards the city, in case they (the citizens) should rush out (i.e. to meet them if they should rush out), T.6,100. On this principle we must explain αἴ κέν πως βούλεται, if haply he may wish (i.e. in hope that he may wish), Il.1,66; αἴ κ' ἐθέλησθα, Od.3,92; and similar passages. For this construction, both in Homer and elsewhere, see Moods and Tenses, §§ 486-491.

## MINED CONSTRUCTIONS. — $\Delta \ell$ in Apodosis.

- 1421. The protasis and apodosis sometimes belong to different forms.
- 1. Especially any tense of the indicative with  $\epsilon l$  in the protasis may be followed by a potential optative with  $\delta \nu$  in the apodosis. E.g.

Εί κατ' οὐρανοῦ εἰλήλουθας, οὐκ ἃν θεοίσι μαχοίμην, if you

have come down from heaven, I would not fight against the Gods, Il. 6, 128. Et νῦν γε δυστυχοῦμεν, πῶς τἀναντί ἄν πράττοντες οὐ σ ψζοίμε θ' ἄν; if we are now unfortunate, how could we help being saved if we should do the opposite? Ar. R. 1449 (here πράττοντες = εἰ πράττοιμεν). Eὶ οἶτοι ὀρθῶς ἀπέστησαν, ὑμεῖς ἄν οὐ χρεὼν ἄρχοιτε, if these had a right to secede, you cannot (could not) possibly hold your power rightfully, T. 3, 40.

[1422

2. Sometimes a subjunctive or a future indicative in the protasis has a potential optative in the apodosis. E.g.

- \*Hν ἐφῆς μοι, λέξαιμ' ἄν, if you (will) permit me, I would fain speak, S. El. 554; οὐδὲ γὰρ ἄν πολλαὶ γέφυραι ὧσιν, ἔχοιμεν ἃν ὅποι φυγόντες σωθῶμεν, for not even if there shall be many bridges, could we find a place to fly to and be saved, X. A. 2, 419; ἀδικοίημεν ἄν, εἰ μὴ ἀποδώσω, I should be guilty of wrong, should I (shall I) not restore her, E. Hel. 1010.
- 3. A potential optative (with ἄν) may express a present condition, and a potential indicative (with ἄν) may express a present or past condition; as εἶπερ ἄλλῳ τῳ πειθοίμην ἄν, καὶ σοὶ πείθομαι, if there is any man whom I would trust, I trust you, P. Pr. 3295, εἰ τοῦτο ἰσχυρὸν ἦν ἄν τούτῳ τεκμήριον, κἀμοὶ γενέσθω τεκμήριον, if this would have been a strong proof for him, so let it be also a proof for me, D.49,58.
- 1422. The apodosis is sometimes introduced by  $\delta \epsilon$ ,  $\delta \lambda \lambda \dot{\alpha}$ , or  $a \dot{\nu} \tau \dot{\alpha} \rho$ , which cannot be translated in English. *E.g.*

El δί κε μη δώωσιν, εγώ δε κεν αυτός ελωμαι, but if they do not give her up, then I will take her myself, Il. 1, 137.

## El AFTER VERBS OF WONDERING, ETC.

1423. Some verbs expressing wonder, delight, contentment, disappointment, indignation, etc. are followed by a protasis with  $\epsilon l$  where a causal sentence would often seem more natural. E.g.

Θυυμάζω δ' ξγωγε εἰ μηδεὶς ὑμῶν μήτ' ἐνθυμεῖται μήτ' ὁργίζεται, and I wonder that no one of you is either concerned or angry (lit. if no one of you is, etc., I wonder), D.4,43; ἀγανακτῶ εἰ α΄ νοῶ μὴ οἴος τ' εἰμὶ εἰπεῖν, I am indignant that (or if) I am not able to say what I mean, P. Lach. 194\*. See also 1502, 2, for the principle of indirect discourse applied to these sentences.

1424. N. Such verbs are especially θαυμάζω, αἰσχύνομαι, ἀγαπάω, and ἀγανακτέω, with δεινόν ἐστιν. They sometimes take ὅτι, because, and a causal sentence (1505).

#### VII. RELATIVE AND TEMPORAL SENTENCES.

1425. The principles of construction of relative clauses include all temporal clauses. Those introduced by  $\tilde{\epsilon}\omega s$ ,  $\pi\rho i\nu$ , and other particles meaning until, have special peculiarities, and are therefore treated separately (1463-1474).

Relative clauses may be introduced by relative pronouns or

adverbs.

1426. The antecedent of a relative is either definite or indefinite. It is definite when the relative refers to a definite person or thing, or to some definite time, place, or manner; it is indefinite when no such definite person, thing, time, place, or manner is referred to. Both definite and indefinite antecedents may be either expressed or understood. E.g.

(Definite.) Ταῦτα ἃ ἔχω ὁρῷς, you see these things which I have; or ἃ ἔχω ὁρῷς. օτ ἐβούλετο ἢλθεν, (once) when he wished, he came.

(Indefinite.) Πάντα α αν βούλωνται εξουσιν, they will have every thing which they may want; or α αν βούλωνται εξουσιν, they will have whatever they may want. Όταν ελθη, τοῦτο πράξω, when he shall come (or when he comes), I will do this. Ότε βούλοιτο, τοῦτο επρασσεν, whenever he wished, he (always) did this. Ως αν είπω, ποιωμεν, as I shall direct, let us act. "Α εχει βούλομαι λαβεῦν, I want to take whatever he has.

#### DEFINITE ANTECEDENT.

1427. A relative as such has no effect on the mood of the following verb. A relative with a definite antecedent therefore may take the indicative (with  $o\dot{v}$  for its negative) or any other construction which could occur in an independent sentence. E.q.

Τίς ἔσθ' ὁ χώρος δητ' ἐν ὡ βεβήκαμεν; what is the place to which we have come? S. O. C. 52. Έως ἐστὶ καιρὸς, ἀντιλάβεσθε τῶν πραγμάτων, (now) while there is an opportunity, take hold of the business, D. 1, 20. Τοῦτο οὐκ ἐποίησεν, ἐν ῷ τὸν δημον ἐτίμησεν ἄν, he did not do this, in which he might have honored the people, D. 21, 69. So ῷ μὴ γένοιτο, and may this not happen, D. 27, 67.

## INDEFINITE ANTECEDENT. - CONDITIONAL RELATIVE.

1428. 1. A relative clause with an indefinite antecedent has a conditional force, and is called a conditional relative clause. 8 Its negative is always μή.

- Relative words, like εἰ, ἰʃ, take ἄν before the subjunctive. (See 1299, 2.) With ὅτε, ὁπότε, ἐπεί, and ἐπειδή, ἄν forms ὅταν, ὁπόταν, ἐπάν οτ ἐπήν (Iouic ἐπεάν), and ἐπειδάν. "A with ἄν may form ἄν. In Homer we generally find ὅτε κε etc. (like εἰ κε, 1403), or ὅτε etc. alone (1437).
- 1429. Conditional relative sentences have four classes, two (I. II.) containing present and past, and two (III. IV.) containing future conditions, which correspond to those of ordinary protasis (1386). Class I. has two forms, one (a) with chiefly particular suppositions, the other (b) with only general suppositions.
- 1430. I. (a) Present or past condition simply stated, with the indicative, chiefly in particular suppositions (1390). E.g.
- "Ο τι βούλεται δώσω, I will give him whatener he (now) wishes (like εἴ τι βούλεται, δώσω, if he now wishes anything, I will give it). "Α μὴ οἴδα, οὐδὲ οἴομαι εἰδέναι, what I do not know, I do not even think I know (like εἴ τινα μὴ οἴδα, if there are any things which I do not know), P.  $Ap.21^{d}$ ; οὖς μὴ εὖρισκον, κενοτάφιον αὐτοῖς ἐποίησαν, for any whom they did not find (=εἴ τινας μὴ εὖρισκον), they raised a cenotoph,  $X.6,4^{o}$ .
- **1431.** (b) 1. Present general condition, depending on a present form denoting repetition, with subjunctive (1393, 1).
- 2. Past general condition, depending on a past form denoting repetition, with optative (1393, 2). E.g.
- "Ο τι ἃν βούληται δίδωμι, I (always) give him whatever he wants (like ἐάν τι βούληται, if he ever wants anything); ὅ τι βούλοιτο ἐδίδουν, I (always) gave him whatever he wanted (like εἴ τι βούλοιτο). Συμμαχεῖν τούτοις ἐθέλουσιν ἄπαντες, οῦς ἄν ὁρῶσι παρεσκευασμένους, all wish to be allies of those whom they see prepared, D. 4, 6. Ἡνίκ ἄν οἴκοι γένωνται. δρῶσιν οἰκ ἀνασχετά, when they get home, they do things unhearable, Ar. Pu. 1179. Οῦς μὲν ἴδοι εὐτάκτως ἱδίντας, τίνες τε εἶεν ἢρώτα. καὶ ἐπεὶ πύθοιτο ἑπήνει, he (always) asked those whom he saw (at any time) marching in good order, who they were; and when he learned, he praised them. X. C. 5, 355. Ἐπειδὴ δὲ ἀνοιχθείη, εἰσήτιμεν παρὰ τὸν Σωκράτη, and (each morning) when the prison was opened, we went in to Socrates, P. Ph. 50<sup>d</sup>.

- 1432. N. The indicative sometimes takes the place of the subjunctive or optative here, as in other general suppositions (1395). This occurs especially with δστις, which itself expresses the same idea of indefiniteness which δς with the subjunctive or optative usually expresses; as δστις μὴ τῶν ἀρίστων ἄπτεται βουλευμάτων, κάκιστος εἶναι δοκεῖ, whoever does not cling to the best counsels seems to be most hase, S. An. 178. (Here δς ἄν μὴ ἄπτηται would be the common expression.)
- 1433. II. Present or past condition stated so as to imply that the condition is not or was not fulfilled (supposition contrary to fact), with the secondary tenses of indicative (1397). E.g.
- "A μὴ ἐβούλετο δοῦναι, οὖκ αν ἔδωκεν, he would not have given what he had not wished to give (like εἴ τινα μὴ ἐβούλετο δοῦναι, οὖκ αν ἔδωκεν, if he had not wished to give certain things, he would not have given them). Οὖκ αν ἐπεχειροῦμεν πράττειν α μὴ ἡ πιστ άμε θα, we should not (then) be undertaking to do (as we now are) things which we did not understand (like εἴ τινα μὴ ἡπιστάμεθα, if there were any things which we did not understand, the whole belonging to a supposition not realized), P. Ch. 171. So δν γῆρας ἔτετμεν, Od. 1, 218.

This case occurs much less frequently than the others.

1434. III. Future condition in the more vivid form, with  $\tilde{a}\nu$  and the subjunctive (1403). E.g.

"Ο τι ἃν βούληται, δώσω, I will give him whatever he may wish (like ἐάν τι βούληται, δώσω, if he shall wish anything, I will give it). "Όταν μὴ σθένω, πεπάυσομαι, when I (shall) have no more strength, I shall cease, S. An.91. 'Αλόχους καὶ νήπια τέκνα ἄξομεν ἐν νήεσσιν, ἐπὴν πτολίεθρον ἔλω μεν, we will bear off their wives and young children in our ships, when we (shall) have taken the city, Il.4, 238.

- 1435. N. The future indicative cannot be substituted for the subjunctive here, as it can in common protasis (1405).
- 1436. IV. Future condition in the less vivid form, with the optative (1408). E.g.
- "Ο τι βούλοιτο, δοίην ἄν, I should give him whatever he might wish (like εἴ τι βούλοιτο δοίην ἄν, if he should wish anything, I should give it). Πεινῶν φάγοι ἄν ὁπότε βούλοιτο, if he were hungry, he would eat whenever he might wish (like εἴ ποτε βούλοιτο, if he should ever wish), X. M.2, 115.
- 1437. Conditional relative sentences have most of the peculiarities and irregularities of common protasis. Thus, the protasis

and apodosis may have different forms (1421); the relative without  $\tilde{a}\nu$  or  $\kappa\epsilon$  is sometimes found in poetry with the subjunctive (like  $\epsilon i$  for  $\epsilon a\nu$  or  $\epsilon i$   $\kappa\epsilon$ , 1396; 1406), especially in general conditions in Homer; the relative (like  $\epsilon i$ , 1411) in Homer may take  $\kappa\epsilon$  or  $\tilde{a}\nu$  with the optative; the relative clause may depend on an infinitive, participle, or other construction (1418; 1419); and the conjunction  $\delta\epsilon$  may connect the relative clause to the antecedent clause (1422).

1438. Homeric similes often have the subjunctive with ως ὅτε (occasionally ως ὅτ' ἄν), sometimes with ως οτ ως τε; as ως ὅτε κινήση Ζέφυρος βαθυ λήιον, as (happens) when the west wind moves a deep grain-field, Il.2, 147; ως γυνὴ κλαίησι... ως 'Οδυσευς δάκρυον εἶβεν, as a wife weeps, etc., so did Ulysses shed tears, Od. 8, 523.

#### ASSIMILATION IN CONDITIONAL RELATIVE CLAUSES.

1439. When a conditional relative clause expressing either a future or a general supposition depends on a subjunctive or optative, it regularly takes the same mood by assimilation. E.g.

Έαν τινες οἱ ἄν δύνωνται τοῦτο ποιῶσι, καλῶς ἔξει, if any who may be able shall do this, it will be well; εἴ τινες οἱ δύναιντο τοῦτο ποιοῖεν, καλῶς ᾶν ἔχοι, if any who should be (or were) able should do this, it would be well. Εἴθε πάντες οἱ δύναιντο τοῦτο ποιοῖεν O that all who may be (or were) able would do this. (Here the optative ποιοῖεν [1507] makes οἱ δύναιντο preferable to οἱ ᾶν δύνωνται, which would express the same idea.) Ἐπειδὰν ὧν ᾶν πρίηται κύριος γένηται, when (in any case) he becomes master of what he has bought, D.18, 47. 'Ως ἀπόλοιτο καὶ ᾶλλος, δ τις τοιαῦτά γε þέζοι, O that any other might likewise perish who should do the like, Od. 1, 47. Τε θναίην ὅτε μοι μηκέτι ταῦτα μέλοι, may I die whenever I shall no longer care for these (ὅταν μέλη would express the same idea), Minm. 1, 2. So in Latin: Injurias quas ferre nequeas defugiendo relinquas.

1440. Likewise, when a conditional relative sentence depends on a secondary tense of the indicative implying the non-fulfilment of a condition, it takes by assimilation a similar form. E.g.

Εἴ τινες οι ἐδύν αν το τοῦτο ἔ πραξαν, καλῶς αν εἶχεν, if any who had been able had done this, it would have been well. Εἰ ἐν ἐκείνη τῆ φωνῆ τε καὶ τῷ τρόπῳ ἔλεγον ἐν οις ἐτεθράμμην, if I were speaking to you in the dialect and in the manner in which I had been

brought up (all introduced by εξένος ετύγχανον ων, if I happened to be a foreigner), P. Ap. 17d. So in Latin: Si solos eos diceres miseros quibus moriendum esset, neminem tu quidem eorum qui viverent exciperes.

1441. N. All clauses which come under this principle of assimilation belong (as conditional forms) equally under 1434, 1436, 1431, or 1433. This principle often decides which form shall be used in future conditions (1270, 2).

#### RELATIVE CLAUSES EXPRESSING PURPOSE.

1442. The relative with the future indicative may ex-

press a purpose. E.g.

Πρεσβείαν πέμπειν ήτις ταθτ' έρει και παρέσται τοις πράγμασιν, to send an embassy to say this, and to be present at the transactions, D.1,2. Οὐ γὰρ ἔστι μοι χρήματα, ὁπόθεν ἐκτίσω, for 1 have no money to pay the fine with, P. Ap. 37°.

The antecedent here may be definite or indefinite; but the negative particle is always  $\mu \dot{\eta}$ , as in final clauses (1364).

- 1443. N. Homer generally has the subjunctive (with  $\kappa \epsilon$  joined to the relative) in this construction after primary tenses, and the optative (without  $\kappa \epsilon$ ) after secondary tenses. The optative is sometimes found even in Attic prose. The earlier Greek here agrees with the Latin.
- 1444. N. In this construction the future indicative is very rarely changed to the future optative after past tenses.

### RELATIVE CLAUSES EXPRESSING RESULT.

1445. The relative with any tense of the indicative, or with a potential optative, may express a result. The negative is oi. E.q.

Τίς οὖτω μαίνεται ὅστις οὐ βο ὑλεταί σοι φίλος εἶναι; who is so mad that he does not wish to be your friend? X.A.2, 5½. (Here ωστε οὐ βούλεται would have the same meaning.) Οὐδεὶς αν γένοιτο οὖτως ἀδαμάντινος, ος αν μείνειεν ἐν τῆ δικαιοσύνη, no one would ever become so like adamant that he would remain firm in his justice (= ωστε μείνειεν ἀν), P. Rp. 360b.

- 1446. N. This is equivalent to the use of ωστε with the finite moods (1450; 1454). It occurs chiefly after negative leading clauses or interrogatives implying a negative.
  - 1447. The relative with a future (sometimes a present)

indicative may express a result which is aimed at. The negative here is  $\mu \dot{n}$ . E.a.

Εὐχετο μηδεμίαν οι συντυχίην γενέσθαι, η μιν παύσει καταστρέψασθαι τὴν Εὐρώπην, he prayed that no such chance might befall him as to prevent him from subjugating Europe (= ωστε μιν παῦσαι), Hd. 7,54. Βουληθεὶς τοιοῦτον μνημεῖον κιταλιπεῖν  $\ddot{v}$  μὴ τῆς ἀνθρωπίνης φύσεώς ἐστιν, when he wished to leave such a memorial as might be beyond human nature (= ωστε μὴ εἶναι), 1.4,89.

1448. N. This construction (1447) is generally equivalent to that of ωστε with the infinitive (1450).

# CONSECUTIVE CLAUSES WITH THE INFINITIVE AND THE FINITE MOODS.

- 1449. " $\Omega \sigma \tau \epsilon$  (sometimes  $\omega_S$ ), so as, so that, is used with the infinitive and with the indicative to express a result.
- 1450. With the infinitive (the negative being  $\mu \hat{\eta}$ ), the result is stated as one which the action of the leading verb tends to produce; with the indicative (the negative being ob), as one which that action actually does produce. E.g.

Παν ποιούσιν ωστε δίκην μη διδόναι, they do everything so as (i.e. in such a way as) not to be punished, i.e. they aim at not being punished, not implying that they actually escape; P. G. 479c. (But παν ποιούσιν ώστε δίκην οὐ διδόασιν would mean they do everything so that they are not punished.) Ούτως ἀγνωμόνως ἔχετε, ωστε ἐλπίζετε αὐτὰ χρηστὰ γενήσεσθαι, are you so senseless that you expect them to become good? D.2,26. (But with ωστε ἐλπίζειν the meaning would be so senseless as to expect, i.e. senseless enough to expect, without implying necessarily that you do expect.)

1451. N. These two constructions are essentially distinct in their nature, even when it is indifferent to the general sense which is used in a given case; as in ούτως ἐστὶ δεινὸς ὥστε δίκην μὴ διδόναι, he is so skilful as not to be punished, and ούτως ἐστὶ δεινὸς ὧστε δίκην οἱ δίδωσιν, he is so skilful that he is not punished.

The use of  $\mu\dot{\eta}$  with the infinitive and of où with the indicative shows that the distinction was really felt. When the infinitive with  $\omega\sigma\tau\epsilon$  has où, it generally represents, in indirect discourse, an indicative with où of the direct form (see Moods and Tenses, §§ 594-598).

1452. The infinitive with ωστε may express a purpose like a

final clause: see ωστε δίκην μὴ διδόναι (= ἴνα μὴ διδώσι), quoted in 1450. It may also be equivalent to an object clause with ὅπως (1372); as in μηχανὰς εὐρήσομεν, ὥστ' ἐς τὸ πῶν σε τῶνδ' ἀπαλλάξαι πόνων, we will find devices to wholly free you from these troubles (= ὅπως σε ἀπαλλάξομεν), A. Eu. 82.

1453. The infinitive after  $\omega \sigma \tau \epsilon$  sometimes expresses a condition, like that after  $\epsilon \phi' \psi$  or  $\epsilon \phi' \psi \tau \epsilon$  (1460). E.g.

Έξὸν αὐτοις των λοιπων ἄρχειν Ἑλλήνων, ὤστ' αὐτοὺς ὑπα κούειν βασιλεί, it being in their power to rule the rest of the Greeks, on condition that they should themselves obey the King, D. 6, 11.

