PREFACE TO THIRD EDITION

In preparing a new edition of this grammar I have found misprints requiring correction to be few and insignificant. The alterations that seemed necessary are nearly all concerned with facilitating the use of the book for students. One of these is the indication of the relevant number of chapter and paragraph on the inside top corner of each page. Since the grammar is intended to supply a complete account of Classical Sanskrit, many paragraphs may be omitted till a later stage of study. I therefore here append a list of those which are essential for absolute beginners and thus constitute a virtual primer of Classical Sanskrit.

I: 1-7, 8-12, 13. II: 16-22, 27, 30-34, 36 A. B., 37, 38, 40, 42-44, 45, 1. 2, 52-55, 65, 67. III: 70, 71, 73, 74, 77, 85, 87, 90, 1, 97, 100, 101 D (p. 63), 103, 1, 2, 109-111, 120. IV: 121-128, 131, 132 (only Pres. Par., pp. 92, 98), 135, 136, 138, 1 (only *✓tud.*, Par.), 141 a (only Par.), 143, 1 (only Par.), 147 (only Par.), 148 (only *adām*), 151 (only Par.), 154 (only Pres.), 156, 160, 1, 2, 162, 163, 167, 168, 169, 172, 175.

When the student has gone through these paragraphs he will be quite prepared to begin reading. Any new grammatical forms he now meets with he will be able to find explained in the paragraphs that have been passed over. In this way he will understand, with the aid of a vocabulary, every word in the first canto of the *Story of Nala* within the course of a month, and know all the grammar necessary for reading easy Sanskrit texts.

Since the appearance of the second edition of this work (1911) my *Vedic Grammar for Students* was published (1916). Though this new book seemed at first sight to make Appendix III superfluous in the present work (pp. 236-44), I decided to retain it as presenting Vedic grammar in an abridged form and rendering it easier for absolute beginners to master.

PREFACE TO SECOND EDITION

THE original form of the present work was my abridgement (1886) of Max Müller's Sanskrit Grammar (2nd ed., 1870). That abridgement was the outcome of what I had found by experience, both as a learner and a teacher, to be unessential in an elementary grammar. It was also partly due to my conviction that the existing Sanskrit grammars, being too much dominated by the system of Pāṇini, rendered Sanskrit unnecessarily hard to learn. The introductory sketch of the history of Sanskrit grammar prefixed to the present volume will, I think, sufficiently show that the native Indian system is incompatible with the practical methods of teaching and learning in the West.

In the first edition of this grammar, published in 1901, the earlier book was transformed into an entirely new work. Though, on the whole, considerably enlarged it showed many omissions. For I made it my guiding principle to leave out all matter that is found exclusively in Vedic literature or in the Hindu grammarians, the aim I had in view being to describe only such grammatical forms as are to be met with in the actual literature of post-Vedic Sanskrit. The student of Sanskrit grammar would thus not be burdened with matter which could never be of any practical use to him. Hence I refrained from employing, even in a paradigm, any word not to be found in the literature; though for the sake of completeness I here often gave inflected forms represented only by other words of the same type. The purpose of the book, then, was not to supply a mass of forms and rules mainly useful for answering examination questions more or

less mechanically, but to provide the student with the full grammatical equipment necessary for reading any Sanskrit text with ease and exactness.

The present edition has undergone a thorough revision aided by the experience of ten more years' teaching and by the suggestions of pupils and others who have used the first edition. The improvements chiefly consist of additions, which have increased the size of the book by twenty-four pages.

An entirely new portion of the grammar are the three sections comprised in pages 159–168. The first (182) deals with nominal stem formation, giving an account of the primary and secondary suffixes, and thus furnishing the student with a more complete insight into the structure of Sanskrit words than the first edition supplied. In connexion with these suffixes a survey (183) of the rules of gender is added. The third new section (184) describes the formation of verbal compounds. The most noticeable case of expansion is otherwise to be found in the rules about the treatment of final dental *n* in Sandhi: these now give a complete account (36, 40) of the changes undergone by that letter. In the accidence a few new paradigms have been introduced, such as *grāvan* (90, 4), and additional forms have been given, as in the difficult s-aorist of *dah*, where (144, 5) even middle forms, though not occurring in that verb, are supplied as a model for other verbs presenting similar difficulties of euphonic combination. Other improvements are intended to facilitate the use of the grammar. Thus in the list of verbs (Appendix I) abbreviations have been added to indicate the various forms which beginners have otherwise often found difficulty in identifying. Again, the Sanskrit Index has been made both fuller and more explanatory (see e.g. *prākṛta*). A decidedly practical improvement is the substitution of a brief synopsis of the subject-matter for an elaborate table of contents at the beginning, and the addition of a General Index at the

end. All these extensions and changes will, I feel sure, be found to have considerably increased the practical value of the grammar both in matter and form.

As in the first edition, the book is transliterated throughout, excepting the list of verbs (Appendix I) and the syntactical examples at the end (180; 190–218). The system of transliteration remains the same, being that which is now most generally adopted in the West. This system includes the use of *r* (to be pronounced with a syllabic value, as the *r* in French *chambre*) to represent the weak grade of the syllables *ar* and *ra*.

The improvements appearing in this edition are largely due to the suggestions of former pupils or of friends. The gentlemen to whom I owe thanks for their advice are—Prof. E. J. Rapson; Dr. James Morison; Mr. M. L. Puri, B.A., of Exeter College; Mr. Horace Hart, M.A., Controller of the University Press; and especially Mr. T. E. Moir, I.C.S., of Wadham College, as well as Dr. F. W. Thomas, Librarian of the India Office. Mr. J. C. Pembrey, Hon. M.A., Oriental Reader of the University Press, has read with his usual care the proofs of this edition, which is separated by no less an interval than sixty-four years from the first Sanskrit Grammar which he (together with his father) corrected for the press, that of Prof. H. H. Wilson, in 1847. To Dr. A. B. Keith I am indebted for reading the proofs of this as well as of all the other books I have published since 1900. I must take this opportunity of thanking him not only for having read the proofs of the whole of my *Vedic Grammar*, but also for having passed several sheets of that work through the press for me during my absence in India between September, 1907, and April, 1908.

INTRODUCTION

BRIEF HISTORY OF SANSKRIT GRAMMAR

THE first impulse to the study of grammar in India was given by the religious motive of preserving intact the sacred Vedic texts, the efficacy of which was believed to require attention to every letter. Thus, aided by the great transparency of the Sanskrit language, the ancient Indian grammarians had by the fifth century B.C. arrived at scientific results unequalled by any other nation of antiquity. It is, for instance, their distinctive achievement to have recognized that words for the most part consist on the one hand of roots, and on the other of affixes, which, when compounded with the former, modify the radical sense in various ways.

The oldest grammar that has been preserved is Pāṇini's. It already represents a fully developed system, its author standing at the end of a long line of predecessors, of whom no fewer than sixty-four are mentioned, and the purely grammatical works of all of whom, owing to the excellence and comprehensiveness of his work, have entirely perished.

Pāṇini is considerably later than Yāska (probably about 500 B.C.), whom he mentions, and between whom and himself a good number of important grammarians intervene. On the other hand, Pāṇini is much older than his interpreter Patañjali, who probably dates from the latter half of the second century B.C., the two being separated by another eminent grammarian, Kātyāyana. Pāṇini himself uses the word *yavanānī*, which Kātyāyana explains as 'writing of the Yavanas' (i.e. Iāones or Greeks). Now it is not at all likely that the Indians should have become acquainted with Greek writing before the invasion of Alexander in 327 B.C. But the natives of the extreme north-west, of whom Pāṇini in all probability was one, would naturally have become acquainted with it soon after that date. They must, however, have grown familiar with it before a grammarian would make a rule as to how to form from Yavana, 'Greek,'

a derivative form meaning 'Greek writing'. It seems therefore hardly possible to place Pāṇini earlier than about 300 B.C.

Pāṇini's grammar consists of nearly 4,000 rules divided into eight chapters. Being composed with the utmost imaginable brevity, each Sūtra or aphorism usually consists of only two or three words, and the whole work, if printed continuously in medium-sized Devanāgarī type, would not occupy more than about thirty-five pages of the present volume. And yet this grammar describes the entire Sanskrit language in all the details of its structure, with a completeness which has never been equalled elsewhere. It is at once the shortest and fullest grammar in the world.

In his endeavour to give an exhaustive survey of the *bhāṣā* or classical Sanskrit with a view to correct usage, Pāṇini went on to include within the scope of his grammar the language of the sacred texts, which was no longer quite intelligible. He accordingly gives hundreds of rules about the Veda, but without completeness. His account of the Vedic language, taken as a whole, thus shows many gaps, important matters being often omitted, while trifles are noticed. In this part of his work Pāṇini shows a decided incapacity to master his subject-matter, attributing to the Veda the most unbounded grammatical license, especially in interchanging or dropping inflections.

The grammar of Pāṇini is a *śabdānuśāsana*, or 'Treatise on Words', the fundamental principle of which is, that all nouns are derived from verbs. Starting with the simplest elements into which words can be analysed, root, affix and termination, Pāṇini shows how nominal and verbal stems are formed from roots and complete words from stems. He at the same time indicates the functions which words acquire by the addition of formative elements and by being compounded with other words. It is a peculiarity of Pāṇini's word-formation, that he recognizes derivation by suffixes only. Thus when a verbal root like *bhid*, 'to pierce,' is used in the nominal sense of 'piercer', he has recourse to the highly artificial expedient of assuming an imaginary suffix, for which a blank is substituted!

Yāska records that the universality of Śākataṭyāya's principle of nouns being derived from verbs was contested by Gārgya, who objected to the forced etymologies resulting from a general

application of this principle. Gārgya maintained that if *aśva*, 'horse,' for instance, were derived from *as*, 'to travel,' not only would everything that travels be called *aśva*, and everything be named after all its activities, but states of being (*bhāva*) would be antecedent to things (which are presupposed by those states).

Pāṇini makes a concession to Gārgya's objection by excluding all words the derivation of which is difficult owing to their form or meaning, as *aśva*, 'horse,' *go*, 'cow,' and *puruṣa*, 'man.' Primary nouns of this kind had been collected before Pāṇini's time in a special list, in which they were often forcibly derived from verbal roots by means of a number of special suffixes. The first of these suffixes being *u*, technically called *un*, the whole list of these formations received the name of *unādi* ('beginning with *un*'). Pāṇini refers to all such words as ready-made stems, the formation of which does not concern him.

The *Unādi* list which Pāṇini had before him survives, in a somewhat modified form, as the *Unādi Sūtra* with the commentary (dating probably from the thirteenth century A.D.) of Ujjvaladatta. In its extant shape this *Sūtra* contains some late words, such as *dīnāra* (Lat. *denarius*), a noun which cannot have come into use in India much before 100 A.D.

The proper object of Pāṇini's grammar being derivation, he does not deal with phonetics as such, but only incidentally as affecting word-formation, or the combination of words in a sentence. He therefore does not give general rules of phonetic change, but since his analyses, unlike those of the *Unādi Sūtra*, move within the bounds of probability and are generally correct, being in many cases confirmed by comparative philology, he actually did discover several phonetic laws. The most important of these was the interchange of vowels with their strong grades *guna* and *vrddhi* (cp. 17), which Grimm called *ablaut*, and which comparative grammar traces to the original Indo-European language. The other great phonetic discoveries of the Indians had already been made by Pāṇini's predecessors, the authors of the original *Prātiśākhyas*, the phonetic treatises of the Vedic schools.

Pāṇini also treats of the accents of words in derivation and in the sentence, but with syntax in our sense he does not deal, perhaps owing to the simplicity of the sentence in Sanskrit.

The general plan of Pāṇini's work is as follows: Book i. contains the technical terms of the grammar and its rules of interpretation; ii. deals with nouns in composition and case relations; iii. teaches how suffixes are to be attached to verbal roots; iv. and v. explain the same process with regard to nominal stems; vi. and vii. describe the accent and phonetic changes in the formation of words, while viii. treats of words in a sentence. This general plan is, however, constantly interrupted by single rules or by a series of rules, which were added by the author as a result of progressive grammatical studies, or transferred from their natural context to their present position in order to economize words.

In formulating his rules, Pāṇini makes it his aim to express them in as abstract and general a way as possible. In this he occasionally goes so far as to state a general rule for a single case; while, on the other hand, he sometimes fails to collect a number of related phenomena under a single head.

In carrying out the principle of extreme conciseness dominating his grammar, Pāṇini resorts to various devices, such as ellipse of the verb, the use of the cases in a special technical sense, and the employment of heading rules (*adhikāra*) which must be supplied with a number of subordinate rules that follow. By such means a whole rule can often be expressed by a single word. Thus the ablative *dhātoḥ*, literally 'after a root', not only means 'to a root the following suffixes are attached', but is also an *adhikāra* extending its influence (*anuvṛtti*) over some 540 subsequent aphorisms.

The principle of brevity is, moreover, notably applied in the invention of technical terms. Those of Pāṇini's terms which are real words, whether they describe the phenomenon, as *sam-āsa*, 'compound,' or express a category by an example, as *dvi-gu* ('two-cow'), 'numeral compound,' are probably all borrowed from predecessors. But most of his technical terms are arbitrary groups of letters resembling algebraic symbols. Only a few of these are abbreviations of actual words, as *it*, 'indicatory letter,' from *iti*, 'thus.' Most of them are the result of great deliberation, being chiefly composed of letters rarely occurring in the language. Thus the letter *l* was taken as a symbol of the personal endings of the verb; combined with a cerebral *t* it refers to a primary tense or mood, but combined with a guttural *n* it denotes a secondary tense or mood. Thus *lat*, *lit*, *lut*, *let*, *lot*, mean present, perfect,

future, subjunctive, and imperative respectively ; *lañ*, *luñ*, *liñ*, imperfect, aorist, and potential.

Pāṇini's grammar begins with the alphabet arranged on scientific principles. To several of its letters is attached an *it* or *anubandha* (indicatory letter), by means of which can be formed convenient contractions (called *pratyāhāra*) designating different groups of letters. The vowels are arranged thus : *a i u-n*, *r !-k*, *e o-n*, *ai au-c*. By means of the indicatory letter at the end of the group, all the simple vowels can be expressed by *ak*, the simple vowels together with the diphthongs by *ac*. As the last letter in Sanskrit is *h*, written *ha-l*, the entire alphabet is expressed by the symbol *al* (much as if we were to express it by *az*). Indicatory letters are also attached to suffixes, roots, and words in order to point to certain rules as applicable to them, thus aiding the memory as well as promoting brevity.

Pāṇini's work has two appendixes, to which it refers. One of these is the *Dhātu-pāṭha*, or 'List of Verbal Roots', arranged according to conjugational classes, the mode of inflexion being expressed by accents and indicatory letters. A striking fact about this collection is that of its 2,000 roots (many of which are, however, merely variants of one form) only about 800 have yet been found in Sanskrit literature, while it omits about fifty Vedic verbs. The second appendix is the *Gana-pāṭha*, or 'List of Word-groups'. Pāṇini gives rules applicable to the whole of a group by referring to its first word. This collection, which contains many words occurring in Vedic works only, has been less well preserved than the *Dhātu-pāṭha*. The Ganas were metrically arranged in the *Gana-ratna-mahodadhi*, or 'Ocean of the Gems of Word-groups', a work composed by Vardhamāna in 1140 A.D.

Pāṇini's work very early acquired a canonical value, and has continued, for at least 2,000 years, to be the standard of usage and the foundation of grammatical studies in Sanskrit. On account of the frequent obscurity of a work which sacrifices every consideration to brevity, attempts soon began to be made to explain it, and, with the advance of grammatical knowledge, to correct and supplement its rules. Among the earliest attempts of this kind was the formulation, by unknown authors, of rules of interpretation (*paribhāṣā*), which Pāṇini was supposed to have followed in his grammar, and which are mentioned by his suc-

cessor Kātyāyana. A collection of such rules was made in the eighteenth century by Nāgoji-bhaṭṭa in his *Paribhāṣēndu-śekhara*, or 'Moon-crest of Interpretative Rules'.

Next we have the Vārtikas, or 'notes' (from *vṛtti*, 'explanation'), of Kātyāyana, on 1,245, or nearly one-third, of Pāṇini's aphorisms. That grammarian belonged to the Deccan, and probably lived in the third century B.C. When Kātyāyana's criticism shows him to differ from Pāṇini, an oversight on the part of the latter is usually to be assumed; but in estimating the extent of such oversights, one should not leave out of account the fact that Kātyāyana lived both later and in a part of India far removed from that of Pāṇini. Other grammarians made similar notes on Pāṇini both before and after Kātyāyana; subsequent to the latter's time are the numerous grammatical Kārikās or comments in metrical form.

All this critical work was collected by Patañjali in his extensive *Mahābhāṣya*, or 'Great Commentary', with many supplementary notes of his own. His discussions take the form of a kind of dialogue, and deal with 1,713 rules of Pāṇini. Patañjali's work probably dates, as has been said, from the latter half of the second century B.C. The *Mahābhāṣya* in its turn was commented upon in the seventh century by Bharṭṛhari in his *Vāk-yapadīya*, or 'Treatise on the Words in a Sentence', which is concerned with the philosophy of grammar, and by Kaiyatā probably in the thirteenth century.

About 650 A.D. was composed another commentary on Pāṇini, the *Kāśikā Vṛtti*, or 'Benares Commentary', the first five books being the work of Jayāditya, the last three of Vāmana. Based on a deteriorated text of Pāṇini, it contains some errors, but has the merit of conciseness and lucidity. Though much shorter than the *Mahābhāṣya*, it is particularly valuable as the oldest commentary on Pāṇini that explains every Sūtra. The examples that it gives in illustration are, as a rule, derived from older interpreters. Such borrowing was a usual practice; even Patañjali speaks of stock examples as *mūrdhābhīṣikta*, or 'consecrated' (lit. 'sprinkled on the head').

In the fifteenth century Rāmacandra endeavoured in his *Pra-kriyā-kaumudī*, or 'Moonlight of Method', to make Pāṇini's grammar more intelligible by rearranging its matter in a more

practical way. The *Siddhānta-kaumudī*, or 'Moonlight of Settled Conclusions', in which Bhaṭṭoji in the seventeenth century disposed Pāṇini's Sūtras in a more natural order, had a similar aim. An abridgement of this work, entitled *Laghu-(siddhānta-)kaumudī*, or 'Short Moonlight (of Settled Conclusions)', by Varadarāja, is commonly employed as a useful introduction to the native system of grammar. A belief in the infallibility of Pāṇini, which still prevails among the Pandits, has often led the above-named interpreters, from Patañjali onwards, to give forced explanations of Pāṇini's rules.

Other later grammarians, not belonging to the school of Pāṇini, are on the whole of little importance. While adducing hardly any new material, they are much less complete than Pāṇini, since they omit whole sections, such as rules about Vedic forms and the accent. Introducing no new points of view, they aim solely at inventing technical devices, or at presenting their subject in a more lucid and popular form. Among these non-Pāṇinian grammarians may be mentioned the names of Candra¹, who flourished about 650 A. D.²; the pseudo-Sākātyāyaṇa, who was posterior to the *Kāśikā Vṛtti*; and the most important of them, Hemacandra (twelfth century). The *Kātantra* by Sarva-varman (of uncertain date), whose terminology has striking affinities with older works, especially the *Prātiśākhya*s, seems to have been the most influential of these later grammars. It served as a model for the standard Pāli grammar of Kaccāyana, and the native grammars of the Dravidians and Tibetans. Vopadeva's *Mugdha-bodha*, or 'Enlightenment of the Ignorant', a very technical work dating from the thirteenth century, has been, down to the present day, the Sanskrit grammar chiefly used in Bengal. Lastly, we have the *Sarasvatī Sūtra*, or 'Aphorisms of the Sarasvatī Grammar', by an unknown author, a work distinguished by lucidity as well as conciseness.

There are, besides, a few works dealing with special departments of the subject, which form contributions of some importance to our knowledge of Sanskrit grammar. The *Phiṭ Sūtra* of

¹ His Grammar, the *Cāndra-cyākaraṇa*, has been edited by Prof. Bruno Liebich (Leipzig, 1902).

² See *Vienna Oriental Journal*, 13, 308–15; Winternitz, *Geschichte der indischen Litteratur*, ii, p. 259.

Sāntanava, composed later than the *Mahābhāṣya*, but at a time when there was still a living knowledge of the ancient accent, gives rules for the accentuation of nouns, not according to the analytical method of Pāṇini, but with reference to the finished word. As Pāṇini does not determine the gender of individual words, though he treats of feminine suffixes and does not ignore differences of gender in general, some value attaches to works dealing with the subject as a whole, especially to Hemacandra's *Liṅgānuśāsana*, or 'Treatise on Gender'.

The first Sanskrit grammar ever written by a European was composed by the German missionary Heinrich Roth, a native of Augsburg, who died at Agra in 1668, as Superior of the Jesuit College in that city. This work was never published, but the manuscript is still preserved at Rome. There is, however, in Kircher's *China Illustrata* (Amsterdam, 1667), pp. 162–63, a contribution by Roth, which contains an account of the Sanskrit alphabet with five tables in Devanāgarī characters (undoubtedly the earliest specimens of that script to be found in any book printed in Europe)¹.

The first printed European Sanskrit grammar was that of Paulinus a Sancto Bartholomaeo, written in Latin and published at Rome in 1790. This work was based partly on the MS. material left by a German Jesuit missionary named Hanxleden, who died in 1732. The first scientific grammar aiming at completeness was that of Colebrooke, published in 1805. It was followed by that of Carey in 1806. The former work was based on Pāṇini, the latter on Vopadeva. The earliest Sanskrit grammar written on European principles, and therefore of most influence on the study of Sanskrit at the beginning of the last century, was that of Wilkins (1808). The most notable among his successors have been Bopp, Benfey, and Whitney. Bopp's grammar was important owing no less to its lucidity than to its philological method. Benfey was the first to combine with the traditional material of Pāṇini a treatment of the peculiarities of the Vedic and the Epic dialects. He also largely used the aid of comparative philology for the explanation of Sanskrit forms. The American scholar Whitney was the first to attempt an

¹ See Zachariae in the *Vienna Oriental Journal*, 15, 313–20.

historical grammar of Sanskrit by treating the Vedic language more fully, and explaining from it the development of classical Sanskrit. The first grammar treating Sanskrit entirely from the comparative point of view is the excellent work of Prof. J. Wackernagel, of which, however, only the first volume, dealing with phonology (1896), and the first part of the second volume (1905) treating of compounds, have yet appeared.

The best known of the Sanskrit grammars used in this country during the latter half of the nineteenth century are those of Monier-Williams and Max Müller. Both of these contain much matter derived from the native system that is of no practical utility, but rather an impediment, to the student of literary Sanskrit. All such matter has been eliminated in the present work, not from any prejudice against the Indian grammarians, but solely with the intention of facilitating the study of the subject by supplying only such grammatical data of the actual language as have been noted by scholars down to the present time. Vedic forms have also been excluded, but in order to furnish English and Indian students with the minimum material necessary for beginning to read works written in the older language, a brief outline of Vedic Grammar is given in Appendix III. My recently published *Vedic Grammar* being too elaborate for elementary students, I hope to bring out, as a parallel to the present work, a simplified Vedic Grammar, including syntax, which will afford beginners the same help in the study of Vedic literature as this grammar does in that of Sanskrit.

Though the accent is never marked in classical Sanskrit, I have, owing to its philological importance, indicated it here in transliterated words as far as it can be ascertained from Vedic texts. A short account of the Vedic accent itself will be found in Appendix III.

CHAPTER I

THE ALPHABET

1. **Sanskrit** (from *sam-skṛta*, 'elaborated') is that later phase of the literary language of ancient India which is described in the grammar of Pāṇini. In phonology it is practically identical with the earlier **Vedic** language. In accidence it has become different from the dialect of the Vedas by a process, not of growth, but of decay; a large number of older forms, including the whole subjunctive mood and all the many infinitives save one, having entirely disappeared. The chief modifications are in the vocabulary, which, while it has lost much of its old material, has been greatly extended by the accession of new words and new meanings. The difference, on the whole, between the Vedic and the Sanskrit language may be taken to be much about the same as that between Homeric and Attic Greek.

2. From the Vedic language are descended the popular dialects called **Prākṛit** ('derived from the fundament,' i.e. from Sanskrit, thence 'vulgar'). The oldest extant forms of these are preserved in King Aśoka's rock inscriptions of the third century B.C., one of them, under the name of Pāli, becoming the sacred literary language of the Southern Buddhists. From the ancient Prākṛits, preserved in inscriptions, in entire literary works, and in parts of Sanskrit plays, are descended most of the dialects of modern India, Panjabī, Sindhī, Gujarātī, Marāthī, Hindī (which, with an

admixture of Arabic and Persian, is called Urdū or Hindūstānī), Bihārī, and Bengālī. The Dravidian dialects of Southern India, Telugu, Tamil, Canarese, Malayālam, though non-Āryan, are full of Sanskrit words, and their literatures are dominated by Sanskrit models.

3. A form of Semitic writing was introduced into the north-west of India by way of Mesopotamia, probably about 700 B.C. The earliest Indian adaptation of this script, known from coins and inscriptions of the third century B.C., is called Brāhmī or 'writing of Brahmā.' Though written from left to right it bears clear traces of having once been written from right to left. From the Brāhmī are descended all the later Indian scripts. The most important of these is the Nāgarī ('urban writing,' or perhaps 'writing of the Nāgara Brahmins' of Gujarāt) or Deva-nāgarī ('city writing of the gods,' a term of late but obscure origin), which assumed its characteristic shape about the middle of the eighth century A.D. Sanskrit is most commonly written in Devanāgarī in Northern India, but other modern Indian characters, such as Bengālī or Oriyā, are also employed in their respective provinces; while in the non-Āryan south the Dravidian scripts are regularly used.

4. The Devanāgarī alphabet consists of forty-eight letters, thirteen vowels and thirty-five consonants (including the pure nasal called Anusvāra, and the spirant called Visarga). These represent every sound of the Sanskrit language. The arrangement of the alphabet in the table facing p. 1 is that adopted by the ancient Indian grammarians, and being thoroughly scientific, has been followed by European scholars as the lexicographical order in their Sanskrit dictionaries¹.

¹ As Anusvāra and Visarga cause beginners much difficulty in finding words in a glossary, the following note on their alphabetical order will

5. The vowels are written differently according as they are initial or follow a consonant. They are—

(a) Simple vowels :

अ (-)¹ a, इ (फि) i², उ (ऊ) u, ए (ए॒) ē, औ (औ॑) ō.
आ (ति) ā, ई (ई॒) ī, ऊ (ऊ॑) ū, ऊ॒ (ऊ॒॑) ū̄.

(b) Diphthongs :

ए (ए॒) e³, ऐ (ई॒) ai⁴, ओ (ऊ॑) o³, औ (औ॑) au⁵.

probably be useful. The unchangeable Anusvāra (before a semivowel, sibilant, or ह h: cp. 42 B 1) has precedence of every other consonant : hence संवर samvara, संशय samśaya precede सक sa-ka. The changeable Anusvāra (10; 42 B 2) occupies the place of the nasal into which it might be changed. Thus संग sam-ga would be found beside सङ्ग saṅga. Similarly the unchangeable Visarga (before a hard guttural or labial) has precedence of every other consonant. Thus अन्तःकरण antahkaraṇa and अन्तःपुर antahpura follow अन्त anta and precede अन्तक anta-ka. But the changeable Visarga (before a sibilant) occupies the place of the sibilant into which it might be changed. Thus अन्तःस्थ antalsthā would appear where अन्तस्थ antasṭha might be written.

¹ There is no sign for medial (or final) ā, as this vowel is considered to be inherent in every consonant;—e.g. कि = ka.

² Medial or final ī is written before the consonant after which it is pronounced;—e.g. कि ki. Originally both ī and ī were written as curves to the left and the right respectively above the consonant ; but for the sake of clear distinction were later prolonged with a vertical downward stroke, the one on the left, the other on the right.

³ Though based, in nearly all cases, on āi and āu respectively, e and o are at present, and have been since at least 300 B.C., pronounced like the simple long vowels ē and ū in most European languages.

⁴ Though etymologically representing āi and āu, ai and au are at present, and have been since at least 300 B.C., pronounced as āi and āu.

⁵ The medial forms of the vowels are in combination with consonants;—e.g. कृ k, written as follows: क ka, का kā, कि ki, की ki, कु ku,

6. The following table contains a complete classification (known to Pāṇini) of all the sounds of the Devanāgarī alphabet according to the organs of speech employed in their articulation.

	Hard (tenues).	Hard aspirates.	Soft (mediae).	Soft aspirates.	(Soft) nasals.	(Soft) semi-vowels.	Hard spirants.	Vowels Short.	Vowels Long.	Soft Diphthongs.

Dentals	ਤ t	ਥ t-h	ਦ d	ਧ d-h	ਨ n	ਲ l	ਸ s	ਲ l		
Labials	ਪ p	ਫ p-h	ਬ b	ਮ b-h	ਮ m	ਵ v	: h ⁵	ਉ u	ਐ ū	ਐ o ਔ au

କୁ kū, କ୍ରୁ kr̥, **କ୍ଷୁ** k̥i, **କ୍ଳୁ** kl̥, କେ ke, କୈ kai, କୋ ko, କୌ kau. In combination with **ରୁ** r̥, **ୟୁ** y̥ and **ୱୁ** u̥ are written at the side instead of below : **ରୁ** ru, **ୟୁ** ry̥u, **ୱୁ** ru̥.

¹ The palatals, being largely derived from original gutturals under the influence of palatal vowels, were transliterated by Max Müller with italicized gutturals. *

² This term is a translation of the old native Sanskrit word *mūrdhanya*, 'produced in the head' (*mūrdhan*), i.e. on the roof or highest point of the mouth, which is nearest the upper part of the head. This class of sounds has also often been called linguals (since Bopp). They are as a rule derived from original dentals under the influence of a neighbouring cerebral s or r sound.

³ ḥ is not a semivowel, but the soft breathing corresponding to the guttural vowel ḫ a, which, unlike the other simple vowels, has no semivowel of its own. It is identical with the second half of the soft aspirates g-h, &c.

⁴ : h (Visarga) the hard breathing, corresponding to the second half of the hard aspirates k-h, &c., is regularly used at the end of a word in *pausā* for s or r, and before hard gutturals and labials. In the latter case modifications of it called Jihvāmūliya ('formed at the root of the tongue'), a guttural spirant (=Germ. *ch*), and Upadhmāniya ('on-breathing'), the bilabial spirant *f*, were formerly employed, but have become obsolete. They were both written .

⁵ It is important to note that in the above table only the letters in

7. Anusvāra ('after-sound'), the unmodified nasal following a vowel and differing from the nasals given in column 5, is written with a dot above the letter which it follows;—e.g. कं kam. Before ल l it is sometimes written उ;—e.g. कृं kam. Its proper place was originally before the sibilants and ह h, whence its use extended. From Anusvāra is sometimes distinguished Anunāsika ('accompanied by a nasal'), the nasalized vowel.

8. In writing the Devanāgarī alphabet, the distinctive portion of each letter is written first, then the perpendicular, and lastly the horizontal line¹;—e.g. र, त, ता ta.

9. Consonants to be pronounced without any vowel after them, are marked below with a stroke slanting from left to right, called Virāma ('stop'). Thus ak must be written अक्.

The only marks of punctuation are the sign I at the end of a half-verse or sentence, and the sign II at the end of a verse or paragraph.

The elision of अ a at the beginning of a word is marked in European editions with the sign S called Avagraha ('separation');—e.g. तेपि te 'pi for ते अपि te api.

An abbreviation is indicated by the sign °; thus गतम् gatam, °तेन (ga)-tena.

10. When the five nasals are followed by consonants of their own class within a word, they are often, to save trouble, incorrectly replaced by the sign for Anusvāra;—e.g. अंकित aṅkita for अङ्कित aṅkita; कंपित kampita for कम्पित kampita. In the same way final म m at the end of a sentence is often wrongly written with Anusvāra; thus अहं aham for अहम् aham. In both cases the pronunciation remains unaffected by the substitution.

columns 1, 2, and 7 are hard (surd, voiceless), while all the rest are soft (sonant, voiced).

¹ This was not originally an essential element in the letter, but represents a part of the line below which the characters were written.

II. If a consonant is followed immediately by one or more consonants they are all written in a group;—e.g. अत्क atka; कात्स्यं kārtṣnya. The general principle followed in the formation of these conjunct consonants, is to drop the perpendicular and horizontal lines except in the last letter. Most of these combinations, with the exception of those transliterated with thick type in the subjoined list, may be recognized without difficulty.

12. The following are the most noticeable modifications of simple consonants when written in conjunction with others:—

1. The component parts are indistinguishable in ज्ञ or ज्ञा = ज् + ञ ; and in क्ष or क्षा = क् + ष .
2. A horizontal line is sometimes substituted for the distinctive portion of त t and for the loop of क k :—e.g. त्ता tta = त् + त ; क्ता kta = क् + त .
3. श्व̄ s̄ is often written श् when followed by a consonant or by the vowels ि or ः ;—e.g. श्वा śca, श्वु śu, श्वृ śr̄.
4. र् r following a consonant is written with a short oblique stroke from right to left at the foot of the letter;—e.g. क्रा kra, द्रा dra, स्त्रा stra, न्त्र्या ntrya.

र् r preceding a consonant or the vowel श्व̄ r̄ is written with ' placed at the top of the letter before which it is to be sounded;—e.g. अर्का arka, वर्ष्मा varṣma; निर्वृतिः nirvṛtil. This sign for र् is placed to the right of any other marks at the top of the same letter;—e.g. अर्केंदू arkendū.

14. The numerical figures in Sanskrit are—

१	२	३	४	५	६	७	८	९	०
।	॥	३	४	५	६	७	८	९	०

These figures were borrowed from the Indians by the Arabs, who introduced them into Europe.

Pronunciation.

15. The following rules should be noted :—

- The vowels are pronounced as in Italian. The short अ a, however, has rather the sound of the so-called neutral vowel in English, like the u in 'but.' It had this sound (in Sanskrit *samvṛta*, 'closed') at least as early as 300 B.C.
- The aspiration of the consonants should be heard distinctly. Thus ख=k-h in 'ink-horn'; घ=t-h in 'pot-house'; फ=p-h in 'topheavy'; ष्घ=g-h in 'loghouse'; ष्ठ=d-h in 'madhouse'; भ=b-h in 'Hobhouse.'
- The guttural ञ n has the sound of ng in 'king.'
- The palatals च c and ज j have the sound of ch in 'church,' and of j in 'join.'

5. The cerebrals are pronounced similarly to the so-called dentals t, d, n in English, the tongue being, however, turned rather further back against the roof of the mouth.
6. The dentals in Sanskrit are at the present day pronounced as inter-dentals, being produced by bringing the tip of the tongue against the very edge of the front teeth. In the days of the ancient Indian phoneticians they were pronounced as post-dentals, being produced at the back of the upper front teeth.
7. The dental **ś** sounds like s in 'sin,' the cerebral **ṣ** like sh in 'shun'; while the palatal **ṭ** is produced midway between the two, being the sibilant pronounced in the same place as the spirant in the German 'ich.'
8. The Visarga, being a final hard breathing, is in India generally pronounced as a hard h, followed by a short echo of the preceding vowel.
9. The Anusvāra, being a pure nasal unmodified by any stop, is sounded like n in the French 'bon.'
10. Since about the beginning of our era Sanskrit has been pronounced with a stress accent (instead of the earlier musical accent) much in the same way as Latin. Thus the stress is laid on a long penultimate (Kālidāsa), on the antepenultimate when followed by a short syllable (Himālaya), and on the fourth from the end when two short syllables follow (kārayati). *

CHAPTER II

RULES OF SANDHI OR EUPHONIC COMBINATION OF LETTERS

16. In Sanskrit every sentence is treated as one unbroken chain of syllables. The coalescence of final and initial letters is called Sandhi ('putting together'). The rules of Sandhi are based chiefly on the **avoidance of hiatus** and on **assimilation**.

The absence of Sandhi is in many cases sufficient to mark the stops which in other languages have to be marked by punctuation.

Though both are based on the same phonetic principles, it is essential, in order to avoid confusion, to distinguish **external Sandhi**, which determines the changes of final and initial letters of *words*, from **internal Sandhi**, which applies to the final letters of *verbal roots* and *nominal stems* when followed by certain suffixes or terminations.

a. The rules of external Sandhi apply, with few exceptions (which are survivals of an earlier stage of external Sandhi), to words forming compounds, and to the final letters of nominal stems before the Pada or middle case-endings भ्याम् bhyām, भिस् bhis, भ्यस् bhyas, सु su (71), or before secondary (182, 2) suffixes beginning with any consonant except च् y.