- 1454. As ωστε with the indicative has no effect on the form of the verb, it may be used in the same way with any verbal form which can stand in an independent sentence; as ωστ' οὐκ ἆν αὐτὸν γνωρίσαιμι, so that I should not know him, E. Or. 379; ωστε μη λίων στένε, so do not lament overmuch, S. El. 1172.
- 1455. N.  $\Omega_S$   $\tau \epsilon$  (never  $\tilde{\omega}\sigma\tau \epsilon$ ) in Homer has the infinitive only twice; elsewhere it means simply as, like  $\tilde{\omega}\sigma\pi\epsilon\rho$ .
- 1456.  $\Omega_{5}$  is sometimes used like  $\omega_{\sigma\tau\epsilon}$  with the infinitive and the finite moods, but chiefly in Aeschylus, Sophocles, Herodotus, and Xenophon.
- 1457. N. Verbs, adjectives, and nouns which commonly take the simple infinitive occasionally have the infinitive with ωστε or ως; as ψηφισάμενοι ωστε ἀμύνειν, having voted to defend them, T. 6, 88; πείθουσιν ωστε ἐπιχειρῆσαι, they persuade them to make an attempt, T. 3, 102; φρονιμώτεροι ωστε μαθείν, wiser in learning, X. C. 4, 311; δλίγοι ως ἐγκρατεῖς εἶναι, too few to have the power, X. C. 4, 515; ἀνάγκη ωστε κινδυνεύειν, a necessity of incurring risk, I. 6, 51.
- 1458. N. In the same way (1457) ωστε or ως with the infinitive may follow the comparative with η (1531); as ελάττω εχοντα δύναμιν η ωστε τοὺς φίλους ωφελεῖν, having too little power to aid his friends, X. H.4, S<sup>23</sup>.
- 1459. N. Ωστε or ως is occasionally followed by a participle; as ωστε σκέψασθαι δέον, so that we must consider, D.3, 1.
- 1460. 'E $\phi$ '  $\phi$  or  $\dot{\epsilon}\phi$ '  $\phi_{\tau\epsilon}$ , on condition that, is followed by the infinitive, and occasionally by the future indicative. E.g.

'Αφίεμέν σε, ἐπὶ τούτω μέντοι, ἐφ' ὧτε μηκέτι φιλοσοφείν, we release you, but on this condition, that you shall no longer be a philosopher, P. Ap. 29°; ἐπὶ τούτω ὑπεξίσταμαι, ἐφ' ὡτε ὑπ' οὐδενὸς ὑμέων ἄρξομαι, I withdraw on this condition, that I shall be ruled by none of you, Hd. 3, 83.

#### CAUSAL RELATIVE.

1461. A relative clause may express a cause. The verb is in the indicative, as in causal sentences (1505), and the negative is generally of. E.a.

Θαυμιστὸν ποιεῖς, δς ἡμῖν οὐδὲν δίδως, you do a strange thing in giving us nothing (like ὅτι σὰ οὐδὲν δίδως), Χ.  $M. 2,7^{13}$ ; δόξας ἀμαθέα εἶναι, δς . . . ἐκέλευε, believing him to be unlearned, because he commanded, etc., Hd. 1,33.

Compare causal relative sentences in Latin.

1462. N. When the negative is  $\mu\eta$ , the sentence is conditional as well as causal; as  $\tau a\lambda a (\pi \omega \rho o s \epsilon \bar{t}, \dot{\phi}, \mu \eta \tau \epsilon, \theta \epsilon o \epsilon \bar{t})$  and  $\tau a \tau \rho \dot{\phi} o \epsilon \bar{t}$  is  $\rho \dot{\phi}$ , you are wretched, since you have neither ancestral yods nor temples (implying also if you really have none), P. Eu. 302b. Compare the use of signidem in Latin.

# TEMPORAL PARTICLES SIGNIFYING UNTIL AND BEFORE.

## "Έως, έστε, άχρι, μέχρι, ΑΝΟ όφρα.

- 1463. When ἔως, ἔστε, ἄχρι, μέχρι, and the epic ὄφρα mean while, so long as, they are not distinguished in their use from other relatives. But when they mean until, they have many peculiarities. Homer has είος or είως for ἔως.
- 1464. When  $\tilde{\epsilon}\omega s$ ,  $\tilde{\epsilon}\sigma\tau\epsilon$ ,  $\tilde{a}\chi\rho\iota$ ,  $\mu\dot{\epsilon}\chi\rho\iota$ , and  $\tilde{o}\phi\rho a$ , until, refer to a definite past action they take the indicative, usually the aorist. E.g.

Νηχον πάλιν, εξος έπηλθον εξς ποταμόν, I swam on again, until I came into a river, Od.7,280. Ταῦτα ἐποίουν, μέχρι σκότος ἐγένετο, this they did until darkness came on, X.  $\Lambda$ . 4, 24.

This is the construction of the relative with a definite antecedent (1427).

1465. These particles follow the construction of conditional relatives in both forms of future conditions, in unfulfilled conditions, and in present and past general suppositions. *E.g.* 

Επίσχες, ἔστ' ἃν καὶ τὰ λοιπὰ προσμάθης, wait until you (shall) learn the rest besides (1434), A. Pr. 697. Εἰποιμ' ἄν . . . ἔως παρατείναι μι τοῦτον, I should tell him, etc., until I put him to torture (1436), X.C.1,311. 'Ηδέως ἃν τοῦτω ἔτι διελεγόμην, ἔως αὐτῷ . . . . ἀπέδωκα, I should (in that case) gladly have continued to talk with

him until I had given him back, etc. (1433), P. G. 506. "A  $\delta$  år åσύντακτα  $\tilde{\eta}$ , ἀνάγκη ταῦτα ἀεὶ πράγματα παρέχειν, εως åν χώραν λάβη, whatever things are in disorder, these must always make trouble until they are put in order (1431, 1), X.C.4,  $5^{81}$ . Περιεμένομεν εκάστοτε, εως ἀνοιχθείη τὸ δεσμωτήριον, we waited each day until the prison was opened (1431, 2), P. Ph.  $59^{4}$ .

1466. N. The omission of  $\check{a}\nu$  after these particles, when the verb is in the subjunctive, is more common than it is after  $\epsilon l$  or ordinary relatives (1406), occurring sometimes in Attic prose; as  $\mu \acute{\epsilon} \chi \rho \iota \pi \lambda o \hat{\nu} s \gamma \acute{\epsilon} \nu \eta \tau a \iota$ , until the ship sails, T.1, 137.

1467. Clauses introduced by  $\tilde{\epsilon}\omega_s$  etc. frequently imply a purpose; see the examples under 1465. When such clauses depend upon a past tense, they admit the double construction of indirect discourse (1502, 3), like final clauses (1369).

1468. N. Homer uses  $\epsilon i_s$   $\tilde{o}$   $\kappa \epsilon$ , until, like  $\tilde{\epsilon} \omega_s$   $\kappa \epsilon$ ; and Herodotus uses  $\tilde{\epsilon}_s$   $\tilde{o}$  and  $\tilde{\epsilon}_s$   $\tilde{o}$  like  $\tilde{\epsilon} \omega_s$ .

## Πρίν, before, until.

1469.  $\Pi \rho i \nu$  is followed by the infinitive, and also (like  $\tilde{\epsilon} \omega_S$ ) by the finite moods.

1470. In Homer  $\pi\rho\dot{\nu}$  generally has the infinitive without reference to its meaning or to the nature of the leading verb. But in other Greek it has the infinitive chiefly when it means simply before and when the leading clause is affirmative; it has the finite moods only when it means until (as well as before), and chiefly when the leading verb is negative or implies a negative. It has the subjunctive and optative only after negatives.

## 1471. 1. Examples of πρίν with the infinitive:—

Naîe δὲ Πήδαιον πρὶν ἐλθεῖν vlas 'Αχαιῶν, and he dwelt in Pedacum before the coming of the sons of the Achaeans, Il. 13, 172 (here πρὶν ἐλθεῖν = πρὸ τοῦ ἐλθεῖν). Οὐ μ' ἀποτρέψεις πρὶν χαλκῶ μαχέσασθαι, you shall not turn me away before (i.e. until) we have fought together, Il. 20, 257 (here the Attic would prefer πρὶν ανμαχεσώμεθα). 'Αποπέμπουσιν αἰτὸν πρὶν ἀκοῦσαι, they send him away before hearing him, T. 2, 12. Μεσσήνην εἴλομεν πρὶν Πέρσας λαβεῖν τὴν βασιλείαν, we took Messene before the Persians obtained their kingdom, I. 6, 26. Πρὶν ὡς 'Αφοβον ἐλθεῖν μίαν ἡμέραν οὐκ ἐχήρευσεν, she was not a widow a single day before she went to Aphobus, D. 30, 33 (here the infinitive is required, as πρίν does not mean until).

2. Examples of  $\pi\rho i\nu$ , until, with the indicative (generally after negatives), and with the subjunctive and optative (always after negatives), the constructions being the same as those with  $\tilde{\epsilon}\omega s$  (1464-1467):—

Οὐκ ἢν ἀλέξημ' οὐδὶν, πρίν γ' ἐγώ σφισιν ἔδειξα, etc., there was no relief, until I showed them, etc. (1464), A.Pr. 479. Οὐ χρή με ἐνθένδε ἀπελθεῖν, πρὶν ἄν δῶ δίκην, I must not depart hence until I am punished (1434), X. An. 5,  $7^5$ . Οὐκ ἄν εἰδείης πρὶν πειρηθείης, you cannot know until you have tried it (1436), Theog. 125. Έχρῆν μὴ πρότερον συμβουλεύειν, πρὶν ἡμᾶς ἐδίδαξαν, etc., they ought not to have given advice until they had instructed us, etc. (1433), I.4, 19. Όρῶσι τοὺς πρεσβυτέρους οὐ πρόσθεν ἀπόντας, πρὶν ἄν ἀφῶσιν οἱ ἄρχοντες, they see that the elders never go away until the authorities dismiss them (1431, 1), X.Cy. 1, 28. ᾿Απηγόρενε μηδένα βάλλειν, πρὶν Κῦρος ἐμπλησθείη θηρῶν, he forbade any one to shoot until Cyrus should be sated with the hunt (1467; 1502, 3), X.C. 1,  $4^{14}$ .

- 1472. N. In Homer  $\pi\rho'_i\nu$   $\gamma'$   $\tilde{\sigma}\tau\epsilon$  (never the simple  $\pi\rho'_i\nu$ ) is used with the indicative, and  $\pi\rho'_i\nu$   $\gamma'$   $\tilde{\sigma}\tau'$   $\tilde{a}\nu$  (sometimes  $\pi\rho'_i\nu$ , without  $\tilde{a}\nu$ ) with the subjunctive.
- 1473. N. Πρίν, like ζως etc. (1466), sometimes has the subjunctive without ἄν, even in Attic Greek; as μὴ στέναζε πρὶν μάθης, do not lament before you know, S. Ph. 917.
- 1474.  $\Pi \rho i \nu \eta'$  (a developed form for  $\pi \rho i \nu$ ) is used by Herodotus (rarely by Homer), and  $\pi \rho \delta \tau \epsilon \rho \rho \nu \eta'$ , somer than, before, by Herodotus and Thucydides, in most of the constructions of  $\pi \rho i \nu$ . So  $\pi \delta \rho \rho s$ , before, in Homer with the infinitive. Even  $\nu \sigma \tau \epsilon \rho \rho \nu \eta'$ , later than, once takes the infinitive by analogy. E.g.

Πρὶν γὰρ ἢ ὁπίσω σφέας ἀναπλῶσαι. ἤλω ὁ Κροῖσος, for before they had sailed back, Croesus was taken, Hd.1,78. Οὐδὲ ἢδεσαν πρότερον ἢ περ ἐπύθοντο Τρηχινίων, they did not even know of it until they heard from the Trachinians, Hd.7,175. Μὴ ἀπανίστασθαι ἀπὸ τῆς πόλιος πρότερον ἢ ἐξέλωσι, not to withdraw from the city until they capture it, Hd.9,86. Πρότερον ἡ αἰσθέσθαι αὐτούς, before they perceived them. T.6,58. See T.1,69; 2,65. Τέκνα ἐξείλοντο πάρος πετεηνὰ γενέσθαι, they took away the nestlings before they were fledged, Od.16,218. So also ἔτεσιν ὕστερον ἐκατὸν ἡ αὐτοὺς οἰκῆσαι, a hundred years after their own settlement, T.6,4.

# VIII. INDIRECT DISCOURSE OR ORATIO OBLIQUA.

#### GENERAL PRINCIPLES.

1475. A direct quotation or question gives the exact

words of the original speaker or writer (i.e. of the oratio recta). In an indirect quotation or question (oratio obliqua) the original words conform to the construction of the sentence in which they are quoted.

Thus the words ταῦτα βούλομαι may be quoted either directly, λέγει τις "ταῦτα βούλομαι," or indirectly, λέγει τις ὅτι ταῦτα βούλεται or φησί τις ταῦτα βούλεσθαι, some one says that he wishes for this. So ἐρωτῷ "τί βούλει;" he asks, "what do you want?" but indirectly ἐρωτῷ τί βούλεται, he asks what he wants.

- 1476. Indirect quotations may be introduced by  $\delta \tau \iota$  or  $\dot{\omega}_{S}$ , that, with a finite verb, or by the infinitive (as in the above example); sometimes also by the participle.
- 1477. N. "Οτι, that, may introduce even a direct quotation; as εἶπον ὅτι ἰκανοί ἐσμεν, they said, "we are able," X. A. 5, 410.
- **1478.** 1. Όπως is sometimes used like  $\dot{\omega}_S$ , that, especially in poetry; as τοῦτο μή μοι Φράζ,  $\ddot{\sigma}\pi\omega_S$  οὐκ εἶ κακός, S.O.T. 548.
- 2. Homer rarely has δ (neuter of δ5) for δτι, that; as λεύσσετε γὰρ τό γε πάντες, δ μοι γέρας ἔρχεται ἄλλη, for you all see this, that my prize goes another way, 11.1, 120; so 5, 433.
- 3. Οὖνεκα and ὁθούνεκα, that, sometimes introduce indirect quotations in poetry.
- 1479. Indirect questions follow the same principles as indirect quotations with  $\tilde{\sigma}\tau\iota$  or  $\omega_{5}$ , in regard to their moods and tenses.

For the words used to introduce indirect questions, see 1605 and 1606.

- 1480. The term indirect discourse applies to all clauses (even single clauses in sentences of different construction) which indirectly express the words or thought of any person, even those of the speaker himself (see 1502).
- 1481. Indirect quotations after ὅτι and ὡς and indirect questions follow these general rules:—
- 1. After primary tenses, each verb retains both the mood and the tense of the direct discourse.
- 2. After past tenses, each indicative or subjunctive of the direct discourse may be either changed to the same tense of the optative or retained in its original mood and tense. But all secondary tenses of the indicative in unreal conditions (1397; 1433) and all optatives remain unchanged.

- 1482. N. The imperfect and pluperfect, having no tenses in the optative, generally remain unchanged in all kinds of sentences (but see 1488). The agrist indicative likewise remains unchanged when it belongs to a dependent clause of the direct discourse (1497, 2). (See 1499.)
- 1483. When the quotation depends on a verb which takes the infinitive or participle, its leading verb is changed to the corresponding tense of the infinitive or participle (av being retained when there is one), and its dependent verbs follow the preceding rule (1481).
- 1484. A  $\nu$  is never omitted with the indicative or optative in indirect discourse, if it was used in the direct form; but when a particle or a relative word has  $\delta \nu$  with the subjunctive in the direct form, as in  $\delta \delta \nu$ ,  $\delta \tau \delta \nu$ , etc. (1299, 2), the  $\delta \nu$  is dropped when the subjunctive is changed to the optative after a past tense in indirect discourse.
- 1485. N. "Av is never added in indirect discourse when it was not used in the direct form.
- 1486. The negative particle of the direct discourse is regularly retained in the indirect form. (But see 1496.)

SIMPLE SENTENCES IN INDIRECT DISCOURSE.

Indicative and Optative after 5t. and  $\dot{\omega}_S$ , and in Indirect Questions.

1487. After primary tenses an indicative (without  $\tilde{a}\nu$ ) retains both its mood and its tense in indirect discourse. After past tenses it is either changed to the same tense of the optative or retained in the original mood and tense. E.g.

Λέγει ὅτι γράφει, he says that he is writing; λέγει ὅτι ἔγραφεν, he says that he was writing; λέγει ὅτι ἔγραψεν, he says that he wrote; λέξει ὅτι γέγοαφεν, he will say that he has written. Ἐρωτῷ τί βούλονται, he asks what they want; ἀγνοῶ τί ποιήσουσιν, I do not know what they will do.

Εἶπεν ὅτι γράφοι or ὅτι γράφει, he said that he was writing (he said γράφω). Εἶπεν ὅτι γράψοι or ὅτι γράψει, he said that he would write (he said γράψω). Εἶπεν ὅτι γράψειεν οr ὅτι ἔγραψεν, he said that he had written (he said ἔγραψα, I wrote). Εἶπεν ὅπ γεγραφῶς εἴη or ὅτι γέγραφεν, he said that he had written (he said γέγραφα, I have written).

- (Opt.) Έπειρώμην αὐτῷ δεικνύναι, ὅτι οἴ οιτο μὰν εἶναι σοφὸς, εἶ η δ οῦ, I tried to show him that he believed himself to be wise, but was not so (i.e. οἴεται μὰν . . . ἔστι δ' οῦ), P. Ap.21°. 'Υπειπών ὅτι αὐτὸς τἀκεῖ πράξοι, ϣχετο, hinting that he would himself attend to things there, he departed (he said αὐτὸς τἀκεῖ πράξω), T. 1, 90. "Ελεξαν ὅτι πέμψειε σφᾶς ὁ Ἰνδῶν βασιλεύς, κελεύων ἐρωτᾶν ἐξ ὅτον ὁ πόλεμος εἴη, they said that the king of the Indians had sent them, commanding them to ask on what account there was war (they said ἔπεμψεν ἡμᾶς, and the question was ἐκ τίνος ἐστὶν ὁ πόλεμος;), Χ. C. 2. 4¹. 'Ηρετο εἴ τις ἐμοῦ εἴη σοφώτερος, he asked whether there was any one wiser than I (i.e. ἔστι τις σοφώτερος;), P. Ap.21°.
- (INDIC.) Έλεγον ὅτι ἐλπίζουσι σὲ καὶ τὴν πόλιν ἔξειν μοι χάριν, they said that they hoped you and the state would be grateful to me, 1.5, 23. Ἡκε δ' ἀγγέλλων τις ὡς Ἑλάτεω κατείληπται, some one was come with a report that Elatea had been taken (here the perfect optative might have been used). D.18, 169. ᾿Αποκρινάμενοι ὅτι πέμψουσι πρέσβεις, εὐθὺς ἀπήλλαξαν, having replied that they would send ambassadors, they dismissed them at once, Τ.1, 90. Ἡπόρουν τί ποτε λέγει, I was uncertain what he meant (τί ποτε λέγει;), Υ. Αρ. 21<sup>b</sup>. ὙΕβουλεύοντο τίν' αὐτοῦ καταλείψουσιν, they were considering (the question) whom they should leave here, D.19, 122.
- 1488. N. Occasionally the present optative represents the imperfect indicative in this construction; as ἀπεκρίναντο ὅτι οὐδεὶς μάρτυς παρείη, they replied that there had been no witness present (οὐδεὶς παρῆν), D. 30, 20 (here the context makes it clear that παρείη does not stand for πάρεστι).
- 1489. 1. In a few cases the Greek changes a present indicative to the imperfect, or a perfect to the pluperfect, in indirect discourse, instead of retaining it or changing it to the optative; as  $\vec{\epsilon} \nu$  discourse, instead of retaining it or changing it to the optative; as  $\vec{\epsilon} \nu$  discourse, instead of retaining it or changing it to the optative; as  $\vec{\epsilon} \nu$  discourse, instead of retaining it or changing it to the optative; as  $\vec{\epsilon} \nu$  discourse, instead of retaining it to the optative,  $\vec{\epsilon} \sigma a \nu$  decrease discourse, and that the barbarians had betrayed them, X.A.3.12. (See the whole passage.) This is also the English usage.
  - 2. In Homer this is the ordinary construction: see Od.3,166.

Subjunctive or Optative representing the Interrogative Subjunctive.

1490. An interrogative subjunctive (1358), after a primary tense, retains its mood and tense in an indirect question; after a past tense, it may be either changed

to the same tense of the optative or retained in the subjunctive. E.g.

Βουλεύομαι ὅπως σε ἀποδρῶ, I am trying to think how I shall escape you (πῶς σε ἀποδρῶ;),  $X.C.1,4^{13}$ . Οὐκ οἶδ' εἰ Χρυσάντα τούτω δῶ, I do not know whether I shall give (them) to Chrysantas here, ibid.  $8,4^{16}$ . Οὐκ ἔχω τί εἴπω, I do not know what I shall say (τί εἴπω;), D.9,54. Cf. Non habeo quid dicam. Ἐπήροντο εἰ παραδῶμεν τὴν πόλιν, they asked whether they should give up the city (παραδῶμεν τὴν πόλιν; shall we give up the city?), T.1,25. Ἡπόρει ὅ τι χρήσαιτο τῷ πράγματι, he was at a loss how to deal with the matter (τί χρήσωμαι;),  $X.H.7,4^{29}$ . Ἑβουλεύοντο εἴτε κατακαύσωσιν εἴτε τι ἄλλο χρήσωνται, they were deliberating whether they should bux them or dispose of them in some other way, T.2,4.

- 1491. N. In these questions  $\epsilon i$  (not  $\epsilon \acute{a}\nu$ ) is used for whether, with both subjunctive and optative (see the second example in 1490).
- 1492. N. An interrogative subjunctive may be changed to the optative when the leading verb is optative, contrary to the general usage of indirect discourse (1270, 2); as our av  $\tilde{\epsilon}_{\chi}$  vers  $\tilde{\epsilon}_{\chi}$   $\tilde{\epsilon$

#### INDICATIVE OR OPPATIVE WITH av.

1493. An indicative or optative with  $\tilde{a}\nu$  retains its mood and tense (with  $\tilde{a}\nu$ ) unchanged in indirect discourse after  $\tilde{o}\tau\iota$  or  $\tilde{\omega}s$  and in indirect questions. E.g.

Λέγει (οι ἔλεγεν) ὅτι τοῦτο ἄν ἐγένετο, he says (or said) that this would have happened; ἔλεγεν ὅτι οῦτος δικαίως ἄν ἀποθάνοι, he said that this man would justly die. Ἡρώτων εὶ δοῖεν ἄν τὰ πιστά, they asked whether they would give the pledges (δοίητε ἄν;), X. A. 4, 8.

## INFINITIVE AND PARTICIPLE IN INDIRECT DISCOURSE.

1494. Each tense of the infinitive or participle in indirect discourse represents the tense of the finite verb which would be used in the direct form, the present and perfect including the imperfect and pluperfect. Each tense with  $\check{a}\nu$  can represent the corresponding tenses of either indicative or optative with  $\check{a}\nu$ . E.g.

'Αρρωστείν προφασίζεται, he presends that he is sick, έξώμοσεν άρρωστείν τουτονί, he took an oath that this man was sick, D. 19, 124. Κατασχείν φησι τούτους, he says that he detained them, ibid. 39.

Έφη χρήμαθ εαυτῷ τοὺς Θηβαίους επικεκηρυχέναι, he said that the Thebans had affered a reward for him, ibid. 21. Έπαγγίλλεται τὰ δίκαια ποιήσειν, he promises to do what is right, ibid. 45.

"Ηγγειλε τούτους έρχομένους, he announced that these were coming (οὐτοι έρχονται); ἀγγελλει τούτους έλθοντας, he announces that these came (οὐτοι ήλθον); ἀγγελλει τοῦτο γενησόμενον, he announces that this will be done; ἤγγειλε τοῦτο γενησόμενον, he announced that this would be done; ἤγγειλε τοῦτο γεγενημένον, he announced that this had been done (τοῦτο γεγένηται).

See examples of  $\tilde{a}\nu$  with infinitive and participle in 1308. For the present infinitive and participle as imperfect, see 1285 and 1289.

- 1495. The infinitive is said to stand in indirect discourse, and its tenses correspond to those of the finite moods, when it depends on a verb implying thought or the expression of thought, and when also the thought, as originally conceived, would have been expressed by some tense of the indicative (with or without  $\tilde{a}\nu$ ) or optative (with  $\tilde{a}\nu$ ), so that it can be transferred without change of tense to the infinitive. Thus in  $\beta o \nu \lambda \epsilon \tau a \ell \lambda \theta \epsilon \hat{\iota} \nu$ , he wishes to go,  $\epsilon \lambda \theta \epsilon \hat{\iota} \nu$  represents no form of either aorist indicative or aorist optative, and is not in indirect discourse. But in  $\phi \eta \sigma i \nu \epsilon \lambda \theta \epsilon \hat{\iota} \nu$ , he says that he went,  $\epsilon \lambda \theta \epsilon \hat{\iota} \nu$  represents  $\epsilon \eta \lambda \theta \sigma \nu$  of the direct discourse. (See Greek Moods and Tenses, § 681.)
- 1496. The regular negative of the infinitive and participle in indirect discourse is oi, but exceptions occur. Especially the infinitive after verbs of hoping, promising, and swearing (see 1286) regularly has μή for its negative; as ώμνυς μηδέν εἰρηκέναι, he swore that he had said nothing, D.21, 119.

## INDIRECT QUOTATION OF COMPLEX SENTENCES.

- 1497. 1. When a complex sentence is indirectly quoted, its *leading* verb follows the rule for simple sentences (1487-1494).
- 2. After primary tenses the dependent verbs retain the same mood and tense. After past tenses, dependent primary tenses of the indicative and all dependent subjunctives may either be changed to the same tense of the optative or retain their original mood and tense. When a subjunctive becomes optative,  $\mathring{a}\nu$  is dropped,  $\mathring{c}\mathring{a}\nu$ ,  $\mathring{o}\tau a\nu$ , etc. becoming el,  $\mathring{o}\tau \epsilon$ , etc. But dependent secondary tenses of the indicative remain unchanged. E.g.

- 1. \*Αν ύμεις λέγητε, ποιήσειν (φησίν) ὁ μήτ αἰσχύνην μήτ ἀδοξίαν αὐτῷ φέρει, if you (shall) say so, he says he will do whatever does not bring shame or discredit to him, D. 19, 41. Here no change is made, except in ποιήσειν (1494).
- 2. Απεκρίνατο ότι μανθάνοιεν ά οὐκ ἐπίσταιντο, he replied. that they were learning what they did not understand (he said  $\mu \alpha \nu \theta \dot{\alpha}$ νουσιν α ουκ επίστανται, which might have been retained), P. Eu. 276. Εί τινα φεύγοντα λήψοιτο, προηγόρευεν ότι ώς πολεμίω χρήσοιτο, he announced that, if he should catch any one running away, he should treat him as an enemy (he said ει τινα λήψομαι, γρήσυμαι), Χ. С.3, 13 (1405). Νομίζων, όσα της πόλεως προλάβοι. πάντα ταθτα βεβαίως εξειν, believing that he should hold all those places securely which he should take from the city beforehand (30' by προλάβω, έξω), D. 18, 26. Εδόκει μοι ταύτη πειρασθαι σωθήναι, ένθυμουμένω ότι, έαν μεν λάθω, σωθήσομαι, it seemed best to me to try to gain safety in this way, thinking that, if I should escape notice, I should be saved (we might have had εὶ λάθοιμι, σωθησοίμην), L. 12, 15. "Εφασαν τους ανδρας αποκτενείν ους έχουσι ζώντας, they said that they should kill the men whom they had alive (anorteνούμεν οις έχομεν, which might have been changed to αποκτενείν ους έχοιεν), Τ.2,5. Πρόδηλον ήν (τουτο) έσόμενον, εί μή κωλύ  $\sigma \epsilon \tau \epsilon$ , it was plain that this would be so unless you should prevent (ἔσται, εἰ μὴ κωλύσετε, which might have become εἰ μὴ κωλύσοιτε), Aesch. 3, 90.

"Ηλπιζον τοὺς Σικελοὺς ταύτη, ους μετεπέμψαντο, ἀπαντήσεσθαι, they hoped the Sikels whom they had sent for would meet them here, T. 7, 80.

- 1498. One verb may be changed to the optative while another is retained; as δηλώσας ὅτι ἔτοιμοί εἰσι μάχεσθαι, εἴ τις ἐξέρχοιτο, having shown that they were ready to fight if any one should come forth (ἔτοιμοί ἐσμεν, ἐάν τις ἐξέρχηται), Χ. C.4, 1¹. This sometimes causes a variety of constructions in the same sentence.
- 1499. The aerist indicative is not changed to the aerist optative in dependent clauses, because in these the aerist optative generally represents the aerist subjunctive.

The present indicative is seldom changed to the present optative in dependent clauses, for a similar reason.

For the imperfect and pluperfect, see 1482.

- 1500. N. A dependent optative of the direct form of course remains unchanged in all indirect discourse (1481, 2).
- 1501. N. Occasionally a dependent present or perfect indicative is changed to the imperfect or pluperfect, as in the leading clause (1489).

- 1502. The principles of 1497 apply also to all dependent clauses after past tenses, which express indirectly the past thought of any person. This applies especially to the following constructions:—
- 1. Clauses depending on an infinitive after verbs of wishing, commanding, advising, and others which imply thought but do not take the infinitive in indirect discourse (1495).
- 2. Clauses containing a protasis with the apodosis implied in the context (1420), or with the apodosis expressed in a verb like  $\theta a \nu \mu a \zeta \omega$  (1423).
- 3. Temporal clauses expressing a past intention, purpose, or expectation, especially those introduced by  $\tilde{\epsilon}\omega_{5}$  or  $\pi\rho(\nu)$ .
- 4. Even ordinary relative sentences, which would regularly take the indicative.
- (1) Έβούλοντο ἐλθεῖν, εἰ τοῦτο γένοιτο, they wished to go if this should happen. (We might have ἐὰν τοῦτο γένηται, expressing the form, if this shall happen, in which the wi-h would be conceived). Here ἐλθεῖν is not in indirect discourse (1495). Ἐκέλευσεν ὅ τι δύναιντο λαβόντας μεταδιώκειν, he commanded them to take what they could and pursue (we might have ὅ τι ᾶν δύνωνται, representing ὅ τι ᾶν δύνησθε), Χ. С. 7, 3<sup>7</sup>. Προεῖπον αὐτοῖς μὴ ναυμαχεῖν Κορινθίοις, ἢν μὴ ἐπὶ Κέρκυραν πλέωσι καὶ μέλλωσιν ἀποβαίνειν, they instructed them not to engage in a sea-fight with Corinthians, unless these should be sailing against Corcyra and should be on the point of landing (we might have εἰ μὴ πλέοιεν καὶ μέλλοιεν), Τ. 1, 45.
- (2) Φύλακας συμπέμπει, ὅπως φυλάττοιεν αὐτὸν, καὶ εἰ τῶν ἀγρίων τι φανείη θηρίων, he sends (sent) guards, to guard him and (to be ready) in case any of the savage beasts should appear (the thought being ἐάν τι φανῆ), Χ. С. 1, 4<sup>7</sup>. Τἄλλα, ἢν ἔτι ναημαχεῖν οἱ ᾿Αθηναῖοι τολ μήσωσι, παρεσκευάζοντο, they made the other preparations, (to be ready) in case the Athenians should still venture a naval battle, Τ. 7, 59. Ἦπειρον, εἰ ἀλώσοιντο, they pitied them, if they were to be captured (the thought being we pity them if they are to be captured, εἰ ἀλώσονται, which might be retained), Χ. Α. 1, 4<sup>1</sup>. Έχαιρον ἀγαπῶν εἴ τις ἐάσοι, Ι rejoiced, heing content if any one would let it pass (the thought was ἀγαπῶ εἴ τις ἐάσει), 1<sup>1</sup>. Rp. 450<sup>8</sup>. Ἑθαύμαζεν εἴ τις ἀργύριον πράττοιτο, he wondered that any one demanded money, Χ. Μ. 1, 2<sup>7</sup>; but in the same book (1, 1<sup>12</sup>) we find ἐθαύμαζε δ' εἰ μὴ φανερὸν αὐτοῖς ἐστιν, he wondered that it was not plain.

- (3) Σπονδὰς ἐποιήσαντο ἔως ἀπαγγελθείη τὰ λεχθίντα εἰς Λακεδαίμονα, they made a truce, (to continue) until what had been said should be reported at Sparta (their thought was ἔως ἄν ἀπαγγελθῆ),  $X.H.3,2^{20}$ . Οὐ γὰρ δή σφεας ἀπίει ὁ θεὸς τῆς ἀποικίης, πρὶν δὴ ἀπίκωνται ἐς αὐτὴν Λιβύην, for the God did not mean to release them from the colony until they should actually come to Libya (we might have ἀπίκοιντο), Hd.4,157. Μένοντες ἔστασαν ὁππότε πύργος Τρώων ὁρμήσειε, they stood waiting until (for the time when) a column should rush upon the Trojans, Il.4,334.
- (4) Καὶ ἦτεε σημα ἰδέσθαι, ὅττι μά οἱ γαμβροῖο πάρα Προίτοιο φέροιτο, he asked to see the token, which he was bringing (as he said) from Proetus, 11.6, 176. Κατηγόρεον τῶν Αἰγινητέων τὰ πεποιήκοιεν προδόντες τὴν Ἑλλάδα, they accused the Aeginetans for what (as they said) they had done in hetraying Greece, Hd. 6, 49.

For the same principle in causal sentences, see 1506.

1503. N. On this principle, clauses introduced by  $\tilde{i}\nu\alpha$ ,  $\tilde{o}\pi\omega$ s,  $\omega$ s,  $\tilde{o}\phi\rho\alpha$ , and  $\mu\dot{\eta}$  admit the double construction of indirect discourse, and allow the subjunctive or future indicative to stand unchanged after past tenses (see 1369). The same principle extends to all conditional and all conditional relative and temporal sentences depending on clauses with  $\tilde{i}\nu\alpha$ , etc., as these too belong to the indirect discourse.

# Ούχ ὅτι, ούχ ὅπως, μὴ ὅτι, μὴ ὅπως.

1504. These expressions, by the ellipsis of a verb of saying, often mean I do not speak of, or not to speak of. With oix an indicative (e.g.  $\lambda \dot{\epsilon} \gamma \omega$ ) was originally understood, and with  $\mu \dot{\eta}$  an imperative or subjunctive (e.g.  $\lambda \dot{\epsilon} \gamma \dot{\epsilon}$  or  $\dot{\epsilon} \dot{\epsilon} \pi \gamma s$ ). E.g.

Οὐχ ὅπως τὰ σκεύη ἀπέδοσθε, ἀλλὰ καὶ αἱ θύραι ἀφηρπάσθησαν, I do not mention your selling the furniture (i.e. not only did you sell the furniture), but even the doors were carried off, Lys. 19,31. Μὴ ὅτι θεὸς, ἀλλὰ καὶ ἀνθρωποὶ ... οὐ φιλοῦσι τοὺς ἀπιστοῦντας, not only God (not to speak of God), but also men fail to love those who distrust them, X. C. 7,  $2^{17}$ . Πεπαύμεθ ἡμεῖς, οὐχ ὅπως σε παύσομεν, we have been stopped ourselves; there is no talk of stopping you, S. Et. 796.

When these forms were thus used, the original ellipsis was probably never present to the mind.

#### IX. CAUSAL SENTENCES.

1505. Causal sentences express a cause, and are introduced by ὅτι, ὡς, because, ἐπεί, ἐπειδή, ὅτε, ὁπότε, since,

and by other particles of similar meaning. They have the indicative after both primary and secondary tenses. The negative particle is ov. E.g.

Κήδετο γὰρ Δαναῶν, ὅτι ἡα θνήσκοντας ὁρᾶτο, for she pitied the Danai, because she saw them dying, 11.1, 56. "Οτε τοῦθ' οὕτως ἔχει, προσήκει προθύμως ἐθέλειν ἀκούειν, since this is so, it is becoming that you should be willing to hear eagerly, D.1,1.

A potential optative or indicative may stand in a causal sen-

tence: see D. 18,49 and 79.

1506. N. On the principle of indirect discourse (1502), a causal sentence after a past tense may have the optative, to imply that the cause is assigned on the authority of some other person than the writer; as τὸν Περικλία ἐκάκιζον, ὅτι στρατηγὸς ὧν οὐκ ἐπεξάγοι, they abused Pericles, because (as they said) being general he did not lead them out, T.2,21. (This assigns the Athenians' reason for abusing Pericles, but does not show the historian's opinion.)

#### X. EXPRESSION OF A WISH.

1507. When a wish refers to the future, it is expressed by the optative, either with or without  $\epsilon \cdot \theta \epsilon$  or  $\epsilon i \gamma d\rho$  (Homeric also  $ai\theta \epsilon$ ,  $ai \gamma d\rho$ ), O that, O if. The negative is  $\mu \eta$ , which can stand alone with the optative. E.g.

Ύμιν θεοὶ δοῖεν ἐκπέρσαι Πριάμοιο πόλιν, may the Gods grant to you to destroy Priam's city, Il.1,18. At γὰρ ἔμοὶ τοσσήνδε θεοὶ δύναμν περιθεῖεν, O that the Gods would clothe me with so much strength, Od.3,205. Το μὲν νῦν ταῦτα πρήσσοις τάπερ ἐν χεροὶ ἔχεις, for the present may you continue to do these things which you have now in hand, Ild.7,5. Είθε φίλος ἡμῖν γένοιο, O that you may become our friend, X.II.4,13. Μηκέτι ζώην ἐγώ, may I no longer live, Ar. N.1255. Τεθναίην, ὅτε μοι μηκέτι ταῦτα μέλοι, may I die when I shall no longer care for these things (1439), Minn.1,2.

The force of the tenses here is the same as in protasis (see 1272).

1508. In portry  $\epsilon l$  alone is sometimes used with the optative in wishes; as  $\epsilon l$   $\mu \nu \nu = 0$   $\nu =$ 

1509. N. The poets, especially Homer, sometimes prefix ως (probably exclamatory) to the optative in wishes; as ως ἀπόλοιτο καὶ ἄλλος ὅτις τοιαῦτά γε ἡ ζοι, likewise let any other perish who may do the like, Od.1,47.

1510. In poetry, especially in Homer, the optative alone sometimes expresses a concession or permission, sometimes a command or exhortation; as αὐτις 'Αργείην 'Ελένην Μενέλαος ἄγοιτο, Menelaus may take back Argive Helen, II.4, 19. Τεθναίης, ὧ Προῖτ', ἡ κάκτανε Βελλεροφόντην, either die, or kill Bellerophontes, II.6, 164. Here, and in wishes without εἰ, εἰ γάρ, etc., we probably have an original independent use of the optative; while wishes introduced by any form of εἰ are probably elliptical protases.

(See Appendix I. in Greek Moods and Tenses, pp. 371-389.)

1511. When a wish refers to the present or the past, and it is implied that its object is not or was not attained, it is expressed in Attic Greek by a secondary tense of the indicative with  $\epsilon i \theta \epsilon$  or  $\epsilon i \gamma \delta \rho$ , which here cannot be omitted. The negative is  $\mu \dot{\eta}$ . The imperfect and agrist are distinguished here as in protasis (1397). E.g.

Είθε τοῦτο ἐποίει, O that he were doing this, or O that he had done this. Είθε τοῦτο ἐποίησεν, O that he had done this; εἰ γὰρ μη ἐγένετο τοῦτο, O that this had not happened. Είθ' εἶχες βελτίους φρένας, O that thou hadst a better understanding, E. El. 1061. Εἰ γὰρ τοσαύτην δύναμιν εἶχον, O that I had so great power, E. Al. 1072. Είθε σω τότε συνεγενόμην, O that I had then met with you, X.M.1.249.

1512. The agrist  $\delta \phi \epsilon \lambda \omega \nu$ , ought, of  $\delta \phi \epsilon i \lambda \omega$ , debeo, owe, and in Homer sometimes the imperfect  $\delta \phi \epsilon \lambda \lambda \omega \nu$ , are used with the infinitive, chiefly in poetry, to express a present or past unattained wish (1402, 2). E.q.

"Ωφελε τοῦτο ποιεῖν, would that he were doing this (lit. he ought to be doing this), or would that he had done this (habitually); ὅφελε τοῦτο ποιῆσαι, would that he had done this. (For the distinction made by the different tenses of the infinitive, see 1400, 2). Τὴν ὅφελ' ἐν νήεσσι κατακτάρεν "Αρτεμις, would that Artemis had slain her at the ships, 11.19,59.