A. External Sandhi.

Classification of Vowels.

17. Vowels are divided into—

A. 1. Simple vowels: अ a, आ ā; इ i, ई ī; उ u, ऊ ū; ऋ r, ऊर् ūr; ल l.

2. Guṇa vowels: अ॒ a; ए॑ e; ओ॑ o; अ॒र् ar; अ॒ल् al.

3. Vṛddhi vowels: आ॒ ā; ए॑ ai; ओ॑ au; आ॒र् ar¹.

¹ The Vṛddhi form of ल् l (which would be आ॒ल् al) does not occur.

- a. Guṇa ('secondary form') is the strengthening of the simple vowels by a preceding अ a (which leaves अ a itself unchanged); Vṛddhi ('increase') is the further strengthening of Guṇa vowels by means of another अ a¹.
- B. i. Vowels which are liable to be changed into semivowels: ई i, ई ī; उ u, ऊ ū; ऋ r, ऋ ī, and the diphthongs (the latter half of which is ई i or ऊ ū): liquid vowels.
2. Those which are not: अ a, आ ā.

Combination of Final and Initial Vowels.

18. If the same simple vowel (short or long) occurs at the end and beginning of words, the result is a long vowel;—e.g. सा अपि ईक्षते sā api iksate becomes सापीक्षते sāpiksate; किंतु उदेति kiṁtu udeti becomes किंतूदेति kiṁtūdeti; कर्तु ऋजु kartu ṛju becomes कर्तृजु kartṛju.

19. अ a and आ ā—

- a. coalesce with a following simple liquid vowel to Guṇa;—e.g. तव इन्द्रः tava indraḥ = तवैन्द्रः tavendraḥ; सा उक्ता sā uktvā = सोक्ता soktvā; सा ऋद्धिः sā ṛddhiḥ = सर्द्धिः sarddhiliḥ.
- b. coalesce with Guṇa vowels to Vṛddhi;—e.g. तव एव tava eva = तवैव tavaiva; सा ओषधिः sā oṣadhiḥ = सौषधिः sausadhiḥ.
- c. are absorbed by Vṛddhi vowels;—e.g. सा आत्सुक्यवती sā autsukyavatī = सौत्सुक्यवती sautsukyavatī.

¹ In this vowel gradation, as Comparative Philology shows, the Guṇa vowel represents the normal stage, from which the simple vowel was reduced by loss of accent, while Vṛddhi is a lengthened variety of Guṇa. The reduction of the syllables ya, va, ra (which are parallel with the Guṇa stage) to the corresponding vowels i, u, ī is termed Samprasāraṇa ('distraction').

20. A simple **liquid vowel** followed by any *other* vowel or by a diphthong is changed into its semivowel;—e.g. दधि अत्र dadhi atra=दध्यत्र dadhy atra; कर्तृ उत kartṛ uta=कर्तुत् kartr̥ uta; मधु इव madhu iva=मध्विव madhv iva; नदी अर्थम् nadī artham=नद्यर्थम् nadyartham.

21. The **Guṇa** vowels ए e and ओ o—

- a. remain unchanged before अ a, which is elided: ते अपि te api=तेऽपि te 'pi; सो अपि so api=सोऽपि so 'pi.
- b. become अ a (through अय् ay and अव् av, which drop the semivowel) before every other vowel (or diphthong): सखे इह sakhe iha=सख इह sakha iha; प्रभो एहि prabho ehi=प्रभ एहि prabha ehi.

22. The **Vṛddhi** vowels ऐ ai and ओ au respectively become आ ā (through आय् āy) and आव् āv (the semivowel not being dropped in this case) before every vowel (or diphthong): श्रिये अर्थः śriyai arthaḥ=श्रिया अर्थः śriyā arthaḥ; तौ इति tau iti=ताविति tāv iti.

- a. The (secondary) hiatus occasioned by the dropping of य् y and व् v in the above three cases (21 b and 22) remains.

Irregular Vowel Sandhi.

23. **Vṛddhi** instead of **Guṇa** results from the contraction of—

- a. a preposition ending in अ a or आ ā with a verb beginning with चर् r;—e.g. उप चर्षति upa ṛṣati=उपार्षति upāṛṣati; आ चर्चति ā ṛchati=आर्चति ār̥chati.
- b. the preposition प्र pra with the perfect participle passive उढ़ uḍha (from वह् vah, ‘carry’): प्रौढ़ praudha, ‘lifted up.’
- c. the augment अ a with an initial vowel;—e.g. अ उनत् a unat=अौनत् aunat, ‘he wetted’ (from उद् ud, ‘wet’).

Absence of Vowel Sandhi.

24. Interjectional particles consisting of or ending in vowels, such as आ ā, हृ i, उ u, हे he, अहो aho, are not liable to Sandhi : हृ इन्द्रं i indra, 'O Indra'; आ एवम् ā evam, 'is it so indeed?' अहो अपेहि aho apehi, 'Oh, go away.'

25. The vowels ई ī, उ ū, ए e, when dual terminations, nominal or verbal, remain unchanged before vowels (अ a not being elided after this dual ए e); they are called Pragrhya ('separate'). The final of अमी amī, a nom. plural (of the pronoun असौ asau, 112), is treated in the same way.

E.g. कवी इमौ kavī imau, 'these two poets'; साधु इमौ sādhū imau, 'these two merchants'; विद्ये इमे vidye ime, 'these two sciences'; याचेते अर्थम् yācete artham, 'they two ask for money'; अमी अस्वा: amī asvāḥ, 'those horses.'

26. In the Epics, the law-books, and other works not strictly conforming to the classical standard, vowel Sandhi is seldom applied between the first and second line (Pāda) of a hemistich.

Combination of Final and Initial Consonants.

27. The rules of Sandhi are only applicable after the final consonant of a word has been reduced to one of the eight allowable (actually occurring) consonants at the end of a word *in pausā*, viz.:

क् k, ट् t, त् t, प् p } and : (Visarga).
ङ् ḡ, ञ् n, म् m }

The thirty-four consonants given in the table (6) are reduced to these eight, as follows :

A final must be hard and unaspirated, the palatals (including श् ś) and ह् h are replaced by क् k or ट् t (ञ् ḡ by ङ् ḡ), ष् ś by त् t, स् s and र् r by Visarga, while ण् ḡ, घ् y, ल् l, and व् v do

not occur. Thus the second, third, and fourth columns, as well as the second line (the palatals), disappear entirely, leaving only four tenues in the first, three nasals in the fifth, and Visarga alone in the sixth and seventh.

28. No word may end in more than one consonant, except when र् r precedes a final क् k, ट् t, त् t, प् p, which is radical (or substituted for a radical) and not a suffix. In the case of all other combinations the final letter or letters must be dropped till only one, in the form allowable as a final, remains. Thus भवन्त् bhavant-s becomes भवन् bhavan, 'being'; अबिभर्त् abibhar-t=अबिभः abibhah, 'he carried' (त् t is a suffix; र् r must become Visarga); but ऊर्क् ūrk, 'strength' (क् k substituted for radical ज् j); अमार्त् amārt, 'he wiped,' from मृज् mṛj (ट् t substituted for radical ज् j).

Classification of Consonants.

29. Place or organ of articulation.

1. The throat, the palate, the roof of the mouth, the teeth, the lips, and the nose are called the places or organs of articulation.
2. By contact between the tongue and the four places—throat, palate, roof, teeth—the guttural, palatal, cerebral, and dental consonants are formed. Labial consonants are formed by contact between the lips.
3. In forming the **nasals** of the five classes, the breath partially passes through the nose while the tongue or the lips are in the position for articulating the corresponding tenuis. The real Anusvāra is formed in the nose only, while the tongue is in the position for forming the particular vowel which the Anusvāra accompanies.

4. The **semivowels** य y, र r, ल l, व v are palatal, cerebral, dental, and labial respectively. They are described by the old Indian grammarians as produced by partial or imperfect contact of the tongue with the organ of articulation. ल l often interchanges with or is derived from र r.
5. The three **sibilants** are hard spirants produced by partial contact of the tongue with the palate, roof, and teeth respectively. Sanskrit has not preserved any of the corresponding soft sibilants (English z, French j).
6. ह h and : ह are respectively soft and hard spirants produced without any contact, and articulated in the position of the vowel which precedes or follows. ह h, corresponding to the second half of the soft aspirates g-h, j-h, d-h, b-h, from which it is in fact derived, occurs only before soft letters. Visarga, corresponding to the second half of the hard aspirates (k-h, &c.), occurs only after vowels and before certain hard consonants. In India Visarga is usually articulated as a hard h, followed by a very short echo of the preceding vowel;—e.g. कः kah=kah^a, कविः kavih=kavihⁱ; रतुः rihu=rihu^u.

30. Quality of consonants.

Consonants are—

1. either **hard** (surd, voiceless): columns 1, 2, 7 in the table, p. 4;
- or **soft** (sonant, voiced): all the rest (columns 3, 4, 5, 6) and Anusvāra (besides all the vowels and diphthongs).
2. either **aspirated**: columns 2, 4, 7, besides ह h (in 6); or **unaspirated**: all the rest.

Hence the change of च c to ख k is a change of place (palatal to guttural), and that of च c to ज j is a change of quality (hard to soft); while the change of च c to ग g (hard palatal to soft

guttural), or of त् t to ज् j (hard dental to soft palatal) is one of both place and quality.

31. It is essential to remember that consonant Sandhi cannot be applied till finals have been reduced to one of the eight allowable letters (27). The latter are then modified without reference to their etymological value (except partially in the case of Visarga). Only six of these finals occur at all frequently, viz. क् k, त् t, न् n, प् p, म् m, and Visarga. The changes which final consonants undergo are most conveniently treated with reference to (I) their quality, (II) their place or organ.

I. Changes of Quality.

32. Final consonants must be soft before soft initials, and hard before hard initials.

a. This rule affects only the five final hard consonants (क् k, द् t, त् t, प् p, and : h), the nasals (6; 36) not being liable to changes of quality (but two of them, न् n, म् m, are liable to changes of place, like the two hard sounds त् t and Visarga: 37).

Hence final क् k, द् t, त् t, प् p before sonants become ग् g, ड् d, त् t, ब् b respectively;—e.g. सम्यक् उक्तम् = सम्युक्तम् samyag uktam, ‘well said’; दिक् गजः = दिरगजः dig-gajah, ‘world-elephant.’—परिव्राट् अयम् = परिव्राढयम् parivrāḍayam, ‘he (is) a mendicant’; परिव्राट् गच्छति = परिव्राङ्गच्छति parivrāḍ gacchati, ‘the mendicant goes.’—सरित् अच् = सरिदच् sarid atra, ‘the river here’; महत् धनुः = महञ्चनुः mahad-dhanuh, ‘a large bow.’—ककुप् अच् = ककुबच् kakub atra, ‘a region here’; अप् जः = अञ्जः ab-jah, ‘born in water.’

33. क् k, द् t, त् t, प् p, when followed by initial न् n or म् m, may, and in practice almost invariably do, become the corresponding nasals न् n, ण् n, न् n, म् m;—e.g. दिक् नागः = दिमागः or

दिन्नागः dig-nāgah or diñ-nāgah, 'world-elephant'; **जगत् नाथः** = **जगद्वायः** or **जगन्नाथः** jagad-nāthah or jagan-nāthah, 'lord of the world'; **षट् मासः** = **षष्ठमासः** ṣaṣ-māsaḥ, 'period of six months'; **प्राक् मुखः** = **प्राञ्मुखः** prāñ-mukhaḥ, 'facing the east.'

34. Final त् t before ल् l becomes ल् l (through द् d);—e.g. **तत् लभ्यम्** = **तल्लभ्यम्** tal labdham, 'that is taken.'

35. Since the nasals have no corresponding hard letters, they remain unchanged in quality before hard letters; but in several cases a sibilant (after न् n) or cognate hard letter (after न् n or ख् ḱ) is inserted between the two. An original palatal च् ī or cerebral ण् ḱ never occurs as a final letter (27). The guttural ख् ḱ, which is rare as a final, remains unchanged in that position, but क् k may be inserted after it before the three sibilants;—e.g. **प्राङ् शेते** prāñ śete or **प्राङ् शैते** prāñ śete, 'he lies eastward.' Final म् m is liable to change before all consonants (42). Final dental न् n remains unchanged before most letters, but is modified before all palatals and cerebrals (except ष् ṣ), before the hard dentals त् t and थ् th, and before the semivowel ल् l. Its treatment requires a somewhat detailed statement.

36. A. The **dental nasal न् n** remains **unchanged**—

1. before vowels (cp. 52);—e.g. **तान् उवाच** tān uvāca, 'he spoke to them.'
2. before all gutturals, क् k, ख् kh, ग् g, घ् gh, as well as ह् h;—e.g. **बुद्धिमान् कोऽपि** buddhimān ko 'pi, 'a certain wise man'; **तान् हत्वा** tān hatvā, 'having slain them.'
3. before all the labials, प् p, फ् ph, ब् b, भ् bh, म् m;—e.g. **एतान् पाशान्** etān pāśān, 'these bonds'; **बान्धवान् मम** bāndhavān māma, 'my relatives.'
4. before the soft dentals द् d, ध् dh, न् n;—e.g. **मत्स्यान् धत्त**

matsyān dhatta, 'put the fish'; राजपुत्रान् नयति rājaputrān nayati, 'he leads the princes.'

5. before the semivowels य् y, र् r, व् v;—e.g. हंसान् रक्षति hāṃsān rakṣati, 'he protects the geese.'
6. before the cerebral ष् s and the dental स् s, but before the latter a transitional त् t may be inserted;—e.g. तान् पट् tān ṣaṭ, 'those six'; तान् सहते tān sahaṭe or तान्तसहते tānt sahaṭe, 'he endures them.'

B. The dental nasal न् n is changed—

1. before the hard palatal च् c and छ् ch; cerebral ट् t and ठ् th; dental त् t and थ् th, to Anusvāra, a palatal ष् ś, a cerebral ष् s, a dental स् s being respectively interposed¹;—e.g. हसन् चकार hasan cakāra = हसंचकार hasaṃś cakāra, 'he did it laughing'; पाशान् केत्तुम् pāśān chettum = पाशं-क्षेत्तुम् pāśaṃś chettum, 'to cut the bonds'; चलन् टिट्टिभः calan ṭittibhāḥ = चलंष्टिभिः calaṃṣ ṭittibhāḥ, 'a moving sandpiper'; पतन् तरुः patan taruh = पतंस्तरुः patams taruh, 'a falling tree.'
2. before the soft palatals ज् j, झ् jh, and the palatal sibilant ष् ś, to palatal ञ् ñ (40).
3. before the soft cerebrals ड् d and ढ् dh to the cerebral ण् ḍ (41).
4. before the semivowel ल् l to nasalized ल् l written with Anusvāra in the form of ८;—e.g. महान् लाभः mahān lābhah = महाल्लाभः mahāl lābhah.

¹ This seemingly inserted sibilant is really a survival of the Indo-European s of the masc. accusative plural (in -ns) and the nominative singular (in -ns; cp. 88; 89). In the oldest Vedic period this sibilant appears only where it is historically justified, but in Sanskrit its use has been extended to the Sandhi of all cases of final न् n before hard palatals, cerebrals, and dentals.

II. Changes of Place.

37. The only four final consonants liable to change of place are the **dental** त् t and न् n, the **labial** म् m, and **Visarga**.

a. The dentals become palatal and cerebral before palatals and cerebrals respectively.

b. Visarga and, to a less extent, म् m adapt themselves to the organ of the following consonant.

1. Final त् t.

38. Final त् t before palatals (च् c, छ् ch, ज् j, झ् jh, श् ś) is changed to a palatal (च् c or ज् j);—e.g. तत् च् = तच् tac ea, ‘and that’; तत् छिनन्ति = तच्छिनन्ति tac chinatti, ‘he cuts that’; तत् जायते = तज्जायते taj jāyate, ‘that is born’; तत् मृणोति = (तच्मृणोति tac śr̥noti, but in practice) तच्छृणोति tac chṛ̥noti¹, ‘he hears that.’

39. Final त् t before ठ् ṭ, ठु् ṭh, ड् d, डु् dh (but not before ष् s) is changed to a cerebral (ड् d or डु् dh);—e.g. एतत् ठक्कुरः = एतद्वक्कुरः etat̥ thakkurah, ‘the idol of him’; तत् डयते = तद्वृयते tad̥ ḍayate, ‘it flies’; तत् ढौकते = तद्वौकते tad̥ ḍhaukate, ‘it approaches.’

2. Final न् n.

40. Final न् n before ज् j, झ् jh, and श् ś² becomes ञ् ñ;—e.g. तान् जयति = ताञ्जयति tāñ jayati, ‘he conquers them’; तान् शार्दूलान् = ताञ्शार्दूलान् tāñ śārdūlān or ताञ्छार्दूलान् tāñ chārdūlān¹, ‘those tigers.’

¹ With the further change of the initial श् ś to the corresponding aspirate छ् ch, cp. 53.

² For the change of न् n before the hard palatals च् c and छ् ch, see 36 B 1.

41. Final न् before द् d, ठ् dh¹ (but not ष् s) is changed to ण् n;—e.g. महान् दमरः=महाएङ्मरः mahān̄ damarah, ‘a great uproar.’

3. Final म् m.

42. A. Final म् m remains unchanged before vowels;—e.g. किम् अत्र=किमत्र kim atra, ‘what (is) here?’

B. Final म् m is changed to Anusvāra before consonants:

1. necessarily before semivowels, sibilants, and ह् h;—e.g. तम् वेद=तं वेद tam̄ veda, ‘I know him’; करुणम् रोदिति=करुणं रोदिति karuṇam̄ roditi, ‘he cries piteously’; मोक्षम् सेवेत=मोक्षं सेवेत mokṣam̄ seveta, ‘one should devote oneself to salvation’; मधुरम् हसति=मधुरं हसति madhuram̄ hasati, ‘he laughs sweetly.’

2. optionally before mutes and the nasals न् n, म् m² (६, cols. 1-5), where it may become the class nasal³ (a change which is rarely made in European editions);—e.g. किम् करोषि=कि करोषि (or किङ्करोषि) kim̄ karōṣi (or kiñ karōṣi), ‘what doest thou?’ शत्रुम् जहि=शत्रुं जहि (or शत्रुजहि) śatrum̄ jahi (or śatruñ jahi), ‘kill the enemy’; किम् फलम्=किं फलम् (or किं फलम्) kim̄ phalam̄ (or kiñ phalam̄), ‘what (is) the use?’ गुरुम् नमति=गुरुं नमति (or गुरुन्नमति) gurum̄ namati (or gurun̄ namati), ‘he salutes the teacher’; शास्त्रम् मीमांसते=शास्त्रं मीमांसते (or शास्त्रमीमांसते) śāstraṇ̄ mīmāṁsate (or śāstram̄ mīmāṁsate), ‘he studies the book.’

a. This alternative Sandhi of final म् m is identical with that

¹ On the treatment of न् n before the hard cerebrals ट् t, ठ् th, and ष् s, see 36 A 6 and B 1.

² Initial ठ् n, च् n, ण् n do not occur.

³ This assimilation was the normal Sandhi of the Vedic language.

of final न् n before the soft palatals ज् j, झ् jh (40), the soft cerebrals छ् d and झ् dh (41), and the dental न् n; and with that of final त् t before न् n (33); thus e.g. in कान्तान् kāntān na the first word may represent the acc. pl. masc. कान्तान् kāntān (36 A 4), the abl. sing. masc. कान्तात् kāntāt (33), or the acc. sing. fem. कान्ताम् kāntām (42 B 2).

4. Final Visarga.

43. Visarga is the spirant to which the hard स् s and the corresponding soft र् r are reduced *in pausā*. If followed by a **hard letter**—

1. a palatal, cerebral, or dental (च् c, छ् ch; ट् t, ठ् th; त् t, थ् th), it is changed to the sibilant (श् ś, ष् ṣ, स् s) of the class to which the following letter belongs;—e.g. पूर्णः चन्द्रः=पूर्णश्चन्द्रः pūrṇaś candraḥ, ‘the full moon’; नद्याः तीरम्=नद्यास तीरम् nadyāś tīram, ‘the bank of the river.’

2. a guttural or labial (क् k, ख् kh, प् p, फ् ph), it remains unchanged¹;—e.g. ततः कामः tataḥ kāmaḥ, ‘thence love’; नद्या पारम् nadyāḥ pāram, ‘the opposite shore of the river.’

3. a sibilant, it remains unchanged or may be assimilated²;—e.g. सुप्तः शिशुः suptaḥ śisuh or सुप्तश्चिशुः ‘the child is asleep’; प्रथमः सर्गः prathamaḥ sargaḥ or प्रथमस्तर्गः prathamas sargaḥ, ‘the first canto.’

44. Visarga (except when preceded by अ a or आ ā) if followed by a **soft letter** (consonant or vowel) is changed to र् r;—e.g. कविः अयम्=कविरयम् kavir ayam, ‘this poet’; गौः गच्छति=गौर्गच्छति gaur gacchati, ‘the cow walks’; वायुः वाति=वायुर्वाति vāyur vāti, ‘the wind blows.’

¹ Cp. the treatment of न् n before hard mutes, 36 A 2, 3; B 1.

² This assimilation was undoubtedly the original Sandhi, and is required by some of the ancient Vedic phoneticians.

45. 1. The final syllable आः āḥ drops its Visarga before vowels or soft consonants;—e.g. अस्वाः अमी=अस्वा अमी asvā amī, ‘those horses’; आगताः कृषयः=आगता कृषयः āgatā ṛṣayah, ‘the poets have arrived’; हताः गजाः=हता गजाः hatā gajāḥ, ‘the elephants (are) killed’; मा॒ भिः=माभिः mā-bhiḥ, instr. plur. of मास् mās, ‘moon.’

2. The final syllable अः ah—

- a. drops its Visarga before vowels except अ a;—e.g. कृतः आगतः=कृत आगतः kuta āgataḥ, ‘whence come?’ कः एषः=क एषः ka eṣaḥ, ‘who (is) he?’ कः कृषिः=क कृषिः ka ṛṣiḥ, ‘who (is) the poet?’
- b. before soft consonants and before अ a, is changed to ओ o, after which अ a is elided (21 a);—आनीतः दीपः=आनीतो दीपः ānītō dīpah, ‘the lamp (has been) brought’; मनः भिः=मनोभिः mano-bhiḥ, inst. plur. ‘with minds’; नरः अयम्=नरोऽयम् naro ’yam, ‘this man.’

46. The final syllables आः āḥ and आः āḥ, in the few instances¹ in which the Visarga represents an etymological र् r, are not subject to the exceptional rule stated in 45. In other words आः āḥ and आः āḥ, reverting to अर् ar and आर् ār, in this case follow the general rule (44). Thus पुनः अपि=पुनरपि punar api, ‘even again’; भ्रातः देहि=भ्रातदेहि bhrātar dehi, ‘brother, give’; द्वा॒ एषा॑=द्वरिषा dvār eṣā, ‘this door.’

47. र् r followed by र् r is always dropped, a preceding short vowel being lengthened;—e.g. विधुः राजते=विधू राजते vidhū

¹ पुनर् punar, ‘again,’ प्रातर् prātar, ‘early,’ अन्तर् antar, ‘within’; स्वर् svar, ‘heaven,’ अहर् ahar, ‘day,’ द्वार् dvār, ‘door,’ वार् vār, ‘water’; voc. sing. of nouns in कृ r, as पितर् pitar, ‘father’ (101); and some forms of verbs in कृ r, as अजागर् ajāgar, 2. 3. sing. imperf. of आगृ jāgr, ‘awake.’

rājate, 'the moon shines'; पुनः रोगी=पुना रोगी punā rogi, 'ill again.'

48. The two pronouns सः saḥ, 'that,' and एषः eṣaḥ, 'this' (110 a), retain Visarga at the end of a sentence only, but become सो so and एषो eṣo before अ a (45, 2 b);—e.g. सः ददाति=स ददाति sa dadāti, 'he gives'; सः इन्द्रः=स इन्द्रः sa Indraḥ, 'that Indra'; but सः अभवत्=सोऽभवत् so 'bhavat, 'he was'; मृतः सः mṛtaḥ saḥ, 'he (is) dead.'

49. भोः bhoḥ, an irregular contracted vocative (for bhavas, used as an interjection) of भवत् bhavat, 'your honour,' drops its Visarga before all vowels and soft consonants;—e.g. भोः ईशान=भो ईशान bho'śāna, 'O lord'; भोः देवाः=भो देवाः bho devāḥ, 'O gods'; but भोः छेत्तः=भोऽछेत्तः bho'śhetṭaḥ, 'O cutter.'

a. The same rule applies to the contracted vocative भगोः bhagoh (for bhagavas) from भगवत् bhagavat, 'adorable one.'

50. Nouns ending in radical र् r (82) retain the र् r before the सु su of the loc. pl.;—e.g. वार् + सु=वार्षु vār-su, 'in the waters.'

a. अहर् ahar (91, 2 N.) and स्वर् svar (indeclinable) retain their र् r when compounded with पर्ति pati: अहर्पतिः ahar-patiḥ, 'lord of day,' स्वर्पतिः svar-patiḥ, 'lord of heaven.'

Doubling of Consonants.

51. क् ch at the beginning of a word may always be doubled after vowels; it must be so after a short vowel and after the particles आ ā and मा mā;—e.g. तव क्षाया=तव च्छाया tava cchāyā, 'thy shade'; आ क्षादयति=आच्छादयति ācchādayati, 'he covers'; मा क्षिदत्=मा च्छिदत् mā cchidat, 'let him not cut'; but बदरीक्षाया badarī-chāyā or बदरीच्छाया badarī-cchāyā, 'shade of jujube trees.'

a. In the body of a word the doubling takes place after all vowels: इच्छति icchati, 'he wishes'; म्लेच्छः mlecchah, 'barbarian.'

52. Final ञ् n and न् n, preceded by a **short** vowel and followed by *any* vowel (or diphthong), are doubled;—e.g. प्रत्यञ्च् आस्ते = प्रत्यञ्चास्ते pratyāññāste, 'he sits westward'; धावन् अस्वः = धावनञ्चः dhāvann asvah, 'a running horse'; but कवीन् आह्वयस्त् kavīñ āhvayasva, 'call the poets,' remains.

Initial Aspiration.

53. Initial श् ś, not followed by a hard consonant, may be, and in practice nearly always is, changed to the corresponding aspirate ष्ठ् ch after च् c (38) and ञ् ñ (40);—e.g. तच्छोकेन = तच्छूकेन tac chlokena, 'by that verse'; धावन् शशः = धावञ्चशः dhāvan̄ chaśah, 'a running hare.'

a. The same change is allowed after क् k, ट् t, प् p, though not usually applied: वाक्शतम् vāk-śatam may become वाक्षतम् vāk-chatam, 'a hundred speeches.'

54. Initial ह् h, after softening a preceding क् k, ट् t, त् t, प् p, is changed to the soft aspirate of the preceding letter;—e.g. वाक् हि = वारिघ vāg ghi, 'for speech'; तत् हि = तच्चि tad dhi, 'for that.'

55. If घ् gh, ध् dh, भ् bh, or ह् h are at the end of a (radical) syllable beginning with ग् g, द् d, ब् b, and lose their aspiration as final or otherwise, the initial consonants are aspirated by way of compensation¹;—e.g. दुह् duh, 'a milker,' becomes धुक् dhuk; बुध् budh, 'wise,' becomes भुत् bhut.

¹ This is an historical survival of the original initial aspiration of such roots, which was lost (both in Greek and Sanskrit) by the operation of the later euphonic law that prohibited a syllable beginning and ending with an aspirate. Hence when the final aspirate disappeared the initial returned. Cp. Gk. nom. θρίξ (=θρίκ-s), 'hair,' beside gen. τριχ-ός.

B. Internal Sandhi.

56. The rules of internal Sandhi apply to the finals of nominal and verbal stems before all terminations of declension (except those beginning with consonants of the middle stem : 73 a) and conjugation, before primary suffixes (182, 1), and before secondary suffixes (182, 2) beginning with a vowel or य् y. They are best acquired by learning paradigms of nouns and verbs first. Many of these rules agree with those of external Sandhi; the most important of those which differ from external Sandhi are here added.

Final Vowels.

57. In many cases before a vowel (and even the same vowel) ई i and ई ī are changed to ईय् iy; उ u and ऊ ū to उव् uv; च्छ् ḍ to च्छ् ir (cp. 18 and 20);—e.g. धी dhī + ई i = धियि dhiy-i, loc. sing., ‘in thought’; भू + ई i = भुवि bhuv-i, ‘on earth’; युयु + उः yu-yu + uh = युयुवुः yu-yuv-uh, ‘they have joined’; गृ + अति gṛi + ati = गिरति gir-ati, ‘he swallows.’

58. Final च्छ् ḍ before consonant terminations is changed to ईर् ir, after labials to ऊर् ūr; while च्छ् ḍ (after a single consonant) before य् y becomes रि ri (154, 3);—e.g. गृ ग्रि, passive pres. 3. sing. गीर्यते gīr-yate, ‘is swallowed’; गीर्णः gīr-ṇah, past pass. part., ‘swallowed’; पूर् pī, pass. pres. पूर्यते pūr-yate, ‘is filled’; past part., पूर्णः pūr-ṇah, ‘filled’; क्रू krū, pass. pres. क्रियते kri-yate, ‘is done.’

59. ए e, ऐ ai, ओ o, औ au are changed before suffixes beginning with vowels or य् y to अय् ay, आय् āy, अव् av, आव् āv respectively (21; 22);—e.g. ने + अन = नयन nayana, ‘eye’; रै + ए = राये rāye-e, ‘for wealth’; गो + ए = गवि gav-e, ‘for a cow’; नौ + अः = नावः nāv-ah, ‘ships’; गो + यः = गव्यः gav-yah, ‘relating to cows.’

Final Consonants.

60. The most notable divergence from external Sandhi is the unchangeableness of the final consonants (cp. 32) of verbal and nominal stems before terminations beginning with vowels, semi-vowels, and nasals¹ (while before other letters they usually follow the rules of external Sandhi);—e.g. प्राच्मः prāñc-ah, ‘eastern’; वचानि vac-āni, ‘let me speak,’ वाच्य vāc-ya, ‘to be spoken,’ वच्मि vac-mi, ‘I speak’; but वक्ति vak-ti, ‘he speaks.’

61. Nominal or verbal stems ending in consonants, and followed by terminations consisting of a single consonant, drop the termination altogether, two consonants not being tolerated at the end of a word (28). The final consonant which remains is then treated according to the rules of external Sandhi. Thus प्राच्म् + स prāñc+s, nom. sing., ‘eastern,’ becomes प्राञ् prāñ (the स s being first dropped, the palatals being changed to gutturals by 27, and the क् k being then dropped by 28); similarly अदोह् + त् a-doh+t=अधोक् a-dhok (55), 3. sing. imperf., ‘he milked.’

62. Aspirates followed by any letters except vowels, semi-vowels or nasals (60) lose their aspiration;—e.g. रुन्ध्+ध्वे rundh+dhve=रुन्धै rund-dhve², ‘you obstruct’; लभ्+स्ये labh+sye=लप्स्ये lap-sye, ‘I shall take’; but युधि yudh-i, ‘in battle,’ लोभः lobh-yah, ‘to be desired.’

¹ द् d is assimilated before the primary suffix न -na;—e.g. in अन्न an-na, ‘food’ (for ad-na); and त् t, द् d before the secondary suffixes मत् mat and मय् maya;—e.g. विद्युन्मत् vidyun-mat, ‘accompanied by lightning’ (vidyut), and मृमय् mrn-maya, ‘consisting of clay’ (mrđ).

² For Sanskrit tolerates two aspirates neither at the beginning and end of the same syllable, nor at the end of one and the beginning of the next.

a. A lost soft aspirate is, if possible, thrown back before ध् dhv (not धि dhi), भ् bh, स् s, according to 55;—e.g. अभुद्वम् a-bhudhvam, ‘you observed,’ भुद्धिः bhud-bhiḥ, inst. plur., भुत्सु bhut-su, loc. plur., but दुरिधि dug-dhi, 2. sing. imper., ‘milk.’

b. But it is thrown forward on a following त् t and थ् th¹, which are softened;—e.g. लभ्+तः labh+tah=लधः lab-dhaḥ, ‘taken’; रन्ध्+थः rundh+thaḥ=rund-dhaḥ, ‘you two obstruct’; बन्ध्+तुम् bandh+tum=बन्धुम् band-dhum, ‘to bind.’

63. Palatals. a. While च् c regularly becomes guttural before consonants (cp. 61; 27; 6, N.I), ज् j in some cases (the majority) becomes guttural (क् k, ग् g)², in others cerebral (ट् t, ढ् d, ष् s);—e.g. उक्त् uk-ta, ‘spoken’ (from वच् vac); युक्त् yuk-ta, ‘joined’ (from युज् yuj); रुग्ण् rug-ṇa, ‘broken’ (from रुज् ruj; cp. 65); but राट् rāṭ, nom. sing. ‘king’ (for राज्+स् rāj+s); मृद्धि mṛd-dhi, 2. sing. imper. ‘wipe’ (from मृज् mrj); राष्ट्र् rāṣṭra, ‘kingdom’ (from राज् rāj; cp. 64).

b. श् s, before ध् dh, the middle terminations (73 a) and the nom. स् s, usually becomes ट् t or ढ् d (sometimes क् k or ग् g); before त् t, थ् th, it always becomes ष् s (cp. 64), and before the स् s of the future and of other conjugational forms, always क् k;—e.g. from विश् vis we get विट्सु vit-su, ‘in the settlers’; विष्ट् vis-ta, ‘entered’; वेक्ष्यामि vek-syāmi (cp. 67), ‘I shall enter.’

c. च् c and ज् j (not श् s) palatalize a following न् n;—e.g. याच्+ना yāc+nā=याच्चा yāc-nā, ‘request’; यज्+न् yaj+na=यञ्ज् yaj-nā, ‘sacrifice’; but प्रश्न् prāś-na, ‘question.’

¹ Except in the case of the root धा dhā, ‘place,’ which has (according to the analogy of a) धत् dhat before त् t and थ् th (see below, 134, third class, 1).

² ज् j regularly becomes क् k before a conjugational स् s (cp. 144, 4).

d. The कृ ch of the root प्रकृ prach, 'ask,' is treated like श्वः: पृष्ट pr̥-ta, 'asked,' प्रक्ष्यामि prak-ṣyāmi, 'I shall ask,' प्रश्न praś-na, 'question.' (In external Sandhi, i.e. when final, and before middle terminations, it becomes त् t.)

64. Cerebrals change following dentals to cerebrals (cp. 39);—e.g. इष्ट+त् is+ta=इष्टि is-ṭa, 'wished'; द्विष्ठ+धि dviṣ+dhī=द्विष्ठि dviḍ-dhi, 'hate'; षट्+नाम् sat+nām=षष्टाम् san-nām (cp. 33), 'of six.'

a. While the cerebral sibilant ष्वः regularly becomes a cerebral (त् t or छ् ḍ) in declension (cp. 80), and before ध् dh in conjugation, it regularly becomes कृ k before an स् s in conjugation (cp. 63b and 67); द्वेष्टि dvek-ṣi, 'thou hatest,' from द्विष् dviṣ.

65. Change of dental न् n to cerebral ण् nः:

A preceding cerebral चृ r̥, चृ̥ ṛ̥, रु r, ष्वः (even though a vowel, a guttural, a labial, च् y, च् v, ह् h, or Anusvāra intervene) changes a dental न् n (followed by a vowel or न् n, म् m, च् y, च् v) to cerebral ण् nः;—e.g. नृ+नाम्=नृणाम् nr-ṇām, 'of men'; कर्णः karṇah, 'ear'; दूषणम् dūṣ-aṇam, 'abuse' (a vowel intervenes); बृहणम् bṛmh-aṇam, 'nourishing' (Anusvāra, ह् h, vowel); अर्केण arkena, 'by the sun' (guttural and vowel); क्षिप्णुः kṣip-ṇuh, 'throwing' (vowel and labial); प्रेमणा premṇā, 'by love' (diphthong and labial); ब्रह्मणः brahmaṇ-yah, 'kind to Brahmins' (vowel, ह् h, labial, vowel; न् n followed by च् y); निषणः niṣaṇ-ṇah, 'seated' (न् n followed by न् n, which is itself assimilated to ण् nः); प्रायेण prāyeṇa, 'generally' (vowel, च् y, vowel).

But अर्चनम् arc-anam, 'worship' (palatal intervenes); अर्णवेन arṇavena, 'by the ocean' (cerebral intervenes); अर्धेन ardhena, 'by half' (dental intervenes); कुर्वन्ति kurvanti, 'they do' (न् n is followed by त् t); रामान् rāmān, acc. pl., 'the Rāmas' (न् n is final).

Note.—The number of intervening letters, it will be seen from the above examples, is not limited. In the word रामायण rāmāyāṇa, for instance, five letters (three vowels, a labial, and a semivowel) intervene between the र् r and the ण n.

Table showing when न् n changes to ण n.

ष् s	य् y, and Anusvāra,	ण n	य् y, व् v.

66. A. The dental न् n—

1. remains unchanged before य् y and व् v;—e.g. हन्ते han-te, ‘is killed’; तन्वन् tan-v-an, ‘stretching.’
2. as final of a root becomes Anusvāra before स् s;—e.g. जिघांसति ji-ghāṁ-sa-ti, ‘he wishes to kill’ (हन् han); मन्सते man-sya-te, ‘he will think’ (मन् man); also when it is inserted before स् s or ष् s in the neuter plural (71 c; 83);—e.g. यशांसि yasāṁs-i, nom. pl. of यशस् yasás, ‘fame’; हवींषि havīṁs-i, neut. pl. of हविस् havis, ‘oblation’ (83).

B. The dental स् s—

1. **becomes** dental त् t as the final of roots or nominal stems:—
 - a. before the स् s of the verbal suffixes (future, aorist, desiderative) in the two roots वस् vas, ‘dwell,’ and घस् ghas, ‘eat’: वत्स्यति vat-syati, ‘will dwell’ (151 b 3); अवात्सीत् a-vāt-sit, ‘has dwelt’ (144, 1); जिघत्सति ji-ghat-sati, ‘wishes to eat’ (171, 5).
 - b. before the endings with initial भ् bh or स् s (and in the nom.

acc. sing. neut.) of reduplicated perfect stems (89): चक्रवद्धिः cakr-vad-bhiḥ, चक्रवत् cakr-vat-su, N.A. n. चक्रवत् cakr-vat.

2. disappears—

- a. between mutes;—e.g. अभक्त a-bhak-ta (for a-bhak-s-ta), 3. sing. s-aorist of भज् bhaj, ‘share’; चष्टे caṣṭe (for cakṣ-ṭe=original caś-s-te), 3. sing. pres. of चक् cakṣ, ‘speak.’ This loss also occurs when the preposition उद् ud is compounded with the roots स्था sthā, ‘stand,’ and स्थम् stambh, ‘support’;—e.g. उत्थाय ut-thāya, ‘standing up’; उत्तमित ut-tambhita, ‘raised up.’
- b. before soft dentals;—e.g. शाधि śā-dhi (for śas-dhi), 2. sing. imperat. of शास् śas, ‘order’; also after becoming ष् ṣ and cerebralizing the following dental;—e.g. अस्तोऽध्वम् a-stoḍhvam (for a-sto-ṣ-dhvam), 2. pl. aor. of शु stu, ‘praise.’

67. Change of dental स् s to cerebral ष् ṣ:

Preceding vowels except अ a or आ ā (even though Anusvāra or Visarga intervene), as well as क् k and र् r, change dental स् s (followed by a vowel, त् t, थ् th, न् n, म् m, य् y, व् v) to cerebral ष् ṣ;—e.g. from सर्पिस् sarpis: सर्पिषा sarpīṣā, ‘with clarified butter’; सर्पिषि sarpīṣi, nom. pl.; सर्पिषु sarpīṣu, loc. pl. (cp. 43, 3); from वाच् vāc: वाकु vāk-ṣu, loc. pl., ‘in speeches’; from गिर् gir: गीर्षु gīrṣu (82), loc. pl., ‘in speeches’; तिष्ठति tiṣṭhati, ‘stands,’ from स्था sthā, ‘stand’; भविष्यति bhaviṣyati, ‘will be,’ from भु bhū, ‘be’; सुष्वाप suṣvāpa, ‘he slept,’ from स्वप् svap, ‘sleep’; from चक्षुस् caksus: चक्षुष्मत् caksuṣ-mat, ‘possessing eyes’; but सर्पिषः sarpīṣ (final); मनसा manas-ā, ‘by mind’ (a precedes); तमिसम् tamis-ram, ‘darkness’ (r follows).

Table showing when स् s changes to ष् s.

Vowels except अ a, आ ā (in spite of intervening Anusvāra or Visarga), also क् k, र् r,	change स् s to ष् s	if followed by vowels, त् t, थ् th, न् n, म् m, य् y, व् v.
---	------------------------------	--

Note.—The rules about the changes of the dental न् n and स् s to the corresponding cerebrals, should be thoroughly acquired, since these changes must constantly be made in declension and conjugation.

68. The **labial** म् m remains **unchanged** before य् y, र् r, ल् l (cp. 60 and 42 B 1); but before suffixes beginning with व् v it **becomes** न् n;—e.g. काम्यः kām-yah, ‘desirable,’ ताम्र tām-ra, ‘copper-coloured,’ अम्ल am-la, ‘sour’; but जगन्वान् ja-gan-vān, ‘having gone’ (from गम् gam, ‘go’).

69. a. The (soft) **breathing** ह् h before स् s and, in roots beginning with द् d, before त् t, थ् th, ध् dh also, is treated like घ gh;—e.g. लेह् + सि leh + si = लेक्षि lek-ṣi, ‘thou lickest’ (67); दह् + स्यति dah + syati = धस्यति dhak-syati, ‘he will burn’ (55); दह् + त् dah + ta = दग्ध dag-dha, ‘burnt’ (62 b); दिह् + ध्वे dih + dhve = धिरध्वे dhig-dhve, ‘ye anoint’ (62 a). Similarly treated are the perf. pass. participles of the roots स्त्रिह् snih and, in one sense, मुह् muh: स्त्रिग्ध suig-dha, ‘smooth,’ and मुग्ध mug-dha, ‘foolish.’

b. ह् h, in all other roots, is treated like an aspirate cerebral, which, after changing a following त् t, थ् th, ध् dh to ढ् dh, and lengthening a preceding short vowel, is dropped;—e.g. लिह् + त् lih + ta = लीढ़ lidha, ‘licked’; मुह् + त् muh + ta = मूढ़

mūdha, 'infatuated.' Similarly treated are the roots वह् vah and सह् sah, but with an apparent irregularity in the vowel: जढ़ धृdha¹, 'carried' (for वह् + त् vah + ta); वोढुम् vodhum², 'to carry' (for वह् + तुम् vah + tum); सोढुम् sodhum², 'to bear' (for सह् + तुम् sah + tum).

An exception to b is the root नह् nah, in which ह् h is treated as ध् dh: नद्ध nad-dha, 'bound.' An exception to both a and b is the root द्रह् dṛh: द्रढ़ dṛdha, 'firm' (begins with द् d and has a short vowel).

CHAPTER III

DECLENSION

70. Declension, or the inflexion of nominal stems by means of endings, is most conveniently treated under the three heads of 1. nouns (including adjectives); 2. numerals; 3. pronouns.

In Sanskrit there are—

- a. three genders: masculine, feminine, and neuter;
- b. **three numbers:** singular, dual, and plural;
- c. **eight cases:** nominative, vocative, accusative, **instrumental**, dative, ablative, genitive, **locative**³.

¹ The syllable वा va, which is liable to Samprasāraṇa (p. 11, note 1), becomes वू u and is then lengthened.

² Here ओ o represents the Indo-Iranian ažh, which after cerebralizing and aspirating the following dental becomes o, just as original a (through az) becomes o;—e.g. in मनोभिः mano-bhilī : cp. 45 b.

³ This is the order of the Hindu grammarians, excepting the vocative, which is not regarded by them as a case. It is convenient as the only arrangement by which such cases as are identical in form, either in the singular, the dual, or the plural, may be grouped together.

71. The normal **case-endings** added to the stem are the following :—

SINGULAR.		DUAL.		PLURAL.	
M. F.	N.	M. F.	N.	M. F.	N.
N. स s	— ^b	औ au	ई ī	अस् as	इ i ^c
V. — a	—				
A. अम् am	—				
I.	आ ā			भिस् bhis	
D.	ए e	भ्याम् bhyām		भ्यस् bhyas	
Ab.	अस् as				
G.		ओस् os		आम् ām	
L.	इ i			सु su	

a. The vocative is the same (apart from the accent) as the nominative in all numbers except the *masc. and fem. sing.* of vowel stems generally and the *masc. sing.* of consonant stems in -at, -an, -in, -as (cp. 76a), -yas, -vas.

b. The nom. acc. sing. neut. has the bare stem excepting the words in -a, which add म् m.

c. The nom. voc. acc. plur. neut. before the इ i insert न् n after a vowel stem and before a single final mute or sibilant of a consonant stem (modifying the न् n according to the class of the consonant).

72. An important distinction in declension (in stems ending in च् c, त् t, न् n, स् s, and र् r) is that between the **strong** and the **weak** stem. If the stem has *two* forms, the **strong** and the **weak** stem are distinguished; if it has *three* forms, **strong**, **middle**, and **weakest** are distinguished.

a. Shifting of accent was the cause of the distinction. The stem, having been accented in the strong cases, here naturally preserved its full form; but it was shortened in the weak cases by the accent falling on the endings. For a similar reason the last vowel of the strong stem, if long, is regularly shortened in

the vocative, because the accent always shifted to the first syllable in that case.

73. The strong stem appears in the following cases:—

- Nom. voc. acc. sing.
 - Nom. voc. acc. dual
 - Nom. voc. (**not acc.**) plur.
 - Nom. voc. acc. **plural only of neuters.**
- } of masculine nouns¹.

a. When the stem has *three* forms, the middle stem appears before terminations beginning with a consonant² (भ्याम् -bhyām, भिस् -bhīs, भ्यस् -bhyas, सु -su); the weakest, before terminations beginning with a vowel in the remaining weak cases;—e.g. प्रत्यञ्ची pratyāñc-au, nom. dual; प्रत्यग्निः pratyág-bhīḥ, inst. plur.; प्रतीचोः pratić-óḥ, gen. dual (93).

b. In neuters with three stems, the nom. voc. acc. sing. are middle, the nom. voc. acc. dual, weakest;—e.g. प्रत्यक् pratyák, sing., प्रतीची pratić-ī, dual, प्रत्यञ्चि pratyāñc-i, plur. (93). The other cases are as in the masculine.

NOUNS.

74. This declension may conveniently be divided into two classes:—

I. Stems ending in consonants³:

- A. unchangeable; B. changeable.

¹ Excepting the stems in त् t (101) nearly all nouns with changeable stems form their feminine with the suffix ई i (100).

² It is practically most convenient to name changeable stems in the middle form, since this is also the form in which they appear as prior members in compounds.

³ Some grammars begin with the vowel declension in अ a (II. A) since this contains the majority of all the declined stems in the language.

II. Stems ending in vowels:—A. in अ a and आ ā; B. in इ i and उ u; C. in ई ī and ऊ ū; D. in ए ē; E. in ऐ ai, ओ o, औ au.

I. A. Unchangeable Stems.

75. The number of these stems is comparatively small, there being none ending in guttural or cerebral mutes, and none in nasals or semivowels (except र r). They are liable to such changes only as are required by the rules of Sandhi before the consonant terminations (cp. 16 a). Masculines and feminines ending in the same consonant are inflected exactly alike; and the neuters differ only in the nom. voc. acc. dual and plural.

76. The final consonants of the stem retain their original sound before vowel terminations (71); but when there is no ending (nom. sing., the स s of the m. f. being dropped), and before the loc. pl. सु su, they must be reduced to one of the letters क् k, ह् t, त् t, प् p or Visarga (27), which respectively become ग् g, ढ् d, द् d, ब् b, or र् r, before the terminations beginning with भ् bh.

a. The voc. sing. m. f. is the same as the nom. except in stems in (derivative) अस् as (83).

b. Forms of the nom. voc. acc. plur. neut. are extremely rare in this declension;—e. g. from भाज् -bhāj, ‘sharing,’ भाजि -bhāñji; nom. sing. भाक् -bhāk.

But for practical reasons it appears preferable to begin with the consonant declension, which adds the normal endings (71) without modification; while the wide deviation of the a-declension from these endings is apt to confuse the beginner.

Stems in **Dentals**.

77. Paradigm सुहृद् su-hṛd, m. 'friend' (lit. 'good-hearted').

a. In the paradigms of regular nouns with unchangeable stems it will be sufficient to remember the nom. sing. and the nom. inst. loc. plur.;—e.g. from °जित् -jit, 'conquering': °जित् -jit, °जितः -jit-ah, °जित्तिः -jid-bhiḥ, °जित्सु -jit-su; from °मथ् -math, 'destroying': °मत् -mat, °मथः -math-ah, °मद्धिः -mad-bhiḥ, °मत्सु -mat-su; from °वृध् -vṛdh, 'increasing': °वृत् -vṛt, °वृधः -vṛdh-ah, °वृत्तिः -vṛd-bhiḥ, °वृत्सु -vṛt-su.

Stems in Palatals.

79. The palatals (**च् c**, **ज् j**, **श् s**) undergo a change of organ when final and before consonant terminations (cp. 63). **च् c** always becomes guttural (**क् k** or **ग् g**); **ज् j** and **श् s** nearly always become guttural, but sometimes cerebral (**ट् t̪** or **ड् d̪**).

b. Like **रुज्** ruj are declined **ऋत्विज्** rtv-ij, m. 'priest' (lit. 'sacrificing in season'), **बणिज्** bañij, m. 'merchant,' **भिषज्** bhiṣaj, m. 'physician'; **सज्** sraj, f. 'garland'; also **ऊर्ज्** ūrj, f. 'strength' (nom. **ऊर्क्** ūrk, 28).

c. Like **सम्राज्** samrāj is declined **परिव्राज्** parivrāj, m. 'mendicant.'

¹ Stems in derivative **अच्** ac are changeable (93).

d. Like दिश् dis̄ are declined °दृश् -dṛś̄, 'seeing,' °स्पृश् -spṛś̄, 'touching' (at the end of compounds).

Stems in Cerebrals.

Stems in ह h.

81. Most of the few stems in ह h change that letter when final or before consonant endings to a guttural, but (cp. 69 b) in °लिह् -lih, 'licking,' it becomes cerebral, and in उपानह् upā-nah, f. 'shoe' (that which is 'tied on'), dental:—

Stems in र्॑ r¹.

82. The र्॑ r becomes Visarga only when final, that is, in the nom. sing. only, remaining before the सु su of the loc. plur. (50). A preceding इ i or उ u is lengthened when the र्॑ r is final or followed by a consonant.

Stems in स् s.

83. These stems consist almost entirely of words formed with the derivative suffixes अस् as, इस् is, उस् us, chiefly neuters. They lengthen their final vowel (before the inserted nasal) in the nom. voc. acc. plur. neut. The masculines and feminines are nearly all adjective compounds with these stems as their final member; those in अस् as lengthen the अ a in the nom. sing.

a. सुमनस् su-manas, as an adjective, 'cheerful,' has in the nom. sing. masc. सुमना: sumánāḥ (voc. सुमनः súmanah), but neuter सुमनः sumánāḥ (but दीर्घायुः dīrghāyuh nom. sing. in all genders). Similarly अङ्गिरस् aṅgiras, m., उशनस् usanas, m., names of seers, and उषस् uṣ-as, f. 'dawn,' form the nominatives अङ्गिराः ángirāḥ, उशनाः usánāḥ (sometimes उशना usánā), and उषाः uṣāḥ.

b. आशिस् ā-sis¹, f. 'blessing,' lengthens its श्व i (like the stems in दूर् ir) in the nom. sing. and before consonants: nom. sing. आशीः āśih; pl. nom. आशिषः āśiṣ-ah, inst. आशीभिः āśiṣ-bhiḥ, loc. आशीःषु āśiṣ-ṣu.

c. दोस् dos, n. 'arm,' is quite regular: nom. sing. दोः doḥ, nom. dual दोषी dos-i; pl. inst. दोर्भिः dor-bhiḥ, loc. दोःषु doḥ-ṣu.

I. B. Changeable Stems.

84. Regular changeable stems end in the dentals त् t, न् n, स् s, or the palatal च् c; those in त् t end in अत् at (also मत् mat, वत् vat); those in न् n end in अन् an (also मन् man, वन् van) or इन् in (also मिन् min, विन् vin); those in स् s end in यस् yas (comparatives) or वस् vas (perf. participles active); those in च् c end in अच् ac, which is properly a root meaning 'to bend.'

The stems in अत् at (85-6), इन् in (87), यस् yas (88) have two forms, strong and weak; those in अन् an (90-92), वस् vas (89), अच् ac (93) have three, strong, middle, and weakest (73).

Nouns with Two Stems.

85. I. **Stems in अत् at** comprise **Present and Future Participles** (156) active (masc. and neut.)². The strong stem is in अन् ant, the weak in अत् at³; — e.g. अदन् ad-ant and अदत् ad-at, 'eating,' from अद् ad, 'to eat'—

¹ Derived not with the suffix इस् is, but from the (weakened) root शास् śas with the prefix आ ā.

² On the formation of the feminine stem see 95.

³ In Latin and Greek the distinction was lost by normalization: gen. edentis, ἔδοντος.

² The change of स् s to त् t here began in the early Vedic period before भ् bh, extending thence to the loc. plur. and the nom. acc. sing. neut. उस् us is the unaccented form of वस् vas (cp. 137, 2 e).

³ Beginners sometimes confuse this *reduplicated* perf. part. active with the active participle formed by adding the suffix वत् vat to the perfect passive part.;—e. g. nom. masc. द्वृतवान् kṛta-ván, ‘having done,’ acc. द्वृतवन्तम् kṛta-vantam (cp. 161). The confusion is caused by both ending in °वान् -ván in the nom. sing.

a. The इ i which is inserted before the व् v in some of these participles is dropped before उष् usः thus तस्थिवान् tasth-i-vān, but तस्थुषा tash-úṣ-ā.

90. 2. Nouns in अन् an (also मन् man, वन् van), masc. and neut.³, form the strong stem in आन् ān, the weakest in न् n, the middle in अ a. In the nom. sing. masc. the final न् n is dropped. In the loc. sing. and the nom. voc. acc. dual the

syncopation of the अ a of the suffix is optional. In the weakest cases syncope does not take place when मन् man and वन् van are immediately preceded by a consonant.

94. The beginner will find it useful to remember the following points with regard to changeable stems :—

1. The vowel of the suffix is lengthened in the nom. sing. masc. except in stems in अत् at and अच् ac;—**अग्निमान्** agni-mán, ज्ञानवान् jñāna-vān; **गरीयान्** gár-iyān; **चक्रवान्** cakr-vān; **राजा** ráj-ā, **ब्रह्मा** brah-má, **युवा** yú-vā; **धनी** dhan-í, **वाग्मी** vāg-mí, **मनस्ती** manas-ví; but **अदन्** ad-áñ, **प्रत्यञ्छ** praty-áñ.

2. The nom. sing. masc. ends in a nasal in all changeable stems except those in न् n (**अन्** an, **मन्** man, **वन्** van, **इन्** in, **मिन्** min, **विन्** vin), which drop it.

3. All changeable stems which lengthen the vowel in the nom. sing. masc., keep it short in the vocative, and always retain the न् n of the stem;—e. g. **अग्निमन्** ágni-man, **ज्ञानवन्** jñāna-van; **गरीयन्** gár-iyān; **चक्रवन्** cakr-van; **राजन्** ráj-an, **ब्रह्मन्** bráhman, **युवन्** yú-van; **धनिन्** dhán-in, **वाग्मन्** vāg-min, **मनस्तिन्** manas-vin.

a. In other changeable stems the vocative differs from the nom. solely in always having the accent on the first syllable: अदन् ad-an, voc., adán, nom.; प्रत्याः prátyah, voc., pratyáñ, nom.

95. The **feminines** of nouns with changeable stems are formed by adding ई ī to the weak stem (when there are two stems) or the weakest (when there are three), and follow the declension of नदी nadī (100);—e.g. अदती adat-ī; अग्निमती agni-mát-ī, ज्ञानवती jñāna-vat-ī; धनिनी dhanín-ī, वातिमनी vāg-mín-ī, मनस्विनी manas-vín-ī; गरीयसी gáriyas-ī; चक्रुषी cakrūś-ī; राज्ञी rájñī ('queen'); नाम्नी -nāmn-ī (adj., 'named'); शुनी śun-ī ('bitch'); घोनी -ghn-ī ('killing'); प्रतीची pratic-ī, प्राची prác-ī.

a. The feminine of the **present participle active** of the first conjugation (125) is made from the strong masc. stem in अन्त् ant (cp. 156); that of the second conjugation from the weak stem in अत् at;—e.g. भवन्ती bhávant-ī, 'being¹', तुदन्ती tudánt-ī², 'striking,' दीव्यन्ती dívyant-ī, 'playing,' चोरयन्ती corayant-ī, 'stealing'; but जुह्नती júhv-at-ī, 'sacrificing,' युज्नती yuñj-at-ī, 'joining,' सुन्वती sunv-at-ī, 'pressing,' कुर्वती kurv-at-ī, 'doing,' क्रीणती krīṇ-at-ī, 'buying.'

b. The feminine of the simple future participle active is usually formed like the present part. of the first conjugation; भविष्यन्ती bhavisyánt-ī², 'about to be,' करिष्यन्ती karisyánt-ī, 'about to do.'

c. The few **adjectives** in वन् -van form their feminines in वरी -vari;—पीवन् pí-van (*piwv*), 'fat,' f. पीवरी pí-vari

¹ But भवती bhavat-ī from भवत् bhavat, 'your Honour' (86 a).

² If the verbal base, however, ends in accented अ a;—e.g. tudá, bhavisyá, the weak form may optionally be taken, when the ई ī receives the accent: तुदती tud-at-ī, भविष्यती bhavisy-at-ī.

(*πίειρα*). The fem. of the irregular युवन् yú-van, 'young' (91, 4), is युवति¹ yuva-tí or युवती¹ yuva-tī.

¹ Cp. 97, foot-note 5.

² This very anomalous ending, being the Vṛddhi vowel of उ u, not इ i, seems to be due to the influence of the stems in उ u, the inflexion of which is entirely analogous.

*for dhyā
in bṛī*

a. Neuter adjectives (not substantives) may be declined throughout (except N.V.A. of all numbers), and fem. adjectives and substantives in the D. Ab.G. L. sing., like masculines. Thus the L. sing. of मति matí, f. 'thought,' is मत्याम् matyám or मतौ matáu, but वारि vāri, n. 'water,' only वारिणि vāriṇi.

b. The voc. sing. of neuters may optionally follow the masc. form;—e.g. वारि vāri or वारे vāre; मधु mádhu or मधो mádho.

c. The **feminine** of adjectives in उ u is sometimes also formed by adding ई ī;—e.g. तनु tanú or तन्वी tanv-ī, f. 'thin'; लघु laghú or लघ्वी laghv-ī, f. 'light'; पृथु pr̥thú, f. 'broad,' पृथ्वी pr̥thv-ī, '(the broad) earth.'

Irregularities.

99. 1. पति pát-i (Gk. πόστι-ς), m. 'husband,' is irregular in the weak cases of the singular: I. पत्या páty-ā, D. पत्ये páty-e, Ab.G. पत्युः páty-uh¹, L. पत्यौ páty-au. When it means 'lord,' or occurs at the end of compounds, it is regular (like शुचि śuci). The fem. is पत्नी pátnī, 'wife' (Gk. πότνια).

2. सखि sákh-i, m. 'friend,' has the same irregularities, but in addition has a strong stem formed with Vṛddhi, सखाय् sákhāy: N. सखा sákhā, A. सखायम् sákhāy-am, I. सखा sákh-ā, D. सख्ये sákh-e, Ab.G. सख्युः sákh-uh¹, L. सख्यौ sákh-au, V. सखे sákhe; du. N.A.V. सखायौ sákhāy-au; pl. N. V. सखायः sákhāy-ah, A. सखीन् sákhīn. At the end of compounds सखि sakhi is regular in the weak cases, but retains the stem सखाय् sákhāy in the strong. The fem. is सखी sakh-ī.

3. The neuters अक्षि áksi, 'eye,' अस्थि asthi, 'bone,' दधि dádhi, 'curds,' सक्थि� sákthi, 'thigh,' form their weakest cases from stems in अन् an (अक्षन् aksan, &c., like नामन् nāman):—

¹ This anomalous ending appears to be due to the influence of the Ab.G. in names of relationship (101) in चूर् r, like पितृ॒ pitúr.

4. द्यु dyú, f. 'sky' (originally diu, weak grade of द्यो dyo : 102 a), retains this stem before consonant terminations (taking Vṛddhi in the N.V. sing.), but changes it to दिव् div before vowels :—

V. द्यौः dyáu-ḥ ¹ (Zeū)	

100. C. Stems in ई ī and ऊ ū (fem.), according as they are monosyllabic or polysyllabic, show various differences of inflexion :—

1. Monosyllabic stems change ई ī and ऊ ū to ईय् iy and ऊव् uv before vowels, the polysyllabic stems to य् y and व् v.

2. Monosyllabic stems have the normal terminations (71) throughout: they **may** take the special feminine terminations (-ai, -āḥ, -ām)², polysyllabic stems must.

¹ The nom. with voc. accent, while the Greek has the proper voc.

² These terminations started from the polysyllabic stems in ई ī, originally या-yā, which was fused with the normal endings ए e and अस् as to यै -yai and यास् -yās, and, in the loc., with an ending अम् -am (of unknown origin) to याम् -yām.

3. Monosyllabic stems use the nom. (which takes स् s), polysyllabic stems shorten the ई ī and ऊ ū of the nom., in the voc. sing.

4. Polysyllabic stems in ई ī have no स् s in the nom. sing. except लक्ष्मीः lakṣmīḥ, 'goddess of prosperity,' तन्त्रीः tantrīḥ, 'string,' and optionally तन्द्रीः tandrīḥ, 'sloth.'

5. Polysyllabic stems form the acc. sing. in ईम् īm and ऊम् ūm, the acc. pl. in ईस् īs and ऊस् ūs.

a. स्त्री strī, f. 'woman,' though monosyllabic, has most of the characteristics of polysyllabic stems in ई ī (100, 2-5): it **must** take the special fem. terminations, it shortens its ई ī in the voc., it has no स् s in the nom., and has an optional acc. sing. in ईम् īm and acc. plur. in ईस् īs. This is doubtless due to its originally having been a dissyllable.

101. D. Stems in चर् r (masc. and fem.), which in origin are consonant stems in अर् -ar, are closely analogous in their declension to stems in अन् -an (90). These nouns mostly end in the suffix त्र् -tr (i.e. -tar, Gk. -τηρ, -τωρ, Lat. -tor). They distinguish a strong stem तर् -tar or तार् -tār, a middle त्र् tr, and a weakest चर् tr. The inflexion of masc. and fem. differs in the acc. plur. only.

In the strong stem the names of relations take the Guṇa form (ar), the names of agents take the Vṛddhi form (ār).

The sing. gen. is formed in उर् ur, the loc. in अरि ari, the voc. in अर् ar; the pl. acc. masc. in चरन् īn, fem. in चरस् īs, the gen. in चरणाम् īnām.

a. नमृ náptr and भर्तुं bhartr̄, though names of relations, follow दातुं dāt̄, taking the Vṛddhi form in the strong stem : acc. sing. नप्तारम् náptār-am, भर्तारम् bharṭār-am; also स्वस् svásr̄, f. 'sister': acc. sing. स्वसारम् svásār-am, but acc. pl. स्वसृः svásr̄ih.

b. नृ nr̄, m. 'man' (Gk. ἀνήρ), takes the Guṇa form in the strong stem; the gen. pl. is नृणाम् nr̄ṇām as well as नृनाम् nr̄nām; the I. D. Ab. G. sing. are not found in classical Sanskrit (but the D. and G. in the Rig-veda are नरे nár-e, नरः nár-ah);—N. ना ná, A. नरम् nár-am, L. नरि nár-i (Ep. Gk. ἀνέρ-ι). N. pl. नरः nár-ah (Ep. Gk. ἀνέρ-ες), A. नृन् níñ, I. नृभिः ní-bhih, L. नृषु ní-su.

c. क्रोष्टृ kros̄-tr̄, m. 'jackal' (lit. 'yeller'), substitutes क्रोष्टु kroṣṭu in the middle cases: N. pl. क्रोष्टारः kroṣṭār-ah, I. pl. क्रोष्टुभिः kroṣṭu-bhih.

d. Stems in त्रु tr̄, if declined in the neuter, would be inflected like the neut. of शुचि śuci: N.A. sing. धात्रु dhāt̄r̄, du. धात्रुणी dhāt̄r̄-ṇ-i, pl. धात्रुणि dhāt̄r̄-ṇ-i; I. sing. धात्रुणा dhāt̄r̄-ṇ-ā, pl. धात्रुणिः dhāt̄r̄-bhih.

e. **Feminine** agent nouns are formed from masculines in त्रु tr̄ by the suffix ई ī: masc. दात्रु dāt̄r̄, fem. दात्री dātr̄-ī, 'giver' (declined like नदी nadi).

E. Stems in ऐ ai, ओ o, औ au.

102. The only stems in diphthongs are रै rai, m. 'wealth,' गो go, m. f. 'bull, cow,' द्यो dyo, f. 'sky,' and नौ nau, f. 'ship.' रै rai changes the ई ī of the diphthong to ए y before vowels, but drops it before consonants. गो go, in the strong cases, takes Vṛddhi and becomes गौ gau, which is shortened to गा gā in the acc. sing and pl. The ab. gen. has a contracted form (os for av-as).

These stems form a transition between the consonant and vowel declension: they agree with the former in taking the normal endings; with the latter in adding श् s in the nom. sing. and in showing a vowel before endings with initial consonant:—

Degrees of Comparison.

103. 1. The **secondary** suffix of the comparative **तरा** -tara (Gk. *-τέρω*) and that of the superlative **तम** -tama (Lat. *-timō*) are added to the weak or middle stem of derivative adjectives (and even substantives);—e. g. शुचि śuci : शुचितरा śuci-tara, शुचितम् śuci-tama; प्राच् prāc : प्राक्तरा prāk-tara, प्राक्तम् prāk-tama; धनिन् dhanin : धनितरा dhani-tara, धनितम् dhani-tama; विद्वस् vidvas : विद्वत्तरा vidvat-tara, विद्वत्तम् vidvat-tama; प्रत्ययः pratyac : प्रत्यक्तरा pratyak-tara, प्रत्यक्तम् pratyak-tama.

a. These suffixes form their **feminine** in आ ā; but तम tama, when used as an ordinal suffix, forms its fem. in ई ī (cp. 107).

2. The **primary** suffix of the comparative, ईयस् iyas (Gk. *-ιών*, Lat. *-ior*), and that of the superlative, ईष्ठ िष्ठा (Gk. *-ιστό*), are added to the root, which generally takes Guṇa (and is accented). Before them every word must be reduced to one syllable by dropping suffixes;—e. g. अणु áṇ-u, 'minute': अणीयस् áṇ-iyas,

अणिष्ठ áṇ-iṣṭha; **गुरु** gur-ú¹, 'heavy': गरीयस् gár-iyas, **गरिष्ठ** gár-iṣṭha; **लघु** lagh-ú, 'light': लघीयस् lágh-iyas, **लघिष्ठ** lágh-iṣṭha (Gk. ἐ-λάχ-ιστος); **दूर** dū-rá, 'far': दवीयस् dáv-iyas; **वर** vár-a, 'choice': वरीयस् vár-iyas, 'better'; **कुद्र** kṣud-rá, 'mean': कोदीयस् kṣód-iyas; **युवन** yú-van, 'young': यवीयस् yáv-iyas; **ह्रस्व** hras-va, 'short': **ह्रसीयस्** hrás-iyas; with irregular radical syllable: **दीर्घ** dīrgh-á, 'long': द्राघीयस् drágh-iyas; **बहुल** bah-u-lá, 'abundant': बंहीयस् báṃh-iyas.

a. In some cases यस् yas is attached (instead of इयस् iyas);—e. g. **ज्यायस्** jyā-yas, 'superior,' **ज्येष्ठ** jyéṣṭha (root ज्या jyā); **भूयस्** bhú-yas, 'more,' **भूयिष्ठ** bhú-y-iṣṭha (root भू bhū); **प्रेयस्** pré-yas, 'dearer,' **प्रेष्ठ** pré-ṣṭha (root प्री pri); **श्रेयस्** śré-yas, 'better' (Gk. κρείων), **श्रेष्ठ** śré-ṣṭha; **स्थिर** sthi-rá, 'firm': **स्थेयस्** sthé-yas.

b. Some comparatives and superlatives belong only in sense to their positives;—e. g. **नेहीयस्** néd-iyas, **नेदिष्ठ** néd-iṣṭha, 'nearest,' to **अन्तिक** antiká, 'near'; **कनीयस्** kán-iyas, 'lesser,' **कनिष्ठ** kán-iṣṭha, 'least,' to **आत्प** álpa, 'small'; **वर्षीयस्** vár-s-iyas, 'older,' **वर्षिष्ठ** vár-s-iṣṭha, 'oldest,' to **वृद्ध** vriddhá, 'old.'

जनत्रिंशत् ūna-trimśat.	

^१ Here द्वा dvā is an old dual: 'two (and) ten.'

^२ Trayo for trayah (45, 2) is the nom. plur. (105).

^३ For ṣás-dásā, through ṣáz-dásā (cp. 69 b, foot-note 2).

^४ Catvārim for catvāri (105), neut. plur., like trimśat.

103 १०३ चिंशतम् trí-satam.	300 ३०० त्रीणि शतानि triṇi śatāni.
च्यधिकं शतम् try- adhikaṁ śatam.	त्रिंशतम् tri-satám.
110 ११० दशशतम् dáśa-sá- tam.	1000 १००० दश शतानि daśa śatāni.
दशाधिकं शतम् da- sādhikaṁ śatam.	सहस्रम् sahásram.
200 २०० द्वे शते dve sáte.	100,000 लक्ष laksá (lakh).
द्विशतम् dvi-satám.	1,000,000 नियुतम् niyutam.
	10,000,000 कोटि kóti (crore).

a. In order to form the numbers from 20 to 100 not enumerated above, it is only necessary to remember that 2, 3, and 8 are द्वा dvā (δύω), चयः trayah (τρεῖς), and अष्टा aṣṭā (ἀκτώ) before 20 and 30 (द्वाचिंशत् dvā-trimśat, चयस्त्रिंशत् tráyas-trimśat, अष्टाचिंशत् aṣṭā-trimśat), and द्वि dvi, त्रि tri, अष्ट aṣṭa before 80; both forms may be used with 40, 50, 60, 70, and 90.

b. The alternative designations of 19, 29, &c. are formed with the old past participle उन् ū-na, 'diminished';—e.g. उनविंशति ūna-vimśati, 'twenty diminished (by one).' By prefixing the necessary cardinal to this participle, other alternatives may be formed;—e.g. च्यूनचिंशत् try-ūna-trimśat, 'thirty diminished by three,' i.e. 27.

c. Similarly alternatives to 101, 102, &c. are formed by means of the adjective अधिक् adhi-ka, 'exceeding,' 'plus';—e.g. द्व्याधिकं शतम् dvy-adhikaṁ śatam, 'a hundred exceeded by two.'

d. The difference of sense in द्विशतम् dvi-satam, चिंशतम् tri-satam, &c. is only to be distinguished by the accent, these compounds meaning 102, 103, &c., when accented on the first member, but 200, 300, &c., when accented on the last.

Declension of Cardinals.

105. Only the first four cardinals distinguish the genders.

1. एकः ékah, एका ékā, एकम् ékam, following the declension of the pronominal adjectives, is inflected like सर्वं sarva (120 b).

2. द्वौ dvá, 'two,' is declined like the dual of कान्ता kánta : N.A. m. द्वौ dváu, f. द्वै dvé, n. द्वे dvé; I.D.Ab. द्वाभ्याम् dvá-bhyám, G.L. द्वयोः dvá-y-oh.

3. त्रि trí, in the masc. and neut., is declined like the plural of शुचि śuc-i, except in the gen., which is formed as if from त्रयं trayā (the regular form त्रीणाम् trí-n-ám is found in the Rig-veda). Its fem. stem is तिस्त्रि tisr̄, the inflexion of which differs in the N.A.G. from that of the regular stems in चतुर् r.