- 1513. N. "Ωφέλον with the infinitive is negatived by μή (not οὐ), and it may even be preceded by είθε, εἰ γώρ, οτ ὡς; as μή ποτ ὡφελον λιπεῖν τὴν Σκῦρον, Ο that I had never left Scyros, S. Ph. 969; εἰ γὰρ ὥφελον οἰοί τε εἶναι, Ο that they were able, P. Cr. 44°; ὡς ὥφελες ὁλέσθαι, would that you had perished, II. 3, 428.
- 1514. In Homer the present optative (generally with εθε or ε γάρ) may express an unattained wish in present time; as εθ ως

ή βώοιμι βίη δέ μοι ξμπέδος εἴη, O that I were again as young and my strength were firm, Il. 11,670.

This corresponds to the Homeric use of the optative in unreal conditions and their apodoses (1398). In both constructions the present optative is commonly future in Homer, as in other Greek.

1515. Homer never uses the indicative (1511) in wishes. He always expresses a past wish by the construction with  $\tilde{\omega}\phi\epsilon\lambda\omega\nu$  (1512), and a present wish sometimes by  $\tilde{\omega}\phi\epsilon\lambda\omega\nu$  and sometimes by the present optative (1514).

## THE INFINITIVE.

- 1516. 1. The infinitive is originally a neuter verbal noun, with many attributes of a verb. Thus, like a verb, it has voices and tenses; it may have a subject or object; and it is qualified by adverbs, not by adjectives.
- 2. When the definite article came into use with other nouns (see 937, 4), it was used also with the infinitive, which thus became more distinctly a noun with four cases.

For the subject of the infinitive, see 895. For the case of predicate nouns and adjectives when the subject is omitted, see 927 and 928.

## INFINITIVE WITHOUT THE ARTICLE.

As Subject, Predicate, Object, or Appositive.

1517. The infinitive may be the subject nominative of a finite verb (especially of an impersonal verb, 898, or of  $\epsilon \sigma \tau i$ ), or the subject accusative of another infinitive. It may be a predicate nominative (907), and it may stand in apposition to a noun (911). E.g.

Συνέβη αὐτῷ ἐλθεῖν, it happened to him to go; ἐξῆν μένειν, it was possible to remain; ἡδὺ πολλοὺς ἐχθροὺς ἔχειν; is it pleasant to have many enemies? Φησὶν ἐξεῖναι τούτοις μένειν, he says it is possible for these to remain (μένειν being subject of ἐξεῖναι). Τὸ γνῶναι ἐπιστήμην λαβεῖν ἐστιν, to learn is to acquire knowledge, P.Th. 200°. Τὸ γὰρ θάνατον δεδιέναι οὐδὲν ἄλλο ἐστὶν ἡ δοκεῖν σοφὸν εἶναι μὴ ὅντα, for to fear death (the fear of death) is nothing else than to seem to be wise without being so, P. Ap. 20°. Εἶς οἰωνὸς ἄριστος, ἀμύνεσθαι περὶ πάτρης, one omen is best, to fight for our country, 11.12,243. For the subject infinitives with the article, see 1542.

- 1518. The infinitive may be the object of a verb. It generally has the force of an object accusative, sometimes that of an accusative of kindred signification (1051), and sometimes that of an object genitive.
- 1519. The object infinitive not in indirect discourse (1495) follows verbs whose action naturally implies another action as its object, especially those expressing wish, command, advice, cause, attempt, intention, prevention, ability, fitness, necessity, or their opposites. Such verbs are in general the same in Greek as in English, and others will be learned by practice. The negative is  $\mu \acute{\eta}$ . E.g.

Βούλεται έλθεῖν, he wishes to go; βούλεται τοὺς πολίτας πολεμικοὺς εἶναι, he wishes the citizens to be warlike; παραινοῦμέν σοι μένειν, we advise you to remain; προείλετο πολεμῆσαι, he preferred to make war; κελεύει σε μὴ ἀπελθεῖν, he commands you not to depart; ἀξιοῦσιν ἄρχειν, they claim the right to rule; ἀξιοῦται θανεῖν, he is thought to deserve to die; δέομαι ὑμῶν συγγνώμην μοι ἔχειν, I ask you to have consideration for me. So κωλύει σε βαδίζειν, he prevents you from marching; οὐ πίφυκε δουλεύειν, he is not horn to be a slave; ἀναβάλλεται τοῦτο ποιεῖν, he postpones doing this; κινδυνεύει θανεῖν, he is in danger of death.

- 1520. N. The tenses here used are chiefly the present and aorist, and these do not differ in their time (1272). In this construction the infinitive has no more reference to time than any other verbal noun would have, but the meaning of the verb generally gives it a reference to the future; as in  $\delta\xi$ io $\delta\tau$ ai  $\theta$ ave $\delta\nu$  (above)  $\theta$ ave $\delta\nu$  expresses time only so far as  $\theta$ avárov would do so in its place.
- 1521. The infinitive may depend on a noun and a verb (generally  $\partial \sigma \tau i$ ) which together are equivalent to a verb which takes an object infinitive (1519). E.g.

Aνάγκη ἐστὶ πάντας ἀπελθεῖν, there is a necessity that all should withdraw; κίνδυνος ἡν αὐτῷ παθεῖν τι, he was in danger of suffering something; ἐλπίδας ἔχει τοῦτο ποιῆσαι, he has hopes of doing this. "Ωρα ἀπιέναι, it is time to go away, P. Ap. 42". Τοῖς στρατιώταις ὁρμὴ ἐνίπεσε ἐκτειχίσαι τὸ χωρίον, an impulse to fortify the place fell upon the soldiers, T.4,4.

For the infinitive with  $\tau o \hat{v}$  depending on a noun, see 1547.

1522. 1. The infinitive in indirect discourse (1495) is

generally the object of a verb of saying or thinking or some equivalent expression. Here each tense of the infinitive corresponds in time to the same tense of some finite mood. See 1494, with the examples.

- 2. Many verbs of this class (especially the passive of  $\lambda \epsilon_{\gamma \omega}$ ) allow both a personal and an impersonal construction. Thus we can say  $\lambda \epsilon_{\gamma \epsilon \tau \omega}$  &  $\hat{\kappa}_{\nu \rho o \sigma}$  &  $\hat{\kappa}_{\nu$ 
  - 1523. 1. Of the three common verbs meaning to say, -
- (a)  $\phi\eta\mu\hat{\iota}$  regularly takes the infinitive in indirect discourse;
- (b) είπον regularly takes ὅτι or ὡς with the indicative or optative;
- (c)  $\lambda i \gamma \omega$  allows either construction, but in the active voice it generally takes  $\delta \tau \iota$  or  $\omega_5$ .

Other verbs which regularly take the infinitive in indirect discourse are οἴομαι, ἡγέομαι, νομίζω, and δοκέω, meaning to believe, or to think.

2. Exceptional cases of  $\epsilon l \pi \sigma \nu$  with the infinitive are more common than those of  $\phi \eta \mu \iota$  with  $\delta \tau \iota$  or  $\omega_s$  (which are very rare).

Eίπον, commanded, takes the infinitive regularly (1519).

For the two constructions allowed after verbs of hoping, expecting, etc., see 1286.

- 1524. N. A relative clause depending on an infinitive in indirect discourse sometimes takes the infinitive by assimilation; as ἐπειδὴ δὲ γεν ἐσθαι ἐπὶ τῆ οἰκία, (ἔφη) ἀνεωγμένην καταλαμβάνειν τὴν θύραν, and when they came to the house, (he said) they found the door open, P. Sy. 1744. Herodotus allows this assimilation even after εἰ, ἰf, and διότι, hecause.
- 1525. In narration, the infinitive often seems to stand for the indicative, when it depends on some word like  $\lambda \epsilon \gamma \epsilon \tau a i$ , it is said, expressed or even implied in what precedes. E.g.

'Aπικομένους δὲ ἐς τὸ 'Aργος, διατίθεσθαι τὸν φόρτον, and having come to Argos, they were (it is said) setting out their cargo for sale,  $\mathrm{Hd}.1,1$ . Διατίθεσθαι is an imperfect infinitive (1285, 1): see also  $\mathrm{Hd}.1,24$ , and  $\mathrm{X}.C.1,35$ .

#### INFINITIVE WITH ADJECTIVES.

1526. The infinitive may depend on adjectives corresponding in meaning to verbs which take an object infinitive (1519), especially those expressing ability, fitness, desert, willingness, and their opposites. E.g.

Δυνατὸς ποιεῖν τοῦτο, able to do this; δεινὸς λέγειν, skilled in speaking; ἄξιος τοῦτο λα βεῖν, worthy to receive this; πρόθυμος λέγειν, eager to speak. Μαλακοί καρτερεῖν, (too) effeminate to endure, P. Rp. 556h; ἐπιστήμων λέγειν τε καὶ σιγᾶν, knowing how both to speak and to be silent, P. Phdr. 276\*.

So τοιοῦτοι οἶοι πονηροῦ τινος ἔργου ἐφίεσθαι, capable of aiming (such as to aim) at any vicious act,  $X.C.1,2^3$ ; also with oἷos alone, οἶος ἀεί ποτε μετα βάλλεσθαι, one likely to be always changing,  $X.H.2,3^{45}$ .

1527. N. Δίκαιος, just, and some other adjectives may thus be used personally with the infinitive; as δίκαιός ἐστι τοῦτο ποιεῖν, he has a right to do this (equivalent to δίκαιόν ἐστιν αὐτὸν τοῦτο ποιεῖν).

LIMITING INFINITIVE WITH ADJECTIVES, ADVERDS, AND NOUNS.

1528. Any adjective or adverb may take an infinitive to limit its meaning to a particular action. E.g.

Θέαμα αἰσχρὸν ὁ ρᾶν, a sight disgraceful to behold; λόγοι ὑμῖν χρησιμώτατοι ἀκοῦσαι, words most useful for you to hear; τὰ χαλεπώτατα εὐρεῖν, the things hardest to find. Πολιτεία ἤκιστα χαλεπὴ συζῆν, a government least hard to live under,  $P.Pol.302^{\text{b}}$ . Οἰκία ἡδίστη ἐνδιαιτᾶσθαι, a house most pleasant to live in,  $X.M.3,8^{\text{s}}$ . Κάλλιστα (adv.) ἰδεῖν, in a manner most delightful to behold,  $X.C.5,3^{\text{b}}$ .

- 1529. N. This infinitive (1528) is generally active rather than passive; as  $\pi \rho \hat{a} \gamma \mu a \chi a \lambda \epsilon \pi \hat{o} \nu$ ,  $\alpha thing hard to do$ , rather than  $\chi a \lambda \epsilon \pi \hat{o} \nu$   $\pi o \iota \epsilon \hat{\iota} \sigma \theta a \iota$ , hard to be done.
- 1530. N. Nouns and even verbs may take the infinitive as a limiting accusative (1058); as θαθμα ίδέσθαι, a wonder to behold, Od. 8, 306. Αριστεύεσκε μάχεσθαι, he was the first in fighting (like μάχην), Il. 6, 460. Δοκείς διαφέρειν αὐτοὺς ίδε εν; do you think they differ in appearance (to look at)? P. Rp. 493.
- 1531. N. Here belongs the infinitive after a comparative with  $\mathring{\eta}$ , than; as vooqua  $\mu \epsilon i \zeta \sigma v \mathring{\eta} \phi \epsilon \rho \epsilon \iota v$ , a disease too heavy to bear, S. O. T. 1293.

For work with this infinitive, see 1458.

## INFINITIVE OF PURPOSE.

1532. 1. The infinitive may express a purpose. E.g.

Οί ἄρχοντες, οὖς εἴλεσθε ἄρχειν μοῦ, the rulers, whom you chose to rule me, P. Ap. 28°. Τὴν πόλιν φυλάττειν αὐτοῖς παρέδωκαν, they delivered the city to them to guard, H.4,415. Θεάσασθαι παρῆν τὰς γυναῖκας πιεῖν φερούσας, the women were to be seen bringing them (something) to drink, X. H.7,2°.

 Here, as with adjectives (1529), the infinitive is active rather than passive; as κτανεῖν ἐμοί νιν ἔδοσαν, they gave her to me to

kill (to be killed), E. Tro. 874.

1533. N. In Homer, where ωστε only rarely has the sense of so as (1455), the simple infinitive may express a result; as τίς σφωε ξυνέηκε μάχεσθαι; who brought them into conflict so as to contend? Il. 1, 8.

## ABSOLUTE INFINITIVE.

1534. The infinitive may stand absolutely in parenthetical phrases, generally with  $\omega_5$  or  $\delta \sigma_{0\nu}$ . E.g.

Herodotus has  $\dot{\omega}_{S}$   $\lambda \dot{\delta} \gamma \psi \dot{\epsilon} i \pi \dot{\epsilon} \hat{i} v$  and où  $\pi \delta \lambda \dot{\psi}$   $\lambda \dot{\delta} \gamma \psi \dot{\epsilon} i \pi \dot{\epsilon} \hat{i} v$ , not to make a long story, in short.

1535. N. In certain cases εἶναι seems to be superfluous; especially in ἐκῶν εἶναι, willing or willingly, which generally stands in a negative sentence. So in τὸ νῦν εἶναι, at present; τὸ τήμερον εἶναι, to-day; τὸ ἐπ' ἐκείνοις εἶναι and similar phrases, as far as depends on them; τὴν πρώτην εἶναι, at first, Hd.1,153; κατὰ τοῦτο εἶναι, so far as concerns this, P.Pr.317\*; ὡς πάλαια εἶναι, considering their age, T.1,21; and some other phrases.

Infinitive in Commands, Wishes, Laws, etc.

1536. The infinitive with a subject nominative is sometimes used like the second person of the imperative, especially in Homer. E.g.

Μή ποτε καὶ σὰ γυναικί περ ἥπιος εἶναι, he thou never indulgent to thy wife, Od.11,441. Of  $\mu$  μη πελάζειν, do not approach these  $(=\mu$ η πέλαζε),  $\Lambda. Pr.712$ .

For the third person, with a subject accusative, see 1537.

1537. The infinitive with a subject accusative sometimes expresses a wish, like the optative (1507); and sometimes a command, like the third person of the imperative. E.g.

Zeῦ πάτερ, ἡ Αἴαντα λαχεῖν ἡ Τυδέος vióv, Father Zeus, may the lot fall either on Ajax or on the son of Tydeus (= Aἴας λάχοι, etc.), Il.7, 179; θεοὶ πολίται, μή με δουλείας τυχεῖν, O ye Gods who hold our city, may slavery not be my lot, A. Se. 253. Τρῶας ἔπειθ' Ἑλένην ἀποδοῦναι, let the Trojans then surrender Helen (= ἀποδοῦεν), Il. 3, 255.

- 1538. N. This construction (1537) has been explained by supplying a verb like δός, grant (see δὸς τίσασθαι, grant that I may take vengeance, Il. 3, 351), or χίνοιτο, may it be.
- 1539. N. For the infinitive in exclamations, which generally has the article, see 1554.
- 1540. In laws, treaties, and proclamations, the infinitive often depends on ξδοξε or δίδοκται, be it enacted, or κελεύεται, it is commanded; which may be expressed in a previous sentence or understood. E.g.

Δικάζειν δὲ τὴν ἐν 'Αρείω πάγω φόνου, and (be it enacted) that the Senate on the Areopagus shall have jurisdiction in cases of murder, D.23, 22. "Ετη δὲ εἶναι τὰς σπονδὰς πεντήκοντα, and that the treaty shall continue fifty years, T. 5, 18. 'Ακούετε λεώ· τοὺς ὁπλίτας ἀπιέναι πάλιν οἴκαδε, hear ye people! let the heavy armed go back again home, Ar. Av. 448.

#### INFINITIVE WITH THE ARTICLE.

1541. When the infinitive has the article, its character as a neuter noun becomes more distinct, while it loses none of its attributes as a verb. The addition of the article extends its use to many new constructions, especially to those with prepositions; and the article is sometimes allowed even in many of the older constructions in which the infinitive regularly stands alone.

## INFINITIVE WITH TO AS SUBJECT OR OBJECT.

1542. The subject infinitive (1517) may take the article to make it more distinctly a noun. E.g.

Τὸ γνωναι ἐπιστήμην λα βεῖν ἐστιν, to learn is to acquire knowledge, P.Th. 209°. Τοῦτό ἐστι τὸ ἀδικεῖν, this is to commit injustice, P.G. 483°. Τὸ γὰρ θάνατον δεδιέναι οὐδὰν ἄλλο ἐστὶν ἡ δοκεῖν σοφὸν εἶναι μὴ ὄντα, for to fear death (the fear of death) is nothing

else than to seem to be wise without being so, P. Ap. 29<sup>a</sup>. The predicate infinitives here omit the article (1517). See 956.

- 1543. The object infinitive takes the article chiefly after verbs which do not regularly take the simple infinitive (see 1519), or when the relation of the infinitive to the verb is less close than it usually is. Eg.
- Τὸ τελευτήσαι πάντων ή πεπρωμένη κατέκρινεν, Fate adjudged death to all (like θάνατον πάντων κατέκρινεν), l. 1, 43; εἰ τὸ κωλῦσαι τὴν τῶν Ἑλλήνων κοινωνίαν ἐπεπράκειν ἐγὼ Φιλίππω, if I had sold to Philip the prevention of the unity of the Greeks (i.e. had prevented this as Philip's hireling), D. 18, 23. Τὸ ξυνοικεῖν τῆδ' ὁμοῦ τίς ἄν γυνὴ δύναιτο; to live with her what woman could do it? S. Tr. 545.
- 1544. N. Sometimes in poetry the distinction between the object infinitive with and without  $\tau \delta$  is hardly perceptible; as in  $\tau \lambda \dot{\eta} \sigma \rho \mu a \tau \delta$  κατθανεΐν, I shall endure to die,  $\Lambda$ . A g. 1290;  $\tau \delta$  δρ  $\hat{\alpha} \nu$  οὖκ  $\dot{\eta} \theta \dot{\epsilon} \lambda \eta \sigma \alpha \nu$ , they were unwilling to act, S. O. C. 442.

Infinitive with to with Adjectives and Nouns.

1545. N. The infinitive with  $\tau \delta$  is sometimes used with the adjectives and nouns which regularly take the simple infinitive (1526). E.g.

Τὸ βία πολιτῶν δρᾶν ἔφυν ἀμήχανος, I am helpless to act in defiance of the citizens, S. An. 79. Τὸ ἐς τὴν γῆν ἡμῶν ἐσ βάλλειν... ἰκανοί εἰσι, they have the power to invade our land, T.6, 17.

Infinitive with του, τώ, or τό in Various Constructions.

1546. The genitive, dative, or accusative of the infinitive with the article may depend on a preposition. E.g.

Πρὸ τοῦ τοὺς ὅρκους ἀποδοῦναι, before taking the oaths, D. 18,26; πρὸς τῷ μηδὲν ἐκ τῆς πρεσβείας λαβεῖν, besides receiving nothing by the embassy. D. 19,229; διὰ τὸ ξένος εἶναι οὐκ ἄν οἴει ἀδικηθῆναι; do you think you would not be wronged on account of your being a stranger? X. M. 2,116. Ύπὲρ τοῦ τὰ μέτρια μὴ γίγνεσθαι, that moderate counsels may not prevail (= ἴνα μὴ γίγνηται), Aesch. 3, 1.

1547. The genitive and dative of the infinitive, with the article, can stand in most of the constructions belonging to those cases; as in that of the attributive genitive, the genitive after a comparative or after verbs

and adjectives, the dative of cause, manner, or means, and the dative after verbs and adjectives. E.g.

Τοῦ πιεῖν ἐπιθυμία, a desire to drink, Υ.7,84; νεοῖς τὸ σιγᾶν κρεῖττόν ἐστι τοῦ λαλεῖν, for youth silence is better than prating, Men. Mon. 387; ἐπέσχομεν τοῦ δακρύειν, we ceased our weeping, P.Ph. 117°; ἀήθεις τοῦ κατακούειν τινός εἰσιν, they are unused to obeying any one, D.1,23. Τῷ φανερὸς εἶναι τοιοῦτος ὧν, by having it evident that he was such a man, Χ.Μ.1,28; τῷ κοσμίως ζῆν πιστεύειν, to trust in an orderly life, I.15,24; ἴσον τῷ προστένειν, equal to lamenting beforehand, A. Αq.253.

1548. The infinitive with  $\tau o \hat{v}$  may express a purpose, generally a negative purpose, where with ordinary genitives  $\tilde{\epsilon}_{V} \epsilon_{K} a$  is regularly used (see 1127). E.g.