4. चतुर् catúr, 'four,' in the masc. and neut., has the strong stem चत्वार् catvár (cp. quatuor). The G.pl., though the stem ends in a consonant, inserts न् n before the ending (like पठ् sat). The feminine stem is चतस् cátasr̄, which is inflected exactly like तिस्त्रि tisr̄.

	MASC.	NEUT.	FEM.	MASC.	NEUT.	FEM.
N.V.	त्रयः	त्रीणि	तिस्त्रः	चत्वारः	चत्वारि	चतसः

L.	त्रिषु		तिस्त्रषु	चतुर्षु		चतस्त्रषु
	tri-sú (τρι-σι)		tisr̄-ṣu	catúr-ṣu		cátasr̄-ṣu

106. a. षष् sás, 'six': N.A. षट् sáṭ (27), I. षडः sáḍ-bhíḥ, D. Ab. षड्भ्यः sáḍ-bhyáḥ, G. षष्ठाम् san-nám (65), L. षट्सु sáṭ-sú.

b. पञ्च páñca, 'five,' is declined like a neuter in अन् an (90, 2) except in the gen., where it follows कान्ता kánta:—N.A. पञ्च páñca, I. पञ्चभिः pañcá-bhíḥ, D. Ab. पञ्चभ्यः pañcá-bhyáḥ, G. पञ्चानाम् pañcā-n-ám, L. पञ्चसु pañcá-su.

The numerals for 7 to 10 are declined in exactly the same way. अष्टा astá, however, has also the following alternative (older) forms:—N.A. अष्टौ astáú, I. अष्टाभिः astā-bhíḥ, D. Ab. अष्टाभ्यः astā-bhyáḥ, L. अष्टासु: astā-sú¹.

c. The cardinals 3 to 19 are used as plural adjectives, agreeing with their substantives in number and case (3 and 4 in gender also). The cardinals from 20 to 99 (which are feminine), as well as शतम् śatám and सहस्रम् sahásram, are used as singular substantives, the accompanying substantive being either in the same case or in the genitive;—e.g. शतेन दासीभिः or दासीनाम् śatena dāsibhíḥ or dāsinám, 'with a hundred female slaves.'

Ordinals.

107. The ordinals from 'first' to 'tenth' are formed with various suffixes: थ tha (for original त ta), म ma, य ya, ईय t-īya, or a combination of the first with the second and fourth (थम् tha-ma, तीय t-īya); those from 'eleventh' to 'nineteenth' have the same form as the cardinals (excepting both inflexion like कान्ता kánta and change of accent); while those from 'twentieth' onward either abbreviate the cardinal or add the suffix तम् tama

¹ अष्टौ astáú and अष्टा astá (ókrú, Lat. octō, Gothic ahtáu) are old dual forms, meaning probably 'the two tetrads' (perhaps with reference to the fingers of the two hands).

C. Interrogative Pronoun.

II3. The stem of the interrogative pronoun क ka, 'who, which, what?' is inflected exactly like त ta, excepting that the N.A. neuter is किम् kí-m;—e.g. N. कः káh, का ká, किम् kím; plur. के ké, काः káh, कानि káni. L. sg. कस्मिन् ká-smin, f. कस्याम् ká-syām; pl. केषु ké-ṣu, f. कासु ká-su.

a. In derivation the stems कि ki and कु ku, as well as क ka, are used;—e.g. कियत् ki-y-at, 'how great?' कुच् ku-tra, 'where?' कदा ka-dā, 'when?' As the first member of a compound किम् kim is generally employed, sometimes कु ku : किरूप् kímp-rūpa, adj. 'of what form?' कुकर्मन् ku-karman, n. ('what kind of' =) 'wicked deed.'

E. Reflexive Pronouns.

II5. a. स्वयम् sva-y-ám, 'self,' is indeclinable (originally a nom. sing. like a-y-ám). It may express any person or number (e.g. 'myself,' 'himself,' 'yourselves'). It usually has the meaning of a nominative, but often of an instrumental, and sometimes of a genitive. It frequently also means 'spontaneously.'

b. आत्मन् ātmán, 'self,' is a masc. substantive (declined like ब्रह्मन् brahman, 90, 3). It is used in the singular as a reflexive pronoun of all persons and genders.

c. स्वः sváh, स्वा svá, स्वम् svám (Lat. suus), 'own,' is a reflexive adjective (declined like सर्वं sarva, 120 b) referring to all three persons and numbers ('my, thy, his, our, your, their own'). It is also used (like आत्मन् ātman) in the oblique cases as a reflexive pronoun;—e.g. स्वं निन्दन्ति svam nindanti, 'they blame themselves.'

d. निज ni-ja, properly an adjective meaning 'inborn,' 'native,' is often used in the sense of a pronominal reflexive adjective (like स्वं sva).

F. Possessive Pronouns.

II6. Possessives are formed with the suffix ईय् iya, from the stems of the personal pronouns मद् mad, त्वद् tvad, &c.: मदीय् mad-iya, 'my,' त्वदीय् tvad-iya, 'thy'; अस्मदीय् asmad-iya, 'our,' युष्मदीय् yuṣmad-iya, 'your'; तदीय् tad-iya, 'his, her, its, their.'

a. With the suffix क ka are formed from the genitives मम mama and तव tava, मामक māma-ká, 'my,' and तावक tāva-ka, 'thy' (cp. 109, foot-note 2); from भवत् bhavat, 'your Honour,' भावत्का bhāvat-ka, 'your.'

G. Compound Pronouns.

II7. By adding दृश् drś, दृश् drśa, or दृक् drkṣa, to certain pronominal stems, the following compound pronouns have been formed:—तादृश् tā-drś, तादृश् tā-drśa, तादृक् tā-drkṣa, 'such'

(lit. 'of that look'); यादृश् yā-dṛś, यादृश् yā-dṛśā, 'what like,' 'of what kind'; ईदृश् ī-dṛś, ईदृश् ī-dṛśā, ईदृश् ī-dṛkṣā, 'such'; कीदृश् kī-dṛś, कीदृश् kī-dṛśā, 'what like?'; मादृश् mā-dṛśā, 'like me,' त्वादृश् tvā-dṛśā, 'like thee.'

a. The **feminine** stem of the compounds in दृश् dṛś is the same as the masc. and neut.;—e.g. nom. sing. m. f. n. तादृक् tādṛk; that of the compounds in दृश् dṛśā is formed with ई ī;—e.g. तादृशी tādṛśī; of those in दृश् dṛkṣā with आ ā;—e.g. तादृचा tādṛkṣā.

II8. By adding वत् vat and यत् yat to certain pronominal stems, the following compounds, implying quantity, have been formed:—तावत् tā-vat and एतावत् etā-vat, 'so much'; यावत् yā-vat, 'as much'; इयत् ī-yat, 'so much,' कियत् kí-yat, 'how much?' These are all declined like nouns in वत् vat (86), and form their **feminines** in the same way (तावती tāvatī, इयती iyatī, &c.).

a. कति ká-ti, 'how many?' (Lat. quot), तति tā-ti, 'so many' (Lat. toti-dem), यति yā-ti, 'as many,' are uninflected in the N.A., but in the other cases are declined like शुचि śuci (98) in the plural.

II9. The interrogative क ka, by the addition of चित् cit, चन cana, or अपि api, is changed to an indefinite pronoun, 'some,' 'some one': कश्चित् kas̄ cit, काचित् kā cit, किचित् kim cit; कश्चन kas̄ cana, काचन kā cana, किचन kim cana; कोपि ko'pi, कापि kāpi, किमपि kim api.

a. In the same manner indefinite adverbs are formed: कदा ka-dā, 'when?' कदाचित् kadā cit, कदाचन kadā cana, 'some time or other,' 'once'; क्वा kva, 'where?' न व्वापि na kvāpi, 'not anywhere,' 'nowhere.'

b. The relative preceding the interrogative renders it indefinite: यः कः yaḥ kah, 'whosoever'; यस्य कस्य yasya kasya, 'of whom-

soever.' Similarly यः कश्चित् yaḥ kaścit, यः कश्च याḥ kaśca, or यः कश्चन् yaḥ kaścana, 'whosoever.'

c. The relative pronoun, if doubled, assumes a distributive meaning: यो यः yo yaḥ, 'whoever, whatever in each case' (followed by a double correlative).

H. Pronominal Adjectives.

120. Several adjectives derived from, or allied in meaning to, pronouns, follow the pronominal declension (like त् ta) either altogether or in part.

a. अन्य anyā, 'other,' अन्यतर् anya-tarā, 'either,' इतर् i-tara, 'other,' कतर् ka-tarā, 'which of two?' कतम् ka-tamā, 'which of many?' एकतम् eka-tamā, 'one (of many),' follow the pronominal declension throughout, taking द् d in the N.V.A. sing. neut.; अन्यः anyā-h, अन्या anyā, अन्यद् anyā-d (cp. Lat. aliu-d); D. अन्यस्मि anyā-smai, f. अन्यस्यै anyā-syai, L. अन्यस्मिन् anyā-smīn; &c.

b. सर्वं sárva, 'every,' 'all,' उभय् ubhá-ya, 'both' (sg. and pl.)¹, एक् éka, 'one' (105), एकतर् eka-tara, 'either,' differ only in taking म् m instead of द् d in the N. e. द्वितीय dvitiya, 'second,' and तृतीय tritiya, 'third,' may follow the pronominal declension throughout the oblique cases of the singular;—e.g. D. m. n. तृतीयाय tritiyāya or तृतीयस्मै tritiya-smái; L. f. तृतीयायाम् tritiyā-yām or तृतीयस्याम् tritiya-syām; but N. pl. m. only तृतीयाः tritiyāḥ.

f. Any of these pronominal words occurring at the end of possessive compounds (189) are declined like ordinary adjectives.

CHAPTER IV

CONJUGATION

121. Sanskrit verbs are inflected with either active or middle terminations. The **active** voice is called **Parasmai-pada**, i.e. transitive (lit. 'word for another'). The **middle** voice is called **Ātmane-pada**, i.e. reflexive (lit. 'word for oneself'). The **passive** takes the terminations of the Ātmane-pada; with which it coincides except in the present and imperfect (where it forms its stem with the suffix य ya), and in the third sing. aorist.

a. The Sanskrit verb has in each tense and mood **three numbers**, Singular, Dual, and Plural, with three persons in each.

122. There are in Sanskrit **five tenses** conjugated in the indicative : 1. Present (with imperative and optative moods) ; 2. Imperfect ; 3. Perfect ; 4. Aorist (with a kind of optative called Benedictive or Precative) ; 5. Future (with the Conditional, a kind of past future). (खण्डार्थ)

There are also **participles** connected with three of these tenses, present, perfect, and future ; and one **infinitive** (167), a verbal noun unconnected with any tense.

a. Classical Sanskrit has neither a pluperfect tense nor a subjunctive mood (excepting the survivals of it in the first persons imperative) ; nor has it an imperative or a proper optative of any tense except the present. There are, therefore, far fewer verbal forms in non-Vedic Sanskrit than in Greek.

The Present System.

123. While the perfect, aorist, and future tenses add the terminations directly (or after inserting a sibilant) to the root, the present group (the present with its moods and the imperfect) forms a special stem, which is made in ten different ways. Hence the native Sanskrit grammarians have divided all verbs into ten classes. The tenth class, which is really a secondary formation, retains its present stem in nearly all the other verbal forms also, as do the secondary verbs generally (causatives, desideratives, intensives, denominatives).

The Ten Classes.

124. The ten classes are divided into **two conjugations**. In the first, comprising the first, fourth, sixth, and tenth classes, the present stem ends in ा, and remains unchanged throughout.

In the **second conjugation**, which comprises all the remaining classes, the terminations are added directly to the final

of the root or to the suffixes उ u, नु nu, ना nā, (नी nī, न् n), and the **present stem is changeable**, being either **strong** or **weak**.

A. First Conjugation.

125. 1. The **first** or **Bhū** class adds अ a to the last letter of the root, which, being accented, takes Guṇa of a final vowel (short or long) and of a short medial vowel followed by one consonant;—e.g. भू bhū, 'be,' forms the present stem भव bháv-a; बुध् budh, 'know': बोध् bódh-a.

2. The **sixth** or **Tud** class adds an accented अ á to the root, which (being unaccented) has no Guṇa. Before this अ á final त्र̥ ḍ changes to द्व̥ ir. Thus तुह् tud, 'strike': तुद् tud-á: कृ kr̥, 'scatter': किर kir-á.

3. The **fourth** or **Div** class adds य ya to the last letter of the root, which is accented (but the weak form in some cases assumed by the root points to the य ya having originally been accented);—e.g. नह् nah, 'bind': नह्य náh-ya; दिव् div, 'play': दीव्य dív-ya (133 B).

4. The **tenth** or **Cur** class adds the suffix अय् áya, before which a final vowel takes Vṛddhi, but a short medial vowel followed by one consonant takes Guṇa;—e.g. चुर् cur, 'steal': चोर्य cor-áya. Short medial अ a followed by one consonant is in most cases lengthened;—e.g. कम् kam: कामय् kám-áya, 'desire.'

B. Second Conjugation.

126. The strong forms are—

1. the singular present and imperfect active;
2. all first persons imperative **active and middle**;
3. the third person singular imperative active.

In these forms the vowel of the root or the affix, being accented, is strengthened; while in the weak forms it becomes short because the terminations are accented.

a. In the ninth class the accented form of the affix is ना ná, the unaccented नी ní or न् n; in the seventh they are respectively न् ná and न् n.

127. 1. The **second** or **Ad** class adds the terminations directly to the root, which in the strong forms takes Guṇa if possible (125, 1);—e.g. अद् ad, ‘eat’: sing. 1. अद्धि ád-mi, 2. अत्सि át-si, 3. अत्ति át-ti; इ i, ‘go’: एमि é-mi, एषि é-si, एति é-ti; लिह् lih, ‘lick’: लेद्धि léh-mi, लेचि lék-si (69 a), लेढि lé-dhi (69 b).

a. This and the seventh are the most difficult classes to conjugate, because terminations beginning with various consonants come into contact with the final consonants of roots, and consequently many rules of internal Sandhi have to be applied.

2. The **third** or **Hu** class adds the terminations directly to the reduplicated root, which in the strong forms takes Guṇa if possible;—e.g. जुहु hu, ‘sacrifice’: जुहोमि ju-hó-mi, ‘I sacrifice’; जुहुमः ju-hu-máh, ‘we sacrifice’.

a. The intensives conjugated in the active (172) follow this class.

3. The **seventh** or **Rudh** class adds the terminations directly to the final consonant, before which न् ná is inserted in the strong, and न् n in the weak forms;—e.g. युज् yuj, ‘join’: युनज्मि yu-ná-j-mi; युहुमः yuñj-máh.

4. The **fifth** or **Su** class adds नु nu, which takes Guṇa in the strong forms, to the root;—e.g. सु su, ‘press out’: सुनोमि su-nó-mi; सुनुमः su-nu-máh.

5. The **eighth** or **Tan** class adds त् u, which takes Guṇa in the strong forms, to the root;—e.g. तन् tan, ‘stretch’: तनोमि tan-ó-mi; तनुमः tan-u-máh.

a. All the (seven) verbs of this class end in न् n, except कर् kr, ‘do,’ which has an irregular present stem: करोमि kar-ó-mi (134 E).

6. The **ninth** or **Kri** class adds to the root ना ná in the strong forms, but in the weak नी ní before consonants and न् n

before vowels;—e.g. क्री kṛī, ‘buy’: क्रीणामि kṛī-nā-mi; pl. 1. क्रीणीमः kṛī-nī-māḥ, 3. क्रीणन्ति kṛī-n-ánti.

The Augment.

128. The imperfect, the aorist, and the conditional prefix to the root accented अ á as their augment, which forms वृद्धि with an initial vowel (23);—e.g. बुध् budh, ‘know’: 3. sing. imperf. अबोधत् á-bodha-t; उन् und, ‘wet’: उनत्ति u-ná-t-ti, ‘he wets,’ आनत् áu-na-t, ‘he wetted’; च च् r, ‘go’: चच्छति recháti, ‘he goes,’ आर्चत् árcchat, ‘he went.’

a. The augment is dropped in the imperf. and aorist (which are then used imperatively) after the prohibitive particle मा mā (μῆ): मा कार्षेत् or करोत् mā kārsit or karot, ‘may he not do it.’

Reduplication.

129. Five verbal formations take reduplication in Sanskrit: the present stem of the third conjugational class, the perfect, one kind of aorist, the desiderative, and the intensive. Each of these five has certain peculiarities, which must be treated separately under the special rules of reduplication (130, 135, 149, 170, 173). Common to all are the following.

General Rules of Reduplication.

1. The first syllable of a root (i.e. that portion of it which ends with a vowel) is reduplicated;—e.g. बुध् budh: बुबुध् bu-budh.

2. Aspirated letters are represented by the corresponding unaspirated;—e.g. भिद् bhid, ‘cut’: बिभिद् bi-bhid; धू dhū, ‘shake’: दुधू du-dhū.

3. Gutturals are represented by the corresponding palatals, ह h by ज् j;—e.g. कम् kam, ‘love’: चकम् ca-kam; खन् khan, ‘dig’: चखन् ca-khan; गम् gam, ‘go’: जगम् ja-gam; हस् has, ‘laugh’: जहस् ja-has.

4. If the root begins with more than one consonant, the first only is reduplicated;—e.g. क्रुश् kruś, ‘shout’: चुकुश् cu-kruś; चिप् kṣip, ‘throw’: चिचिप् ci-kṣip.

5. If a root begins with a sibilant followed by a hard consonant, the latter is reduplicated;—e.g. स्तु stu, ‘praise’: तुऽस्तु tu-ṣtu (67); स्था sthā, ‘stand’: तस्था ta-sthā; शृत् ścut, ‘drip’: चुशृत् eu-ścut; स्कन्द् skand, ‘leap’: चस्कन्द् ca-skand. But स्मृ smṛ, ‘remember’: सस्मृ sa-smṛ (m is soft).

6. If the radical vowel, whether final or medial, is long, it is shortened in the reduplicative syllable;—e.g. गाह् gāḥ, ‘enter’: जगाह् ja-gāḥ; क्री krī, ‘buy’: चिक्री ci-krī; कूज् kūj, ‘hum’: चुकूज् cu-kūj.

7. If the radical (not final) vowel is ए e, it is represented by इ i; if ओ o or औ au, by उ u;—e.g. सेव् sev, ‘worship’: सिषेव् si-sev (67); ढौक् dhauk, ‘approach’: डुढौक् duḍhauk.

8. Roots which, according to the native Sanskrit grammarians, end in ए e, ऐ ai, ओ o are more conveniently stated to end in आ ā, and are so treated in reduplication;—e.g. गौ gai, ‘sing,’ 3. sing. perfect जगौ ja-gau (136, 4).

Special Rule of Reduplication for the Third Class.

130. चर् r and चर् ṛ are represented in reduplication by र् i;—भृ bhr, ‘bear’: बिभर्ति bī-bhar-ti; पृ pṛ, ‘fill’: पिपर्ति pī-par-ti.

Terminations.

131. The following table gives the terminations, which are on the whole the same for all verbs, of the present system. The chief difference is in the optative, which is characterized by ए e in the first, and या yā and ई ī in the second conjugation. It will prevent confusion to remember that the present indicative has the primary (-mi, -si, -ti, &c.), while the imperative (with some variations)

and the optative, as well as the imperfect, have the secondary terminations (-m, -s, -t, &c.). Of the other tenses, the future takes the primary, and the aorist, with the benedictive and the conditional, takes the secondary terminations; while the perfect takes in the active (with many variations) the secondary, and in the middle, the primary endings.

In order to understand clearly the difference between the two conjugations, the following points should be noted. **In the first or a-conjugation** (as in the a-declension), **the accent** is never on the terminations, but always **on** the same syllable of **the stem** (the root in the first and fourth, the affix in the sixth and tenth classes), which therefore remains unchanged. **On the other hand**, in the second conjugation (as in the declension of changeable stems) the accent falls on the strong stem, which is shortened in the weak forms by the shifting of the accent to the terminations. **In the second conjugation**, therefore, **the terminations are accented** except in the strong forms (126) of the present. The same would apply to the imperfect, were it without an augment (128).

1. The final अ a of the first conjugation is lengthened before अ m or अ v;—e.g. भवामि bhāvā-mi, भवावः bhāvā-vah.

2. Terminations beginning with vowels should be added in the first conjugation after dropping the final आ a;—e.g. अभवम् á-bhav-am, भवेत् bháv-et.

3. The terminations of the first conjugation, given in the above table as beginning with ए e, really consist of the final आ a of the base + ई ī; but on practical grounds it is preferable to assume that they begin with ए e.

4. Verbs of the first conjugation take no termination in the 2. sing. imperat. Par. (being exactly parallel with the vocative singular of the a-declension). Those of the second take धि dhi (Gk. θι) after consonants, हि hi after vowels. But—

a. in the ninth class आन् āna takes the place of धि dhi;—
e.g. मथान् math-ānā¹ (but क्रीणीहि krī-nī-hí).

ākhyāhi b. हि hi is dropped in the fifth and eighth classes, if the उ u is preceded by a single consonant;—e.g. सुनु su-nú (but आप्नुहि āp-nu-hí).

c. in the third class ऊ hu adds धि dhi (instead of हि hi) after a vowel: जुऊधि ju-hu-dhí.

5. Verbs of the third class and some other reduplicated present stems (cp. 134 A 4, B; 172) drop the न् n of the 3. plur. pres. indic. and imperat. Par. In the अत्म. the whole **second conjugation** rejects the न् n of the 3. plur. pres. impf. impv.

6. Verbs of the third class and some other reduplicated stems (cp. 134 A 4, B; 172) take उर् ur instead of आन् an in the 3. plur. impf. Par. Those of the second class which end in आ ā, as well as विद् vid, 'know,' and द्विष् dvis, 'hate,' may do so. Before this suffix a final आ ā is dropped, while ई ī, उ u, ऊ ū are

¹ The origin of this peculiar imperative ending is uncertain. It perhaps stands for -ना-ना: ā being the reduced form (= long nasal sonant) of the class suffix -nā, and na the ending which is found in the Vedic 2. pl. impv.;—e.g. i-ta-na.

guuated;—e.g. भी bhi, 'fear': अविभयः á-bi-bhay-uh; अजुहवः á-ju-hav-uh; अयान् á-yā-n or अयः á-y-uh. That the final of this ending (which also appears in the 3. plur. optative and the 3. plur. perf. active) is etymologically र् r, and not स् s, is proved by the corresponding forms in the Avesta.

Paradigms.

132. As the four classes of the first conjugation are inflected exactly alike, one paradigm will suffice for them. The same applies to the fifth and eighth classes. In the second class द्विष् dviṣ has been used for the paradigm, because it illustrates better than अद् ad both the rules of internal Sandhi and the difference between strong and weak forms.

Irregularities of the Present Stem.

First Conjugation.

133. A. First or Bhū Class. 1. क्रम् kram, 'step,' आ-चम् ā-cam, 'sip,' गुह् guh, 'conceal,' शिव् śhiv, 'spit,' lengthen their vowel:—क्राम् krām-a, आचाम् ā-cām-a, गूह् gūh-a, शीव् śhīv-a.—मृज् mrj, 'cleanse,' takes Vṛddhi: मार्ज् mārj-a.—सद् sad, 'sink,' substitutes ई ī for आ a: सीद् sīd-a (for si-s[a]da: Lat. sido).

2. गम् gam, 'go,' and यम् yam, 'restrain,' form the present stem with छ् cha (Gk. σκ): गच्छ् gá-ccha, यच्छ् yá-ccha (see below, C 2).

3. ग्रा ghrā, 'smell,' पा pā, 'drink,' स्था sthā, 'stand,' reduplicate with इ i: जिघ्रा jí-ghra, पिबा pí-ba (Lat. bi-bo), तिष्ठा tí-śha (Gk. ι-στη-μι, Lat. sisto). These verbs originally belonged to the third (reduplicating) class (ep. सद् sad above, A 1).

4. दंश् dāmś, 'bite,' मन्थ् manth, 'churn,' सञ्ज् sañj, 'adhere,' drop the nasal:—दश् dás-a, मथ् máth-a, सज् sáj-a.

5. हृश् dr̥s, 'see,' धम् dhmā, 'blow,' स्त्रा mnā, 'study,' substitute पस्य् páś-ya, धम् dhám-a, मन् mán-a.

B. Fourth or Div Class. 1. तम् tam, 'languish,' भ्रम् bhram, 'roam,' शम् śam, 'cease,' अस्रम् śram, 'be weary,' मद् mad, 'rejoice,' दिव् div, 'play,' lengthen their vowel:—ताम् tám-ya, माद् mād-ya, दीव् dívy-a, &c.

2. भ्रंश् bhrams, 'fall,' drops its nasal: भ्रस्य् bhrás-ya.—वध् vyadh, 'pierce,' takes Samprasāraṇa: विध् vídh-ya.—जन् jan, 'be born,' substitutes जा jā: जाय् já-ya (ep. 154 a, 1).

C. Sixth or Tud Class. 1. कृत् kṛt, 'cut,' मुच् muc, 'loosen,' लुप् lūp, 'break,' लिप् lip, 'paint,' विद् vid, 'find,' सिच् sic, 'sprinkle,' insert a nasal:—कृत्ता kṛnt-á, मुच्चा muñc-á, लुप्पा lump-á, लिप्पा limp-á, विन्द् vind-á, सिच्चा siñc-á.

2. इष् is, 'wish,' substitutes क् ch for ष् s, and चृ॒ त्, 'go,' adds क् ch:—इच्छ् i-cechá, चृच्छ् t-cechá (cp. A 2).

3. प्रक् prach, 'ask,' भञ्ज् bhrajj, 'fry,' व्रश् vraśc, 'cut,' take Samprasāraṇa:—पृच्छ् prech-á, भृञ्ज् bhrijj-á, वृश् vršc-á.

Second Conjugation.

134. A. Second or Ad Class.

1. The root is irregularly **strengthened** in the following verbs:—

a. यु yu, 'join,' and all other roots ending in उ u, take Vṛddhi instead of Guṇa in the strong forms before terminations beginning with consonants:—यौमि yaú-mi, but अयवम् á-yav-am.

b. मृज् mrj, 'cleanse,' takes Vṛddhi instead of Guṇa: 3. sing. मार्ष्टि mārṣ-ti (cp. 63), 3. pl. मृजन्ति mrj-ánti.

c. श्री śi, 'lie down,' Ātm., takes Guṇa throughout its weak forms, besides inserting र् r before the terminations in the 3. plur. pres., impv., impf.:—3. sg. श्रेति śe-te (Gk. κεῖ-ται), 3. pl. श्रेतते śe-r-ate, श्रेताम् śe-r-atām, अश्रेतत् á-śe-r-ata.

2. The root is irregularly **weakened** in the following verbs:—
a. वश् vas, 'desire,' takes Samprasāraṇa in the weak forms: 3. sg. वष्टि vás-ti (63 b), 3. pl. उशन्ति us-ánti.

b. अस् as, 'be,' drops its initial अ a in the optative and all the weak forms of the pres. and imperative;—e.g. 3. sg. opt. स्वात् s-yát; 3. pl. pres. सन्ति s-ánti (sunt). The 2. sing. impv. is एधि e-dhí (for az-dhí, Avestic zdi). In the imperfect it inserts हि h before the endings of the 2. 3. sing.: आसीः ás-iḥ, आसीत् ás-i-t.

c. हन् han, 'kill,' Par., drops its न् n before त् t and थ् th in the weak forms: 3. sg. हन्ति hán-ti, but 2. pl. हथ् ha-thá. In the 3. pl. pres., impv., impf. the radical अ a is dropped and the ह् h becomes घ् gh: घन्ति ghn-ánti, घन्तु ghn-ántu, अघन् á-ghn-an. The 2. sg. impv. is जहि ja-hí (for झहि jha-hí, with palatalized initial, instead of घहि gha-hí).

3. A vowel or semivowel is irregularly inserted in the following verbs :—

a. अन् an, 'breathe,' जच् jaks, 'eat,' रुद् rud, 'weep,' श्वस् śvas, 'breathe,' स्वप् svap, 'sleep,' insert इ i before terminations beginning with consonants except य y; but ई ī or आ a before the स s and त t of the 2. 3. sg. impf. Par.;—e.g. रोदिमि ród-i-mi, but रुदन्ति rud-ánti, रुद्याम् rud-yám; impf. 3. sg. अरोदीत् á-rod-ī-t or अरोदत् á-rod-a-t.

b. ईरु īd, 'praise,' and ईश् īś, 'rule,' both Ātm., insert इ i before terminations beginning with स s and ध dh (i.e. 2. sg. pl. pres. and impv.):—ईशिषे īś-i-se, ईशिष्वे īś-i-dhvye; ईशिष्व इś-i-sva, ईशिष्वम् īś-i-dhvam.

c. ब्रू brū, 'speak,' inserts ई ī in the strong forms before terminations beginning with consonants:—ब्रवीमि bráv-ī-mi (but ब्रूमः brū-máḥ), अब्रवीत् á-brav-ī-t.

d. इ i preceded by अधि adhi, 'read' (Ātm. only), resolves ई ī in the pres. and ऐ ai (angm. a+i) in the impf. before vowels into ईय् īy and ऐय् aiy:—pres. sg. 1. अधीये adhī-y-é, 2. अधीषे adhī-sé; impf. sg. 1. अधीयि adhy-ái-y-i, 2. अधीथा: adhy-ái-thāh.

4. The reduplicated verbs चकास् ca-kās, 'shine,' जच् ja-ks (for ja-gh[a]s, from ghas), 'eat,' जागृ jā-gr, 'wake' (intensive of गृ gr), दरिद्रा dari-drā (intensive of द्रा drā, 'run'), 'be poor,' though accounted verbs of the second class, follow those of the third in taking अति ati and अतु atu in the 3. pl. pres. and impv., and उर् ur for अन् an in the 3. pl. impf.:—3. sg. दरिद्राति dárí-drā-ti, 3. pl. दरिद्रति dárídr-ati; 3. pl. impf. अजक्षः á-jaks-uh.

a. शास् śás, 'rule,' follows the same analogy; it also takes शिष् śis as its weak stem before consonants:—3. sg. शास्ति śás-ti, du. शिष्टः śis-tah, pl. शासति śás-atि.

B. Third or Hu Class. 1. दा dā, 'give,' and धा dhā, 'place,' use दद् dad and दध् dadh as their stems in the weak forms. दध् dadh (against 62 b) becomes धत् dhat before त् t and थ् th: दधामि da-dhā-mi, but du. 1. दध्वः dadh-vāḥ, 2. धत्यः dhat-thāḥ. The 2. sg. impv. Par. is देहि de-hí (for da-z-dhí) and धेहि dhe-hí (for dha-z-dhí).

2. मा mā, 'measure,' and हा hā, 'depart,' both Ātm., have मिमी mi-mī and जिही ji-hī as their present stems, dropping the ई ī before vowels:—pres. sg. 1. जिहे jih-e, 2. जिहीषे jihī-ṣe, pl. 3. जिहते jih-ate; impf. sg. 1. अजिहि á-jih-i, 2. अजिहीथा: á-jihī-thāḥ, pl. 3. अजिहत् á-jih-ata.

3. हा hā, 'abandon,' Par., has जही jahī in the weak forms, dropping ई ī before vowels and य् y:—3. sg. जहाति jáhā-ti, but du. जहीतः jahī-tah, pl. जहति jah-ati; impv. 2. sg. जहीहि jahī-hi; opt. 1. sg. जह्याम् jah-yām.

C. Fifth or Su Class. 1. Roots ending in vowels may drop the उ u before व् v or म् m:—सुनोमि su-nó-mi, but सुन्वः sun-vāḥ or सुनुवः su-nu-vāḥ.

2. Roots ending in consonants change उ u to उव् uv before vowels:—शक्नुवन्ति śak-nuv-ánti.

3. श्रु śru, 'hear,' and धू dhū, 'shake,' form the present stems श्रुणु śr-ṇu and धूनु dhū-ṇu.

D. Seventh or Rudh Class. अञ्ज añj, 'anoint,' भञ्ज bhañj, 'break,' हिंस् hims, 'injure,' drop their nasal before inserting न na:—अनञ्जिम् a-ná-j-mi, भनञ्जिम् bha-ná-j-mi, हिनस्ति hi-na-s-mi.

E. Eighth or Tan Class. कृ kṛ, 'do,' takes करो kar-ō as its strong stem, and as its weak कुरु kur-u, the उ u of which must be dropped before म् m, य् y, व् v:—करोमि karó-mi, कुरुथः kuru-thāḥ; but कुर्वः kur-vāḥ, कुर्मः kur-máḥ; कुर्याम् kur-yām. Other verbs of this class may drop the उ u before व् v and म् m.

as in the fifth. When compounded with the prepositions परि pari and सम् sam, the verb कृ kṛ has an initial स् s: परिस्कृत pári-skṛta, 'adorned,' संस्कृत sām-skṛta, 'put together.' This स् s is not original.

F. Ninth or Kṛī Class. 1. धू dhū, 'shake,' पू pū, 'purify,' लू lū, 'cut,' shorten their vowel:—धुनामि dhu-ná-mi, पुनामि pu-ná-mi, लुनामि lu-ná-mi.

2. ज्ञा jñā, 'know,' and ग्रह् grah, 'seize,' are shortened to जा ja and ग्रह् gr̥h:—जानामि jā-ná-mi; गृह्णामि gr̥h-ṇá-mi (65).

3. बन्ध् bandh, 'bind,' and मन्थ् manth, 'churn,' drop the nasal:—बधामि badh-ná-mi, मथामि math-ná-mi.

The Perfect Tense.

135. This tense is formed either by reduplication or periphrastically. Roots follow the former method, derivative verbs (chiefly causatives) the latter. There are also four roots with a prosodically long initial vowel (140 a, 1) which take the periphrastic perfect.

Special Rules of Reduplication.

1. चक् r, चक् ṛ, लू l are represented by च्च a in the reduplicative syllable:—e.g. कृ kṛ, 'do': चकार ca-kār-a; तै tr, 'cross': ततार ta-tār-a; कूप् klp, 'be able': चक्कूपे ca-klp-é.

2. Initial च्च a or च्चाः a becomes च्चाः a:—e.g. चक् ad, 'eat': चाद् ád-a; चाप् āp, 'obtain': आप् áp-a (cp. 140 a, 1).

3. Roots beginning with इ i contract इ i + इ i to ई ī; but if the radical इ i takes Guna or Vṛddhi, य् y is inserted between the reduplicative syllable and the root:—e.g. इष् is, 'desire,' 3. pl. ईषुः: is-úh (for i-is-uh), but 1. sg. ईयेष i-y-éṣ-a.

4. Roots beginning with or containing य् ya or व् va, and liable to Samprasāraṇa (cp. 137, 2c), reduplicate with ई ī and उ u:—

यज् yaj, 'sacrifice': इयाज् i-yāj-a; वच् vac, 'speak': उवाच् u-vāc-a.

136. The singular perfect active is strong, like the singular active present and imperfect, the root being accented; the remaining forms are weak, the terminations being accented. The endings are the following:—

PARASMAIPADA.

SINGULAR.	DUAL.	PLURAL.
अ a	(इ)व् (i)-vá	(इ)म् (i)má
(इ)थ् (i)-tha	अथुर् á-thur ¹	अ a
अ a	अतुर् á-tur ¹	उर् úr (131, 6)

ĀTMANEPADĀ.

1. ए é	(इ)वहे (i)-váhe	(इ)महे (i)-máhe
2. (इ)षे (i)-sé	आषे áthe	(इ)ध्वे (i)-dhvé
3. ए é	आते áte	इरे i-re

a. The terminations with initial consonant are added with the **connecting vowel** इ i² except in the eight verbs: द्रु dru, 'run,' श्रु śru, 'hear,' स्तु stu, 'praise,' स्रु srū, 'flow,' कृ kr̥, 'do,' भृ bhr̥, 'bear,' वृ vr̥, 'choose,' गृ sr̥, 'go,' **where it must be omitted**. The 3. pl. Ātm. retains the इ i even in these verbs. In 2. sg. Par. it is omitted by many other verbs also, and is optional in verbs ending in आ ā, as well as in most of those ending in इ i, ई ī, उ u.

¹ In these two dual forms उर् ur has been borrowed from the 3. pl., the two endings थुर् thur and तुर् tur corresponding to the 2. 3. du. pres. थस् thas and तस् tas.

² This इ i was in origin probably the reduced form of the final आ ā of roots like दा dā, 'give,' and became the starting-point of इ i as a connecting vowel in other verbs.

The Strong Stem.

1. Short vowels followed by a single consonant take Guṇa throughout the singular;—e. g. इष् is, ‘wish’: इयेष् i-y-ēṣ; बुध् budh, ‘wake’: बुबोध् bu-bódh; but जीव् jīv, ‘live’: जिजीव् ji-jīv.

2. Final vowels take Vṛddhi or Guṇa in the first person singular, Guṇa in the second, Vṛddhi only in the third;—e. g. इ॒ ि, ‘go’:

1. इयाय् i-y-āy-a or इय्य् i-y-āy-a; 2. इयेथ् i-y-é-tha; 3. इयाथ् i-y-āy-a; कृ॑ क्रि, ‘do’: 1. चकार् ca-kár-a or चकर् ca-kár-a;

2. चकर्थ् ca-kár-tha; 3. चकार् ca-kár-a.

3. Medial अ a followed by a single consonant takes Vṛddhi in sg. 3. and optionally in 1.;—e. g. हन् han, ‘kill’: 1. जघान् jaghán-a or जघन् jaghán-a, 3. जघान् jaghán-a.

4. Roots ending in आ ā (or diphthongs: 129, 8) take औ au in 1. 3. sg., and may retain आ ā before थ tha in 2. sg. (ep. 136 a);—e. g. धा dhā, ‘place’: 1. 3. दधौ॑ da-dháu, 2. दधाथ॒ dadhā-tha or दधिथ॒ dadh-i-thá.

But छा hvā or ह्वे॑ hve, ‘call,’ is treated as हु॑ hū:—3. sg. जुहाव् ju-hāv-a (ep. 154 a, 3).

The Weak Stem.

137. 1. In roots containing the vowels ि, ु, ऊ, the **radical syllable** remains **unchanged**, except by Sandhi;—e. g. बुध् budh: बुबुधिम् bu-budh-i-ma; कृ॑ क्रि॑ क्रम्॑ क्रमा॑ क्रम॑ स्तु॑ स्तु॑ स्तु॑ मा॑ tu-s्तु॑-má.

a. Before terminations beginning with vowels final इ॑ i, ई॑ i, ऊ॑ ऊ॑ if preceded by one consonant become य॑ y, र॑ r, if by more than one, इ॑ iy, आ॑ ar; while उ॑ u, ऊ॑ ū, and ऊ॑ ऊ॑ always become उ॑ uv and आ॑ ar;—e. g. नी॑ nī, ‘lead’: निन्य॑ ni-ny-úh; श्री॑ śrī, ‘resort’: शिश्रिय॑ śi-śriy-úh; कृ॑ क्रि॑ क्र॑ क्र॑ ऊ॑ ऊ॑ स्त्र॑ str,

'strew': तस्त्रः ta-star-úh; यु Yu, 'join': युयुवः yu-yuv-úh; क्लृ kṛi, 'scatter': चक्लः ca-kar-úh.

2. In roots containing a medial अ a or a final आ ā, the radical syllable is weakened.

a. Roots in which अ a is preceded and followed by a single consonant (e.g. पत् pat), and which reduplicate the initial consonant unchanged (this excludes roots beginning with aspirates, gutturals, and for the most part व् v), contract the two syllables to one with the diphthong ए e (cp. Lat. fāc-iō, fēc-ī)¹. This contraction takes place even in 2. sg. Par. when अ tha is added with इ i (the strong form being used when अ tha is added without इ i);—e.g. पच् pac, 'cook': 2. sg. पेचिथ pec-i-thá (but पपकथ papák-tha), 3. pl. पेचुः pec-úh; तन् tan, 'stretch': तेनिथ ten-i-thá, तेनुः ten-úh.

b. जन् jan (139, 2), 'be born,' and four roots with medial अ a beginning with gutturals, viz. खन् khan, 'dig,' गम् gam, 'go,' घस् ghas, 'eat,' हन् han, 'kill,' weaken the root by dropping the radical vowel:—3. sg. Ātm. जज्ञे ja-jñ-é; 3. sg. Par. जगाम ja-gám-a, but 3. pl. जगमुः ja-gm-úh; जघास ja-ghás-a, but जघुः ja-ks-úh; जघान ja-ghán-a, but जघ्नुः ja-ghn-úh (cp. 134, 2 c).

c. Five roots beginning with व् va, viz. वच् vac, 'speak,' वद् vad, 'speak,' वप् vap, 'strew,' वस् vas, 'dwell,' वह् vah, 'carry'; also यज् yaj, 'sacrifice,' व्यध् vyadh, 'pierce,' खप् svap, 'sleep,' ग्रह् grah, 'seize,' take Samprasāraṇa. In the first five उ u + उ u (cp. 135, 4) contract to ऊ ū, in the sixth इ i + इ i to ई ī:—3. sg. उवाच u-vác-a, but pl. ऊचुः ūc-úh (for u-uc-úh); इयाज i-yaj-a, but ईजुः īj-úh (for i-ij-úh); सुष्वाप su-sváp-a (67), but सुषुपुः su-sup-úh; जयाह ja-gráh-a, but जगृः ja-grh-úh.

¹ This vowel spread from contracted forms like sa-z-d (Avestic hazd), weak perfect stem of sad, 'sit' (az becoming e; cp. 134, 2 b and 133 A 1).

d. Roots ending in आ ā drop it in all the weak forms, and optionally in 2. sg. Par. (see 136 a and 138, 3).

Irregularities.

139. 1. भज् bhaj, 'share,' though beginning with an aspirate, follows the analogy of the contracting verbs with ए e (137, 2 a): 3. sg. बभाज् ba-bháj-a, but 3. pl. भेजुः bhej-úh. Similarly राज् rāj, 'shine' (medial ा), and optionally त्रस् tras, 'tremble' (two initial consonants), and भ्रम् bhram, 'wander' (initial aspirate, two consonants):—3. sg. A. रेजे rej-e; 3. pl. P. तत्रसुः ta-tras-uh or त्रेसुः tres-uh; बध्रमुः ba-bhram-uh or भ्रेमुः bhrem-uh.

2. यम् yam, 'reach,' and वम् vam, 'vomit,' though beginning with य ya and व va, do not take Samprasāraṇa, but follow 137, 2 a:—यद्याम् ya-yáma, but येमे yem-é; ववाम् va-vām-a, but वेमुः vem-uh; while वस् vas, 'wear,' Ātm., does not weaken the root at all:—ववसे va-vas-e.

3. विद् vid, 'know,' forms an unreduplicated perfect with present meaning: वेद् véd-a, 'I know' (Gk. οἶδα, Germ. weiss), वेत्य vét-tha (οἴσθα), वेद् véd-a (οἴδε); विद् vid-má (ἰδ-μεν, wissen), विद् vid-á, विदुः vid-úh.

4. चि ci, 'gather,' जि ji, 'conquer,' हि hi, 'impel,' हन् han, 'kill,' revert to their original guttural in the radical syllable:—चिकाय् ci-káy-a, जिगाय् ji-gáy-a, जिघाय् ji-gháy-a, जघान् ja-ghán-a (cp. 137, 2 b).

5. आह् ah, 'say,' is defective, forming only 2. sg. dual and 3. sg. dual pl.:—आत्य् át-tha, आह् áh-a; आहथुः áh-áthuh, आहतुः áh-átuh; आङ्गः áh-úh.

6. अंश् amś, 'reach,' reduplicates with the syllable आन् ān, in which the radical nasal is repeated with the initial vowel (cf. Gk. aor. inf. ἐν-εγκ-εῖν); on the other hand, the radical nasal is dropped in the weak forms: 3. sg. P. आनंश् ān-ámśa, 3. pl. A. आनश्वरे ān-ás-ire. The analogy of this verb is followed by आर्च् arc, 'praise':—3. sg. आनर्च् ān-árc-a.

7. भू bhū, 'be,' has the double irregularity of reduplicating with अ a and retaining its त् tū throughout (cp. Gk. πε-φύ-ασι) :—

बभूव ba-bhū-v-a	बभूविव ba-bhū-v-i-vá	बभूविम ba-bhū-v-i-má
बभूथ ba-bhū-tha		
बभूविथ ba-bhū-v-i-tha	बभूवषुः ba-bhū-v-áthuh	बभूव ba-bhū-v-á
बभूव ba-bhū-v-a	बभूवतुः ba-bhū-v-átuḥ	बभूतुः ba-bhū-v-úḥ

Periphrastic Perfect.

140. The verbs which cannot reduplicate, form their perfect by making an abstract feminine noun in the accusative, आम् ám, and adding to this the reduplicated perfect of त् kr, 'do,' अस् as, 'be,' or भू bhū, 'be.' This formation started with the employment of the transitive verb त् kr, e.g. गमयां चकार् gamayám cakāra, 'he did going,' i.e. 'he did go'; but in classical Sanskrit the periphrastic perfect is usually formed with अस् as, the other two auxiliaries occurring only exceptionally. The periphrastic perfect is almost entirely limited to the derivative verbs in अथ् aya (tenth class, causatives, and denominatives);—e.g. बोधया-मास bodhayám āsa, 'he awakened.' Hardly any examples of desideratives or intensives are found in this tense.

a. The following are the few primary verbs taking the periphrastic perfect:—

1. four roots beginning with a prosodically long vowel: आस् ās, 'sit,' ईक् iks, 'see,' उज्ज्ञ् ujjh, 'forsake,' एध् edh, 'thrive';—e.g. आसां चक्रे ās-ām cakre, 'he sat.'

2. the reduplicated roots चकास् ca-kās, 'shine,' and जाग् jā-gr, 'awake' (properly an intensive, 134 A 4):—चकासां चकार् cakās-ām cakāra, जागरामास् jāgar-ām āsa.

3. the roots भू bhr, 'bear,' and, in the Epics, नी nī, 'lead,' and ह्वे hve, 'call,' optionally:—विभरां बभूव bibhar-ām babhūva or

बभार ba-bhār-a, 'he bore'; (आ)नयामास (ā-)nayām āśa or निनाय ni-nāy-a, 'he brought'; द्वयामास hvay-ām āśa or जुहाव ju-hāv-a, 'he called.'

Paradigm of the Periphrastic Perfect.

Aorist.

141. There are two kinds of aorists in Sanskrit, as in Greek. The First is formed by inserting a sibilant between root and termination, the Second by adding the terminations to the root with or without the connecting vowel आ a. Both aorists take the augment (which is accented) and the secondary terminations. There are four forms of the First Aorist, and three of the Second.

First Aorist.

a. The **first form** is made by adding to the augmented root the suffix स sa, and is **inflected like an imperfect of the first conjugation** (ā-bhava-t) except in the Ātm. 1. sg., 2. 3. dual (where it follows the impf. of द्विष् dviṣ). It is taken by only a few roots ending in श् ś and ह् h (which become क् k before स् s: 63 b; 69 a), and containing the vowels इ i, उ u, or ऊ ū, which remain unchanged;—e.g. दिष् dis, 'point': 3. sg. अदिक्षत् ā-dik-ṣa-t. This form corresponds to the Greek First Aorist (ε-δειξε, Lat. dixi-t).

3. अदिक्षत्	अदिक्षाताम्	अदिक्षन्त
á-dikṣa-ta	á-dikṣ-ātām	á-dikṣ-anta

b. Similarly inflected is the aorist of दुहू duh, 'milk,' the stem of which is á-dhuk-ṣa (55):—Par. 1. sg. अधुक्षम् á-dhuk-ṣa-m, Ātm. अधुक्षि á-dhuk-ṣ-i. ✗

142. The other three forms of the First Aorist are made by adding to the augmented root the suffixes स् s, इष् i-ṣ, सिष् s-i-ṣ respectively, and are inflected like imperfects of the second conjugation (á-dves-am). The sis-form is used, in the Par. only, by a few roots ending in आ ā, which remains unchanged throughout. The s-form and iṣ-form are used by roots ending in other vowels than आ ā, or in consonants; both have Vṛddhi throughout the Parasmaipada (a medial vowel has only Guna in the iṣ-form) and Guna throughout the Ātmanepada (a medial vowel and final च् ḍ remain unchanged in the s-form). All three forms have the peculiar endings ईस् is, ईत् it in the 2. 3. sing. Par., and must take उर् ur in the 3. plur.

Second or s-form.

143. 1. नी nī, 'lead,' as an example of a root ending in a vowel:—

PARASMAIPADA.

2. अच्छित्याः (66 B 2)	अच्छित्साथाम्	अच्छिद्धम् (66 B 2)

3. अच्छित्त (66 B 2)	अच्छित्साताम्	अच्छित्सत
á-cchit-ta	á-cchit-s-ātām	á-cchit-s-ata

a. द्वा kr, 'do,' as ending in द्वा r, is similarly inflected:—Par. अकार्षम् á-kār-s-am, अकार्षीः á-kār-s-īḥ, अकार्षीत् á-kār-s-īt, &c. Ātm. अकृषि á-kr-s-i, अकृथाः á-kr-thāḥ, अकृत् á-kr-ta, &c. The last two forms do not properly belong to the s-aorist, being borrowed from the second form of the root aorist (148) which is not otherwise inflected in the Ātm.

Irregularities of the s-form.

144. 1. Before the suffix स् s final radical (a) न् n as well as म् m becomes Anusvāra (cp. 66 A 2);—e.g. अमंस्त् á-mam̑-sta, from मन् man, 'think,' as well as अरंस्त् á-ram̑-sta, from रम् ram, 'be glad' (cp. 42 B 1); (b) स् s in the verb वस् vas, 'dwell,' becomes त् t: अवात्सीत् a-vāt-sít (66 B 1).

2. The termination ध्वम् dhvam (before which the स् s of the aorist is always lost) becomes ध्वूम् dhwam when the स् s would have been cerebralized (cp. 66 B 2);—e.g. अनेध्वूम् á-ne-dhwam (for á-ne-s-dhvam), अकृध्वूम् á-kr-dhwam (for á-kr-s-dhvam).

3. दा dā, 'give,' धा dhā, 'place,' स्था sthā, 'stand' (which takes the second aorist in the Par., 148), weaken their vowel to ई i (cp. 136 a, note 2) before the terminations of the Ātmanepada:—अदिषि á-di-s-i, अदिथाः á-di-thāḥ (cp. 143 a), अदित् á-di-ta (ई-δो-το), अदिष्वहि á-di-s-vaḥi, &c.

4. दृश् drś, 'see,' सृज् srj, 'create,' सृप्त् sprś, 'touch,' take Vṛddhi with metathesis in the Par.;—e.g. 3. sg. अस्त्राक्षीत् á-srāk-sít (63 a, note 2), du. अस्त्राष्टाम् á-srās-tām (63 a; 66 B 2), pl. अस्त्राक्षुः á-srāk-suh; Ā. अस्त्रक्षि á-sȓk-si, अस्त्रष्टाः á-sȓs-thāḥ, अस्त्रष्टु एस्र̑s-ta, &c.

5. The aorist of दह् dah, 'burn,' and रुध् rudh, 'hinder,' is difficult owing to the Sandhi (69 a; 62 b):—sg. अधाक्षम् á-dhāk-sam,

अधाक्षः á-dhāk-sūh, **अधाक्षीत्** á-dhāk-sit; du. **अधाक्ष्व** á-dhāk-sva, **अदाग्धम्** á-dāg-dham, **अदाग्धाम्** á-dāg-dhām; pl. **अधाक्ष्वा** á-dhāk-sma, **अदाग्धा** á-dāg-dha, **अधाक्षः** á-dhāk-suh; Ā. sg. **अधक्षि** á-dhak-s-i, **अदग्धाः** á-dag-dhāh, **अदग्ध** á-dag-dha; **अधक्ष्वहि** á-dhak-svahi, **अधक्षाधाम्** á-dhak-sāthām, **अधक्षाताम्** á-dhak-s-ātām; pl. **अधक्ष्वहि** á-dhak-smahi, **अधग्धम्** á-dhag-dhvam (62 a), **अधक्षत्** á-dhak-s-ata; **अरौद्रसम्** á-raut-sam; du. 2. **अरौद्रम्** á-raud-dham (62 b), pl. 2. **अरौद्रा** á-raud-dha; Ātm. sing. 1. **अरुत्सि** á-rut-s-i, 2. **अरुद्धाः** á-rud-dhāh, 3. **अरुद्धा** á-rud-dha; pl. 2. **अरुद्धम्** á-rud-dhvam, 3. **अरुत्सत्** á-rut-s-ata.

Third or is-form.

145. This form differs from the preceding merely in adding the स् s with the connecting vowel ई i (which changes it to ई s, 67). The endings of the 2. 3. sg. are ईस् is, ईत् it (for is-s, is-t; cp. 28; 150). Hardly any Parasmaipada forms of is-aorists from roots ending in vowels occur in classical Sanskrit, but one such, formed from पूँ pū, 'purify,' in the older language and inflected in both voices, may be taken as a paradigm for the active as well as the middle:—

PARASMAIPADA.

1. अपाविष्म	अपाविष्व	अपाविष्म
á-pāv-is-am	á-pāv-is-va	á-pāv-is-ma
2. अपावीः	अपाविष्टम्	अपाविष्ट
á-pāv-īh	á-pāv-is-tam	á-pāv-is-ta
3. अपावीत्	अपाविष्टाम्	अपाविष्टः
á-pāv-it	á-pāv-is-tām	á-pāv-is-uh

ĀTMANEPAḌA.

1. अपविष्टि	अपविष्ट्वहि	अपविष्ट्वहि
á-pav-iṣ-i	á-pav-iṣ-vahi	á-pav-iṣ-mahi
2. अपविष्टाः	अपविषाथाम्	अपविष्टम्
á-pav-iṣ-ṭhāḥ	á-pav-iṣ-āthām	á-pav-i-ḍhvam (144, 2)
3. अपविष्ट	अपविषाताम्	अपविषत्
á-pav-iṣ-ṭa	á-pav-iṣ-ātām	á-pav-iṣ-ata

a. बुध् budh, 'awake,' as an example of a root ending in a consonant, does not take Vṛddhi in the Par. (142):—

PARASMAIPADA.

1. अबोधिष्म	अबोधिष्व	अबोधिष्म
á-bodh-iṣ-am	á-bodh-iṣ-va	á-bodh-iṣ-ma
2. अबोधीः	अबोधिष्टम्	अबोधिष्ट

3. अबोधीत्	अबोधिष्टाम्	अबोधिषुः

ĀTMANEPAḌA.

1. अबोधिष्टि	अबोधिष्वहि	अबोधिष्महि
á-bodh-iṣ-i	á-bodh-iṣ-vahi	á-bodh-iṣ-mahi
2. अबोधिष्टाः	अबोधिषाथाम्	अबोधिष्टम् (144, 2)
á-bodh-iṣ-ṭhāḥ	á-bodh-iṣ-āthām	á-bodh-i-ḍhvam
3. अबोधिष्ट	अबोधिषाताम्	अबोधिषत्
á-bodh-iṣ-ṭa	á-bodh-iṣ-ātām	á-bodh-iṣ-ata

b. मद् mad, 'exhilarate,' and वद् vad, 'speak,' take Vṛddhi in the Par.: अमादिषुः á-mād-iṣ-uh; अवादीत् á-vād-iṭ.

Fourth or sis-form.

146. This form differs from the preceding one simply in prefixing an additional स् s to the suffix. It is conjugated in the Parasmaipada only, and is used by not more than six roots, all ending in आ ā. या yā, 'go,' may serve as an example:—

PARASMAIPADA.

1. अयासिषम्	अयासिष्व	अयासिष्म
á-yā-siṣ-am	á-yā-siṣ-va	á-yā-siṣ-ma
2. अयासीः	अयासिष्टम्	अयासिष्ट
á-yā-sīḥ	á-yā-siṣ-tam	á-yā-siṣ-ṭa
3. अयासीत्	अयासिष्टाम्	अयासिष्टुः
á-yā-sīt	á-yā-siṣ-tām	á-yā-siṣ-ṭuh

Second Aorist.

147. This aorist is like an imperfect formed directly from the root, the terminations being added with or without the connecting vowel आ a.

The **first form** is like an imperfect of the sixth class, the stem being formed by adding आ a to the unmodified root. It corresponds to the Second Aorist of the first conjugation in Greek (*ε-τυπ-ο-ν*). The inflexion of this aorist formed from सिच् sic, 'sprinkle,' is as follows:—

PARASMAIPADA.

1. असिचम्	असिचाव	असिचाम्
á-sic-am	á-sicā-va	á-sicā-ma
2. असिचः	असिचतम्	असिचत्
á-sica-h	á-sica-tam	á-sica-ta
3. असिचत्	असिचताम्	असिचन्
á-sica-t	á-sica-tām	á-sic-an

ATMANEPADA.

1. असिचे	असिचावहि	असिचामहि
á-sic-e	á-sicā-vahi	á-sicā-mahi
2. असिचथा:	असिचेथाम्	असिचध्वम्
á-sica-thāḥ	á-sic-ethām	á-sica-dhvam
3. असिचत	असिचेताम्	असिचन्त
á-sica-ta	á-sic-etām	á-sic-anta

Irregularities.

- a. 1. ख्या khyā, 'tell,' substitutes अ a for आ ā: अख्यत् á-khyā-t.—2. दृश् dṛś, 'see,' takes Guṇa: अदर्शत् á-darś-a-t.—3. अस् as, 'throw,' adds थ् th to the root: आस्थत् ás-th-a-t¹.—4. पत् pat, 'fall,' and वच् vac, 'speak,' form contracted reduplicated aorists:—अपत्तम् á-pa-pt-am, अवोचम् á-voc-am (for á-va-uc-am, cp. Gk. ἐ-επ-ο-ν).

Second Form.

148. The imperfect terminations of the second conjugation are attached to the root. This form corresponds to the Second Aorist of the second conjugation in Greek:—अधाम् á-dhā-m, 'I placed' (ε-θη-ν); अस्थात् á-sthā-t, 'he stood' (ε-στη); अगात् á-gā-t, 'he went' (ε-βη); अभूत् á-bhū-t, 'he became' (ε-φυ). A few verbs ending in आ ā (as well as भु bhū, 'be') take this form. This आ ā is retained throughout except before the उर् ur of the 3. pl. There is no Ātmanepada (cp. 143 a; 144, 3).

1. दा dā, 'give':— PARASMAIPADA.

1. अदाम् á-dā-m	अदाव् á-dā-va	अदाम् á-dā-ma
2. अदा: á-dā-h	अदातम् á-dā-tam	अदात् á-dā-ta
3. अदात् á-dā-t	अदाताम् á-dā-tām	अदुः á-d-uh

¹ The root of this aorist is, however, probably स्था sthā, 'stand,' with the vowel shortened as in अख्यत् á-khyat.

2. भू bhū, 'be':— PARASMAIPADA.

1. अभूवम् á-bhū-v-am	अभूव् á-bhū-va	अभूम् á-bhū-ma
2. अभूः á-bhū-h	अभूतम् á-bhū-tam	अभूत् á-bhū-ta
3. अभूत् á-bhū-t	अभूताम् á-bhū-tām	अभूवन् á-bhū-v-an

Third or Reduplicated Form.

149. Excepting the primary verbs द्रु dru, 'run,' and श्री śri, 'go,' this aorist has attached itself to the secondary conjugation in अय् aya (tenth class and causatives). The stem is formed by a peculiar reduplication of the root, to which अ a is attached. The inflexion is like that of an imperfect of the first conjugation. Upwards of forty verbs take this aorist in classical Sanskrit.

Special Rules of Reduplication.

1. अ a, आ ā, उ ū, ऊ ū, उ॒ ū] are represented in the reduplicative syllable by उ i.

2. The vowel of the reduplicative syllable, unless already long by position, is lengthened.

The quantity of the first three syllables of the stem is thus almost invariably उ—उ: ा-जी-ज॑-न-अ, ा-जी-ग्र॒-ह-अ, ा-सी-शी-य-अ, ा-वी-वි-॑-अ, ा-दी-द॒-॒-अ (from दी), ा-दु-द्र॒-॒-व-अ, ा-मू-॑-॒-अ, ा-की-क॒-॒-प-अ.

मुच् muc, 'release': stem अमूमुच् a-mū-muc-a:—

PARASMAIPADA.

1. अमूमुचम्	अमूमुचाव	अमूमुचाम्
a-mūmuc-am	a-mūmucā-va	a-mūmucā-ma

3. अमूमुचत्	अमूमुचताम्	अमूमुचन्

a-mūmuc-e	a-mūmucā-vahi	a-mūmucā-mahi
2. अमूमुचथा:	अमूमुचेथाम्	अमूमुचध्वम्

3. अमूमुचत	अमूमुचेताम्	अमूमुचन्त
a-mūmuca-ta	a-mūmuc-etām	a-mūmuc-anta.

Irregularities.

a. 1. राध् rādh, 'succeed,' and व्यध् vyadh, 'pierce,' shorten their radical syllable, so as to produce the prevailing rhythm : अरीरधत् ā-rī-rādh-a-t, अवीविधत् ā-vī-vidh-a-t (cp. 133 B 2).

2. दीप् dīp, 'shine,' and मील् mīl, 'wink,' retaining their long radical vowel, do not lengthen the reduplicative syllable, thus inverting the usual quantity of these two syllables : अदिदीपत् a-didīp-a-t, अमिमीलत् a-mimil-a-t.

Benedictive or Precative.

150. The active of this form is very rare, while the middle does not occur at all, in classical Sanskrit. It is an aorist optative, being formed by adding the terminations directly to the root. The terminations are those of the optative of the second conjugation, with स s inserted between या yā and the personal inflexions. The endings of the 2. 3. sing. are यास् yās (for yā-s-s), यात् yāt (for yās=yā-s-t: cp. 28; 145), being thus identical in form with those of the optative present (131). The Benedictive Par. of बुध् budh, 'awake,' would be formed as follows :—

1. बुध्यासम्	बुध्यास्त्	बुध्यास्मि
budh-yá-s-am	budh-yá-s-va	budh-yá-s-ma
2. बुध्याः	बुध्यास्तम्	बुध्यास्तः
budh-yá-h	budh-yá-s-tam	budh-yá-s-ta
3. बुध्यात्	बुध्यास्ताम्	बुध्यासुः
budh-yá-t	budh-yá-s-tām	budh-yá-s-uḥ

Simple Future.

151. The future is formed by adding to the stem the suffix स्या syá, or, with the connecting vowel इ i, इष्या i-syá, and is inflected like a present of the first conjugation (bhávāmi). Most roots ending in vowels (except चक् r̥) take स्या sya, more than half of those ending in consonants take इष्या isya. Derivative verbs regularly take the latter.

a. Final vowels and prosodically short medial vowels take Guṇa;— e.g. इ i, 'go': एष्यति e-syá-ti; बुध् budh, 'awake': भोत्स्यते bhot-sya-te (55); रुध् rudh, 'hinder': रोत्स्यति rot-sya-ti; कृ kr̥, 'do': करिष्यति kar-i-syá-ti; भू bhū, 'be': भविष्यति bhav-i-syá-ti.

1. Several roots take both forms;—e.g. दह् dah, 'burn': धक्ष्यति dhak-syá-ti (55) and दहिष्यति dah-i-syá-ti.

2. Derivatives in अय् aya retain their present stem, dropping only their final अ a;—e.g. चोरय् cor-aya, 'steal': चोरयिष्यति coray-i-syá-ti.

3. दास्यते	दास्यते	दास्यन्ते
dā-syá-te	dā-sy-éte	dā-sy-ántē

Irregularities.

b. 1. Several verbs have र् ra instead of अर् ar before स्या sya (cp. 144, 4):— दृश् drś, 'see,' वृज् srj, 'emit,' वृप् srp, 'creep,' सृष् sprś, 'touch': द्रक्ष्यति drak-syá-ti (63 b), स्रक्ष्यति srak-syá-ti (63 a), सप्त्यति srap-sya-ti, स्पृक्ष्यति s̄p rak-syá-ti.

2. A few verbs strengthen the root with a nasal before स्या sya:— नश् nas, 'be lost': नाङ्क्ष्यति naṅk-syati as well as नश्यति naś-i-sya-ti; मञ्ज् majj, 'sink': माङ्क्ष्यति maṅk-syá-ti.

3. वस् vas, 'dwell,' changes its स् s to त् t before स्या sya: वत्स्यति vat-sya-ti (66 B 1).

4. ग्रह् grah, 'seize,' takes ई ī instead of ई i as its connecting vowel: ग्रहीष्यति grah-ī-syá-ti (cp. 160, 3 a).

Periphrastic Future.

152. It is formed by adding the present of the verb अस् as, 'be,' to the nom. masc. of an agent noun in तृ -tr (101). The nom. sing. is used in all forms except the third persons dual and plural, in which the nom. dual and plural appear. The auxiliary is omitted in the third persons. The Parasmaipada only is found in use. About forty verbs, chiefly in the Epics, take this form of the future.

a. तृ tr is added, with or without ई ī, to the guṇated root, much in the same way as स्या sya. But roots ending in च्छ् r, as well as गम् gam, 'go,' and हन् han, 'kill,' reject the connecting vowel:—कृ kr: कर्तास्मि kartāsmi (but करिष्यामि kar-i-syā-mi); गन्तास्मि gantāsmi (but गमिष्यामि gam-i-syā-mi).

Conditional.

153. This is a past tense of the future, meaning 'would have.' It is formed by turning the simple future into a past, which is inflected like an imperfect of the first conjugation (ábhavam). Extremely rare even in the Par., it is still rarer in the Ātm. It is to be met with chiefly in the Epics and the dramas. Examples are:—from भू bhū, 'be': (fut. भविष्यामि bhav-i-syámi) अभविष्यम् á-bhavisy-am, अभविष्यः á-bhaviṣya-h, अभविष्यत् á-bhavisya-t, &c.; Ātm. अभविष्ये á-bhavisy-e, &c.; इ i, 'go': (fut. एष्यामि e-syá-mi) ऐष्यम् áisy-am, ऐष्यः áisy-a-h, ऐष्यत् áisy-a-t, &c.; Ātm. ऐष्ये áisy-e, &c.

Passive.

154. The passive, which takes the terminations of the Ātmāne-pada, differs from the latter only in the forms made from the present stem and in 3. sg. aor. From the Ātm. of verbs of the fourth class it differs in accent only: नह्यते náh-yá-te, 'he binds'; नह्यते nah-yá-te, 'he is bound.'

Before adding या, the root undergoes the following changes:—

1. Final आ ā (or diphthongs : 129, 8) remains or becomes ई ī;—e.g. ज्ञा jñā, 'know': ज्ञायते jñā-yá-te; पा pā, 'drink': पीयते pī-yá-te; गा gā, 'sing' (or गै gai): गीयते gī-yá-te.

2. Final इ i and उ u are lengthened;—e.g. इ i, 'go': ईयते ī-yá-te; चि ci, 'collect': चीयते cī-yá-te; श्रु śru, 'hear': श्रूयते śrū-yá-te.

3. Final च्छ r, after a single consonant becomes रि ri, after two consonants, अर् ar;—e.g. क्र kr, 'do': क्रियते kri-yá-te; but स्मृ smṛ, 'remember': स्मर्यते smar-yá-te.

4. Final च्छ ī is changed to ईर् īr and, after labials, to ऊर् ūr;—e.g. क्षि kṣi, 'scatter': कीर्यते kīr-yá-te; स्त्रि stři, 'strew': स्तीर्यते stīr-yá-te; but पूर् pṛ, 'fill' (the only example): पूर्यते pūr-yá-te.

5. Roots ending in a consonant preceded by a nasal, lose the nasal;—e.g. भञ्ज् bhañj, 'break': भज्यते bhaj-yá-te.

6. Roots liable to Samprasāraṇa (137, 2c) take it;—e.g. यज् yaj: इज्यते ij-yá-te; वच् vac: उच्यते uc-yá-te; ग्रह् grah: गृह्यते grh-yá-te; स्वप् svap: सुप्यते sup-yá-te.

7. Derivative verbs in अय् aya drop the suffix while retaining the strong radical vowel;—e.g. चोरय् cor-aya: चोर्यते cor-yate; कारय् kār-aya (from क्र kr): कार्यते kār-ya-te.

The passive of भू bhū, 'be,' would be inflected as follows:—

PRESENT.

1. भूये	भूयावहे	भूयामहे
bhū-y-é	bhū-yá-vahē	bhū-yá-mahē
2. भूयसे	भूयेथे	भूयध्वे

Irregularities.

a. 1. खन् khan, 'dig,' has either खन्यते khan-yá-te or खायते khā-yá-te; तन् tan, 'stretch': तन्यते tan-yá-te or तायते tā-yá-te; जन् jan, 'beget,' has जायते já-yá-te, 'is born' (properly an Ātm. of the fourth class: cp. 133 B 2).

2. शास् śás, 'command,' has either शास्यते śás-yá-te or शिष्यते śiś-yá-te (cp. 134, 4 a).

३. छा hvā, 'call' (or छे hve), has हयते hū-yáte (cp. 136, 4); वा vā (or वे ve), 'weave,' ऊयते ū-yá-te.

Aorist Passive.

155. The Ātm. of this tense supplies the place of the passive except in the **third person singular**, which has a special form. Here the augmented root adds the suffix ई i, which requires Vṛddhi of a final vowel and Guṇa of a medial vowel (but अ a is lengthened) followed by a single consonant; after आ ā, a य् y is inserted;—e. g. श्रु śru, 'hear': अश्रावि á-srāv-i; कृ kr̥, 'do': अकारि á-kār-i; पद् pad, 'walk': अपादि á-pād-i; विश् vis, 'enter': अवेशि a-ves-i; मुच् muc, 'release': अमोचि á-moc-i; ज्ञा jñā, 'know': अज्ञाचि á-jñā-y-i.

a. The following are peculiarities or **irregularities** in this formation:—1. रभ् rabh, 'seize,' shows the nasalized form of the root: अरभि a-rambh-i.—2. पू पी pī, 'fill,' has अपूरि a-pūr-i (cp. 154, 4).—3. गम् gam, 'go,' रच् rac, 'fashion,' वध् vad, 'slay,' do not lengthen their अ a: अगमि a-gam-i, अरचि a-rac-i, अवधि a-vadh-i.—4. Verbs in आय aya drop the suffix (cp. 154, 7): रोपय rop-aya, causative of रह् ruh, 'mount': अरोपि a-rop-i.

PARTICIPLES, GERUNDS, AND INFINITIVE.

I. Active Participles.

156. The stem of the **present** and **future** participles Par. is formed with the suffix अत् at (cp. 85). The strong stem is obtained by dropping the ई i of the 3. pl. pres. and fut. Par.: hence **verbs of the third class and other reduplicated verbs** (134 A 4) **have no nasal** in the strong stem of the **pres.** part., while the **fut.** part. **always** has अन् ant as its strong stem. Thus:—

PRES. 3. pl.	PRES. PART. (strong).	FUT. 3. pl.	FUT. PART. (strong).
भवन्ति <i>bhávant-i</i> (1)	भवन् bhávant	भविष्यन्ति bhav-isyánt-i	भविष्यन् bhaviṣyánt
क्रीणन्ति krī-ṇ-ánt-i (9)	क्रीणन् krīṇánt	क्रेष्यन्ति kre-ṣyánt-i	क्रेष्यन् kresyánt
जुह्वति júhv-at-i (3)	जुह्वत् júhvat	होष्यन्ति ho-ṣyánt-i	होष्यन् hosyánt

a. The strong stem of the pres. part. of अस् as, 'be,' is सन्त् sánt (3. pl. सन्ति s-ánt-i); that of हन् han, 'slay,' is घन् ghn-ánt (3. pl. घन्ति ghn-ant-i)¹.

157. The **reduplicated perfect participle** (89) is most easily formed by taking the 3. pl. Par., with which the weakest stem is practically identical (only that र् r² must be changed to स् s which, being always followed by a vowel, appears as ष् ṣ). In forming the middle and strong stems from this, the final vowel of the root (changed to a semivowel before उस् us) must be restored, and in verbs which, after dropping उर् ur, become monosyllabic, ई i must be inserted:—

3. PLUR.	WEAKEST STEM.	STRONG STEM.	MIDDLE STEM.
चक्रः ca-kr-úḥ	चक्रुषा cakr-úṣ-ā	चक्रवांसम् cakr-váṁśam	चक्रवद्धिः cakr-vád-bhiḥ
बभूवुः babhū-v-úḥ	बभूवुषा babhū-v-úṣ-ā	बभूवांसम् babhū-váṁśam	बभूवद्धिः babhū-vád-bhiḥ
तेनुः ten-úḥ	तेनुषा ten-úṣ-ā	तेनिवांसम् ten-i-váṁśam	तेनिवद्धिः ten-i-vád-bhiḥ
ईजुः īj-úḥ	ईजुषा īj-úṣ-ā	ईजिवांसम् īj-i-váṁśam	ईजिवद्धिः īj-i-vád-bhiḥ

¹ On the declension of participles in अत् at, see 85; on the formation of their feminine stems, 95 a.