Έτειχίσθη 'Αταλάντη, τοῦ μὴ ληστὰς κακουργείν τὴν Εὕβοιαν, Atalante was fortified, that pirates might not ravage Euboea, T.2,32. Μίνως τὸ ληστικὸν καθήρει, τοῦ τὰς προσόδους μᾶλλον ἰέναι αὐτῷ, Minos put down piracy, that his revenues might come in more abundantly, T.1,4.

1549. Verbs and expressions denoting hindrance or freedom from anything allow either the infinitive with  $\tau o \hat{v}$ (1547) or the simple infinitive (1519). As the infinitive after such verbs can take the negative  $\mu \hat{\eta}$  without affecting the sense (1615), we have a third and fourth form, still with the same meaning. (See 1551.) E.g.

Εἴργει σε τοῦτο ποιεῖν, εἴργει σε τοῦ τοῦτο ποιεῖν, εἴργει σε μὴ τοῦτο ποιεῖν, εἴργει σε μὴ τοῦτο ποιεῖν, εἴργει σε κοῦ μὴ τοῦτο ποιεῖν, all meaning he prevents you from doing this. Τὸν Φίλιππον παρελθεῖν οὐκ ἐδύναντο κωλῦσαι, they could not hinder Philip from passing through, D. 5, 20. Τοῦ δραπετεύειν ἀπείργουσι; do they restrain them from running away?  $X. M. 2, 1^{16}$ . Ὅπερ ἔσχε μὴ τὴν Πελοπόννησον πορθεῖν, which prevented (him) from ravaging Peloponnesus, T. 1, 73. Δύο ἄνδρας ἔξει τοῦ μὴ καταδῦναι, it will keep two men from sinking,  $X. A. 3, 5^{11}$ .

- 1551. The infinitive with  $\tau \delta \mu \eta$  may be used after expressions denoting hindrance, and also after all which even imply

prevention, omission, or denial. This infinitive with  $\tau \delta$  is less closely connected with the leading verb than are the forms before mentioned (1549), and it may often be considered an accusative of specification (1058), and sometimes (as after verbs of denial) an object accusative. Sometimes it expresses merely a result. E.g.

Τὸν ὅμιλον εἶργον τὸ μὴ τὰ ἐγγὺς τῆς πόλεως κακουργεῖν, they prevented the crowd from injuring the neighboring parts of the city, T.3,1. Κίμωνα παρὰ τρεῖς ἀφεῖσαν ψήφους τὸ μὴ θανάτω ζημιῶσαι, they allowed Cimon by three votes to escape the punishment of death (they let him off from the punishment of death), D.23,205. Φόβος ἀνθ ὅπνου παραστατεῖ, τὸ μὴ βλέφαρα συμβαλεῖν, fear stands by me instead of sleep, preventing me from closing my eyelids, A. Ag. 15.

Thus we have a fifth form,  $\epsilon i \rho \gamma \epsilon \iota \sigma \epsilon \tau \delta \mu \dot{\eta} \tau o \hat{\nu} \tau \delta \sigma \sigma \iota \epsilon \hat{\iota} \nu$ , added to those given in 1549, as equivalents of the English he prevents you from doing this.

- 1552. N. Here, as above (1550),  $\mu\dot{\gamma}$  où is generally used when the leading verb is negatived; as οὐδὲν γὰρ αὐτῷ ταῦτ' ἐπαρκέσει τὸ μὴ οὐ πεσεῖν, for this will not at all suffice to prevent him from falling, A.Pr.918.
- 1553. N. The infinitive with τοῦ μή and with τὸ μή may also be used in the ordinary negative sense; as οὐδεμία πρόφασις τοῦ μὴ δρᾶν ταῦτα, no ground for not doing this, P. Ti. 20°.
- 1554. 1. The infinitive with  $\tau \delta$  may be used in exclamations, to express surprise or indignation. E.g.

Της μωρίας το Δία νομίζειν, ὅντα τηλικουτονί, what folly! to believe in Zeus, now you are so big! Ar. N. 819. So in Latin: Mene incepto desistere victam!

- 2. The article here is sometimes omitted; as τοιουτονὶ τρέφειν κύνα, to keep a dog like that! Ar. V. 835.
- 1555. The infinitive with its subject, object, or other adjuncts (sometimes including dependent clauses) may be preceded by  $\tau \delta$ , the whole standing as a single noun in any ordinary construction. E.g.

Τὸ δὲ μήτε πάλαι τοῦτο πεπονθέναι, πεφηνέναι τέ τινα ἡμῖν συμμαχίαν τούτων ἀντίρροπον, ἄν βουλώμεθα χρῆσθαι, τῆς παρ ἐκείνων εὐνοίας εὐεργέτημ ἄν ἔγωγε θείην, but the fact that we have not suffered this long ago, and that an alliance has appeared to us to balance these, if we (shall) wish to use it, — this I should ascribe as a benefaction to their good-will, D.1,10. (Here the whole sentence το···χρῆσθαι is the object accusative of θείην.)

- 1556. 1. For the infinitive as well as the finite moods with ωστε, ως, έφ' ω and έφ' ωτε, see 1449-1460.
  - 2. For the infinitive and finite moods with  $\pi \rho i \nu$ , see 1469-1474.
  - 3. For the infinitive with av. see 1308.

#### THE PARTICIPLE.

- 1557. The participle is a verbal adjective, and has three uses. First, it may express an attribute, qualifying a noun like an ordinary adjective (1559-1562); secondly, it may define the circumstances under which an action takes place (1563-1577); thirdly, it may be joined to certain verbs to supplement their meaning, often having a force resembling that of the infinitive (1578-1593).
- 1558. N. These distinctions are not always exact, and the same participle may belong to more than one class. Thus, in  $\delta \mu \dot{\eta} \delta a \rho \epsilon i s$   $\delta v \theta \rho \omega \pi \sigma s$ , the unflogged man,  $\delta a \rho \epsilon i s$  is both attributive and conditional (1563, 5).

## ATTRIBUTIVE PARTICIPLE.

1559. The participle may qualify a noun, like an attributive adjective. Here it may often be translated by a relative and a finite verb, especially when it has the article. *E.g.* 

'Ο παρών καιρός, the present occasion, D.3,3; θεοὶ αἰὰν ἐόντες, immortal Gods, Il.21,518; πόλις κάλλει διαφέρουσα, a city excelling in beauty; ἀνὴρ καλώς πεπαιδευμένος, a man who has been well educated (or a well educated man); οἱ πρέσβεις οἱ ὑπὸ Φιλίππον πεμφθέντες, the ambassadors who were sent by Philip; ἄνδρες οἱ τοῦτο ποιήσοντες, men who are to do this.

1560. 1. The participle with the article may be used substantively, like any adjective. It is then equivalent to he who or those who with a finite verb. E.g.

Οί κρατοῦντες, the conquerors; οἱ πεπεισμένοι, those who have been convinced; παρὰ τοῖς ἀρίστοις δοκοῦσιν εἶναι. among those who seem to be best, Χ. Μ.4,2°; ὁ τὴν γνώμην ταύτην εἶπών, the one who gave this opinion, Τ.8,6°ς; τοῖς ᾿Αρκάδων σφετέροις οὖσι ξυμμάχοις προεῖπον, they proclaimed to those who were their allies among the Arcadians, Τ.5,64.

- The article is sometimes omitted; as πολεμούντων πόλις, a city of belligerents, X. C.7, 578.
- 1561. N. Sometimes a participle becomes so completely a noun that it takes an object genitive instead of an object accusative; as ὁ ἐκείνου τεκών, his father (for ὁ ἐκείνου τεκών), Ε. Εl. 335.
- 1562. N. The neuter participle with the article is sometimes used as an abstract noun, like the infinitive; as  $\tau \delta$  δεδιός, fear, and  $\tau \delta$  θαρσσοῦν, courage, for  $\tau \delta$  δεδιέναι and  $\tau \delta$  θαρσεῦν, T.1,36. Compare  $\tau \delta$  καλόν for  $\tau \delta$  κάλλος, beauty. In both cases the adjective is used for the noun.

#### CIRCUMSTANTIAL PARTICIPLE.

- 1563. The participle may define the *circumstances* of an action. It may express the following relations:—
- 1. Time; the tenses denoting various points of time, which is relative to that of the verb of the sentence (1288). E.g.

Ταῦτα ἔπραττε στρατηγῶν, he did this while he was general; ταῦτα πράξει στρατηγῶν, he will do this while he is general. Τυραννεύσας δὲ ἔτη τρία Ἱππίας ἐχώρει ἐς Σίγειον, and when he had been tyrant three years, Hippias withdrew to Sigeum, T.6,59.

2. Cause. E.q.

Λέγω δὲ τοῦδ ἔνεκα, βυυλύμενος δόξω σοι ὅπερ ἐμοί, and I speak for this reason, because I wish that to seem good to you which seems so to me,  $P. Ph. 102^{d}$ .

3. Means, manner, and similar relations, including manner of employment. E.q.

Προείλετο μάλλον τοις νόμοις  $\epsilon$  μμένων ἀποθανείν  $\mathring{\eta}$  παρανομών ζ $\mathring{\eta}$ ν, he preferred to die abiding by the laws rather than to live transgressing them. Χ. Μ. 4.4. Τοῦτο  $\epsilon$ ποίησε λαθών, he did this secretly. ᾿Απεδήμει τριηραρχών, he was absent on duty as trierarch. Ληζόμενοι ζώσιν, they live by plunder, Χ.  $C. 3.2^{25}$ .

4. Purpose or intention; generally expressed by the future participle. E.g.

\*Ηλθε λυσόμενος θύγατρα, he came to ransom his daughter, Il. 1, 13. Πέμπειν πρέσβεις ταθτα έροθντας και Λύσανδρον αιτήσοντας, to send ambassadors to say this and to ask for Lysander, X. II. 2, 16.

5. Condition; the tenses of the participle representing the corresponding tenses of the indicative, subjunctive, or optative, in all classes of protasis.

See 1413, where examples will be found.

6. Opposition, limitation, or concession; where the participle is generally to be translated by although and a verb. E.g.

'Ολίγα δυνάμενοι προορᾶν πολλὰ ἐπιχειροῦμεν πράττειν, although we are able to foresee few things, we try to do many things, X. C. 3, 216.

7. Any attendant circumstance, the participle being merely descriptive. This is one of the most common relations of this participle. E.g.

Έρχεται τὸν νίὸν ἔχονσα, she comes bringing her son, X. C. 1,3\(\text{1}\). Παραλαβόντες Βοιωτούς ἐστράτευσαν ἐπὶ Φάρσαλον, they took Bocotians with them and marched against Pharsalus, T. 1,111.

The participle here can often be best translated by a verb, as in the last example.

8. That in which the action of the verb consists. E.g.

Tόδ' εἶπε φωνῶν, thus he spake saying, Λ. Ag. 205. Εὖ γ' ἐποίησας ἀναμνήσας με, you did well in reminding me, P. Ph. 60°.

For the time of the agrist participle here, see 1290.

1564. N. Certain participles of time and manner have almost the force of adverbs by idiomatic usage. Such are ἀρχόμενος, at first; τελευτῶν, at last, finally; διαλιπῶν χρόνον, after a while, φέρων, hastily; φερόμενος, with a rush; κατατείνως, earnestly; φθάσας, sooner (anticipating); λαθών, secretly; ἔχων, continually; ἀνύσας, quickly (hastening); κλαίων, to one's sorrow; χαίρων, to one's joy, with impunity. E.g.

\*Απερ ἀρχύμενος εἶπον, as I said at first, T.4,61. Ἐσέπεσον φερόμενοι ἐς τοὺς ελληνας, they fell upon the Greeks with a rush, Hd.7,210. Τί κυπτάζεις ἔχων; why do you keep poking about? Ar. N.509. Κλαίων ἄψει τῶνδε, you will lay hands on them to your sorrow, F. Her. 270.

1565. N. Έχων, φέρων, ἄγων, λαβών, and χρώμενος may often be translated with. E.g.

Mία ὅχετο πρέσβεις ἄγουσα, one (ship) was gone with ambassadors, T.7,25. See X.C.1,31, in 1563,7. Boŷ χρώμενοι, with a shout, T.2,84.

1566. N. Tí  $\pi a\theta \dot{\omega} v$ ; having suffered what? or what has happened to him? and  $\tau i$   $\mu a\theta \dot{\omega} v$ ; what has he taken into his head? are used in the general sense of why? E.g.

Τί τοῦτο  $\mu a \theta \dot{\omega} \nu$  προσέγραψεν; with what idea did he add this clause? D.20,127. Τί  $\pi a \theta o \hat{\nu} \sigma a \iota$  θνηταῖς εἴξασι γυναιξίν; what makes them look like mortal women? Ar. N. 340.

1567. N. The same participle may sometimes be placed under more than one of these heads (1558).

## GENITIVE AND ACCUSATIVE ABSOLUTE.

1568. When a circumstantial participle belongs to a noun which is not grammatically connected with the main construction of the sentence, they stand together in the genitive absolute. E.g.

'Ανέβη οὐδενὸς κωλύοντος, he made the ascent with no one interfering,  $X.A.1, 2^{22}$ . See 1152, and the examples there given.

Sometimes a participle stands alone in the genitive absolute, when a subject can easily be supplied from the context, or when some general subject, like  $\partial v \partial \rho \omega \pi \omega v$  or  $\pi \rho \alpha \gamma \mu \alpha \tau \omega v$ , is understood; as of  $\pi o \lambda \epsilon \mu \omega v$ ,  $\pi \epsilon \omega v$ ,  $\pi \epsilon \omega v$   $\pi \nu v$   $\pi \nu v$ , but the enemy, as they (men before mentioned) came on, kept quiet for a time,  $X.A.5, 4^{16}$ . Out  $\delta$  exortw, elas ( $\epsilon \tau v$ ),  $\kappa.\tau.\lambda$ , and this being the case (sc.  $\pi \rho \alpha \gamma \mu \alpha \tau \omega v$ ), it is likely, etc.  $X.A.3, 2^{10}$ . So with verbs like vel (897, 5); as vortos  $\pi o \lambda \lambda \omega v$ , when it was raining heavily (where originally  $\Delta v$ ) was understood),  $X.H.1, 1^{16}$ .

1569. The participles of impersonal verbs stand in the accusative absolute, in the neuter singular, when others would be in the genitive absolute. So passive participles and  $\eth \nu$ , when they are used impersonally. E.g.

Tί δη, ὑμᾶς ἐξὸν ἀπολέσαι, οὐκ ἐπὶ τοῦτο ἥλθομεν; why now, when we might have destroyed you, did we not proceed to do it?  $X.A.2,5^{22}$ .

1570. N. The participles of personal verbs sometimes stand with their notins in the accusative absolute; but very seldom unless they are preceded by  $\dot{\omega}_{S}$  or  $\ddot{\omega}\sigma\pi\epsilon\rho$ . E.g.

Σιωπή εδείπνουν, ώσπερ τοῦτο προστεταγμένον αὐτοῖς, they were suppling in silence, as if this had been the command given to them, X. Sy. 1, 11.

1571. N.  $\Omega_{\nu}$  as a circumstantial participle is seldom omitted, except with the adjectives  $\epsilon_{\kappa\omega\nu}$ , willing, and  $\delta_{\kappa\omega\nu}$ , unwilling, and

after ἄτε, οἶα, ὡς, οτ καίπερ. See ἐμοῦ οὐχ ἑκόντος, against my will, S. Aj. 455; Zεὺς, καίπερ αὐθάδης φρενῶν, Zeus, although stubborn in mind, A. Pr. 907; also ἀπόρρητον πόλει, when it is forbidden to the state, S. An. 44. See 1612.

## ADVERBS WITH CIRCUMSTANTIAL PARTICIPLE.

- 1572. N. The adverbs  $\tilde{a}\mu a$ ,  $\mu \epsilon \tau a \xi \dot{v}$ ,  $\epsilon \dot{v} \theta \dot{v} s$ ,  $a \dot{v} \tau i \kappa a$ ,  $\tilde{a}\rho \tau i$ , and  $\dot{\epsilon} \xi a \dot{i} \phi \nu \eta s$  are often connected (in position and in sense) with the temporal participle, while grammatically they qualify the leading verb; as  $\tilde{a}\mu a \kappa a \tau a \lambda a \beta \dot{v} \tau \epsilon s$   $\pi \rho o \sigma \epsilon \kappa \dot{\epsilon} a \tau \dot{v} \sigma \phi \iota$ , as soon as they overtook them, they pressed hard upon them, IId.9,57. New  $\mu \epsilon \tau a \dot{\xi} \dot{v} \dot{v} \dot{v} \dot{v} \sigma \sigma \omega v \dot{\epsilon} \pi a \dot{v} \sigma a \tau o$ , Necho stopped while digging (the canal), IId.2,158.
- 1573. No. The participle denoting opposition is often strengthened by καί οι καίπερ, εσεη (Homeric also καί ... περ), and in negative sentences by οὐδί οι μηδί; also by καὶ ταῦτα, and that too; as ἐποικτίρω νιν, καίπερ ὄντα δυσμενή, I pity him, even though he is an εnemy, S. Aj. 122. Οὐκ ἄν προδοίην, οὐδί περ πράσσων κακῶς, I would not be faithless, even though I am in a wretched state, E. Ph. 1624.
- 1574. Circumstantial participles, especially those denoting cause or purpose, are often preceded by  $\dot{\omega}_s$ . This shows that they express the idea or the assertion of the subject of the leading verb or that of some other person prominent in the sentence, without implying that it is also the idea of the speaker or writer. E.g.

To Περικλέα εν αιτία είχον ως πείσαντα σφάς πολεμείν, they found fault with Pericles, on the ground that he had persuaded them to engage in war, T.2,59. 'Αγανακτοῦσιν ως μεγάλων τινῶν ἀπεστερημένοι, they are indignant, because (as they say) they have been deprived of some great blessings, P. Rp. 320°.

- 1575. The causal participle is often emphasized by  $\tilde{a}\tau\epsilon$  and of over of a, as, inasmuch as; but these particles have no such force as  $\omega_s$  (1574); as  $\tilde{a}\tau\epsilon$  mais  $\tilde{\omega}\nu$ ,  $\tilde{\eta}\delta\epsilon\tau$ 0, inasmuch as he was a child, he was pleased, X. C. 1, 3.
- 1576.  $\Omega \sigma \pi \epsilon \rho$ , as, as it were, with the participle expresses a comparison between the action of the verb and that of the participle. E.g.

'Ωρχούντο ωσπερ όλλοις επιδεικνύμενοι, they danced as if they were showing off to others (i.e. they danced, apparently showing off), X. A. 5, 4<sup>84</sup>. Τίτοῦτο λέγεις, ωσπερ οὐκ ἐπὶ σοὶ ὅν ὅ τι αν βούλη λέγειν; why do you say this, as if it were not in your power to say what

you please? X. M.2,636. Although we find as if a convenient translation, there is really no condition, as appears from the negative of (not  $\mu\dot{\eta}$ ). See 1612.

1577. N.  $\Omega \sigma \pi \epsilon \rho$ , like other words meaning as, may be followed by a protasis; as  $\tilde{\omega} \sigma \pi \epsilon \rho$   $\epsilon i$   $\pi a \rho \epsilon \sigma \tau a \tau \epsilon \epsilon$ , as (it would be) if you had lived near,  $\Lambda$ . Ag. 1201. For  $\tilde{\omega} \sigma \pi \epsilon \rho$   $\tilde{\alpha} \nu$   $\epsilon i$ , see 1313.

#### SUPPLEMENTARY PARTICIPLE.

1578. The supplementary participle completes the idea expressed by the verb, by showing to what its action relates. It may belong to either the subject or the object of the verb, and agree with it in case. E.g.

Παύομέν σε λέγοντα, we stop you from speaking; παυόμεθα

λέγοντες, we cease speaking.

1579. This participle has many points of resemblance to the infinitive in similar constructions. In the use of the participle (as in that of the infinitive) we must distinguish between indirect discourse (where each tense preserves its force) and other constructions.

## PARTICIPLE NOT IN INDIRECT DISCOURSE.

1580. In this sense the participle is used with verbs signifying to begin, to continue, to endure, to persevere, to cease, to repent, to be weary, to be pleased, displeased, or ashamed; and with the object of verbs signifying to permit or to cause to cease. E.g.

Ήρχον χαλεπαίνων, I was the first to be angry, Il. 2,378; οὐκ ἀνέξομωι ζῶσα, I shall not endure my life, E. Hip. 354; ἐπτὰ ἡμέρας μαχόμενοι διετέλεσαν, they continued fighting seven days, X. A. 4, 32; τιμώμενοι χαίρουσιν, they delight in being honored, E. Hip. 8; ἐλεγχόμενοι ἡχθοντο, they were displeased at being tested, X. M. 1, 241; τοῦτο οὐκ αἰσχύνομωι λέγων, I say this without shame (see 1581), X. C. 5,  $1^{21}$ ; τὴν φιλοσοφίαν παῦσον ταῦτα λέγουσαν, make Philosophy stop talking in this style, P. G. 4824; παύεται λέγων, he stops talking.