² Cp. 131, 6.

a. The participle of the present perfect of विद् vid, 'know' (3. pl. विदुः: vid-ūḥ), does not take the intermediate इ i:—inst. sg. विदुषा vidūṣā; acc. विद्वांसम् vid-vāṁs-am; inst. pl. विद्वन्नः vidvād-bhiḥ.

II. Ātmanepada and Passive Participles.

158. Present and Future Participles Ātmanepada and Passive are formed with the suffix मान māna, which is added after dropping the 3. pl. termination न्ते -nte:—Ātm. pres. भवमान bhāva-māna, fut. भविष्यमाण bhavisyá-māna; Pass. pres. भूयमान bhūyá-māna.

a. The second conjugation takes आन ānā in the pres. Ātm.: जुह्वान júhv-ānā (but fut. होष्यमाण hōsyá-māna, Pass. pres. हृयमान hūyá-māna). The root आस ās, 'sit,' takes the anomalous suffix ईन īna: आसीन ās-īna, 'sitting.'

159. The Perfect Ātm. would be formed with the suffix आन ānā, which is added after dropping the termination ईरे ire of the 3. pl. Ātm.;—e.g. बभूविरे babhūv-irē: बभूवान babhūv-ānā. It has, however, become obsolete, only a few instances of it surviving in the sense of substantives or adjectives;—e.g. अनुचान anu-ūcān (from anu-vae, 'having repeated' =) 'learned.'

160. The Perfect Passive Participle is formed with the suffixes न nā and the much commoner त tá.

i. न na, which is taken by primary verbs only, and is attached immediately to the root, is used by a good many roots ending in the long vowels आ ā, ई ī, ऊ ū, ऋ ū (which becomes ईर īr or ऋर ūr) and especially in द d;—e.g. स्ता mlā, 'fade': स्तान mlā-na; ली li, 'cling': लीन li-na; लू lū, 'cut': लून lū-na; स्त्रī st̄ī, 'strew': स्त्रीण st̄ī-nā; पू p̄ī, 'fill': पूर्ण pūr-nā (cp. 154, 4); भिद् bhid, 'cleave': भिन्न bhin-nā.

a. नुद् nud, 'push,' and विद् vid, 'find,' optionally take ता ta:—
नुन् nun-na or नुत् nut-tá; विन् vin-na or वित् vit-tá.

b. The final of a few roots in ज् j that take ना na reverts to the original guttural;—e. g. भञ्ज् bhañj, 'break': भग् bhag-na; भुज् bhuj, 'bend': भुग् bhug-na; मज् majj, 'sink': मग् mag-na; विज् vij, 'tremble': विग् vig-na.

2. ता ta is attached to the root with or without the connecting vowel ई i;—e. g. जित् jit-tá, 'conquered'; पतित् pat-i-ta, 'fallen.' When attaching the suffix immediately, the root has a tendency to be weakened in the usual way: verbs liable to Samprasāraṇa (137, 2c) take it, आ ā is in some cases weakened to ई ī or even ई i, a final nasal is in several cases lost¹;—e. g. यज् yaj, 'sacrifice': इष् iṣ-tá (63a; 64); वच् vac, 'speak': उक् uk-tá; स्वप् svap, *svapna*, 'sleep': सुप् sup-tá; पा pā, 'drink': पीत् pī-tá; स्था sthā, *sthan*, 'stand': स्थित् sthi-tá (Gk. στα-τό-s, Lat. sta-tu-s); गम् gam, *gaman*-go: गत् ga-tá; हन् han, 'kill': हत् ha-tá.

a. धा dhā, 'put,' is doubly weakened: हित् hi-tá (for dhi-tá).

b. दा dā, 'give,' uses its weak present stem दह् dad: दत् dat-tá. After certain verbal prepositions दत् dattá is weakened to त् t-ta;—e. g. आत् ā-tta (for ā-datta), 'taken.'

c. Several roots in अम् am, instead of dropping the nasal, retain it, and lengthen the preceding vowel;—e. g. कम् kam, 'love': कान्त् kān-ta.

d. ध्वन् dhvan, 'sound,' follows the analogy of कम् kam, &c.: ध्वान् dhvān-tá; while a few others in अन् an use a collateral form of the root in आ ā;—e. g. खन् khan, 'dig': खात् khā-tá; जन् jan, 'be born': जात् jā-tá.

3. इत् i-ta is taken by a considerable number of primary verbs which end either in double consonants or in single consonants

¹ On the peculiar Sandhi of roots ending in ह् h, cp. 69.

not easily combining with त् t, and by all derivative verbs (which drop the final आ a or आय aya before it);—e.g. शङ्खा śāṅk, 'doubt': शङ्खित् śāṅk-i-ta; लिख् likh, 'scratch': लिखित् likh-i-ta; ईस् ī-p-sa, desiderative of आप् āp, 'obtain': ईस्मित् īps-i-ta; कार्य kār-aya, causative of कृ kṛ, 'do': कारित् kār-i-ta.

a. The full form of the root is usually retained before इत् ita; but वद् vad, 'speak,' and वस् vas, 'dwell,' usually take Samprasāraṇa:—उदित् ud-i-ta, उषित् us-i-ta; while ग्रह् grah, 'seize,' always takes Samprasāraṇa and the connecting vowel ई ī instead of इ i: गृहीत् gr̥h-ī-ta (cp. 151 b 4).

161. By adding the possessive suffix वत् vat to the past pass. part., a new form of very common occurrence is made, which has the value of a **perfect active** participle;—e.g. कृत् kṛ-ta, 'done': कृतवत् kṛta-vat, 'having done.' It is generally used as a finite verb, the copula being omitted;—e.g. स तत् कृतवान् sa tat kṛtavān, 'he (has) done it'; सा तत् कृतवती sā tat kṛtavatī, 'she (has) done it' (cp. 89, foot-note 3).

162. The **Future Passive** Participle is formed with the suffixes य ya, तव्य tav-yā, and अनीय an-īya. They correspond in sense to the Lat. gerundive in -ndus.

i. Before the suffix य ya—

a. final आ ā becomes ए e;—e.g. दा dā: देय् dé-ya, 'to be given.'

b. final इ i, ई ī take Guṇa, उ u, ऊ ū Guṇa or Vṛddhi, चर् r, चर्हर् Vṛddhi;—e.g. जि ji: जेय् je-ya, 'to be conquered'; नी nī: नेय् ne-ya, 'to be led'; हु hu: हव्य् hav-yā, 'to be offered'; भु bhū: भाव्य् bhāv-ya, 'about to be'; कृ kṛ: कार्य् kār-yā, 'to be done.'

c. medial इ i and उ u followed by a single consonant generally take Guṇa, आ a is sometimes lengthened, चर् r remains unchanged;—e.g. भिद् bhid: भेद्य् bhed-ya, 'to be split'; युज् yuj:

योज्य yoj-ya, 'to be joined'; **शक्** śak: **शक्य** śak-ya, 'possible'; but **वच्** vac: **वाच्य** vāc-ya, 'to be said'; **दृश्** dṛś: **दृश्य** dṛś-ya, 'to be seen.'

2. Before the suffix **तव्य** tavya, the root, if possible, takes Guṇa, being treated in the same way as before the **ता** tā of the periphrastic fut. (152);—**जि** ji: **जितव्य** je-tavya, 'to be conquered'; **भू** bhū: **भवितव्य** bhav-i-tavya, 'that must be'; **गम्** gam: **गन्तव्य** gan-tavya, 'to be gone'; **दा** dā: **दातव्य** dā-tavya, 'to be given'; **भिद्** bhid: **भेतव्य** bhet-tavya, 'to be split.'

3. Before the suffix **अनीय** an-iya, the root takes Guṇa;—e.g. **चि** ci: **चयनीय** cay-anīya, 'to be gathered'; **भू** bhū: **भवनीय** bhav-anīya, 'that must be'; **कर्** kṛ: **करणीय** kar-aṇīya, 'to be done'; **लुभ्** lubh: **लोभनीय** lobh-anīya, 'to be desired.'

a. The **आय** aya of the causative is rejected;—**भावय** bhāv-aya: **भावनीय** bhāv-anīya, 'to be supposed.'

III. Gerund or Indeclinable Participle.

163. The suffix used for forming this participle from the **simple** verb is **त्वा** tvā (an old instrumental singular of a stem in **तु** tu). It is most easily attached to the root by being substituted for the **ता** tā of the passive participle;—e.g. **कृत** kṛ-tá, 'done': **कृत्वा** kṛ-tvā, 'having done'; **उक्त** uk-tá, 'spoken': **उक्त्वा** uk-tvā, 'having spoken'; **गत** ga-tá, 'gone': **गत्वा** ga-tvā, 'having gone.'

a. The suffix of the causative, **आय** aya, is, however, retained: **चोरित** cor-i-ta, 'stolen,' but **चोरयित्वा** cor-ay-i-tvā, 'having stolen.'

164. If the verb is **compounded** with a preposition it takes **या** ya instead of **त्वा** tvā: from **भू** bhū, 'be,' **भूत्वा** bhū-tvā, but **संभूय** sam-bhū-ya; from **वच्** vac, 'speak,' **उक्त्वा** uk-tvā, but **प्रोच्य**

प्रायुक्त्-या; from तु ति, 'cross,' अवतीर्य् ava-tir-ya, 'having descended'; from पू पृ, 'fill,' संपूर्य् sam-pür-ya.

a. The suffix of the causative, अय् aya, is retained (excepting the final अ a) before य् ya if the radical vowel is short¹;—e.g. संगमय् sam-gam-ay-ya from संगमय् sam-gam-aya, 'cause to assemble'; but विचारय् vi-cär-ya from विचारय् vi-cär-aya, 'consider.'

165. त्व् tya is added, instead of य् ya, to compound verbs ending in a short vowel;—e.g. जित्वा ji-tvā, but विजित्य् vi-jí-tya.

a. The analogy of these verbs is optionally followed by roots ending in न् n or म् m, preceded by अ a, which may drop the nasal if it is dropped in the perfect participle passive (160, 2);—e.g. गम् gam, 'go': आगम्य् ā-gam-ya or आगत्य् ā-ga-tya (part. गत ga-tá); नम् nam, 'bend': प्रणम्य् pra-nam-ya (65) or प्रणत्य् pra-na-tya (part. नत na-tá); मन् man, 'think': °मन्य् -man-ya or °मत्य् -ma-tya (part. मत ma-tá); हन् han, 'kill': °हन्य् -han-ya or °हत्य् -ha-tya (part. हत ha-tá); तन् tan, 'stretch': °ताय् -tā-ya (cp. 154 a 1) or °तत्य् -ta-tya (part. तत ta-tá). But क्रम् kram, 'stride,' has only °क्रम्य् -kram-ya (part. क्रान्त krānta); खन् khan, 'dig,' only °खाय् -khā-ya (part. खात khā-tá; cp. 154 a 1).

166. There is also a rare indeclinable participle in अम् am. It is most easily formed by adding the suffix to that form which the root assumes before the इ i of the 3. sg. aor. passive (155);—e.g. श्रु॒ श्रु (अश्रावि á-sráv-i, 'it was heard'): आवम् sráv-am, 'having heard.'

IV. Infinitive.

167. The infinitive (=Lat. supine) is formed by adding तुम् tu-m (originally the acc. sg. of a verbal noun) to the form which

¹ Otherwise the gerunds of the simple and the causative verb would be identical.

the verb assumes before the ता tā of the periphrastic future (152), or the तव्य tavya (162, 2) of the future part. pass.;—e.g. स्था sthāः स्थातुम् sthá-tum (Lat. sta-tum), ‘to stand’; बुध् budhः बोधितुम् bodh-i-tum, ‘to awake’; भू bhūः भवितुम् bháv-i-tum, ‘to be’; कृ krः कर्तुम् kár-tum, ‘to do’; द्रश् dr̄sः द्रष्टुम् drás-tum (151 b 1), ‘to see’; वह् vahः वोढुम् vódhum (69 b), ‘to carry’; सह् sahः सोढुम् sodhum (69 b), ‘to bear’; चुर् curः चोरयितुम् coray-i-tum, ‘to steal.’

DERIVATIVE VERBS.

I. Causatives.

168. This, the commonest class of derivative verbs, is formed with the suffix अय् aya in the same way as the tenth class (125, 4), and is similarly inflected;—e.g. नी nī, ‘lead’: नायय् nāy-aya, ‘cause to lead’; कृ krः, ‘make’: कारय् kár-aya, ‘cause to make’; विद् vid, ‘know’: वेदय् ved-aya, ‘cause to know’; सद् sad, ‘sit’: सादय् sād-aya, ‘set.’

a. Most of the verbs in आ ā insert प् p before the causative suffix;—e.g. दा dā, ‘give’: दापय् dā-p-aya; स्था sthā, ‘stand’: स्थापय् sthā-p-aya.

b. The causative suffix is retained (as in the tenth class) throughout the conjugation excepting the (reduplicated) aorist (which is connected with the causative in sense only: cp. 149).

Irregularities.

1. ज्ञा jñā, ‘know,’ ग्ला glā, ‘languish,’ म्ला mlā, ‘fade,’ स्ना snā, ‘wash,’ optionally shorten the radical vowel before पय् paya: ज्ञापय् jñā-p-aya or ज्ञपय् jñā-p-aya, &c.

2. A few roots ending in other vowels than आ ā take पय् paya:—जि ji, ‘conquer’: जापय् jā-paya, ‘cause to win’; इ i with अधि adhi, ‘read’: अध्यापय् adhy-āpaya, ‘teach’; च्छ् cch, ‘go’: अर्पय्

ar-paya, 'put'; रुह् ruh, 'grow': रोपय् ro-paya, as well as रोहय् roh-áya, 'raise.'

3. धू dhū, 'shake,' makes धूनय् dhū-n-aya, 'shake'; प्री pri, 'love': प्रीणय् prī-n-aya, 'delight'; भी bhī, 'fear': भीषय् bhī-s-aya, as well as the regular भायय् bhāy-aya, 'frighten.'

4. लभ् labh, 'take,' inserts a nasal: लभय् lambh-aya; while दंश् damś, 'bite,' retains its nasal: दंशय् damś-aya (cp. 133 A 4).

5. हन् han, 'kill,' substitutes the denominative stem घातय् ghāta-ya, 'make slaughter of.'

II. Desideratives.

169. Desiderative stems are formed by adding to the root, reduplicated in a peculiar way, the suffix स sa, directly in about seventy cases, but with the connecting vowel ई i (i.e. ईष i-sa) in nearly thirty others. Thus भू bhū, 'be,' becomes बुभूष् bū-bhū-sa, 'desire to be,' but जीव् jīv, 'live,' जिजीविष् ji-jīv-iṣa, 'desire to live.' Desideratives are inflected like verbs of the first conjugation (p. 92).

The accent being on the reduplicative syllable, the **root** as a rule remains unchanged, but—

1. before स sa, final ई i and उ u are lengthened, while चर् ṛ and चर् ṫ become ईर् īr or, after labials, ऊ ūr;—e.g. चि ci, 'gather': चिचीष् ci-cī-sa; सु stu, 'praise': तुष्टूष् tu-ṣtū-sa; तु ति, 'cross': तितीर्ष् ti-tīr-sa; मृ mr̥, 'die': मुमूर्ष् mu-mūr-sa.

2. before ईṣ isa, final ई i, उ u, चर् ṛ must take Guṇa; medial चर् ṛ takes it also, medial उ u does so in one case, and medial ई i not at all;—e.g. शी sī, 'lie': शिश्यिष् sī-say-iṣa; श्री sr̥, 'crush': शिश्वरिष् sī-sār-iṣa; नृत् nr̥t, 'dance': निनृतिष् ni-nart-iṣa; शुभ् śubh, 'beautify': शुश्रोभिष् śu-śobh-iṣa; विद् vid, 'know': विविदिष् vi-vid-iṣa, as well as विवित्स् vi-vit-sa.

Special Rules of Reduplication.

170. 1. अ a, आ ā, and उ u are represented by इ i in the reduplicative syllable (but ऊ ūr, standing for ऊ u after labials, reduplicates with उ u);—e.g. दहः dah, ‘burn’: दिधक् di-dhak-*sa* (55; 69 a); स्था sthā, ‘stand’: तिष्ठास ti-sthā-sa; सृज् srj, ‘create’: सिसृच् si-sṛk-*sa* (63 a); भू bhṛ, ‘bear’: बुभूर्षे bu-bhūr-*sa*.

a. The reduplication of roots containing इ i and उ u is normal;—e.g. विश् vis, ‘enter’: विविक् vi-vik-*sa* (63 b); बुध् budh, ‘know’: बुभुत्स bu-bhut-*sa* (55); दुह् duh, ‘milk’: दुधुक् du-dhuk-*sa* (55; 69 a); रुह् ruh, ‘grow’: रुरुक् rú-ruk-*sa*. Thus all desideratives, except those from roots containing उ u, ऊ ū, reduplicate with इ i.

2. The two or three roots with initial vowel that take the desiderative reduplicate internally with इ i: आस् as, ‘eat,’ अशिश्वि ाś-iś-*sa*; ईक् iks, ‘see’: ईचिच्छि īc-iks-*sa*. आप् āp, ‘obtain,’ forms its stem by contraction: ईप्स ip-*sa*.

Irregularities.

171. 1. गम् gam, ‘go,’ and हन् han, ‘kill,’ lengthen their radical vowel; while मन् man, ‘think,’ lengthens the reduplicative vowel as well:—जिगांस ji-gām-*sa* (beside जिगमिष jí-gam-*isa*); जिघांस ji-ghām-*sa* (66 A 2); मीमांस mī-mām-*sa* (66 A 2), ‘reflect.’

2. ग्रह् grah, ‘seize,’ प्रक् prach, ‘ask,’ स्वप् svap, ‘sleep,’ take Samprasāraṇa:—जिघृक् ji-ghṛk-*sa* (55; 69 a), पिपृच्छि pi-prech-*isa*, सुषुप्स su-sup-*sa*.

3. दा dā, ‘give,’ धा dhā, ‘place,’ मा mā, ‘measure,’ पद् pad, ‘go,’ रभ् rabh, ‘grasp,’ लभ् labh, ‘take,’ शक् śak, ‘be able,’ contract the first two syllables of the stem in such a way as to retain only the reduplication and one consonant of the root: दित्स dí-t-*sa*, धित्स dhí-t-*sa* (for dí-dh(ā)-*sa*: 55), मित्स mi-t-*sa*, पित्स pi-t-*sa*, रिप्स ri-p-*sa*, लिप्स li-p-*sa*, शिक् śí-k-*sa*.

4. चि ci, 'gather,' जि ji, 'conquer,' हन् han, 'kill' (cp. 171, 1), revert to their original guttural: चिकीष ci-kī-sa (beside चिचीष ci-cī-sa); जिगीष jí-gī-sa; जिघांस jí-ghām-sa.

5. घस् ghas, 'eat,' changes its स् s to त् t: ji-ghat-sa, 'be hungry.'

III. Intensives (Frequentatives).

172. These verbs are meant to convey an intensification or frequent repetition of the action expressed by the simple root. Only monosyllabic verbs beginning with a consonant are liable to be turned into intensives. Hence neither verbs of the tenth class nor roots like अद् ad can form this derivative. About sixty roots (less than half the number found in Vedic literature) take the intensive in Sanskrit, but forms of it rarely occur.

The stem, which takes a peculiar kind of strong reduplication, has **two forms**. The one adds the personal endings immediately to the reduplicated stem (accented on the first syllable in strong forms), being conjugated in the Parasmaipada only, like a verb of the third or reduplicated class (p. 96);—e.g. बोभोति bō-bho-ti from भू bhū, 'be.' The other adds accented य ya, in the same way as the passive (154), to the reduplicated stem, being conjugated in the Ātmanepada only, like the passive (p. 130);—e.g. बोभूयते bo-bhū-yá-te from भू bhū.

a. The first intensive may optionally insert ई ī before terminations beginning with consonants in the strong forms. Stems ending in consonants do not take Guṇa either before this ई ī or before terminations beginning with vowels;—e.g. विद् vid, 'know'; वेवेद्मि vé-ved-mi or वेविदीमि vé-vid-ī-mi, वेविद्यः ve-vidmáḥ, imper. वेविदानि vé-vid-āni; but हृ hū, 'call': जोहोमि jó-ho-mi or जोहवीमि jó-hav-ī-mi, जोहवानि jó-hav-āni.

Special Rules of Reduplication.

173. The reduplicative syllable takes Gunā and lengthens अ a;—e.g. निज् nij, ‘cleanse’: नेनेति né-nek-ti; नी nī, ‘lead’: नेनीयते ne-nī-yá-te; बुध् budh, ‘know’: बोबुधीति bo-budh-i-ti; फ्लू plu, ‘float’: पोफ्लूयते po-plū-ya-te; तप् tap, ‘be hot’: तातयते tā-tap-ya-te.

a. Roots ending in अम् am repeat the nasal instead of lengthening the vowel;—e.g. क्रम् kram, ‘stride’: चङ्कङ्मीति cañ-kram-i-ti, चङ्कङ्मयते cañ-kram-yá-te.

b. Roots containing चर् r insert ई ī between the reduplication and the root;—e.g. मृ mr, ‘die’: मरीमर्ति mar-i-mar-ti; दृश् drś, ‘see’: दरीदृश्यते dar-i-drś-ya-te; नृत् nr̥t, ‘dance’: नरीनृत्यते nar-i-nṛ̥t-ya-te.

Irregularities.

174. गृ gr, ‘awake,’ reduplicating with आ ā (as from गर् gar), forms the stem जागृ jā-gr, which has almost assumed the character of a root (134 A 4) and is used as the only present stem of the verb: 3. sg. जागति jā-gar-ti, 3. pl. जागति jā-gr-atī.

a. दह् dah, ‘burn,’ and जभ् jahb, ‘snap at,’ reduplicate with a nasal, while चर् car, ‘move,’ changes its radical vowel as well: दन्दहीति dan-dah-i-ti and दन्दह्यते dan-dah-ya-te; जज्ञभ्यते jañ-jabh-yá-te; चच्छूर्यते cañ-cūr-yá-te.

b. पढ् pad, ‘go,’ besides reduplicating with a nasal, inserts ई ī after it: पनीपद्यते pa-n-i-pad-ya-te; while द्रा drā, ‘run,’ reduplicates as if (173 b) it contained चर् r (only that the inserted vowel is ई ī, which, however, is long by position): दरिद्राति dár-i-drā-ti (cp. 134 A 4).

IV. Denominatives.

175. A large number of verbs, inflected like those of the a-conjugation (p. 92), are derived, with the suffix या yá, from nouns, to which they express some such relation as 'be or act like,' 'treat as,' 'make,' 'desire.' Before the suffix, final इ i and उ u are lengthened; आ a often is also, but sometimes becomes ई ī (cp. 154, 1). Examples are:—नमस्य namas-yá, 'pay homage (namas) to'; स्वामीय svāmī-ya, 'regard as a master' (svāmi); गोपाय gopā-ya, 'be like a herdsman (go-pā) to,' 'protect'; राजाय rājā-ya, 'play the king' (rāja); द्रुमाय drumā-ya, 'rank as a tree' (druma); पुत्रीय putrī-ya, 'desire a son' (putra).

a. Denominatives which have the causative accent (á-ya) are reckoned verbs of the tenth class by the Hindu grammarians. Such are मन्त्रय mantrá-ya, 'take counsel' (mántra), कीर्तय kīrtá-ya, 'celebrate' (kīrtí, 'fame'); वर्णय varṇá-ya, 'depict,' 'describe' (várṇa, 'colour'); कथय kathá-ya, 'tell how,' 'relate' (ka-thám, 'how?').

CHAPTER V

INDECLINABLE WORDS

Prepositions.

176. Owing to the cases having a more independent meaning than in other Āryan languages, the number of prepositions is quite small, and their use is very limited in Sanskrit. They are nearly all postpositions¹, and they do not 'govern,' but only define the general sense of, the case to which they are added.

¹ In Homeric Greek the prepositions preserve their original position as well as accent in anastrophe: ἄπο (Skt. ápa), ἐπί (ápi), πάρα (párā), πέρι (pári).

Of the dozen Vedic postpositions (also employed as verbal prefixes) Sanskrit preserves only three in common use :—

1. अनु् ाnu, 'after,' and प्रति् práti (Gk. πρότι), 'towards,' 'about,' after the **accusative**.

2. आ् á, 'from' or 'up to,' before the **abative**.

a. The following are also occasionally met with, nearly always following their case :—अभि् abhí, 'against' (acc.); पुरस् purás, 'before' (gen.); अधि् ádhi, 'over' (loc.), अन्तर्् antár (Lat. inter, Eng. under), 'within,' 'between' (loc., rarely gen.).

Prepositional Adverbs.

177. The loss or obsolescence of the Vedic prepositions in the true sense is compensated in Sanskrit by the increasing use of ungenuine prepositions, that is to say, those which cannot be attached to verbs and the origin of which from cases is still for the most part clear. They are employed with all the oblique cases except the locative and the dative; with the latter case no prepositional word is ever connected in Sanskrit. These adverbs are given in the following list, grouped under the cases which they accompany :—

a. Acc. अन्तरा् antarā and अन्तरेण् ántareṇa, 'between,' 'without'; the latter also 'regarding'; निकषा् nikasā and समया् samayā, 'near'; अभितः abhí-tah, परितः parí-tah, सर्वतः sarvá-tah, समन्ततः samanta-tah, 'around'; उभयतः ubhayá-tah, 'on both sides of'; परेण् páreṇa, 'beyond'; यावत् yávat, 'during,' 'up to,' 'till' (also abl.).

b. Instr. सह् sahá, समम् samám, साकम् sákám, सार्धम् sár-dham, '(together) with'; विना् vínā, 'without,' 'except' (also acc., rarely abl.).

c. Abl. All the adverbs used with this case express some modification of the fundamental ablative notion of separation :—

1. 'before' (of time): अर्वाक् arvák, पुरा purá, पूर्वम् púrvam, प्राक् prák. 2. 'after' (of time): अनन्तरम् an-antaram, उर्ध्वम् ūrdhvám, परम् param, परतः para-tah, परेण páreṇa, प्रभृति prabhṛti (originally a fem. noun meaning 'commencement'). 3. 'outside,' 'out of': बहिः bahiḥ. 4. 'apart from': अन्यत्र anyá-trā; छृते ḍte (also acc.).

d. Gen. Nearly all the adverbs used with this case express some relation in space:—1. 'before,' 'in presence of': अग्रे ágre, अग्रतः agra-táh, पुरतः pura-tah, पुरस्तात् purás-tät, प्रत्यक्षम् praty-aksam, समक्षम् sam-aksám. 2. 'after': पश्चात् pascát. 3. 'beyond': परतः para-tah, परस्तात् parás-tät. 4. 'above,' 'over,' 'upon': उपरि upári (also acc.) and उपरिष्ठात् upári-stät; the former also 'with regard to.' 5. 'below': अधः adháh and अधस्तात् adhás-tät.—With the gen. is also used कृते kṛte, 'for the sake of.'

178. The case-notions of the accusative ('whither'), ablative ('whence'), and locative ('where') are often paraphrased by nouns meaning 'proximity,' such as अन्तिक् antiká, उपकण्ठ upa-kaṇṭha, निकट् ni-kata, सकाश् sa-káśa, संनिधि sam-nidhi, समीप sam-ípa, पार्श्व pársvá ('side'). In the acc. they mean 'towards,' 'to,' 'near'; in the abl., 'from'; and in the loc., 'near,' 'in the presence of': in each case governing the genitive. For example:—राघोऽन्तिकं गच्छ 'go to the king'; रघोः सकाशाद् अपासरत् 'he withdrew from Raghu'; मम पार्श्वे 'beside me,' 'near me'; तस्माः समीपे नलं प्रशशंसुः 'they praised Nala in her presence.'

Prepositional Gerunds.

179. Several indeclinable participles are used in the sense of prepositions:—

- i. with acc. उद्दिश्य ud-dis्यa, 'pointing at' = 'towards,'

'about,' 'at,' 'for'; आदाय ā-dā-ya, गृहीत्वा gr̥hi-tvā, 'taking,' नीत्वा nī-tvā, 'leading' = 'with'; अधिष्ठाय adhi-sthā-ya, अवस्थाय ava-lamb-ya, आश्रित्य ā-srī-tya, आस्थाय ā-sthā-ya, 're-sorting to' = 'by means of'; मुक्त्वा muk-tvā, परित्यज्य pari-tyaj-ya, वर्जयित्वा varjay-i-tvā, 'putting aside' = 'except'; अधिकृत्य adhi-kṛ-tya, 'putting at the head' = 'with reference to,' 'about.'

2. with abl. आरभ्य ā-rabh-ya, 'beginning from' = 'since.'

Conjunctive and Adverbial Particles.

180. अङ्गः angá, in exhortations = 'pray': अङ्गं कुरु 'pray do it.' किमङ्गः kim anga: 1. 'why, pray?' 2. 'how much more?'

अथ ā-tha: 1. introducing something new at the beginning of a sentence = 'now,' 'then,' 'afterwards.' 2. in the headings of books, chapters, sections, 'now' = 'here begins' (opposed to इति iti, 'here ends'). 3. connecting parts of a sentence = 'and,' 'also.' 4. 'if': अथ तान्नानुगच्छामि गमिष्यामि यमक्षयम् 'if I do not follow them, I shall go to Yama's abode.'—अथ किम् atha kim, 'what else?' = 'it is so,' 'certainly,' 'yes.'—अथ वा atha vā: 1. 'or else,' 'or.' 2. correcting a previous statement = 'or rather,' 'but.' 3. adding a corroborative statement, 'or so' = 'so for instance': अथवा साध्विदमुच्यते 'thus it is well said.'

अथो átho, 'then,' 'afterwards' (see उ u).

अन्यस्त् anyac ca, 'and another thing' = 'and besides,' 'more-over.'

अपरम् aparam, 'further,' 'moreover,' 'besides.'

अपि ápi: 1. connecting (like च ca) parts of a sentence = 'likewise,' 'moreover,' 'and' (अपि—अपि 'both—and'). 2. 'also,' 'on one's own part': दमनकोऽपि निर्जगाम 'Damanaka also (on his part) went away.' 3. 'even,' 'though': बालोऽपि 'even

a child'; एकाक्यपि ekākīapi, 'though alone.' 4. 'only,' 'but' (of time): मुहूर्तमपि 'but a moment.' 5. 'all' with numerals: चतुर्णामपि चर्णानाम् 'of all the four castes.' In the above five senses अपि api always follows the word to which it belongs. It is also used at the beginning of a sentence as an interrogative particle, and with the optative to express a wish or preference: अपि तपो वर्धते 'is your penance prospering?' अपि स कालः स्यात् 'would that the time had come'; अपि प्राणानहं जह्यां न स्वाम् 'I would rather abandon life than thee.'—अपि नाम् api nāma, 'perhaps' (see नाम् nāma).

अलम् alam, 'enough,' construed with the instrumental, gerund or infinitive, expresses a prohibition: अलं भयेन 'away with fear'; अलमुपालभ्य 'cease reproaching me'; अलं प्रबोधयितुम् 'do not awaken.'

इति iti, 'thus': 1. is used after the exact words of quotations. With verbs of saying it supplies the place of inverted commas and of the indirect construction in English: तवाज्ञां करिष्यामीति स मासुवाच 'he said to me, I will do thy bidding (tavaज्ञाम्),' or 'he told me that he would do my bidding.'

2. It is similarly used to quote thoughts, intentions, knowledge, though not uttered: बालोऽपि नावमन्तव्यो मनुष्य इति भूमिपः 'one should not despise a king, though a child, (thinking=) because he is a mere human being'; दातव्यमिति यहानं दीयते 'a gift which is presented (thinking 'it ought to be given'=) from a sense of duty'; न धर्मशास्त्रं पठतीति कारणम् '(the knowledge) that he reads the book of the law, is not a cause (of confidence in him).'

2.== 'here ends,' at the end of books, chapters, sections, acts: इति तृतीयोऽङ्कः 'here ends the third act.'

3. 'in the capacity of,' 'as regards,' 'as for': शीघ्रमिति सुकरं निभृतमिति चिन्तनीयं भवेत् 'as for (doing it) quickly, it (would

be) easy; as for (doing it) secretly, it would require consideration.' (See also किम् kim and तथा tathā.)

इव iva, being enclitic, follows the word to which it belongs in sense:—1. 'like': अयं चोर इवाभाति 'this man looks like a thief.' 2. 'as if,' 'as it were': साक्षात् पश्यामीव पिनाकिनम् 'I see, as it were, Siva himself before me.' 3. 'somewhat': सरोषमिव 'somewhat angrily.' 4. 'almost': मुहूर्तमिव 'almost an hour.' 5. 'just,' 'quite': अकिञ्चिदिव 'just a little'; नचिरादिव 'quite soon.' 6. 'indeed,' 'pray' (German 'wohl'), with interrogatives: किमिव मधुराणां मण्डनं नाकृतीनाम् 'what, indeed, is not an ornament to lovely figures?'

उप्, an old particle of frequent occurrence in the Veda, meaning 'and,' is preserved in Sanskrit only in combination with **किम्** kim (q.v.), and in अथो átho (for áthay, 'and so'), 'then,' and नो nó (for náy, 'and not'), 'not.'

उत् utá, a common particle in the Veda, meaning 'and,' 'also,' 'or,' survives only 1. in combination with प्रति and **किम्**:—प्रत्युत् pratiuta, 'on the contrary'; **किमुत्** kim uta, 'how much more,' 'how much less'; 2. in the second part of a double question:—**किम्—उत्** (=utrum—an) 'whether—or.' It is also frequent as an expletive at the end of a line in the Epics.

एव evá is a restrictive particle following the word which it emphasizes. It may often be rendered by 'just,' 'only,' 'exactly,' 'quite,' as well as in various other ways, sometimes merely by stress:—एक एव 'quite alone'; दर्शनमेव 'the very sight'; अहमेव 'I myself'; तदेव 'that very,' 'the same'; मृत्युरेव 'sure death'; वसुधेव 'the whole earth.'—चैव caeva, 'and also.'—तथैव tathāeva, 'likewise,' 'also.'—नैव naeva, 'not at all,' 'by no means.'

एवम् evám, 'thus,' 'so':—एवमस्तु 'so be it'; मैवम् māevam, 'not so!'

कच्चित् ká-c-cit (Vedic neuter of interr. कद् ká-d+चिद् cid), used in questions expecting the answer 'yes' (Lat. nonne)= 'I hope':—कच्चिद्दृष्टा त्वया राजन् दमयन्ती 'I hope you have seen Damayantī, O king?' With negative= 'I hope not' (Lat. num):—कच्चित्तु नापराधं ते द्रष्टवानस्मि 'I have not done you any injury, I hope?'

कामम् káma-m (acc. of काम 'desire'), primarily used as an adverb meaning 'at will,' 'gladly,' is frequently employed as a concessive particle:—1. 'indeed,' 'certainly,' 'forsooth,' 'to be sure'; 2. 'granted,' 'supposing' (generally with imperative), followed by adversative adverb:—कामम्—तु, किंतु, तथापि, or पुनः 'it is true—but,' 'although—yet'; कामम्—न तु 'certainly—but not,' 'rather—than' (cp. वरम् varam—न na).

किम् ki-m : 1. 'what?' 2. 'why?' 3. a simple interrogative particle not to be translated, and expecting the answer 'no' (Lat. num). 4. 'whether?' in double questions, followed by कि वा, किमुत, or simply उत, वा, or आहोस्तिद् 'or.'

Combinations of किम् kim with other particles are the following:—कि च 'moreover.'—कि तु 'but,' 'however.'—किमिति, किमिव 'wherefore?'—कि वा 'perchance?'—किस्तिद् 'why, pray?' 'I wonder?'—किमपि 1. 'very,' 'vehemently': किमपि दृदती 'weeping bitterly'; 2. 'nay, more.'—किमु, किमुत, कि पुनः 'how much more,' 'how much less': एकेकम् अप्यनर्थाय किमु यत्र चतुष्टयम् 'even each singly (leads) to ruin, how much more (is it so) when the four (are combined)!'

किल् kila (quidem): 1. 'indeed,' 'certainly,' 'to be sure,' follows the word it emphasizes: अर्हति किल् कितव उपद्रवम् 'to be sure the rogue deserves calamity.' Sometimes किल् may be rendered by stress merely: एकस्मिन् दिने व्याघ्र आजगाम किल् 'one day a tiger did come.' 2. 'they say,' 'we are told':

बभूव योगी किल कार्तवीर्यः 'there lived, it is said, a devotee named Kārtavīrya.'

द्वतम् kr-ta-m (neut. of past part.), 'done,' is used (like अलम् alam) with the instrumental in the sense of 'have done with':—
ह्यतं संदेहेन 'away with doubt.'

केवलम् kevala-m, 'only': **केवलं स्वप्निति** 'he merely sleeps.'—
न केवलम्—अपि 'not only—but.'

क्वा kva, 'where?' if **repeated** with another question, expresses great difference, incongruity, or incompatibility: **क्वा सूर्यप्रभवो वंशः क्वा चाल्पविषया मतिः** 'where (is) the race sprung from the sun, and where (my) limited intelligence?' i.e. 'how great is the discrepancy between the glory of the solar race and my powers of description.'

खलु khalu: 1. 'indeed,' 'surely,' often merely emphasizing the preceding word. 2. 'pray,' 'please,' in entreaties: **देहि खलु मे प्रतिवचनम्** 'please give me an answer' (German 'doch'). 3. with gerund = 'enough of,' 'do not' (like अलम् alam): **खलु ददिला** 'do not weep.'—**न खलु** 'not at all,' 'certainly not,' 'I hope not.'

च ca, enclitic (= re, que), 'and,' 'also':—**गोविन्दो रामश्च** 'Govinda and Rāma.' In poetry the particle is occasionally misplaced: **इह चामुच** for **इहामुच च** 'in this world and in the next.' When more than two words are connected, the conjunction is commonly used with the last only, as in English.—
च—च 1. 'both—and.' 2. 'on the one hand—on the other,' 'though—yet.' 3. 'no sooner—than.'

चेह ced (ca+fd), 'if,' never begins a sentence or half-line (as यदि yádi, 'if,' does).—**अथ चेह** 'but if.'—**न चेह or नो चेह** 'if not' (elliptically) = 'otherwise': **सर्वं विमृश्य कर्तव्यं नो चेत् पश्चात्तापं ब्रजिष्यसि** 'everything should be done after deliberation, otherwise you will come to repentance.'—**चेन्न cen na**, 'if—'

not' (apodosis): भावि चेत् तदन्यथा 'if it (is) to be, it (will) not (be) otherwise.'—इति चेत् 'if this (is objected, it is) not (so).'

जातु jātu: 1. 'at all,' 'ever.' 2. 'possibly,' 'perhaps.' 3. 'once,' 'one day.' न जातु 'not at all,' 'by no means'; 'never.'

ततः tā-tah: 1. 'thence.' 2. 'thereupon,' 'then.' ततस्तः tatas tataḥ = 'what next,' 'pray go on' (with what you are saying).

तथा tā-thā: 1. 'thus,' 'so,' 'accordingly.' 2. 'likewise,' 'also,' 'as well as,' 'and' (=च). 3. 'that is so,' 'yes,' 'it shall be done.'—तथा च 'so also,' 'similarly.'—तथापि tathāpi, 'nevertheless.'—तथा हि 'for so (it is),' 'so for instance,' 'that is to say,' 'namely.'—तथेति tathāiti, 'yes.'

तद् tā-d (neut. of pron. 'that'): 1. 'then,' 'in that case.' 2. 'therefore,' 'accordingly': राजपुत्रा वयं तद् वियहं ओरुं नः कुतूहलमस्ति 'we are princes; therefore we have a curiosity to hear of war.'

तावत् tā-vat: 1. 'so long' (correlative to यावत् 'how long,' 'while,' 'till'). 2. 'meanwhile.' 3. 'in the first place,' 'first.' 4. 'just,' 'at once' (with imperative = before doing anything else): इतस्तावदागम्यताम् 'pray come here at once.' 5. 'already,' 'even' (as opposed to 'how much more,' 'how much less'). 6. 'only,' 'merely.' 7. 'at least': न तावन्नानुषी 'she is at least not a human being.' 8. (concessively) 'indeed,' 'certainly,' 'it is true' (followed by तु 'but,' &c.). 9. emphasizes a notion (like एव): 'as for,' 'as regards,' 'only,' 'just,' 'quite,' or to be rendered by stress only.

तावत्—च 'scarcely—when.' न तावत् 'not yet.'

तु tū (never commences a sentence): 'but,' 'however.' It is sometimes = च or वा, or a mere expletive; it is even found combined with च or repeated in the same sentence.—अपि तु 'but rather.' न तु 'but not.' न त्वेव तु na tu_eva tu, 'never

at all.' परं तु 'yet,' 'however.' तु—तु 'indeed—but.' च—न तु 'although—yet not.'

न ná, 'not'; with indefinite pronoun= 'no': न कोऽपि ('not any') = 'no man'; न किंचित् 'nothing'; न द्विचित् 'nowhere'; न कदाचित् 'never.' न if repeated amounts to an emphatic positive: न तत्र कश्चित् बभूव तपितः 'no one was there (who was) not satisfied,' i.e. 'every one was thoroughly satisfied.'—नापि naapi, 'not even.'—नैव naeva, 'not at all.'

ननु na-nú: 1. 'not?' in questions expecting an affirmative answer (Lat. non-ne) = 'surely': नन्हं ते प्रियः nanuaham te priyah, 'surely I am thy beloved?' 2. with interrogative pronouns and imperatives = 'pray': ननु को भवान् 'pray who are you?' ननुच्यताम् nanuucyatām, 'pray tell.' 3. in arguments: 'is it not the case that?' = 'it may be objected'; followed by अत्रोच्यते atraucyate, 'to this the reply is.'

नाम náma, besides its adverbial meaning 'by name' (e.g. नलो नाम 'Nala by name'), has the following senses as a particle: 1. 'indeed,' 'certainly,' 'to be sure': मया नाम जितम् 'I have indeed conquered.' 2. 'perhaps': दृष्टस्त्वया कश्चिद् धर्मज्ञो नाम 'you have perhaps seen a righteous man.' 3. ironically, with interrogatives = 'pray': को नाम राज्ञां प्रियः 'who, pray, is a favourite with kings?' 4. with imperatives = 'granted,' 'no matter if,' 'ever so much': स धनी भवतु नाम 'let him be ever so rich.'—अपि नाम 1. at the beginning of a sentence with potential = 'perhaps.' 2. emphasizes a preceding word more strongly than अपि alone.—**ननु नाम** 'surely': ननु नामाहमिष्ठ किल तव 'surely I am dear to thee.'

नु nú, 'now,' with interrogatives = 'pray': को नु 'who, pray?' नु—नु, in double questions expressing uncertainty, '(either)—or': अयं भीमो नु धर्मो नु 'can this be Bhima or Dharma?'

नूनम् nū-ná-m, usually the first word in a sentence: 'in all probability,' 'undoubtedly,' 'assuredly': नूनं मन्ये न दोषोऽस्मि नेषधस्य 'assuredly, I think, it is not the fault of the king of Niṣadha.'

नो nō (nā+u) in the Veda meant 'and not,' 'nor,' but in Sanskrit simply = 'not' (cp. चेद् céd).

परम् pára-m: 1. 'highly,' 'greatly,' 'entirely,' 'very': परमनुगृहीतोऽस्मि 'I am greatly obliged.' 2. 'at the most': आयुस तत्र मर्त्यानां परं चिंशद् भवति 'in it the life of mortals (lasts) at most thirty (years).' 3. 'nothing but,' 'only': विषाणु स्तः परं न ते 'you only lack the horns.' 4. 'but,' 'however': सर्वशास्त्रपारगाः परं बुद्धिरहिताः 'they (are) thoroughly versed in all learning, but lack intelligence.'

पुनः púnah: 1. 'again.' 2. 'on the other hand,' 'on the contrary,' 'but.'—पुनः पुनः, or simply पुनः, 'again and again,' 'repeatedly.'

प्रायः prāyah, प्रायशः prāya-sāḥ, प्रायेण prāyena: 1. 'for the most part,' 'generally,' 'as a rule.' 2. 'in all probability.'

बाढ्हम् bādhá-m: 1. 'certainly,' 'assuredly,' 'indeed.' 2. expressing consent: 'very well.' 3. expressing assent: 'so it is,' 'yes.'

मा mā, prohibitive particle (= Gk. μή), generally used with imperative or unaugmented aorist: मा गच्छ or मा गमः 'do not go.' मा स्मा mā sma is employed in the same way. Both मा and मैवम् mā evam are used elliptically = 'not so!' 'don't'; similarly मा तावत् 'not for heaven's sake!' 'God forbid.' मा नाम with potential or elliptically: = 'would that not,' 'if only not': मा नाम रक्षणः 'heaven forbid (that it should be) the warders.'

मुहुः mūhuḥ: 1. 'every moment,' 'repeatedly,' 'incessantly'

(often repeated: मुङ्गमुङ्गः). 2. 'on the contrary.' मुङ्गः—मुङ्गः: 'now—now,' 'at one time—at another.'

यतः yá-tah: 1. 'whence' (often = 'where,' sometimes = 'whither'; often= ablative of the relative य ya). 2. 'wherefore,' 'for which reason.' 3. 'because,' 'since,' 'for' (often introducing a verse in support of a previous statement). 4. 'that,' after questions or before *oratio recta*: किं तु दुःखमतः परम इच्छासंपद् यतो नास्ति 'what misery is greater than this, that there is no fulfilment of desire?'

यत्र yá-tra: 1. 'where.' 2. 'if.' 3. 'when.' 4. 'since.'

यथा yá-thā: 1. 'as': यथा ज्ञापयति देवः 'as your Majesty commands.' 2. 'like' (= इव): राजते भैमी सौदामिनी यथा 'the daughter of Bhīma shone like the lightning.' 3. 'as for instance.' 4. 'in order that': यथा त्वदन्यं पुरुषं न मन्यते 'in order that she shall think of no other man than thee.' 5. 'so that': अहं तथा करिष्ये यथा स वधं करिष्यति 'I shall so contrive that he will slay him.' 6. 'that,' introducing (like यद् yád) a direct assertion, with or without इति at the end: त्वयोक्ते मे यथा 'you told me that—.' यथा यथा—तथा तथा 'in proportion as—so,' 'the more—the more.' तद्यथा tad yathā, 'that (is) as (follows),' 'thus for instance.'

यद् yá-d: 1. 'that,' introducing direct assertions (like Gk. ὅτι) with or without इति at the end: वक्तव्यं यदिह मया हता प्रियेति 'you must say, I have slain my beloved here.' 2. (so) 'that': किं यन्न वेत्सि त्वम् 'how (is it) that you do not know?' 3. 'in order that': किं शक्यं कर्तुं यन्न कुधते नृपः 'what can be done in order that the king be not angry?' 4. 'inasmuch as,' 'because,' 'since.'

यदि yád-i, 'if' (cp. चेत् céd). — **यदि वा**: 1. 'or else,' 'or rather,' 'or': अज्ञानाद्यदि वा ज्ञानात् 'unwittingly or wittingly.' 2. sometimes = 'however.' — **यद्यपि** yadi api, 'even if,' 'although.'

माधुर्यम् 'Oh, the sweetness of the song!' अहो हिरण्यका
स्माध्योऽसि 'Ah, Hiranyaka, you are praiseworthy!'

आ ā (cp. 24) is used especially to express sudden recollection :
आ एवं किल तत् 'Ah, so indeed it was!'

आः āḥ (cp. 24) expresses joy or indignation, 'ah' : **आः अतिथिपरिभाविनि** 'Ah, you who slight your guest!'

कष्टम् *kaṣṭa-m*, 'woe!' 'alas!' often combined with **धिक्** dhik or **हा** **धिक्** hā dhik.

दिष्ट्या *distīṭā* (inst. 'by good luck' =) 'thank heaven!' often with **वृध्** *vṛdh*, 'prosper' = 'to have cause for joy or congratulation': **दिष्ट्या महाराजो विजयेन वर्धते** 'your Majesty is to be congratulated upon your victory!'

धिक् **dhik**, exclamation of dissatisfaction, reproach, or lamentation: 'fie!' 'woe!' It is regularly used with the accusative, but the nom. gen. voc. also occur: **धिक् त्वामस्तु** 'shame on you!'

बत bata, expresses 1. astonishment: 'ah!' 2. regret: 'alas!' It is also combined with other interjections in the same sense: **बतारे** *bataare*, अहो बत, अयि बत.

भोः bhoh: 1. usually an exclamation of address: 'sir!' 'ho!' 'listen!' Though a contracted form of an old masculine singular vocative (bhavas), it is used in addressing female as well as male persons, and is connected even with the plural number. It is often repeated:—**भो भोः पण्डिताः** 'listen, Pandits!' 2. it sometimes occurs in soliloquies = 'alas!'

साध् sādhū: 1. 'well done!' 'bravo!' 2. with imperative = 'come': **दमयन्त्याः पणः साधु चर्तताम्** 'come, let Damayanti be played for as a stake.' 3. 'well' with 1. per. pres.: **साधु यामि** 'well, I will go.' 4. 'assuredly': **यदि जीवामि साध्वेनं पश्शेयम्** 'if I live, I shall undoubtedly see him.'

स्वस्ति sv-astī: 1. 'hail!' 2. 'farewell!'

हन्ता hánta: 1. exclamation of exhortation = 'come,' 'look,' 'pray': हन्त ते कथयिष्यामि 'come, I will tell thee'; शृणु हन्त 'pray listen.' 2. expresses grief: 'alas!' 3. joy, surprise, or hurry: 'oh!' 'ah!'

हा hā, expresses 1. astonishment or satisfaction: 'ah!' 2. pain: 'alas!' हा हतास्मि 'alas! I am undone.' It is frequently accompanied by a vocative; and is sometimes used with a following acc. = 'alas for!' It is often combined with कष्टम्, धिक्, or हन्ता.

CHAPTER VI

NOMINAL STEM FORMATION AND COMPOUNDS

A. Nominal Stems.

182. Declinable stems, though they often consist of the bare root (either verbal or pronominal), are chiefly formed by means of suffixes added to roots. These **suffixes** are of two kinds: **primary**, or those added directly to roots (which may be compounded with verbal prefixes); **secondary**, or those added to stems already ending in a suffix.

i. **Primary** derivatives as a rule show the root in its strong form;—e.g. वेद् véd-a, 'knowledge' (विद् 'know'). In meaning they may be divided into the two classes of abstract action nouns (cognate in sense to infinitives) and concrete agent nouns (cognate in sense to participles) used as adjectives or substantives;—e.g. मति ma-tí, f. 'thought' (मन् man, 'think'); योध् yodh-á, m. 'fighter' (युध् yudh, 'fight'). Other meanings are only modifications of these two. Thus abstract substantives often acquire a concrete sense;—e.g. नयन nay-ana, n. 'leading' comes to mean 'eye' (the organ that leads).

a. When the **bare root** is used as a declinable stem, it usually remains unchanged;—e.g. द्विष् dvīṣ, m. (hater) ‘enemy’ (80); युध् yūdh, f. ‘fight,’ m. ‘fighter.’ Many of these stems are used only at the end of compounds;—e.g. दुहूः duhū, ‘milking’ (81). Roots ending in आ ā are shortened to अ a, and those in इ i, उ u, or ए e, are always modified by adding a त t: these stems are only used as the last members of compounds;—e.g. सुष्ट्रत् su-kṛt, ‘doing well’ (cp. 187 b).

b. Several primary nominal suffixes connected with the verbal system have already been sufficiently dealt with, viz. those of the present and future participles: अत् at (85; 156), आन् āna and मान् māna (158); of the perfect: वांस् vāns (89; 157); of the past passive participle (160): ता ta and ना na; of the gerundive: अनीय् an-īya¹, तव्य् tav-yā², and य् ya (162). The formation of stems to which the primary suffixes of the comparative and superlative, ईयांस् īyāṁs and ईष् iṣṭha, are added has also been explained (88; 103, 2). Of the rest, the following, in alphabetical order, are the most usual and important:—

अ a: substantives and adjectives;—e.g. सर्गं sārg-a, m. ‘creation’ (सृज् srj, ‘emit’); मेघं megh-ā, m. ‘cloud’ (lit. ‘discharger’); मिह् mih); भागं bhāg-ā, m. ‘share’ (भज् bhaj, ‘divide’); प्रियं priy-ā, ‘pleasing,’ ‘dear’ (प्री pri, ‘please’). The substantives are almost exclusively masc.; but युग् yug-ā, n. ‘yoke’ (Gk. ζυγόν, Lat. yug-u-m).

आन् an: masc. agent nouns and a few defective neuter stems;—e.g. राजन् rāj-an, m. ‘ruler,’ ‘king’ (90, 1); आहन् áh-an, n. ‘day’ (91, 2).

¹ The latter part, ईय् iya and य् ya, of these two suffixes is secondary (182, 2), but the whole is employed as a primary suffix (162, 3).

² The first part of तव्य् tav-yā is probably derived from the old infinitive ending तवे tave (App. III, 13 b).

अन ana: neut. action nouns;—e.g. दर्शन dárś-ana, n. ‘sight’ (दृश् drś, ‘see’), भोजन bhój-ana, n. ‘enjoyment’ (भुज् bhuj, ‘enjoy’); also agent nouns;—e.g. वाहन vāh-ana, ‘conveying,’ n. ‘vehicle’; very rarely with weak vowel: कृपण kṛp-aṇā (‘lamenting’), ‘miserable.’

अस as, इस is, उस us: neuter action nouns, often with concrete meaning (cp. 83);—e.g. वचस् vác-as, ‘speech’; ज्योतिस् jyót-is, ‘light’; धनुस् dhán-us, ‘bow.’

इ i: fem. action nouns, also agent nouns (adj. and subst.), and a few neuters of obscure origin;—e.g. कृषि kṛṣ-i, f. ‘tillage’; शुचि śūc-i, ‘bright’; पाणि pāṇ-i, m. ‘hand’; अक्षि ákṣ-i, n. ‘eye,’ अस्थि ásth-i, n. ‘bone,’ दधि dádh-i, n. ‘sour milk’ (cp. 99, 3).

उ u: agent nouns, adj. and subst., the latter being mostly masc., but including several fem. and neut.;—e.g. तनु tan-ú, ‘thin’ (Lat. ten-u-i-s); बाहू bāh-ú, m. ‘arm’ (Gk. πῆχυ-s); हनु hán-u, f. ‘jaw’; जानु ján-u, n. ‘knee’ (Gk. γόνυ-s).

उन una: adj. and masc. neut. subst.;—e.g. तरुण tár-uṇa, ‘young’; मिथुन mith-uná (m.), n. ‘pair,’ शकुन śak-uná, m. ‘bird.’

ऊ औ: fem., mostly corresponding to m. and f. in उ u;—e.g. तनू tan-ú, ‘body’; independently formed: चमू cam-ú, ‘army,’ वधू vadhu-ú, ‘bride.’

त ta: besides ordinarily forming past passive participles appears, in a more general sense, as the suffix of a few adjectives and substantives;—e.g. शीत sí-tá, ‘cold,’ असित ás-i-ta, ‘black’; दूत dū-tá, m. ‘messenger,’ हस्त há-s-ta, m. ‘hand.’

ति ti: fem. action nouns;—e.g. भूति bhū-tí, ‘well-being’ (Gk. φύσι-s); जाति jā-ti, ‘birth’; ज्ञाति jñā-tí, ‘kinsman,’ is, however, **masc.** (owing to its concrete sense designating a male being).

तु tu: chiefly forms the stem of infinitives in **तुम् -tum**;—e.g. गन्तुम् gan-tum, 'to go'; also a few masc. and neut. substantives:—तन्तु tán-tu, m. 'thread,' हेत् he-tú, m. 'cause' (हि hi, 'impel'); वास्तु vás-tu, n. 'dwelling' (Gk. ἀστροῦ).

त्रृ tr̥: masc. agent nouns;—e.g. कर्तुर् kar-tí, 'doer'; also names of relationship, fem. as well as masc.;—e.g. मात्रु mā-tí, f. 'mother,' पित्रु pi-tí, m. 'father' (101).

त्रा tra, m. n., **त्रा trā**, f.: expressive of the instrument or means;—e.g. पात्रा pá-tra, n. 'cup' (पा pā, 'drink'); दंष्ट्रा dámṣṭra, m. 'tusk' ('biter': दंष् dámṣ), मन्त्रा mán-tra, m. 'prayer' (मन् man, 'think'); मात्रा mā-trā, f. 'measure' (Gk. μέτρον).

थ tha, m. n., **था thā**, f.;—e.g. अर्थ ár-tha, m. 'aim,' 'object'; तीर्थ tīr-thá, n. 'ford'; गाथा gá-thā, f. 'song.'

न na, m. n., **ना nā**, f.: besides ordinarily forming past pass. participles (160, 1), also adjectives and substantives;—e.g. क्रष्ण kṛs-ná, 'black'; वर्णा vár-ṇa, m. 'colour'; पर्ण par-ṇá, n. 'wing'; तुष्णा tús-ṇá, f. 'thirst.'

नि ni, m. f.;—e.g. अग्नि ag-ní, m. 'fire' (Lat. ig-ni-s); श्रेणि śré-ní, f. 'line.'

नु nu, m. f.;—e.g. भानु bhā-nú, m. 'light,' सूनु sū-nú, m. 'son'; धेनु dhe-nú, f. 'cow.'

म ma, adj.; m. subst.;—e.g. भीम bhī-má, 'terrible'; धूम dhū-má, m. 'smoke.'

मन् man, m. n.: chiefly neut. action nouns;—e.g. कर्मन् kár-man, n. 'action,' ब्रह्मन् bráh-man, n. 'prayer'; अश्मन् áś-man, m. 'stone' (Gk. ἄκμη), ब्रह्मन् brah-mán, m. 'one who prays' (90, 3).

मि mi, m. f., **मी mī**, f.;—e.g. रश्मि ras-mí, m. 'ray;' भूमि bhū-mi, f. 'earth'; भूमी bhū-mī, f. id.; लक्ष्मी lakṣ-mí, f. 'prosperity.'

यु yu, m.;—e.g. मन्यु man-yú, 'anger'; मृत्यु mṛt-yú, 'death.'

र ra, adj.; m. n. subst.;—e.g. उग्र ug-rá, 'terrible'; रुद्र rud-rá, m. name of a god; अभ्र abh-rá, n. 'cloud.'

र ru, adj.; n. subst.;—e.g. भीर bhi-rú, 'timid'; अश्व áś-ru, n. 'tear.'

व va, adj.; m. subst.;—e.g. सर्व sár-va, 'all' (Lat. sal-vo-s); अश्व áś-va, m. 'horse' (Lat. eq-uo-s).

वन् van, adj.; m. n. subst.;—e.g. पीवन् pí-van, 'fat'; ग्रावन् grá-van, m. 'stone' (90, 4); पर्वन् párvan, n. 'joint.'

2. Secondary nominal Suffixes:—

आ a, adj.; m. n. subst.: forms adjectives, chiefly with initial Vṛddhi, expressing the sense of relation to or connexion with the primitive word;—e.g. मानव mānav-á, 'belonging to man' (मनु manu). Many of these have become substantives in the masc. and, as abstracts, in the neuter;—e.g. मानव mānav-á, m. 'human being'; वैश्वामित्र vaisvāmitra, m. 'descendant of Visvāmitra'; पौरुष pauruṣ-á, 'manly,' n. 'manliness.' When formed with Vṛddhi, these derivatives always take ई ī in the feminine.

आ ā: forms the fem. of adjectives which in the masc. and neut. end in आ a;—e.g. कान्ता kānt-ā, 'beloved' (97).

आनी ānī: forms the fem. of the names of deities ending in आ a;—e.g. इन्द्राणी indr-ānī, 'wife of Indra.'

आयन् āyana, m.: forms patronymics with initial Vṛddhi;—e.g. आश्वलायन् áśval-āyana, 'descendant of Aśvala.'

ई ī, m.: forms patronymics with initial Vṛddhi;—e.g. मारुति mārut-i, 'descendant of the Maruts.' Similarly formed is सारथि sārathi, 'charioteer' (सरथ sa-rátha, 'driving on the same car').

इन् in: forms, in the sense of 'possessing,' adjectives from stems ending in आ a;—e.g. बलिन् bal-in, 'strong,' from बल bala, n. 'strength' (87).

ई ī: forms the fem. of masc. stems made with suffixes ending in consonants (95), or with तु t̥ (101 e), often to those in उ u

(98 c), or in अ a (always when formed with Vṛddhi);—e.g. देवी dev-ī, 'goddess' (देव dev-ā, 'god'). Cp. 107.

इन ina: forms adjectives, chiefly expressive of direction and made from words in अञ्च् añc;—e.g. प्राचीन prāc-inā, 'eastern' (प्राच् prāñc, 'eastward').

ईय īya: forms general adjectives;—e.g. पर्वतीय parvat-īya, 'mountainous'; तदीय tad-īya, 'belonging to him,' 'his.'

क ka: forms adjectives and diminutives;—e.g. अन्तक् ánta-ka, 'ending'; with Vṛddhi, वार्षिक् vārs-i-ka, 'belonging to the rains' (varṣāḥ); राजक् rāja-ka, m. 'petty king,' पुत्रक् putra-ka, 'little son.' The fem. of such derivatives (in a-ka) is often formed with इका ikā;—e.g. पुत्रिका putr-ikā, 'little daughter.'

तन tana: forms adjectives with a temporal meaning;—e.g. नूतन nū-tana, 'present,' पुरातन purā-tana (f. i), 'ancient.'

तम tama: forms superlatives and ordinals;—e.g. उत्तमा ut-tamā, 'highest'; सत्तमा sata-tamā, 'hundredth.'

तर tara: forms comparatives;—e.g. उत्तर út-tara, 'higher.'

ता tā, f., त्वा tva, n.: form abstract substantives with the sense conveyed by the English suffix '-ness';—e.g. देवता devá-tā, 'divinity'; अमृतत्वा amṛta-tvā, n. 'immortality'; पञ्चत्वा pañca-tvā, 'five-ness' (i.e. dissolution into the five elements), 'death.'

त्य tya, adj.; m. n.: forms nouns from prepositions and adverbs;—e.g. नित्य ní-tya, 'constant'; अपत्य ápa-tya, n. 'offspring'; अमात्य amā-tya, m. 'companion' (अमा amā, 'at home').

थ tha, adj.: forms some ordinals from cardinals;—e.g. चतुर्थ catur-thá, 'fourth.'

भ bha, m.: forms the names of animals;—e.g. गर्दभ garda-bhá, 'ass,' वृषभ vr̥ṣa-bhá, 'bull.'

म ma, adj.: forms some superlatives, partly from prepositions, and some ordinals;—e.g. अवम् ava-má, 'lowest,' मध्यम् madhya-má, 'middlemost'; पञ्चम् pañca-má, 'fifth.'

मत् mat, adj.: forms, in the sense of 'possessing,' derivatives from substantives (except such as end in आ a);—e.g. अग्निमत् agni-mát, 'maintaining the (sacred) fire'; 'fiery.'

मय् maya, adj. (f. ई ī), 'consisting of';—e.g. मनोमय् mano-máya, 'consisting of mind,' 'spiritual.'

य् ya, adj.; m. n. subst.: forms adjectives in the sense of 'relating to,' masc. patronymics and neuter abstracts with Vṛddhi, as well as ordinary adjectives without Vṛddhi;—e.g. ग्राव्य् gráiv-ya, 'relating to the neck' (ग्रीवा grīvā); आदित्य् ādit-yá, m. 'son of Aditi'; सौभाग्य् saubhāg-ya, n. 'good fortune' (from सुभग् su-bhágā, 'fortunate'); पित्र्य् pítr-ya, 'paternal' (पितृ pitrī, 'father').

र् ra, adj.: forms comparatives from prepositions and ordinary adjectives;—e.g. अवर् áva-ra, 'lower'; धूम्र् dhūm-rá, 'grey' (from धूम् dhūma, 'smoke').

ल् la, adj.; m. subst.: forms adjectives and a few diminutives;—e.g. कपिल् kapi-lá ('monkey-coloured'), 'brown,' बङ्गल् bahu-lá, 'abundant'; वृषल् vr̥ṣa-lá, m. 'little man,' 'man of low caste,' 'Sūdra.'

वत् vat, adj. 'possessing';—e.g. प्रजावत् prajā-vat, 'having offspring'; नभस्त् nábhās-vat, 'cloudy,' m. 'wind.'

वन् van: forms in the sense of 'possessing' adjectives and masc. substantives;—e.g. मधवन् maghá-van, 'bountiful,' m. an epithet of Indra; अथर्वन् áthar-van, m. 'fire-priest.'

विन् vin: forms adjectives meaning 'possessing';—e.g. यशस्विन् yaśas-vin, 'glorious.'

183. The above lists practically supply the rules of **gender** for the Sanskrit noun. These may be summarized as follows.

Speaking generally, all stems ending in the long vowels आ ā, ई ī, ऊ ū, are feminine; stems ending in आ a, त् t, न् n, may be

masculine or neuter; stems ending in ई i or ई u may be of any gender.

a. Feminine are all stems formed with the suffixes आ ā, ई ī, ऊ ū, ता tā, त्रा trā, ति ti.

b. Neuter are all stems formed with the suffixes त्वा tva, रु ru, इस is, उस us, and (unless the name of a living being) अस as, and (unless meaning an agent) अन ana.

c. Masculine are (in so far as they are not used adjectivally) all stems formed with the suffixes त ta, व va, यु yu; आयन āyana, ई i (patronymic), क ka, भ bha, ल la.

d. Masc. or fem. are stems formed with the suffixes नि ni, नु nu, मि mi, तृ tṛ; also stems formed with the bare root (neuter also if adjectives).

e. Masc. or neut. are stems formed with the suffixes अ a, थ tha, न na, उन una, म ma, य ya, र̄ ra, त्वा tya, त्रा tra, तु tu, अन an, मन् man, वन् van; also the adjectives formed with इन् in, विन् vin, ईन् īna, ईय् īya, तन् tana, तम् tama, तर् tara, मय् maya, मत् mat, वत् vat.

f. Masc., fem., or neut. are stems formed with ई i or ई u.

B. Compounds:

184. I. Verbal Compounds are formed by combining roots with some twenty prepositions and a few adverbs. The compound verb is conjugated like the simple verb. Thus गम् gam, 'to go,' combines with सम् sam, 'together,' to संगम् sam-gam, 'to go together,' 'unite'; 3. sing. pres. संगच्छति samp-gacchati. The compound root can be used to form nominal stems by means of the primary suffixes enumerated above (182, 1);—e.g. संगम् samp-gam-ā, m. 'union.'

a. The prepositions which are compounded with roots are the following:—अति áti, 'beyond'; अधि ádhi, 'upon'; अन् ánu,

'after'; अन्तर् antár, 'between'; अप् ápa, 'away'; अपि ápi, 'on'; अभि abhí, 'against'; अव् áva, 'down'; आ á¹, 'near'; उद् úd, 'up'; उप् úpa, 'up to'; नि ní, 'down'; निस् nís, 'out'; परा pára, 'away'; परि pári, 'around'; प्र prá, 'forth'; प्रति práti, 'towards'; वि ví, 'asunder'; सम् sám, 'together.'

b. A few adverbs are also compounded with a limited number of verbs: तिरस् tirás, 'across,' 'aside,' with कृ kṛ, 'make,' धा dhā, 'put,' भु bhū, 'be';—e.g. तिरस्कुर्वन्ति tiras-kurvanti, 'they abuse'; तिरोधा tiro-dhā, 'put aside,' 'conceal'; तिरोधाभवन् tiro 'bhavan, 'they disappeared'; पुरस् purás with कृ kṛ and धा dhā, 'put in front,' 'honour';—e.g. पुरस्क्रियन्ताम् puras-kriyantām, 'let them be honoured'; आविस् ávis, 'openly,' with कृ kṛ, 'to manifest,' with अस् as and भु bhū, 'to appear';—e.g. आविष्करोति áviṣ-karoti, 'he shows'; आविरासीत् ávir-āsīt, 'he appeared'; अलम् álām, 'enough,' with कृ kṛ, 'to adorn.' अद् śrád, an old word meaning 'heart' (Lat. cord-), having acquired the character of an adverb, is compounded with धा dhā, 'put'; and similarly नमस् námas, 'obeisance,' अस्तम् ásta-m, acc. of अस्त् ásta, 'home,' are compounded with participles of कृ kṛ, 'do,' and इ i, 'go,' respectively;—e.g. अहधामि śrad-dadhāmi, 'I put faith,' 'credit' (Lat. crēdo); नमस्कृत्व नamas-kṛtya, 'having adored'; अस्तमित् ástam-itā, 'set' (of the sun).

Note. Adjectives or substantives may be compounded with कृ kṛ and भु bhū, before which final अ a, आ á, or इ i becomes ई ī, final उ u becomes ऊ ū;—e.g. वश् vasa, m. 'control': वशीकृ vaśi-kṛ, 'reduce to subjection,' वशीभु vaśi-bhū, 'become subject'; परिखीकृत parikhī-kṛta, 'turned into a moat' (परिखा parikhā). The sense of these verbal compounds implies a trans-

¹ The preposition आ á reverses the sense of verbs of going or giving;—e.g. आगम् á-gam, 'come'; आदा á-dā, 'take.'

formation; thus रत्नीभूत ratnī-bhūta would mean 'turned into a jewel,' but रत्नभूत ratna-bhūta, 'being a jewel,' as a nominal compound (188, 1 c).

II. Nominal Compounds.

185. The power of combining two or more words into one, which belongs to all the Indo-European languages, has been more largely developed in Sanskrit than in any of the others. Not only are long and complex compounds here in constant use, but they also take the place of the analytical modes of expression which prevail in the other cognate tongues. Thus Kālidāsa describes a river as 'wave-agitation-loquacious-bird-row-girdle-string-ed,' while we should say: 'her girdle-string is a row of birds loquacious because of the agitation of the waves.' Compounds being therefore of great syntactical importance in Sanskrit, it is necessary to distinguish and classify the various kinds, in order that the meaning of a Sanskrit sentence may be clearly understood. The most convenient division is into the three classes of Co-ordinatives, Determinatives, and Possessives. The Determinatives, so called because the former member determines (or qualifies) the latter, are of two kinds, Dependent and Descriptive. Possessives are secondary compounds, consisting chiefly of Determinatives turned into adjectives.

a. All words making up a compound except the last, ordinarily appear in the form of their uninflected stem; those with two stems using the weak, and those with three, the middle stem (73 a). The last word, in the case of Co-ordinatives and Determinatives, retains, as a rule, its usual form and inflexion, as well as, if a substantive, its gender; while, in Possessives, it is variable like an adjective.

E.g. देवदासः deva-dāsah, m. 'servant of a god, or of the gods';

स्वामिसेवा svāmi-sevā, f. 'serving a master'; **राजकर्म** rāja-karma, n. 'duty of a king'; **सनामन्** sa-nāman, 'homonymous': nom. m. **सनामा**, f. **सनाम्नी**, n. **सनाम**.

1. Co-ordinative (Dvandva) Compounds.

186. These consist of two (or more) nouns, far less commonly adjectives, very rarely adverbs, connected in sense by the copula 'and.' Dvandva, the name applied to Co-ordinatives by the Hindu grammarians, means 'pair' or 'couple.'

1. Compounded substantives are inflected in the dual or plural according as two or more objects are denoted, the gender being that of the last member;—e. g. **हस्त्याश्वौ** hasty-aśvau, 'an elephant and a horse'; **हस्त्याश्वाः** hasty-aśvāḥ¹, 'elephants and horses.' When, however, the parts of the compound express not individuals but categories, the Dvandva is inflected in the neuter singular as a collective;—e. g. **गवाश्वम्** gavaśvam, 'kine and horses.' Names of objects associated in pairs by way of contrast are often combined in Dvandvas;—e. g. **सिंहगजाः** simha-gajāḥ, 'lions and elephants'; **सारमेयमार्जाराः** sārameya-mārjārāḥ, 'dogs and cats'; **अहोरात्र** aho-rātra, m. n. 'day and night'². The number of members in the compound is not limited and is often considerable;—e. g. **देवगन्धर्वमानुषोरगराक्षसाः** deva-gandharva-mānuṣa_uraga-rāksasāḥ, 'gods, heavenly musicians, men, serpents, and demons.'

2. Adjectives (including past participles) are comparatively seldom compounded as Dvandvas;—e. g. **उत्तरदक्षिण** uttara-dakṣiṇa, 'north and south'; **शीतोष्ण** śītauṣṇa, 'cold and hot'; **सितासित** sitāasita, 'white and black'³; **घनायत** ghanaāyata,

¹ Cp. Lat. *eu-ove-taurilia*.

² Cp. Gk. *νυχθήμερον*

³ Cp. *λευκο-μέλας*.