1581. Some of these verbs also take the infinitive, but generally with some difference of meaning; thus,  $ai\sigma\chi\acute{\nu}\iota\dot{\nu}\iota$  at  $\tau o\hat{\nu}\tau o \lambda \acute{\epsilon}$   $\gamma \epsilon_{\iota}\nu$ , he is ashamed to say this (and does not say it), — see 1580;  $\mathring{a}\pi o \kappa \acute{a}\mu \nu \epsilon_{\iota}$   $\tau o\hat{\nu}\tau o \pi o \iota \epsilon_{\iota}\hat{\nu}$ , he ceases to do this, through weariness (but  $\mathring{a}\pi o \kappa \acute{a}\mu \nu \epsilon_{\iota}$   $\tau o\hat{\nu}\tau o \pi o \iota \acute{\omega}\nu$ , he is weary of doing this). So  $\mathring{a}\rho \chi \epsilon \tau a \iota \lambda \acute{\epsilon} - \gamma \epsilon_{\iota}\nu$ , he begins to speak (but  $\mathring{a}\rho \chi \epsilon \tau a \iota \lambda \acute{\epsilon} \gamma \omega \nu$ , he begins by speaking or he is at the beginning of his speech);  $\pi a \acute{\nu}\omega \sigma \epsilon \mu \acute{a}\chi \epsilon \sigma \dot{\theta} a \iota$ , I pre-

vent you from fighting (but  $\pi \alpha \acute{\nu} \omega \sigma \epsilon \mu \alpha \chi \acute{\sigma} \mu \epsilon \nu \sigma \nu$ , I stop you while fighting).

1582. The participle may be used with verbs signifying to perceive (in any way), to find, or to represent, denoting an act or state in which the object is perceived, found, or represented. E.q.

'Ορῶ σε κρύπτοντα χείρα, I see you hiding your hand, E. Hec. 342; ἤκουσά σου λέγοντος, I heard you speak; εὖρε Κρονίδην ἄτερ ἤμενον ἄλλων, he found the son of Cronos sitting apart from the others, Il. 1,498; βασιλέας πεποίηκε τοὺς ἐν Αιδου τιμωρουμένους, he has represented kings in Hades as suffering punishment, P. G. 525.

1583. N. This must not be confounded with indirect discourse, in which δρῶ σε κρύπτοντα would mean I see that you are hiding; ἀκούω σε λέγοντα, I hear that you say (ἀκούω taking the accusative). See 1588.

1584. The participles βουλόμενος, wishing, ήδόμενος, pleased, προσδεχόμενος, expecting, and some others, may agree in ease with a dative which depends on εἰμί, γίγνομαι, or some similar verb. E.g.

 $T\hat{\phi}$  πλήθει οὐ βουλομένω ην, it was not pleasing to the majority (it was not to them wishing it), T.2,3; προσδεχομένω μοι τὰ τῆς ὀργῆς ὑμῶν ἐς ἐμὲ γεγένηται, I have been expecting the manifestations of your wrath against me, T.2,60.

1585. With verbs signifying to overlook or see, in the sense of to allow or let happen ( $\pi\epsilon\rho\iota\circ\rho\hat{\omega}$  and  $\dot{\epsilon}\phi\circ\rho\hat{\omega}$ , with  $\pi\epsilon\rho\iota\epsilon\hat{\delta}\circ\nu$  and  $\dot{\epsilon}\pi\epsilon\hat{\iota}\delta\circ\nu$ , sometimes  $\dot{\epsilon}\hat{\iota}\delta\circ\nu$ ), the participle is used in a sense which approaches that of the object infinitive, the present and a orist participles differing merely as the present and a orist infinitives would differ in similar constructions. E.g.

Μὴ περιίδωμεν ὑ βρισθεῖσαν τὴν Λακεδαίμονα καὶ κατα φρονηθεῖσαν, let us not see Lacedaemon insulted and despised, I. 6, 108. Μή μ' ἰδεῖν θανόνθ' ὑπ' ἀστῶν, not to see me killed by citizens, E. Or. 716. Περιιδεῖν τὴν γῆν τμηθεῖσαν, to let the land be ravaged, i.e. to look on and see it ravaged, T. 2, 18; but in 2, 20 we have περιιδεῖν τὴν γῆν τμηθῆναι, to permit the land to be ravaged, referring to the same thing from another point of view, τμηθῆναι being strictly future to περιιδεῖν, while τμηθεῖσαν is coincident with it.

1586. The participle with  $\lambda a \nu \theta \dot{a} \nu \omega$ , escape the notice of,  $\tau \nu \gamma \chi \dot{a} \nu \omega$ , happen, and  $\phi \theta \dot{a} \nu \omega$ , anticipate, contains the leading idea of the expression and is usually translated by a verb.

The agriculture of the coincides in time with the verb (unless this expresses duration) and does not denote past time in itself. (See 1290.) E.g.

Φονέα τοῦ παιδὸς ἐλάνθανε βόσκων, he was unconsciously supporting the slayer of his son, Hd.1,44; ἔτυχον καθήμενος ἐνταῦθα, I happened to be sitting there (= τύχη ἐκαθήμην ἐνταῦθα), l'. Eu. 272°; αὐτοὶ φθήσονται τοῦτο δράσαντες, they will do this themselves first (= τοῦτο δράσουσι πρότεροι), P. Rp. 375°; τοὺς δ' ἔλαθ' εἰσελθών, and he entered unnoticed by them (= εἰσῆλθε λάθρω), Il. 24,477; ἔφθησαν πολλῷ τοὺς Πέρσας ἀπικόμενοι, they arrived long before the Persians, Hd.4, 136; τοὺς ἀνθρώπους λήσομεν ἐπιπεσόντες, we shall rush in unnoticed by the men, X. A. 7, 348.

The perfect participle here has its ordinary force.

1587. N. The participle with  $\delta\iota a\tau\epsilon\lambda\epsilon\omega$ , continue (1580), of  $\chi o\mu a\iota$ , be gone (1250),  $\theta a\mu i\zeta\omega$ , be wont or be frequent, and some others, expresses the leading idea; but the acrist participle with these has no peculiar force; as of  $\chi\epsilon\tau a\iota$   $\phi\epsilon\dot{\nu}\gamma\omega\nu$ , he has taken flight, Ar. Pl. 933; où  $\theta a\mu i\zeta\epsilon\iota s$   $\kappa a\tau a\beta ai\nu\omega\nu$   $\epsilon\iota s$   $\tau\dot{o}\nu$   $\Pi\epsilon\iota\rho a\iota\hat{a}$ , you don't come down to the Peiraeus very often, I'. Rp. 328°.

So with the Homeric  $\beta \hat{\eta}$  and  $\tilde{\epsilon} \beta a \nu$  or  $\beta \dot{a} \nu$  from  $\beta \dot{a} \dot{\iota} \nu \omega$ ; as  $\beta \hat{\eta} \phi \dot{\epsilon} \dot{\nu} \gamma \omega \nu$ , he took flight, 1l.2,665; so 2,167.

## PARTICIPLE IN INDIRECT DISCOURSE.

1588. With many verbs the participle stands in indirect discourse, each tense representing the corresponding tense of a finite mood.

Such verbs are chiefly those signifying to see, to hear or learn, to perceive, to know, to be ignorant of, to remember, to forget, to show, to appear, to prove, to acknowledge, and  $\dot{a}\gamma\gamma\dot{\epsilon}\lambda\lambda\omega$ , announce. E.g.

Όρω δέ μ' ἔργον δεινὸν ἐξειργασμένην, but I see that I have done a dreadful deed, S. Tr. 706; ἤκουσε Κῦρον ἐν Κιλικία ὅντα, ħe heard that Cyrus was in Cilicia (ct. 1583), X. A. 1, 4°; ὅταν κλύη ἤξοντ' 'Ορέστην, when she hears that Orestes will come, S. El. 293. Οἶδα οὐδὲν ἐπιστάμενος, I know that I understand nothing; οὐκ ἤδεσαν αὐτὸν τεθνηκότα, they did not know that he was dead, X. A. 1,  $10^{16}$ ; ἐπειδὰν γνῶσιν ἀπιστούμενοι, after they find out that they are distrusted, X. C. 7,  $2^{17}$ ; μέμνημαι ἐλθών, I remember that I went; μέμνημαι αὐτὸν ἐλθόντα, I remember that he went; δείξω τοῦτον ἐχθρὸν ὄντα, I shall show that this man is an enemy (passive

ούτος δειχθήσεται έχθρὸς ων). Αὐτῷ Κύρον ἐπιστρατεύοντα πρώτος ήγγειλα, I first announced to him that Cyrus was on his march against him, X. A. 2, 319.

See 1494; and 1308 for examples of the participle with  $\tilde{a}_{\nu}$  representing both indicative and optative with  $\tilde{a}_{\nu}$ .

- 1589. N. Δηλός εἰμι and φανερός εἰμι take the participle in indirect discourse, where we use an impersonal construction; as δηλος ην οἰόμενος, it was evident that he thought (like δηλον ην ὅτι οἴοιτο).
- 1590. N. With σύνοιδα or συγγιγνώσκω and a dative of the reflexive, a participle may be in either the nominative or the dative; as σύνοιδα ἐμαυτῷ ἡδικημένω (or ἡδικημένος), I am conscious to myself that I have been wronged.
- 1591. Most of the verbs included in 1588 may also take a clause with 371 or 45 in indirect discourse.
- 1592. 1. Some of these verbs have the infinitive of indirect discourse in nearly or quite the same sense as the participle. Others have the infinitive in a different sense: thus φαίνεται σοφὸς ων generally means he is manifestly wise, and φαίνεται σοφὸς εἶναι, he seems to be wise; but sometimes this distinction is not observed.
- 2. Others, again, may be used in a peculiar sense, in which they have the infinitive not in indirect discourse. Thus olda and ἐπίσταμαι regularly have this infinitive when they mean know how; as olda τοῦτο ποιῆσαι, I know how to do this (but olda τοῦτο ποιήσαι, I know that I did this). Μανθάνω, μέμνημαι, and ἐπιλανθάνομαι, in the sense of learn, remember, or forget to do anything, take the regular object infinitive. See also the uses of γιγνώσκω, δείκνυμι, δηλῶ, φαίνομαι, and εὐρίσκω in the Lexicon.
- 1593. 1.  $\Omega_5$  may be used with the participle of indirect discourse in the sense explained in 1574. E.g.

'Ως μηκέτ' ὄντα κείνον ἐν φάει νόει, think of him as no longer living, S. Ph. 415. See 1614.

2. The genitive absolute with ωs is sometimes found where we should expect the participle to agree with the object of the verb; as ως πολέμου ὄντος παρ' ὑμῶν ἀπαγγελῶ; shall I announce from you that there is war? (lit. assuming that there is war, shall I announce it from you?), X. A. 2, 121,— where we might have πόλεμον ὄντα with less emphasis and in closer connection with the verb. So ως ωδ' ἐχόντων τῶνδ' ἐπίστασθαί σε χρή, you must understand that this is so (lit. believing this to be so, you must understand it). S. Aj. 281.

## VERBAL ADJECTIVES IN -Téos AND -Téov.

1594. The verbal in -τέος has both a personal and an impersonal construction, of which the latter is more common.

1595. In the personal construction it is passive in sense, and expresses necessity, like the Latin participle in -dus, agreeing with the subject. E.g.

 $\Omega \phi \in \lambda \eta \tau \epsilon u$  so  $\eta \pi \delta \lambda \iota \varsigma \epsilon \sigma \tau \iota v$ , the city must be henefited by you, X. M. 3, 68. Alas  $\mu \epsilon \tau u \pi \epsilon \mu \pi \tau \epsilon u \varsigma \epsilon \iota v u (\epsilon \phi \eta)$ , he said that other (ships) must be sent for, T. 6, 25.

1596. N. The noun denoting the agent is here in the dative (1188). This construction is of course confined to transitive verbs.

1597. In the impersonal construction the verbal is in the neuter of the nominative singular (sometimes plural), with  $\epsilon \sigma \tau i$  expressed or understood. The expression is equivalent to  $\delta \epsilon \hat{\iota}$ , (one) must, with the infinitive. It is practically active in sense, and allows transitive verbals to have an object like their verbs.

The agent is generally expressed by the dative, sometimes by the accusative. E.g.

Ταῦτα ἡμῖν (or ἡμᾶς) ποιητέον ἐστίν, we must do this (equivalent to ταῦτα ἡμᾶς δεῖ ποιῆσαι). Οἰστέον τάδε, we must bear these things (sc. ἡμῖν), Ε. Or. 769. Τί ἃν αὐτῷ ποιητέον εἴη; what would he be obliged to do? (= τί δίοι ἃν αὐτὰν ποιῆσαι), Χ. Μ. 1,  $7^2$  (1598). Ἐψηφίσαντο πολεμητέα εἶναι, they roted that they must go to war (= δεῖν πολεμεῖν), Τ. 1, 88. Εύμμιχοι, οὖς οὖ παραδοτέα τοῖς Αθηναίοις ἐστίν, allies, whom we must not abandon to the Athenians, Τ. 1, 86.

1598. N. Though the verbal in  $-\tau \acute{e}_{0}$  allows both the dative and the accusative of the agent (1188), the equivalent  $\delta \hat{\alpha}$  with the infinitive allows only the accusative (1162).

1599. N. The Latin has this construction (1597), but generally only with verbs which do not take an object accusative; as Eundum est tibi (lτέον ἐστί σοι), — Moriendum est onmibus. So Bello utendum est nobis (τῷ πολέμῳ χρηστέον ἐστίν ἡμῖν), we must go to war. The earlier Latin occasionally has the exact equivalent of the Greck impersonal construction; as Acternas poenas timendum est, Lucr. 1, 112. (See Madvig's Latin Grammar, § 421.)

## INTERROGATIVE SENTENCES.

1600. All interrogative pronouns, pronominal adjectives, and adverbs can be used in both direct and indirect questions. The relative sorts (rarely os) and the relative pronominal adjectives (429) may be used in indirect questions. E.q.

Tί λέγει; what does he say? Πότε ήλθεν; when did he come? Πόσα είδες; how many did you see? "Ηροντο τί λέγοι (or ο τι λέγοι), they asked what he said. "Ηροντο πότε (or ὁπότε) ήλθεν, they asked when he came. 'Opas huas, oool couver; do you see how many

of us there are? P. Rp. 327c.

1601. N. The Greek, unlike the English, freely uses two or more interrogatives with the same verb. E.g.

"Η τίσι τί ἀποδιδούσα τέχνη δικαιοσύνη αν καλοίτο; the art which renders what to what would be called Justice? P.Rp. 332d. See the five interrogatives (used for comic effect) in D.4,36: πρόοιδεν έκαστος τίς γορηγός... πότε καὶ παρά τοῦ καὶ τί λαβύντα τί δεῖ ποιείν, meaning everybody knows who the xopnyos is to be, what he is to get, when and from whom he is to get it, and what he is to do with it.

1602. N. An interrogative sometimes stands as a predicate with a demonstrative; as τί τοῦτο ἔλεξας; what is this that you said?  $(= \tilde{\epsilon} \lambda \epsilon \xi as \tau \hat{o} v_0, \tau \hat{i} \tilde{o} v_i; \text{ lit. you said this, being what?}); \tau \hat{i} v as \tau \hat{o} v o \delta$ elσορω; who are these that I see? E. Or. 1347.

Such expressions cannot be literally translated.

.1603. The principal direct interrogative particles are apa and (chiefly poetic) 7. These imply nothing as to the answer expected; but apa of implies an affirmative and apa μή a negative answer. Où and μή are used alone with the same force as with dog. So you (for un our) implies a negative answer, and οὐκοῦν, therefore (with no negative force), implies an affirmative answer. E.a.

Ή σχολή έσται; will there be leisure? 'Αρ' εἰσί τινες ἄξιοι; are there any deserving ones? 'Aρ' οὐ βούλεσθε έλθειν; or οὐ βούλεσθε έλθειν; do you not wish to go (i.e. you wish, do you not)? 'Apa μη βούλεσθε ελθείν; or μη (or μων) βούλεσθε ελθείν; do you wish to go (you don't wish to go, do you)? Οὐκοῦν σοι δοκεῖ σύμφορον είναι; does it not seem to you to be of advantage? X. C.2, 416. This distinction between or and un does not apply to questions with the inter-

rogative subjunctive (1358), which allow only μή.

1604. Allo  $\tau_i$   $\tilde{\eta}$ ; is it anything else than? or (more frequently) allo  $\tau_i$ ; is it not? is sometimes used as a direct interrogative. E.g.

"A  $\lambda\lambda$ 0 τι η ὁμολογοῦμεν; do we not agree? (do we do anything else than agree?),  $\Gamma$ . G.  $470^{\circ}$ . "A  $\lambda\lambda$ 0 τι οῦν δύο ταῦτα ἔλεγες; did you not call these two? ibid.  $495^{\circ}$ .

1605. Indirect questions may be introduced by  $\epsilon i$ , whether; and in Homer by  $\tilde{n}$  or  $\epsilon i$ . E.g.

Ἡρώτησα εἰ βούλοιτο ἐλθεῖν, I asked whether he wished to go. Ταχετο πευσόμενος ή που ἔτ' εἴης, he was gone to inquire whether you were still living, Od. 13, 415. Τὰ ἐκπώματα οὐκ οίδα εἰ τούτῳ δῶ (1490), I do not know whether I shall give him the cups, X. C. 8, 416. (Here εἰ is used even with the subjunctive: see 1491.)

1606. Alternative questions (both direct and indirect) may be introduced by  $\pi \acute{o} \tau \epsilon \rho o \nu \ (\pi \acute{o} \tau \epsilon \rho a) \dots \mathring{\eta}$ , whether . . . or. Indirect alternative questions can also be introduced by  $\epsilon \acute{\epsilon} \dots \mathring{\eta}$  or  $\epsilon \breve{\iota} \tau \epsilon \dots \epsilon \breve{\iota} \tau \epsilon$ , whether . . . or. Homer has  $\mathring{\eta} \ (\mathring{\eta} \epsilon) \dots \mathring{\eta} \ (\mathring{\eta} \epsilon)$  in direct, and  $\mathring{\eta} \ (\mathring{\eta} \acute{\epsilon}) \dots \mathring{\eta} \ (\mathring{\eta} \epsilon)$  in indirect, alternatives, — never  $\pi \acute{o} \tau \epsilon \rho o \nu$ . E.g.

Πότερον είζε ἄρχειν η ἄλλον καθίστης; do you allow him to rule, or do you appoint another?  $X.C.3,1^{12}$ . Έβουλεύετο εἰ πέμποιέν τινας η πάντες ἴοιεν, he was deliberating whether they should send some or should all go,  $X.A.1,10^{5}$ .

## NEGATIVES.

1607. The Greek has two negative adverbs, où and μή. What is said of each of these generally applies to its compounds, — οὐδείς, οὐδέ, οὖτε, etc., and μηδείς, μηδέ, μήτε, etc.

1608. Or is used with the indicative and optative in all independent sentences, except wishes; also in indirect discourse after on and w, and in causal sentences.

1610. M $\acute{\eta}$  is used with the subjunctive and imperative in all constructions, except with the Homeric subjunctive (1355), which has the force of a future indicative. M $\acute{\eta}$  is used in all final and object clauses after  $\emph{lva}$ ,  $\emph{o}\pi\omega_{\it s}$ , etc., with the subjunctive, optative, and indicative; except after  $\mu\acute{\eta}$ , lest, which takes ob. It is used in all conditional and conditional relative clauses, and in the corresponding temporal sentences after  $\emph{l}\omega_{\it s}$ ,  $\pi\rho\acute{\omega}$ , etc., in relative sentences expressing a purpose (1442), and in all expressions of a wish with both indicative and optative (1507; 1511).

For causal relative clauses with  $\mu\dot{\eta}$  (also conditional), see 1462. For  $\epsilon i \ o\dot{v}$  occasionally used in protasis, see 1383, 2.

1611.  $M_{\eta}^{\gamma}$  is used with the infinitive in all constructions, both with and without the article, except in indirect discourse. The infinitive in indirect discourse regularly has  $o_{ij}$ , to retain the negative of the direct discourse; but some exceptions occur (1496).

For ωστε où with the infinitive, see 1451. For μή with the infinitive after verbs of hoping, promising, swearing, etc., see 1496.

- 1612. When a participle expresses a condition (1563, 5), it takes  $\mu\dot{\eta}$ ; so when it is equivalent to a conditional relative clause; as of  $\mu\dot{\eta}$   $\beta$ ov $\lambda\dot{\delta}\mu\epsilon\nu\sigma$ , any who do not wish. Otherwise it takes of. In indirect discourse it sometimes, like the infinitive, takes  $\mu\dot{\eta}$  irregularly (1496).
- 1613. Adjectives follow the same principle with participles, taking  $\mu\dot{\eta}$  only when they do not refer to definite persons or things (i.e. when they can be expressed by a relative clause with an indefinite antecedent); as of  $\mu\dot{\eta}$  dyadol  $\pi$ olital, (any) citizens who are not good, but of our dyadol  $\pi$ olital means special citizens who are not good.
- 1614. Participles or adjectives connected with a protasis, a command, or an infinitive which would be negatived by  $\mu \hat{\eta}$ , generally take  $\mu \hat{\eta}$ , even if they would otherwise have  $o\hat{v}$ .
- 1615. When verbs which contain a negative idea (as those of hindering, forbidding, denying, concealing, and distrusting) take the infinitive,  $\mu\dot{\eta}$  can be added to the infinitive to strengthen the negation. Such a negative cannot be translated in English, and can always be omitted in Greek. For examples, see 1549-1551.

1616. An infinitive which would regularly be negatived by  $\mu\dot{\eta}$ , either in the ordinary way (1611) or to strengthen a preceding negation (1615), generally takes the double negative  $\mu\dot{\eta}$  of if the verb on which it depends itself has a negative.

Thus δίκαιόν ἐστι μὴ τοῦτον ἀφεῖναι, it is just not to acquit him, if we negative the leading verb, generally becomes οὐ δίκαιόν ἐστι μὴ οὐ τοῦτον ἀφεῖναι, it is not just not to acquit him. So ὡς οὐχ ὅσιόν σοι ὂν μὴ οὐ βοηθεῖν δικαιοσύνη, since (as you said) it was a failure in piety for you not to assist justice, P. Rp. 427°. Again, εἴργει σε μὴ τοῦτο ποιεῖν (1550), he prevents you from doing this, becomes, with εἴργει negatived, οὐκ εἴργει σε μὴ οὐ τοῦτο ποιεῖν, he does not prevent you from doing this.

- 1617. N. (a) Mỳ oỏ is used also when the leading verb is interrogative implying a negative; as  $\tau i \epsilon \mu \pi o \delta \omega \nu \mu \dot{\gamma} o \dot{\nu} \chi \dot{\nu} \delta \rho \nu \zeta o \mu \dot{\nu} \nu o \sigma \dot{\nu} \dot{\nu} \dot{\nu}$  what is there to prevent (us) from being insulted and perishing? X. An. 3, 113.
- (b) It is sometimes used with participles, or even nouns, to express an exception to a negative (or implied negative) statement; as πόλεις χαλεπαὶ λαβεῖν, μὴ οὐ πολιορκία, cities hard (i.e. not easy) to capture, except by siege, D. 19, 123.
- 1618. When a negative is followed by a simple negative (où or  $\mu\dot{\eta}$ ) in the same clause, each retains its own force. If they belong to the same word or expression, they make an affirmative; but if they belong to different words, each is independent of the other. E.g.

Οὐδὲ τὸν Φορμίωνα οὐχ ὁρῷ, nor does he not see Phormio (i.e. he sees Phormio well enough), D.36,46. Οὐ δι' ἀπειρίων γε οὐ φήσεις ἔχειν ὅ τι εἴπης, it is not surely through inexperience that you will deny that you have anything to say, D.19,120. Εἰ μὴ Πρόξενον οὐχ ὑπεδέξαντο, if they had not refused to receive Proxenus (had not notreceived him), D.19,74. So μὴ οὖν . . . διὰ ταῦτα μὴ δότω δίκην, do not then on this account let him escape punishment (do not let him not be punished), D.19,77.

1619. But when a negative is followed by a compound negative (or by several compound negatives) in the same clause, the negation is strengthened. E.q.

Oὐδεὶς εἰς οὐδεν οὐδενὸς ἄν ἡμῶν οὐδέποτε γένοιτο ἄξιος, no one of us (in that case) would ever come to be of any value for anything, P. Ph. 19b.

For the double negative of  $\mu \eta$ , see 1360 and 1361. For onx ort,  $\mu \dot{\eta}$  ort, onx onws,  $\mu \dot{\eta}$  onws, see 1504.

## PART V.

## VERSIFICATION.

#### RHYTHM AND METRE.

1620. Every verse is composed of definite portions called feet. Thus we have four feet in each of these verses:—

Φήσο|μεν πρὸς | τοὺς στρα|τηγούς. | Fár from | mórtal | cáres re|treáting. |

1621. In each foot there is a certain part on which falls a special stress of voice called *ictus* (*stroke*), and another part on which there is no such stress. The part of the foot on which the *ictus* falls is called the *arsis*, and the rest of the foot is called the *thesis*. The regular alternation of arsis and thesis in successive feet produces the rhythm (harmonious movement) of the verse.

1622. In this English verse (as in all English poetry) the rhythm depends entirely on the ordinary accent of the words, with which the ictus coincides. In the Greek verse, however, the ictus is entirely independent of the word-accent; and the feet (with the ictus marked by dots) are  $\phi\eta\sigma\sigma$ ,— $\mu\epsilon\nu$   $\pi\rho\sigma$ ,— $\tau\sigma\nu$ ,  $\sigma\tau\rho\alpha$ ,— $\tau\eta\gamma\sigma\nu$ s. In Greek poetry a foot consists of a regular combination of syllables of a certain

The term dpois (raising) and  $\theta to is$  (placing), as they were used by nearly all the Greek writers on Rhythm, referred to the raising and putting down of the foot in marching, dancing, or beating time, so that  $\theta to is$  denoted the part of the foot on which the ictus fell, and  $\theta to is$  the lighter part. Most of the Roman writers, however, inverted this use, and referred arsis to the raising of the voice and thesis to the lowering of the voice in reading. The prevailing modern use of these terms unfortunately follows that of the Roman writers, and attempts to reverse the settled usage of language are apt to end in confusion.

length; and the place of the ictus here depends on the quantity (i.e. the length or shortness) of the syllables which compose the foot, the ictus naturally falling upon a long syllable (1629). The regular alternation of long and short syllables in successive feet makes the verse metrical, i.e. measured in its time. The rhythm of a Greek verse thus depends closely on its metre, i.e. on the measure or quantity of its syllables.

1623. The fundamental distinction between ancient and most modern poetry is simply this, that in modern poetry the verse consists of a regular combination of accented and unaccented syllables, while in ancient poetry it consists of a regular combination of long and short syllables. The rhythm is the one essential requisite in the external form of all poetry, ancient and modern; but in ancient poetry, rhythm depends on metre and not on accent; in modern poetry it depends on accent, and the quantity of the syllables (i.e. the metre) is generally no more regarded than it is in prose. Both are equally rhythmical; but the ancient is also metrical, and its metre is the basis of its rhythm. What is called metre in English poetry is strictly only rhythm.

1624. The change from metrical to accentual rhythm can best be seen in modern Greek poetry, in which, even when the forms of the ancient language are retained, the rhythm is generally accentual and the metre is no more regarded than it is in English poetry. These are the first two verses in a modern translation of the Odyssey:—

Ψάλλε τον | ἄνδρα, Θε|α, τον πο|λύτροπον, | ὅστις το|σούτους Τόπους δι|ηλθε, πορ|θήσας της | Τροίας την | ἔνδοξον | πόλιν.

The original verses are: -

"Ανδρα μοι | έννεπε, | Μοῦσα, πο|λύτροπον, | δς μάλα | πολλά Πλάγχθη, ἐπεὶ Τροί|ης ἱε|ρὸν πτολί|εθρον ἔ|περσεν.

If the former verses set our teeth on edge, it is only through force of acquired habit; for these verses have much more of the nature of modern poetry than the Homeric originals, and their rhythm is precisely what we are accustomed to in English verse, where Still stands the | forest pri|meval; but | under the | shade of its | branches is dactylic, and

And the ollive of peace | spreads its branch|es abroad is anapaestic.

1625. It is very difficult for us to appreciate the ease with which the Greeks distinguished and reconciled the stress of voice which constituted the ictus and the raising of tone which constituted the word-accent (107, 1). Any combination of the two is now very difficult, and for most persons impossible, because we have only stress of voice to represent both accent and ictus. In reading Greek poetry we usually mark the ictus by our accent, and either neglect the word-accent or make it subordinate to the ictus. Care should always be taken in reading to distinguish the words, not the feet.

#### FEET.

- 2. But a long syllable sometimes has the length of three shorts, and is called a *triseme* (\_\_), and sometimes that of four shorts, and is called a *tetraseme* (\_\_). The triseme has the value of \_! in music, and the tetraseme that of \_!.
- 1627. Feet are distinguished according to the number of times which they contain. The most common feet are the following:—

  1. Of Three Times (in \$ time)

	0) 111100 1111	to,, (the 8 control).		
Trochee		φαῖνε	] }	
Iambus	<b>∨</b> _	ἔφην	ا ۱

2. Of Four Times (in \ or \ time).

3. Of Five Times (in \ time).

Ionic a minore	· · ·	$\pi$ ροσιδέσ $ heta$ αι

5. A foot of four shorts (000) is called a proceleusmatic, and one of two shorts (00) a pyrrhic.

For the dochmius,  $\bigcirc$  \_ \_  $\bigcirc$  \_, see 1691. For the cpitrite, see 1684.

- 1628. The feet in  $\frac{3}{6}$  time (1), in which the arsis is twice as long as the thesis, form the double class ( $\gamma \acute{e}\nu o_{S}$   $\delta \iota \pi \lambda \acute{a}\sigma \iota \nu \nu$ ), as opposed to those in  $\frac{3}{4}$  time (2), in which the arsis and thesis are of equal length, and which form the equal class ( $\gamma \acute{e}\nu o_{S}$   $\iota \sigma \sigma \nu$ ). The more complicated relations of arsis and thesis in the feet of five and six times are not considered here.
- 1629. The ictus falls naturally on a long syllable. The first syllable of the trochee and the dactyl, and the last syllable of the iambus and the anapaest, therefore, form the arsis, the remainder of the foot being the thesis; as  $\angle \circ$ ,  $\angle \circ \circ$ ,  $\langle \circ \rangle$ ,  $\langle \circ \rangle$ .
- 1630. When a long syllable in the arsis is resolved into two short syllables (1631), the ictus properly belongs on the two taken together, but in reading it is usually placed on the first. Thus a tribrach used for a trochee ( $\angle \cup$ ) is  $\angle \cup \cup$ ; one used for an iambus ( $\cup \angle$ ) is  $\cup \angle \cup \cup$ . Likewise a spondee used for a dactyl is  $\angle -$ ; one used for an anapaest is -. So a dactyl used for an anapaest (-0 of for -1 for -0 is -2 of the only use of the tribrach and the chief use of the spondee are (as above) to represent other feet which have their arsis naturally marked by a long syllable.

# RESOLUTION AND CONTRACTION. — IRRATIONAL TIME. — ANACRUSIS. — SYLLABA ANCEPS.

1631. A long syllable, being naturally the metrical equivalent of two short ones (1626), is often resolved into these; as when a tribrach  $\circ \circ \circ$  stands for a trochee  $\_ \circ \circ$  or an iambus  $\circ \_$ . On the other hand, two short syllables are often contracted into one long syllable; as when a spondee

- $\_$  stands for a dactyl  $\_$   $\bigcirc$  or an anapaest  $\bigcirc$   $\bigcirc$ . The mark for a long resolved into two shorts is  $\backsimeq$ ; that for two shorts contracted into one long is  $\eqsim$ .
- 1632. 1. When a long syllable has the measure of three or four short syllables (1626, 2), it may represent a whole foot: this is called *syncope*. Thus a triseme ( $\square = \bot$ ) may represent a trochee ( $\square = \bigcup$ ), and a *tetraseme* ( $\square = \bigcup$ ) may represent a dactyl ( $\square = \bigcup$ ).
- 2. An apparent trochee ( $\cup \cup$ ), consisting of a triseme ( $\cup$ ) and a short syllable, may be the equivalent of a dactyl or a spondee, that is, a foot of four times. This is called a long trochee, or a Doric trochee (see 1684).
- 1633. On the other hand, a long syllable may in certain cases be shortened so as to take the place of a short syllable. Such a syllable is called irrational, and is marked >. The foot in which it occurs is also called irrational ( $\pi$ 005 å $\lambda$ 0705). Thus, in  $\lambda\lambda\lambda$  å $\pi$  è $\chi$ 6 $\rho$  $\omega$  $\nu$  ( $\angle$ 0 $\angle$ >), the apparent spondee which takes the place of the second trochee is called an irrational trochee; in  $\delta$ 0 $\omega$ 0
- 1634. A similar shortening occurs in the so-called cyclic dactyl (marked  $\sim \circ$ ) and cyclic anapaest (marked  $\circ \circ$ ), which have the time of only three short syllables instead of four. The cyclic dactyl takes the place of a trochee  $\sim \circ$ , especially in logacedic verses (1679). The cyclic anapaest takes the place of an iambus  $\circ \sim$ , and is found especially in the iambic trimeter of coinedy (1658).
- 1635. An anacrusis (ἀνάκρουσις, upward beat) consists of a single syllable (which may be long, short, or irrational) or of two short syllables, prefixed to a verse which begins with an arsis.
- 1636. The last syllable of every verse is common, and it may be made long or short to suit the metre, without regard to its usual quantity. It is called *syllaba anceps*. But the continuous *systems* described in 1654, 1666, and 1677 allow this only at the end of the system.

## RHYTHMICAL SERIES. — VERSE. — CATALEXIS. — PAUSE.

1637. A rhythmical series is a continuous succession of feet of the same measure. A verse may consist of one such series, or of several such united.

Thus the verse

πολλά τὰ δεινά, κοὐδὲν ἀν θρώπου δεινότερον πέλει

consists of a First Glyconic (1682, 4),  $\neg \cup | \_ \cup | \_ \cup | \_ \cup |$  (at the end of a verse,  $\neg \cup | \_ \cup | \_ \cup | \_ \cup |$ ), followed by a Second Glyconic,  $\_ \ge | \neg \cup | \_ \cup | \_ \cap$ . Each part forms a series, the former ending with the first syllable of  $\partial u \theta \rho \omega \pi o v$  (see above); and either series might have formed a distinct verse.

- 1638. The verse must close in such a way as to be distinctly marked off from what follows.
  - 1. It must end with the end of a word.
- 2. It allows the last syllable (syllaba anceps) to be either long or short (1636).
  - 3. It allows hiatus (34) before a vowel in the next verse.
- 1639. A verse which has an unfinished foot at the close is called catalectic (καταληκτικός, stopped short). A complete verse is called acatalectic.
- 1640. 1. If the omitted syllable or syllables in a catalectic verse are the thesis of the foot (as in trochaic and dactylic verses), their place is filled by a pause. A pause of one time, equivalent to a short syllable  $(\smile)$ , is marked  $\wedge$  (for  $\Lambda$ , the initial of  $\lambda \epsilon \hat{\iota} \mu \mu \alpha$ ); a pause of two times  $(\_)$  is marked  $\overline{\wedge}$ .
- 2. But in catalectic jambic and anapaestic verses, the thesis of the last foot is lost, and the place is filled by prolonging the preceding arsis: thus we have  $0 \le 2 \pmod{n}$  as the catalectic form of 0 = 0 = 3; and  $0 = 0 \le 2 \pmod{n}$  as that of  $0 = 0 \le 2 \pmod{n}$  (See 1664 and 1665.)
- 1641. A verse measured by dipodies (1646) is called brachycatalectic if it wants a complete foot at the end, and hypercatalectic if it has a single syllable beyond its last complete dipody.

#### CAESURA AND DIAERESIS.

1642. 1. Caesura (i.e. cutting) of the foot occurs whenever

a word ends before a foot is finished; as in three cases in the following verse:—

πολλάς | δ' ἰφθί μους ψύ χὰς "Αϊ δι προί αψεν.

- 2. This becomes important only when it coincides with the caesura of the verse (as after  $i\phi\thetai\mu$ ous). This caesura is a pause within a foot introduced to make the verse more melodious or to aid in its recital. In some verses, as in the iambic trimeter acatalectic (1658) and the heroic hexameter (1669), it follows definite principles.
- 1643. When the end of a word coincides with the end of a foot, the double division is called diaeresis (διαίρεσις, division); as after the first foot in the line just quoted. Diaeresis becomes important only when it coincides with a natural pause produced by the ending of a rhythmic series; as in the trochaic tetrameter (1651) and the daetylic pentameter (1670).
- 1644. The following verse of Aristophanes (Nub. 519), in trochaic (‡) rhythm, shows the irrational long (1633) in the first, second, and sixth feet; the cyclic dactyl (1634) in the third; syncope (1632) in the fourth; and at the end catalexis and pause (1639; 1610), with syllaba anceps (1636).

τάλη
$$|\theta \hat{\eta} \rangle v \hat{\eta} | \tau \hat{\sigma} v \rangle \Delta \iota \hat{\sigma} |v v| \sigma v \rangle v | \epsilon \kappa \theta \rho \epsilon |\psi \alpha v \tau \alpha \rangle \mu \epsilon$$

A rhythmical series (1637) ends with the penult of  $\Delta \iota \acute{o} \nu \bar{\nu} \sigma \sigma \nu$ . This is a logacedic verse, called Eupolidean (1682, 7).

#### VERSES.

- 1645. Verses are called Trochaic, Iambic, Dactylic, etc., from their fundamental foot.
- 1646. In most kinds of verse, a monometer consists of one foot, a dimeter of two feet, a trimeter, tetrameter, pentameter, or hexameter of three, four, five, or six feet. But in trochaic, iambic, and anapaestic verses, which are measured by dipodies (i.e. pairs of feet), a monometer consists of one dipody (or two feet), a dimeter of four feet, a trimeter of six feet, and a tetrameter of eight feet.

- 1647. When trochaic or iambic verses are measured by single feet, they are called *tripodies*, *tetrapodies*, *hexapodies*, etc. (as having three, four, six, etc. feet). Here irrational syllables (1633) seldom occur. (See 1656.)
- 1648. Rhythms are divided into rising and falling rhythms. In rising rhythms the arsis follows the thesis, as in the iambus and anapaest; in falling rhythms the thesis follows the arsis, as in the trochee and the dactyl.
- 1649. In Greek poetry, the same kind of verse may be used by the line (κατὰ στίχον), that is, repeated continuously, as in the heroic hexameter and the iambic trimeter of the drama. Secondly, similar verses may be combined into distichs (1670) or into simple systems (1654). Verses of both these classes were composed for recitation or for simple chanting. Thirdly, in lyric poetry, which was composed to be sung to music, verses may be combined into strophes of complex rhythmical and metrical structure, with antistrophes corresponding to them in form. A strophe and antistrophe may be followed by an epode (after-song) in a different metre, as in most of the odes of Pindar.

#### TROCHAIC RHYTHMS.

1650. Trochaic verses are generally measured by dipodies (1646). The irrational trochee  $\angle >$  (1633) in the form of a spondee can stand in the second place of each trochaic dipody except the last, that is, in the even feet (second, fourth, etc.), so that the dipody has the form  $\angle \cup \angle \overline{\cup}$ . An apparent anapaest ( $\angle \cup >$  for  $\angle >$ ) is sometimes used as the equivalent of the irrational trochee. The cyclic dactyl  $\angle \cup \cup$  (1634) sometimes stands for the trochee in proper names in both parts of the dipody, except at the end of the verse.

The tribrach ( $\langle \circ \circ \circ \rangle$ ) may stand for the trochee (1631) in every foot except the last.

1651. The chief trochaic verse which is used by the line (1649) is the TETRAMETER CATALECTIC, consisting of seven feet and a syllable, divided into two rhythmical series (1637) by a diaeresis (1643) after the second dipody. E.g.

(1)  $\vec{\omega}$  σοφώτα|τοι θε $\vec{\alpha}$ ταὶ, || δε $\hat{\nu}$ ρο τὸν νο $\hat{\nu}$ ν | πρόσχετε.

~~~\\~~~\\ ~~~\\	> / ^
(2) κατὰ σελήνην   ώς ἄγειν χρὴ   τοῦ   >	βίου τὰς   ἡμέρας. <sup>2</sup> >
(3) ξύγγονόν τ' ἐμὴν Πυλάδην τε    τὸ	ν τάδε ξυν¦δρῶντά μοι.*
• "	
Notice the tribrach in the first place dactyl in the third place of (3).  This verse is familiar in English poetry,	
Tell me not in mournful numbers, life is l	out an empty dream.
1652. The lame tetrameter $(\sigma \chi \dot{\alpha} \zeta \omega \nu)$ , ca Hipponax (see 1663), is the preceding verbut one long. E.g.	lled Hipponactean from se with the last syllable
άμφιδέξιος γάρ είμι κούχ άμα <sub>ι</sub>	οτάνω κό <del>πτων.<sup>4</sup></del>
	· · · ·
1653. The following are some of	the more important
lyric trochaic verses: —	•

1654. A stanza consisting of a series of dimeters acatalectic (1653, 3), rarely with an occasional monometer  $(- \circ - \circ)$ , and ending in a dimeter catalectic (1653, 4), is called a trochaic system. E.g.

For iambic and anapaestic systems, formed on the same principle, see 1666 and 1677. See also 1636.

1655. The following contain examples of syncopated trochaic verses (1632, 1):—

νῦν καταστροφαὶ νέων 
$$- \circ - \circ - \wedge$$
 θεσμίων, εἰ κρατήσει δίκα τε καὶ βλάβα  $- \circ - \wedge - \wedge$  τοῦδε μητροκτόνου.²  $- \circ - \wedge \wedge$  δωμάτων γὰρ εἰλόμαν  $- \circ - \wedge \wedge$  ἀνατροπὰς, ὅταν Αρης τιθασὸς ὧν φίλον ἔλη.³

1656. In lyric trochaic and iambic verses, the irrational syllable is found chiefly in comedy, and is avoided in tragedy.

#### IAMBIC RHYTHMS.

1657. lambic verses are generally measured by dipodies (1646). The irrational iambus  $> \angle$  (1633) in the form of a spondee can stand in the first place of each iambic dipody, that is, in the odd places (first, third, etc.), so that the dipody has the form  $\neg \angle \cup \angle$ . An apparent dactyl ( $> \angle \cup$  for  $> \angle \cup$ ) is sometimes used as the equivalent of the irrational iambus; and the cyclic anapaest  $\cup \bigcirc \angle$  (1634) is used for the iambus in both parts of the dipody, except in the last foot, especially by the Attic comedians (1658). The tribrach ( $\cup \angle \cup$ ) may stand for the iambus in every foot except the last.

1658. The most common of all iambic verses is the TRIMETER ACATALECTIC, in which most of the dialogue of

<sup>&</sup>lt;sup>1</sup> Ar. R. 534 ff.

the Attic drama is composed. It never allows any substitution in the last foot. With this exception it may have the tribrach in any place. The irrational iambus  $> \angle$  in the form of a spondee can stand in the first place of every dipody. The tragedians allow the (apparent) dactyl  $> \bigcirc$  only in the first and third places, and the cyclic anapaest only in the first place; but in proper names they allow the anapaest in every place except the last. The comedians allow the dactyl  $> \bigcirc$  in all the odd places, and the cyclic anapaest in every place except the last (1657). The most common caesura is that after the thesis of the third foot.

1659. The following scheme shows the tragic and the comic iambic trimeter compared, — the forms peculiar to comedy being enclosed in [].

1660. When the tragic trimeter ends in a word forming a cretic (\_\_\_\_\_), this is regularly preceded by a short syllable or by a monosyllable. In general the tragedians avoid the feet of three syllables, even where they are allowed.

1661. The following arc examples of both the tragic and the comic form of the iambic trimeter: —

(Tragic) χθονὸς μὲν εἰς | τηλουρὸν η κομεν πέδον,
Σκύθην εἰς οἶ,μον, ἄβατον εἰς | ἐρημίᾶν.

"Ηφαιστε, σοὶ | δὲ χρὴ μέλειν | ἐπιστολάς. Α. Pr. 1-3.
(Comic) ὧ Ζεῦ βασιλεῦ· | τὸ χρῆμα τῶν | νυκτῶν ὅσον ἀπέραντον· οὐ δέποθ' ἡμέρᾶ | γενήσεται;
ἀπόλοιο δῆτ', | ὧ πόλεμε, πολ;λῶν οὔνεκα. Ατ. Ν. 2, 3, 6.

<sup>1</sup> This is known as "Porson's rule." "Nempe hanc regulam plerumque in senariis observabant Tragici, ut, si voce quae Creticum pedein efficeret terminarctur versus, camque vocem hypermonosylabon praecederet, quintus pes iambus vel tribrachys esse deberct." Suppl. ad Praef. ad Hecuban.

1662. The Iambic Trimeter appears in English as the Alexandrine, which is seldom used except at the end of a stanza:—

And hope to merlit Heaven by makling Earth a Hell.

1663. The lame trimeter  $(\sigma\chi\acute{\alpha}\acute{\alpha}\omega\nu)$ , called the Choliambus and the Hipponactean (see 1652), is the preceding verse with the last syllable but one long. It is said to have been invented by Hipponax (about 540 p.c.), and it is used in the newly discovered mimes of Herondas. E.g.

άκούσαθ' Ίππώνακτος οὐ γὰρ ἀλλ' ἤκω.¹ οὕτω τί σοι δοίησαν αἱ φίλαι Μοῦσαι.² 
□ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □ □

1664. The TETRAMETER CATALECTIC, consisting of seven feet and a syllable, is common in Attic comedy. There is a regular diaeresis (1643) after the second dipody, where the first rhythmical series ends (1637).

εἴπερ τὸν ἄνδρ' | ὑπερβαλεῖ, || καὶ μὴ γέλωτ' | ὀφλήσεις.³ 
$$> \angle \cup \_ | \cup \angle \cup \_ | > \angle \cup \_ | \cup \angle \_ (1640,2)$$

In English poetry we have

A captain bold | of Halifax, || who lived in coun!try quarters.

- 1665. The following are some of the more important lyric iambic verses:—
  - 1. Dipody or monometer:

$$\tau i \delta \hat{\eta} \theta \delta \rho \hat{q} s$$
;

2. Tripody (acatalectic and catalectic):

3. Dimeter (acatalectic and catalectic):

- ibid. 1098.
- 7 A. Ch. 22.

- <sup>2</sup> Herond. 3, 1.
- A. Ay. 211.
- 8 Ar. Ach. 1008.

- 8 Ar. N. 1035.
- 6 Ar. N. 703.
- <sup>9</sup> Ar. N. 1452.

4. Hexapody or trimeter catalectic:

πρέπει παρηίς φοινίοις αμυγμοίς.

1666. Iambic systems are formed on the same principle as trochaic systems (1654), of acatalectic dimeters with an occasional monometer, ending with a catalectic dimeter. E.g.

These verses end a long iambic system in Ar. Nub. 1090-1104: see also Nub. 1446-1452, and Eq. 911-940.

1667. For the irrational syllable in lyric verse, see 1656.

### DACTYLIC RHYTHMS.

- 1668. The only regular substitute for the dactyl is the spondee, which arises by contraction of the two short syllables of the dactyl  $(\angle \_$  from  $\angle \lor \lor \lor)$ .
- 1669. The most common of all Greek verses is the HEROIC HEXAMETER, the Homeric verse. It always has a spondee in the last place, often in the first four places, seldom in the fifth (the verse being then called spondaic). There is commonly a caesura in the third foot, either after the arsis or (rather more frequently) dividing the thesis. There is sometimes a caesura after the arsis of the fourth foot, and rarely one in the thesis. The caesura after the arsis is called masculine, that in the thesis feminine or trochaic. A diaeresis after the fourth foot, common in bucolic poetry, is called bucolic. E.g.

τίπτ' αὖτ', αἰγιόχοιο Διὸς τέκος, εἰλήλουθας; 1
_∪∪ _∪∪ _∪∪,  _⊻
εἰπέ μοι, ω Κορύδων, τίνος αἱ βόες; ἢρα Φιλώνδα; 1

1670. The ELEGIAC DISTICH consists of an heroic hexameter followed by the so-called *Elegiac pentameter*. This last verse consists really of two dactylic trimeters with syncope (1632, 1) or catalexis in the last measure; as—

At the end of the pentameter verse the pause  $(\overline{\wedge})$  takes the place of syncope  $(\Box)$  in the middle. The verse probably arose from a repetition of the first penthemim  $(\pi\epsilon\nu\theta-\eta\mu\nu-\mu\epsilon\rho\dot{\epsilon}s,$  five half-feet) of the hexameter. But syllaha anceps and hiatus are not allowed after the first trimeter, but only at the end of the verse (1638). The last two complete feet are always dactyls. A diaeresis (1643) divides the two parts of the verse. The pentameter is never used by itself.

1671. The following is an Elegiac Distich: —
τίς δὲ βίρος τί δὲ | τερπνὸν ἄ|νευ χρῦ|σέης 'Α φρο|δίτης;
τεθναί|ην ὅτε | μοι || μηκέτι | ταῦτα μέ|λοι. 1
— Ο Ο Ι — Ο Ο Ι — Ο Ι — Ι — Ο Ι — —
— — Ι — Ο Ο Ι — Ο Ο Ι — Ο Ο Ι — Τ

1672. In the Homeric verse a long vowel or a diphthong in the thesis (not in the arsis) is often shortened at the end of a word when the next word begins with a vowel. This sometimes occurs in the middle of a word. E.g.

 $\ddot{\omega}$  πόποι,  $|\ddot{\eta}$  μάλα  $|\ddot{\delta}\dot{\eta}$  μετε $|\beta$ ούλευ $|\dot{\sigma}$ αν θεοὶ  $|\ddot{\alpha}$ λλως.  $^{5}$  χρῦσέῳ  $\ddot{\alpha}$ |νὰ σκή|πτρω, καὶ |λίσσετο  $|πάντας ^{3}A|χαιούς (see 47, 1). <math>^{6}$  βέβληαι, οὐδ'  $\ddot{\alpha}$ λιον  $βέλος ἔκφυγεν, ως ὄφελόν τοι. <math>^{7}$  But  $\ddot{\eta}$ μετέρω ἐνὶ οἴκω ἐν  $^{3}A$ ργεϊ, τηλόθι πάτρης.  $^{8}$

1673. When a short vowel stands in Homer where a long one
is required by the verse, it may be explained in various ways.
1. By supposing $\lambda$ , $\mu$ , $\nu$ , $\rho$ , or $\sigma$ to be doubled at the beginning
of certain words; as πολλά λισσομένω (, 11.22,91
(we have ἐλλίσσετο in Il. 6, 45).
2. By the original presence of F making position (see 3; 90; 91);
as τοιόν τοι πυρ (), Il. 5, 7. So before δείδω, fear, and
other derivatives of the stem $\delta_{\mathcal{E}^{\epsilon_{1}}}$ , and before $\delta \hat{\eta} \nu$ (for $\delta_{\mathcal{E}} \eta \nu$ ).
3. By a pause in the verse (1642.2) prolonging the time: as in

1674. The following are some of the chief lyric dactylic verses:

φεύγωμεν ετι γάρ κεν άλύξαιμεν κακὸν ήμαρ.1

1. Dimeter:

```
μυστοδό|κος δόμος<sup>2</sup> = 0 \cup 1 = 0 \cup 1
μοῖρα δι|ώκει<sup>3</sup> = 0 \cup 1 = 0
```

2. Trimeter (acatalectic and catalectic):

```

# ANAPAESTIC RHYTHMS.

1675. Anapaestic verses are generally measured by dipodies (1646). The spondee and the dactyl (- and -  $\circ$ ) may stand for the anapaest.

The long syllable of an anapaest is rarely resolved into two short, making  $\smile \smile \smile \smile$  for  $\smile \smile \smile \smile$ .

3. The dimeter catalectic, or paroemiac:

ηραν | στρατιώ|τιν ἀρω|γήν. $^{6}$  \_ \_ |  $\bigcirc$   $\bigcirc$  [  $\bigcirc$   $\bigcirc$   $\bigcirc$  [  $\bigcirc$   $\bigcirc$  ] . The Lord [ is advancing. Prepare | ye!

4. The TETRAMETER CATALECTIC, consisting of seven feet and a syllable, or of the two preceding verses combined. There is a regular diaercsis after the second dipody. This verse is frequently used by the line (1649) in long passages of Aristophanes.

- πρόσχετε τὸν νοῦν | τοις ἀθανάτοις || ἡμιν, τοις αἰ|εν ἐοῦσι,
τοις αἰθερίοις, | τοισιν ἀγήρως, || τοις ἄφθιτα μη|δομένοισιν.<sup>8</sup>

1677. An anapaestic system consists of a series of anapaestic dimeters acatalectic, with occasionally a monometer, ending always with the paroemiac (or dimeter catalectic). These are very frequently employed in both tragedy and comedy. E.g.

<sup>1</sup> A. Ag. 49. <sup>8</sup> Ar. Av. 221. <sup>5</sup> ibid. 50. <sup>7</sup> Ar. Av. 736. <sup>9</sup> A. Ag. 40-47. <sup>2</sup> ibid. 98. <sup>4</sup> A. Ag. 48. <sup>6</sup> ibid. 47. <sup>8</sup> ibid. 689.

1678. Anapaestic systems are especially common in march movements in tragedy, where they were probably chanted by the leader of the chorus, as in the  $\pi \acute{\alpha} \rho o \delta o s$ .

# LOGACEDIC RHYTHMS.

- 1679. Logacedic rhythm is a rhythm in  $\frac{3}{4}$  time, having the trochee as its foundation, but admitting great freedom of construction. Besides the trochee  $\_$   $\circ$ , it admits the irrational trochee  $\_$  >, the tribrach  $\circ$   $\circ$   $\circ$ , the cyclic dactyl  $\_$   $\circ$ , and the triseme (1632, 1) or syncopated trochee  $\_$  These are all equivalent feet, of three times (=  $\circ$   $\circ$   $\circ$ ).
- 1680. The first foot of a logacedic verse allows special freedom. It may be a trochee or an irrational trochee \_\_>, and sometimes a tribrach o o o. An apparent iambus (probably with ictus o \_) sometimes occurs (1682, 7). Great license is here permitted in using different forms in strophe and antistrophe, even in verses which otherwise correspond precisely: see 1682, 7.

When a logacedic verse has more than one rhythmical series (1637), the first foot of each series has this freedom of form (see 1682, 7).

- 1681. An anacrusis (1635) may introduce any logacedic verse.
- 1682. The following are some of the most important logacedic verses which have special names:—
- 1. Adonic: σύμμαχος ἔσσο.¹ 1 \_ 0 This is the final verse of the Sapphic stanza (6).

  - Second Pherecratic: παιδὸς δύσφορον ἄταν.<sup>4</sup> \_ > | ~ ∪ | \_ ∪
     Catal. ἐκ μὲν δὴ πολέμων.<sup>5</sup> \_ > | ~ ∪ | \_ ∧
  - 4. Glyconic: (Three forms):

- <sup>b</sup> S. An. 150.
- 8 ibid. 107.

8 S. O.C. 129.

<b>5</b> . ˈ	Three Alcaics,	which form	the Alcaic	stanza (c	a, a,	b, c	):
--------------	----------------	------------	------------	-----------	-------	------	----

Compare in Horace (Od. 1, 9):

Vides ut alta stet nive candidum Soracte, nec iam sustineant onus Silvae laborantes, geluque Flumina constiterint acuto.

Three Sapplies and an Adonic (1) form the Sapplie stanza.

7. Eupolidean:  $\vec{\omega} \theta \epsilon |\dot{\omega}\mu\epsilon|$ voi, κατε $|\rho\hat{\omega}| |\pi\rho$ òs  $b|\mu$ âs  $\dot{\epsilon}|\lambda\epsilon\upsilon\theta\dot{\epsilon}|\rho\omega$ s.

The Eupolidean verse is used by the line in comedy; as in Ar. Nub. 518-562.

1683. The first strophe of the first Olympic ode of Pindar is given as an example of the free use of logacedics in lyric poetry.

# DACTYLO-EPITRITIC RHYTHMS.

- 1684. 1. About half of the odes of Pindar are composed in a measure called dactylo-epitritic, which consists of dactyls, with their equivalent spondees and syncopated forms ( $\square$ ), and epitrites. The epitrite ( $\square \cup \square$ ) is composed of a long (or Dorie) trochee ( $\square \cup$ , see 1632, 2) and a spondee. The dactylic parts of the verse generally have the form  $\triangle \cup \square \triangle \cup \square \triangle \cup \square$  or (catalectic)  $\triangle \cup \square \triangle \cup \square \triangle \cup \square \wedge \square$ . The verse may have an anaerusis.
- 2. It will be noticed that in this verse the long trochee ( $\smile$ ) has the same length as the dactyl and the dactyl has its full time, while in logacedic verse the trochee has its ordinary time and the dactyl is cyclic (equivalent in time to the trochee).
- 1685. The first strophe of Pindar's third Olympic ode is an example of this measure:—

RHYTHMS WITH FEET OF FIVE OR SIX TIMES.
4000 0

1686. Some of the more important rhythms with feet of five or six times (1627, 3 and 4) are the following:—

1687. 1. Choriambic rhythms, with the choriambus

δεινὰ μέν οὖν, δεινὰ ταράσσει σοφὸς οἰωνοθέτᾶς.²

2. Choriambic verses of this class are rare. Most verses formerly called choriambic are here explained as logacedic (1682).

1688. 1. Ionic rhythms, with the ionic a minore  $\circ \circ \bot \bot$  as the fundamental foot, admitting also the equivalent  $\circ \circ \sqcup \sqcup (1626, 2) : \bot$

2. A double trochee \_ o \_ o often takes the place of the two long syllables and the two following shorts. This is called anaclasis (ἀνάκλασις, hreaking up), as it breaks up the feet. E.g.

1690. Bacchic rhythms, with the bacchius . \_ \_ as the fundamental foot: \_ \_

# DOCHMIACS.

1691. Dochmiac verses, which are used chiefly in tragedy to express great excitement, are based upon a foot called the dochmius, compounded of an iambus and a cretic (or a bacchius and an iambus)  $\circ$  |  $\circ$  (or  $\circ$  = |  $\circ$  ). This peculiar foot appears in nineteen different forms, by resolving the long syllables and admitting irrational longs in place of the two shorts. Its most common forms are  $\circ$  |  $\circ$  and  $\circ$   $\circ$  |  $\circ$  and  $\circ$   $\circ$  . As examples may be given

# APPENDIX.

CATALOGUE OF VERBS.

# APPENDIX.

# 1692. CATALOGUE OF VERBS.

Note. — This catalogue professes to contain all verbs in ordinary use in classic Greek which have any such peculiarities as to present difficulties to a student. No verb is introduced which does not occur in some form before Aristotle; and no forms are given which are not found in writers earlier than the Alexandrian period, except sometimes the present indicative of a verb which is classic in other tenses, and occasionally a form which is given for completeness and marked as later. Tenses which are not used by Attic writers, in either prose or poetry, or which occur only in lyrical parts of the drama, are enclosed in [], except occasionally the present indicative of a verb which is Attic in other tenses.

The verb stein, with any other important forms of the stem, is given in () directly after the present indicative, unless the verb belongs to the first class (569). The class of each verb in  $\omega$  is given by an Arabic numeral in () at the end, unless it is of the first class. Verbs in  $\mu$  of the Seventh Class (619), enumerated in 794, are marked with (I.); those of the Fifth Class in  $\nu \bar{\nu} \mu \nu$  (608), enumerated in 797, 1, with (II.); and the poetic verbs in  $\nu \eta \mu \nu$  (609), enumerated in 797, 2, which add  $\nu \alpha$  to the stem in the present, with (III.). A few epic peculiarities are sometimes disregarded in the classification.

The modification of the stem made by adding  $\epsilon$  in certain tenses (653) is marked by prefixing  $(\epsilon -)$  to the first form in which this occurs, unless this is the present. Presents in  $\epsilon \omega$  thus formed have a reference to 654. A hyphen prefixed to a form (as  $-\epsilon \delta \rho \bar{\alpha} \nu$ ) indicates that it is found only in composition. This is omitted, however, if the simple form occurs even in later Greek; and it is often omitted when the occurrence of cognate forms, or any other reason, makes it probable that the simple form was in use. It would be extremely difficult to point out an example of every tense of even the best English verbs in a writer of established authority within a fixed period.

The imperfect or pluperfect is generally omitted when the present or perfect is given. Second perfects which are given among the principal parts of a verb (462, 1) are not specially designated (see  $\beta\lambda 4\pi\tau\omega$ ).