'dense and extensive' (forest); **कृताकृत** kṛta-akṛta, 'done and undone'; **मृताजात** mṛta-ajāta, 'dead and unborn.'

a. Two past participles are sometimes compounded to express immediate sequence, the relation of the second to the first being often translatable by 'as soon as';—e.g. **दृष्टनष्ट** drṣṭa-nasta, 'seen and vanished' = 'vanished as soon as seen'; **जातप्रेत** jāta-preta, 'died as soon as born'; **उत्खातप्रतिरोपित** ut-khāta + prati-ropiita, 'uprooted and replanted'; **सुप्तोत्थित** supta-utthita, 'having slept and arisen,' i.e. 'having just arisen from sleep.'

3. Examples of the rare Dvandvas composed of adverbs are **सायंप्रातर्** sāyām-prātar, 'in the evening and morning'; **दिवानक्तम्** divā-naktam, 'by day and night.'

a. Occasionally complex Dvandvas, made up of compounds of another class, are met with;—e.g. **व्याकीर्णकेसरकरालमुख** vyākīrṇa-kesara+karāla-mukha, 'having a dishevelled mane and terrific jaws,' consists of two possessives (189).

b. Of the numerous Vedic Dvandvas consisting of the names of deities, each member being in the dual and separately accented, only very few survive in Sanskrit: **मित्रावरुणौ** mitrā¹-vāruṇau, 'Mitra and Varuṇa'; **द्यावापृथिव्यौ** dyāvā¹-pr̥thivyaū, 'Heaven and Earth.' In cases other than nom. voc. acc. the final member only is inflected: **मित्रावरुणयोः** mitrā-varuṇayoh and **द्यावापृथिव्योः** dyāvā-pr̥thivyoḥ.

c. **मातृ** mātṛ, 'mother,' and **पितृ** pitṛ, 'father,' as the first member of a Dvandva of relationship, assume the form of the nom. sing.: **मातापितरौ** mātā-pitarau, 'mother and father'; **पितापुत्रौ** pitā-putrau, 'father and son.'

¹ Mitrā and Dyāvā are Vedic duals. This type of compound was perhaps originally due to the juxtaposition of elliptic duals (*c*);—e.g. Mitrā, 'the two Mitras' being = 'Mitra and Varuṇa.' **द्वादश** dvā-dasa is a numeral Dvandva ('two and ten') in which the first number is an old dual.

The mass. of co-ordinate pairs of relations can be used alone in the dual so as to include the female;—e.g. पितरौ pitara॑u = ‘parents’; अशुरौ śva॑śura॑u = ‘parents-in-law’; पुत्रौ putra॑u = ‘son and daughter’ (as well as ‘two sons’); भातरौ bhrātarau = ‘brother and sister’².

2 a. Dependent (Tatpurusa) Determinatives.

187. A dependent determinative is one in which the first member depends on the last, the syntactical relation of the former to the latter being that of an attribute (noun or pronoun) in an oblique case. The compound may be a substantive or an adjective, according as the last member is one or the other.

E.g. तत्पुरुष tat-puruṣa, m. ‘the man of’ him, ‘his man’ (an example used by the Hindu grammarians to designate the class); सूरमानिन् sūra-mānin, adj. ‘thinking oneself a hero’; गुणोपित् guṇa-upita, adj. ‘endowed with virtues’ (upaita is a past part.).

In dependent compounds the first member may have the sense of any oblique case, but that of the gen. is by far the commonest.

i. Acc. The last member is naturally always an adjective of a verbal nature³;—जयप्रेप्सु jaya-prepsu, adj. ‘desiring victory’ (prāpsu is a desid. adj., cp. 170, 2); वर्षभोग्य varṣa-bhogya, adj. ‘to be enjoyed for a year’ (bhogya is a fut. part. pass.); गृहागत gṛha-āgata, adj. ‘come to the house’ (āgrata is a past part.); ग्रामप्राप्त grāma-prāpta, ‘arrived at the village’⁴. (A past part. is more commonly placed at the beginning, when the compound

¹ Cp. Lat. socius = socius et soror.

² Cp. Gk. ἀδελφοί and Lat. fratres = ‘brother and sister.’

³ Cp. Gk. ἵπποδαμος, ‘horse-taming,’ Lat. jiū-dex, ‘pointing out the law,’ ‘judge.’

⁴ The past part. गत gata, ‘gone to,’ is often used at the end of Tatpurusas in the sense of ‘relating to,’ ‘existing in’;—e.g. हस्तगत hasta-gata, ‘held in the hand.’

becomes a possessive;—e.g. प्राप्तग्राम prāpta-grāma, lit. ‘having a reached village.’)

2. **Instr.** मासपूर्व māsa-pūrva, ‘earlier by a month’; स्वामिसदृश svāmi-sadr̥śa, ‘like (his) master’ (cp. 199, 2 c); अल्पोन alpañuna, ‘deficient by a little’=‘almost finished’; अहिहत ahi-hata, ‘killed by a snake’; देवदत्त deva-datta, ‘given by the gods’ (cp. θεό-δοτος), commonly used as a proper name with an auspicious sense (Dien-donné) and often denoting an indefinite person=‘so-and-so.’

3. **Dat.** युपदार् yūpa-dāru, n. ‘wood for a sacrificial post’; विष्णुबलि viṣṇu-bali, m. ‘offering to Viṣṇu’; प्रभुहित prabhu-hita, adj. ‘advantageous to the king.’

4. **Abl.** स्वर्गपतित svarga-patita, adj. ‘fallen from heaven’; भवदन्य bhavad-anyā, adj. ‘different from you.’

5. **Gen.** राजपुरुष rāja-puruṣa, m. ‘king’s man’; व्याघ्रबुद्धि vyāghra-buddhi, f. ‘thought of (its being) a tiger.’

6. **Loc.** उरोज uro-ja, adj. ‘produced on the breast’; अस्वकोविद् asva-kovida, adj. ‘skilled in horses’; गृहजात gr̥ha-jāta, adj. ‘born in the house’; पूर्वाह्नक्षत्र pūrvāhna-kṣṭra, adj. ‘done in the forenoon.’

a. Some dependent compounds retain the case termination in the governed noun;—e.g. धनंजय dhanam-jaya, adj. ‘winning booty,’ m. as a proper name; परस्मैपद paraśmai-pada, n. ‘word for another’; वाचस्पति vācas-pati, m. ‘lord of speech’; युधिष्ठिर yudhi-ṣṭhira, adj. ‘firm in battle,’ m. as a proper name.

b. If a root forms the last member of a Tatpuruṣa it undergoes no change except that आ ā is shortened to अ a, while इ i, उ u, ए e add त t (cp. 182, 1 a);—e.g. वरद् vara-da, adj. ‘granting boons’ (दा dā, ‘give’); विश्वजित् viśva-ji-t, adj. ‘all-conquering’; कर्मक्षत् karma-kṛ-t, adj. ‘doing work,’ ‘laborious.’

c. At the end of a dependent, विशेष viśeṣa, m. means ‘special kind of,’ i.e. ‘choice,’ ‘pre-eminent’; similarly अन्तर् antara, n.

'difference,' generally means 'other,' sometimes 'special,' 'particular';—e.g. तेजोविशेषं tejo-viśeṣa, m. 'extraordinary splendour'; देशान्तरं desā-antara, n. 'another country'; उपायान्तरं upāya-antara, n. 'a special means'; भाष्यान्तरं bhāṣya-antara, n. 'particular conversation.'

d. अर्थ artha, m. 'object,' 'purpose,' is often used adverbially at the end of dependents in the acc. and less commonly in the dat. and loc.;—e.g. दमयन्त्यर्थम् damayanty-artham, 'for the sake of Damayantī.'

2 b. Descriptive (**Karmadhāraya**) Determinatives.

188. A descriptive determinative is one in which the first member describes the last, the syntactical relation of the former to the latter being that of a predicate. This relation may be expressed in three ways:—

i. By a **Noun** (in apposition);—e.g. राजर्षि rājaṛṣi, m. 'king sage,' i.e. 'royal sage'; स्त्रीजनं strī-jana, m. 'women-folk.'

a. A title is thus sometimes compounded with a proper name;—e.g. अमात्यराक्षसं amātya-Rākṣasa, 'Minister Rākṣasa.' Occasionally the proper name comes first;—e.g. शांडिलीमातृ Sāṇḍili-mātṛ, 'Mother Sāṇḍili.'

b. The apposition often expresses a comparison;—e.g. जलादश्यामं jalada-syāma, adj. 'dark as a cloud'; हिमशिशिरं hima-siśira, adj. 'cold as ice'; जलान्तस्त्रङ्गचपलं jala-āntaś-trāṅga-capala, adj. 'fickle as the moon reflected in the water.' When both members are substantives the object with which a comparison is made is placed not at the beginning of the compound, but at the end;—e.g. पुरुषव्याघ्रं puruṣa-vyāghra, m. 'man-tiger,' i.e. 'tiger-like man,' 'human tiger'; वाञ्छधुं vāñ-madhu, n. 'speech-honey,' i.e. 'honied speech'; पादपद्मं pāda-padma, n. 'foot-lotus,' i.e. 'lotus-like foot.'

c. The past part. भूत bhūta, 'become,' 'existent,' is often added, in the sense of 'being,' to an appositional substantive (which is thus turned into an adj.);—e.g. तमोभूत tamo-bhūta, 'existing in a state of darkness'; रत्नभूत ratna-bhūta, 'being a jewel' (cp. 184 b, note).

2. By an **Adjective**;—e.g. कृष्णसर्पि krṣṇa-sarpa, m. 'black snake'; नीलोत्पला nila-utpalā, n. 'blue lotus'; मध्याह्न madhya-ahna, m. 'midday'; अर्धमार्ग ardha-mārga, m. 'half way'; वर्तमानकवि vartamāna-kavi, m. 'living poet.'

a. Those compounds in which the adjective is a **numeral** are by the Hindu grammarians treated as a special class, called **Dvigna** ('two-cow'). They are generally neuters or feminines (in ई i) expressing aggregates;—e.g. त्रिलोक tri-loka, n. or त्रिलोकी tri-lokī, f. 'the three worlds.' They may also become adjectives by being turned into possessives (189);—e.g. त्रिगुण tri-guṇa, n. 'the three qualities'; adj. 'possessing the three qualities.'

b. पूर्व pūrva, 'previous,' is put at the end, instead of adverbially at the beginning, in the sense of 'before,' after past participles;—e.g. दृष्टपूर्व adj. 'seen before.'

c. At the beginning of a descriptive compound महत mahat becomes महा mahā, while at the end राजन् rājan, अहन् ahan, सखि sakhi, रात्रि rātri, become राज, अह, सख, रात्र (m. n.) respectively;—e.g. महाराजः 'great king'; पुण्याहम् punya aham, 'auspicious day'; प्रियसखः 'dear friend'; अर्धरात्र ardha-rātra, m. 'midnight.'

d. अन्योन्य anyo-(a)nya and परस्पर para-s-para, 'one another,' are a kind of irregular compound in which the nom. masc. form, due to frequent syntactical juxtaposition, became generalized; thus अन्योन्याम् acc. sing. fem.=अन्या-अन्याम् anyā-anyām.

3. By an **Adverb** (inclusive of particles and prepositions);—

e. g. सुजन् su-jana, m. 'honest man'; अधिलोक् adhi-loka, m. 'highest world'; अज्ञात् a-jñāta, adj. 'unknown'; यथोक्त् yathā-ukta, adj. 'as stated'; एवंगत् evam-gata, adj. 'thus faring.'

a. Compounds of this kind, when used in the acc. neuter as adverbs, are treated by the Hindu grammarians as a special class called **Avyayī-bhāva** ('indeclinable state'). Such are अनुरूपम् anu-rūpam, 'conformably'; यथाशक्ति् yathā-sakti, 'according to ability'; सविनयम् sa-vinayam, 'politely'; यावज्जीवम् yāvaj-jīvam, 'for life.'

3. Possessive (*Bahuvrīhi*) Compounds.

189. These compounds are essentially adjectives agreeing with a substantive expressed or understood. They are determinatives (generally of the adjectively descriptive class) ending in substantives, which are made to agree in gender, number, and case with another substantive. Thus बहुव्रीहि bahu-vrīhi, m. 'much rice,' becomes an 'adjective in the sense of 'having much rice' (an example used by the Hindu grammarians to designate the class).

Every kind of determinative can be turned into a possessive;—e. g. इन्द्रशत्रु् indra-śatru, m. 'foe of Indra': adj. 'having Indra as a foe'; भीमपराक्रम् bhīma-parākrama, m. 'terrible prowess': adj. 'of terrible prowess'; त्रिपद् tri-pád, adj. 'three-footed' (Gk. *τριπόδης*, Lat. *tri-ped-*); अधोमुख् adho-mukha, adj. 'downcast' (mukha, n. 'face'); अपुत्र a-putra, adj. 'sonless'; सभार्य sa-bhārya, adj. 'accompanied by his wife' (bhāryā); तथाविध tathā-vidha, adj. 'of such a kind' (vidhi, m.); दुर्मनास् dur-manās, adj. nom. m.f. (*δυσ-μενής*), 'ill-minded,' 'dejected.'

a. In the Vedic language possessives were distinguished from determinatives by accent;—e.g. rāja-putrā, 'king's son'; rājā-putra, adj. 'having kings as sons.'

b. Possessives often come to be used as substantives or proper

names;—e.g. सुहृद् su-hṛd, 'good-hearted,' becomes masc. 'friend'; सत्यश्रवास् satyā-śravāś, adj. nom. m. 'of true fame,' becomes the name of a man (cp. Ἐπεο-κλέψ).

c. Possessives are often very intricate, containing several other compounds. Thus [(vīci-kṣobha)-stanita-(vihaga-śreni)]-(kāñcī-guṇā) is based on an appositional descriptive consisting of two main parts. The second, 'kāñcī-guṇā,' m. 'girdle-string,' is a Tatpurusa. The first is an adjectival descriptive in which the Tatpurusa 'vihaga-śreni,' 'row of birds,' is described by 'vīci-kṣobha-stanita,' 'loquacious through wave-agitation.' The latter is a compound Tatpurusa, in which 'stanita' is qualified by the simple Tatpurusa 'vīci-kṣobha,' 'agitation of the waves.' श्रोतो-षणकिरणी sītā-usna-kirāṇau, 'moon and sun,' is an example of a Bahuvrīhi which is used as a substantive and contains a Dvandva. It is in reality a kind of contracted Dvandva ('the cool and the hot-rayed' for 'the cool-rayed and the hot-rayed').

d. Bahuvrīhis with a past participle at the beginning are syntactically often equivalent to a gerund or loc. absolute;—e.g. त्यक्तनगर् tyakta-nagara, 'having the city left' = नगरं त्यक्ता nagaram tyaktvā, 'having left the city,' or नगरे त्यक्ते nagare tyakte, 'the city being left.'

e. Bahuvrīhis based on appositional descriptives often imply a comparison;—e.g. चन्द्रानन् candra-ānana, 'moon-faced'; पद्माक्षा padmākṣa (f. i), 'lotus-eyed.' Inversion of the natural order does not take place here as in descriptives (cp. 188, 1 b).

f. कल्प kalpa, m. 'manner,' and प्रायं prāya, m. 'chief part,' are used at the end of Bahuvrīhis in the sense of 'like,' 'almost'; e.g. अमृतकल्प amṛta-kalpa, adj. 'ambrosia-like'; प्रभातप्राय prabhāta-prāya, adj. 'almost dawning.' In the same position परं para and परम् parama, adjectives meaning 'highest,' 'chief,' used as substantives, signify 'engrossed in,' 'intent on' (lit. 'having

as the chief thing');—e.g. चिन्नापर cintā-para, 'immersed in thought.'

g. मात्रा mātrā, f. 'measure,' is used at the end of Bahuvrīhis in the sense of 'only';—e.g. नाममात्रा नराः nāmamātrā narāḥ, 'men bearing the name only.' At the end of past participles it means 'as soon as';—e.g. जातमात्रः शत्रुः jāta-mātrah śatruḥ, 'an enemy as soon as (he has) come into being.' It is, however, generally employed as a neuter substantive in this way;—e.g. जलमात्रम् jala-mātram, 'water alone' (lit. 'that which has water for its measure').

h. आदि ādi, m. and प्रभृति prabhṛti, f. 'beginning,' आद्या ādyā, 'first' (used as a substantive), are employed at the end of Bahuvrīhis in the sense of 'and the rest,' 'and so forth,' 'etcetera,' primarily as adjectives and secondarily as substantives;—e.g. (देवा) इन्द्रादयः (devā) Indra ādayaḥ, '(the gods) Indra and the rest' (lit. 'having Indra as their beginning'); इत्यादि itiādi, n. 'beginning thus' (i.e. with these words)= 'and so on.'

पुरोगम puro-gama, पूर्वं pūrvam, पुरःसर puraḥ-sara, 'preceding' = 'leader,' are similarly employed in the sense of 'preceded, led, or accompanied by';—e.g. देवा इन्द्रपुरोगमाः 'the gods led by Indra.' पूर्वं and पुरःसर are also used adverbially at the end of Bahuvrīhis;—e.g. स्मितपूर्वम् 'with the accompaniment of a smile,' 'smilingly'; बहुमानपुरःसरम् bahumāna-puraḥsaram, 'with respect,' 'respectfully.'

i. Words meaning 'hand' are placed at the end of possessives;—e.g. शस्त्रपाणि śastra-pāṇi, 'weapon-handed,' 'having a weapon in one's hand'; कुशहस्ति kusa-hasta, 'with kuśa-grass in (his) hand.'

j. The suffix इन् in is pleonastically added to धर्म dharma, 'duty,' शीलं sīla, 'character,' माला mālā, 'garland,' शाला śalā, 'house,' शोभा śobhā, 'beauty,' वर्णं varṇa, 'colour';—e.g.

वरवर्णिन् vara-varṇ-in, 'of excellent colour.' The adjectival suffix का ka is similarly often added, especially to unusual finals, as to words in चूँ त्, to feminines in ई इ (like नदी nadi), and in the feminine to words in इन् in;—e.g. मृतभर्तुका mṛta-bhartṛ-kā, 'whose husband is dead'; सपत्नीका sa-patnī-ka, 'accompanied by his wife.'

CHAPTER VII

OUTLINES OF SYNTAX

190. As the great bulk of the literature consists of poetry, the syntactical arrangement of the Sanskrit sentence is primitive and undeveloped, as compared with Latin and Greek. Its main characteristic is the predominance of co-ordination, long compounds and gerunds constantly taking the place of relative and other subordinate clauses, while the *oratio obliqua* is entirely absent. Another feature is the comparatively rare use of the finite verb (frequent enough in the Vedic language), for which past participles or verbal nouns are very often substituted. There is also a marked fondness for passive constructions. A special feature of Sanskrit syntax is the employment of the **locative absolute**.

The Order of Words.

191. The usual arrangement of words in a Sanskrit sentence is:—first, the subject with its attributes (a genitive preceding its nominative); second, the object with its adjuncts (which precede it); and lastly, the verb.

Adverbs or extensions of the predicate are commonly placed near the beginning, and unemphatic connective particles follow

३५१. + ३५२. - ३५३. + ३५४.

the first word;—e.g. जनकसु सत्वरं स्वीयं नगरं जगाम ‘but Janaka went in haste to his own city.’

When there is a vocative, it generally comes first. Instead of the subject any other word requiring emphasis may be placed at the head of the sentence;—e.g. रात्रौ त्वया मठमध्ये न प्रवेष्ट्वम् ‘at night you must not enter the monastery.’

a. The subject, if a personal pronoun, is not expressed unless emphatic, being inherent in finite verbal forms. Even the general subject ‘one’ or ‘they’ is often indicated by the verb alone;—e.g. ब्रूयात् ‘one should say’; आङ्गः ‘they say’=‘it is said.’

b. The copula अस्ति ‘is,’ unless the tense or mood has to be expressed, is generally omitted. In that case the predicate precedes its noun;—e.g. श्रीतला रात्रिः ‘the night (is) cold.’ If the predicate bears any emphasis, भवति is used, not अस्ति;—e.g. यो विद्यया तपसा जन्मना वा वृद्धः स पूज्यो भवति द्विजानाम् ‘he who is distinguished by knowledge, penance, or birth, is (certainly) to be respected by the twice-born.’

c. Just as attributes precede their nouns and the qualifying word comes first in compounds, so a relative or other subordinate clause precedes the principal clause, which regularly begins with a correlative word;—e.g. यस्य धनं तस्य बलम् lit. ‘of whom wealth, of him power,’ i.e. ‘he who has wealth has power.’ Similarly यदा—तदा, यावत्—तावत्, &c.

The Article.

192. There is properly neither an indefinite nor a definite article in Sanskrit. But एक् ‘one’ and कस्ति॒र् ‘some’ (119), being frequently used to express ‘a certain,’ may sometimes be translated by ‘a.’ Similarly स ‘that’ (110) may, when referring to persons or things just mentioned, be rendered by ‘the’;—e.g. स राजा ‘the king’ (of whom we are speaking).

Number.

193. 1. Singular collective words are sometimes used at the end of compounds to form a plural;—e.g. स्त्रीजन् strī-jana, m. ‘womankind’=‘women.’ Such collectives are sometimes themselves used in the plural;—e.g. लोकः or लोकाः ‘the world,’ ‘people.’

2. The dual number is in regular use and of strict application, the plural practically never referring to two objects. It is therefore invariably employed with the names of things occurring in pairs, such as parts of the body;—e.g. हस्तौ पादौ च ‘the hands and the feet.’ A masc. dual is sometimes used to express a male and female of the same class;—e.g. जगतः पितरौ ‘the parents of the universe’ (see 186, 3 c, p. 171).

3. a. The plural is sometimes applied to others by the speaker or writer as a mark of great respect, यूयम् and भवन्तः taking the place of त्वम् and भवान्;—e.g. श्रुतं भवन्नः ‘has your Majesty heard?’ In this sense the plur. पादाः ‘feet’ is employed instead of the dual (cp. 193, 2);—e.g. एष देवपादान् अधिक्षिपति ‘he insults your Majesty’s feet.’ Proper names are occasionally used in the same way;—e.g. इति श्रीशंकराचार्याः ‘thus (says) the revered teacher Sankara.’

b. The 1. pers. pl. is sometimes used by the speaker referring to himself (like our editorial ‘we’) instead of the singular or dual (cp. 193, 2);—e.g. वयमपि किंचित्पृच्छामः ‘we (=I) too ask something’; किं कुर्मः सांप्रतम् ‘what shall we (=you and I) do now?’

c. The names of countries are plural, being really the names of the peoples (like ‘Sweden’ in English and ‘Sachsen’ in German);—e.g. विदर्भेषु ‘in Vidarbha’ (Berar). In the singular the name of the people often denotes the king of the country.

d. Some nouns are used in the plural only:—**आपः** f. 'water' (96, 1); **प्राणाः** m. 'life'; **वर्षाः** f. 'the rains' = 'the rainy season'; **दाराः** m. 'wife.'

Concord.

194. The rules of concord in case, person, gender, and number are in general the same as in other inflexional languages, but the following special points may be noted:—

1. The nominative with **इति** may take the place of a predicative acc. governed by verbs of calling, considering, knowing, &c.;—e.g. **ब्राह्मण इति मां विज्ञि** 'know me to be a Brahmin' (instead of **ब्राह्मणं मां विज्ञि**).

2. When a dual or plural verb refers to two or more subjects the first person is preferred to the second or third, and the second person to the third;—e.g. **त्वमहं च गच्छावः** 'you and I go.'

3. a. A dual or plural adjective agreeing with masc. and fem. substantives is put in the masc., but when neuters are associated with masculines and feminines, in the **neuter** (sometimes singular);—e.g. **मृगयाक्षास्थथा पानं गर्हितानि महीभुजाम्** 'the chase, dice (aksāh), and drinking are reprehensible in kings'; **पञ्चविकलश्च पक्षी शुक्षश्च तस्मै सरश्च जलहीनं सर्पश्चोद्भृतदंप्रस् तुत्यं लोके दरिद्रश्च** 'a bird with clipped wings, a withered tree, a dried-up pond, a toothless serpent and a poor man are of equal account (neut. sing.) in (the eyes of) the world.'

b. Occasionally an attribute or predicate takes the natural instead of the grammatical gender;—e.g. **त्वां चिन्तयन्ती निराहाराः द्राताः प्रजाः** 'thinking (masc.) of thee the subjects (fem.) have been reduced to taking no food.'

c. As in Greek and Latin, a demonstrative pronoun agrees with its predicate in gender;—e.g. **असौ परमो मन्तः** 'this (masc.) is the best counsel' (masc.).

A participle used in place of a finite verb, which should agree

with the subject, may be attracted in gender by a substantive predicate if in close proximity with it;—e.g. त्वं मे मित्रं जातम् ‘thou (masc.) hast become (neut.) my friend’ (neut.).

4. A singular collective noun is necessarily followed by a singular verb. Two singular subjects require a predicate in the dual, three or more require it in the plural. Occasionally, however, the predicate agrees in number with the nearest subject, being mentally supplied with the rest;—e.g. कान्तिमती राज्यमिदं मम च जीवितमपि खद्धीनम् ‘Kāntimati, this kingdom, and my very life (are) at your mercy’ (sing.).

a. Similarly, the verb which should agree with a single plural subject may be attracted in number by a noun predicate in its immediate proximity;—e.g. सप्तप्रवृतयो हीताः समस्तं राज्यमुच्यते ‘these seven constituent parts are said (sing.) to form the entire kingdom.’

Pronouns.

195. 1. Personal. a. Owing to its highly inflexional character Sanskrit uses the nominatives of personal pronouns far less frequently than modern European languages do (cp. 191 a).

b. The unaccented forms of अहम् and त्वम् (109 a) being enclitic, can be used neither at the beginning of a sentence or metrical line (Pāda), nor after vocatives, nor before the particles च, वा, एव, ह;—e.g. मम मित्रम् ‘my friend’ (not मे); देवास्तान् पाहि ‘O God, protect us’ (अस्तान्, not तः); तस्य मम वा गृहम् ‘his house or mine.’

c. भवान् ‘your Honour’ (f. भवती), the polite form of त्वम् ‘thou’ (with which it often alternates even in the same sentence), takes the verb in the 3. person;—e.g. किमाह भवान् ‘what does your Honour say?’ The plural भवत्तः (f. भवत्यः) is construed in the same way; it frequently has a singular sense (193, 3 a). Two compounds of भवान् are often used in the drama:—अत्रभवान्

atra-bhavān refers to some one present, either the person addressed or some third person—‘your Honour here’ or ‘his Honour here’; तत्रभवान् tatra-bhavān, ‘his Honour there,’ referring to some one off the stage, can only be used of a third person. Both take the verb in the 3. sing.

2. Demonstrative. *a.* एष and अयम् refer to what is near or present—‘this.’ The former is the more emphatic of the two. Both are often employed agreeing with a subject in the 1. or 3. pers. sing. in the sense of ‘here’;—e.g. एष तपस्वी तिष्ठति ‘here a devotee stands’; अयमस्मि ‘here am I’; अयम् आगतस्तव पुत्रः ‘here comes your son.’ अयं जनः ‘this person’ is frequently used as an equivalent of ‘I.’

b. स and असौ refer to what is absent or remote—‘that.’ स is the more definitely demonstrative of the two, being, for instance, the regular correlative to an antecedent relative. It has the following special uses. It has often (like Lat. ille) the sense of ‘well-known,’ ‘celebrated’;—e.g. सा रम्या नगरी ‘that well-known charming city.’ It is frequently also the equivalent of ‘the aforesaid’;—e.g. सोऽहम् ‘I (being) such’ (as just described). In this sense it may often be translated simply by the definite article ‘the’ (cp. 192). When unaccompanied by a noun स supplies the place of a personal pronoun of the third person—‘he, she, it, they,’ but with a certain amount of emphasis when used in the nominative (अयम् and असौ are employed in the same way as personal pronouns of the third person). Finally स when repeated means ‘various,’ ‘several,’ ‘all sorts of’;—e.g. तानि तानि शास्त्राण्णथेत् ‘he read various treatises.’

3. Possessive. These pronouns (116) are comparatively little used, as the genitive of the personal pronouns is generally employed. In accordance with the sense of भवत् (195, 1 c), its derivatives भवदीय bhavad-iya and भावत्का bhāvat-ka are used as possessive pronouns of the second person in respectful address.

THE CASES.**Nominative.**

प्रयोग न करें। संस्कृत में यहाँ वास्तविक वाचन का उदाहरण है।
196. The nominative is far less frequently used in Sanskrit as the subject of a sentence than in other Indo-European languages. Its place is very commonly supplied by the instrumental of the agent with a passive verb;—e.g. किनापि सखरकैकाने स्थितम् 'a certain field-watcher was standing aside' (lit. 'by a certain field-watcher it was stood aside').

a. The nominative is used predicatively with verbs meaning 'to be, become, seem, appear,' as well as with the passive of verbs of calling, considering, sending, appointing, making, &c.;—e.g. तेन मुनिना कुङ्कुरो व्याघ्रः कृतः 'the dog was turned into a tiger by the sage.'

b. The nominative followed by इति may in certain circumstances take the place of the accusative (see 194, 1).

Accusative.

प्रयोग न करें। यहाँ वास्तविक वाचन का उदाहरण है।
197. Besides its ordinary use of denoting the object of transitive verbs, the accusative is employed to express—

1. the goal with verbs of motion;—e.g. स विदर्भान् अगमत् 'he went to Vidarbha.'

a. verbs of going, like गम् and या, are very commonly joined with an abstract substantive where either the corresponding adjective with 'to become,' or merely an intransitive verb would be used in English;—e.g. स कीर्ति याति 'he becomes famous' (lit. 'goes to fame'); पञ्चत्वं गच्छति 'he dies' (lit. 'goes to death').

2. duration of time and extension of space;—e.g. मासमधीति 'he learns for a month'; योजनं गच्छति 'he goes (the distance of) a Yojana' (nine miles).

3. the object of desiderative adjectives in सु (cp. 169) and of some compound adjectives beginning with prepositions;—e.g.

तितीर्षुर् अस्मि सागरम् 'I am desirous of crossing the ocean';
दमयन्तीम् अनुव्रतः 'devoted to Damayanti.'

4. the cognate object of intransitive verbs in the case of substantives and the analogous adverbial sense in the case of adjectives;—e.g. **कामान् सर्वान् वर्षतु** 'may he rain (i. e. grant) all desires'; **शीघ्रं गच्छाम** 'let us go quickly' (originally, 'go a quick gait').

Double Accusative.

198. Two accusatives are governed by—

1. verbs of calling, considering, knowing, making, appointing, choosing;—e.g. **जानामि त्वा प्रवृत्तिपुरुषम्** 'I know thee (to be) the chief person.'

2. verbs of speaking (**ब्रू, चत्, अह्**), asking (**प्रश्न्**), begging (**याच्, प्रार्थय**), instructing (**अनुशास**), fining (**दण्डय**), winning (**जि**), milking (**दुह्**);—e.g. **अन्तरिक्षगो वाचं व्याजहार नलम्** 'the bird addressed a speech to Nala'; **साच्यं पृच्छेदृतं द्विजान्** 'he should ask true evidence from the twice-born'; **बलिं याचते वसुधाम्** 'he asks Bali for the earth'; **यदनुशास्ति माम्** 'what she commands me'; **तान् सहस्रं दण्डयेत्** 'he should fine them a thousand (panas)'; **जित्वा राज्यं नलम्** 'having won the kingdom from Nala'; **रत्नानि दुदुङ्गर्धरित्रीम्** 'they milked (i. e. extracted) gems from the earth.'

3. **कथय** 'tell,' **वेदय** 'make known,' and **आ-दिश्** 'enjoin,' never take the accusative of the person addressed, but the dative (or gen.).

3. verbs of bringing, conveying, leading, dispatching;—e.g. **यामम् अज्ञान् नयति** 'he brings the goat to the village'; **शकुन्तलां पतिकुलं विद्युज्य** 'having sent Sakuntalā away to her husband's house.'

4. causative verbs;—e.g. रामं वेदमधापयति 'he causes Rāma to learn the Veda'; if stress is laid on the agent (the direct acc.), it may be put in the instrumental: तां अभिः खादयेत् 'he should cause her to be devoured by dogs.'

a. When the causative meaning has faded, the dat. or gen. of the person is used instead of the acc.; this is generally the case with दर्शय 'show' ('cause to see'), and आवय 'tell' ('cause to hear'), and always with वेदय 'make known,' 'tell' ('cause to know').

b. In the passive construction the direct acc. (the person or agent) becomes the nom., the indirect acc. (the object or thing) remains;—e.g. रामो वेदम् अधायते 'Rāma is caused to learn the Veda'; तां श्वानः खाद्यन्ते 'dogs are caused to devour her'; बलिर्याच्यते वसुधाम् 'Bali is asked for the earth.' X

Instrumental.

199. The fundamental notion of the instrumental, which may be rendered by 'by' or 'with,' expresses the **agent**, the **instrument** (means), or **concomitant** by or with which an action is performed;—e.g. तेनोक्तम् 'it was said by him' = 'he said'; स खड्गेन व्यापादितः 'he was killed with a sword'; यस्य मित्रेण संलापस् ततो नास्तीह पुण्यवान् 'there is no one happier (201, 2a) in this world than he who has converse with a friend.'

i. The following are modifications of the **instrumental sense** expressing—

a. the **reason**: 'by,' 'through,' 'by reason of,' 'because of,' 'on account of';—e.g. भवतोऽनुग्रहेण 'through your favour'; तेना-पराधेन लां दण्डयामि 'I punish you for that fault'; व्याघ्रबुद्धा 'by the thought of a tiger' = 'because he thought it was a tiger' (cp. p. 172, 5); सुखभाव्या 'under the delusion of (the existence of) pleasure.'

b. accordance: 'by,' 'in conformity with';—e.g. प्रकृत्या 'by nature'; जात्या 'by birth'; स मम मतेन वर्तते 'he goes by (acts in accordance with) my opinion.'

c. the price: ('with,' 'by means of' =) 'for,' 'at the price of';—e.g. रूपकश्तेन विक्रीयमाणं पुस्तकम् 'a book sold for a hundred rupees'; आत्मानं सततं रचेद् दारिरपि धनैरपि 'a man should always save himself even at the cost of his wife or of his wealth.'

d. time within which anything is done: ('by the lapse of' =) 'in';—e.g. द्वादशभिर् वर्षैर्व्याकरणं शूयते 'grammar is learnt in twelve years.'

e. the way, vehicle or part of the body by which motion is effected;—e.g. कतमेन मार्गेण प्रनष्टाः काकाः 'in what direction (lit. 'by what road') have the crows disappeared?' वाजिना चरति 'he goes on horseback' (lit. 'by means of a horse'); स अनां स्वाम्बेनोवाह 'he carried (uvāha) the dog on his shoulder.'

f. 'in respect of': with words implying superiority, inferiority or defectiveness;—e.g. एताभ्यां शौचिण्यं हीनः 'inferior to these two (abl.) in valour'; पूर्वान् महाभाग तथातिशेषे 'O fortunate man, you excel your ancestors in that (devotion)'; अद्याणा काणाः 'blind of an eye.'

g. 'of,' 'with': with words meaning **need** or **use**, आर्थः; प्रयोजनम् (used interrogatively or with a negative), or किम् 'what?' (with or without क्ष 'do');—e.g. को मे जीवितेनार्थः 'what is the use of life to me' (gen.); देवपादानां सेवकैर्ण प्रयोजनम् 'your Majesty's feet have no need of servants'; किं तथा क्रियते धेन्वा 'what is to be done with that cow?' किं न एतेन 'what have we (to do) with this?' Similar is the use of क्षतम् 'done with' = 'away with' and अलम् 'enough of' (cf. 180): क्षतमभ्युत्थानेन 'away with rising' = 'pray do not rise.'

b. 'with,' 'at': with verbs of rejoicing, laughing, being pleased, satisfied, astonished, ashamed, disgusted;—e.g. कापुरुषः स्वल्पेनापि तुष्टति ‘a low person is satisfied even with very little’; जहास तेन ‘he laughed at it.’

i. 'of,' 'by': with verbs of boasting or swearing;—e.g. भरते-नामना चाहं श्रूपे ‘I swear by Bharata and myself.’

j. the object (victim) with यज् ‘sacrifice’;—e.g. पशुना रुद्रं यजते ‘he sacrifices a bull to Rudra.’ Here we have the real inst. sense surviving from the time when यज् meant ‘worship’ a god (acc.) with (inst.).

2. The concomitant or associative sense is generally supplemented by the prepositional adverbs सह, साक्षम्, सार्धम् and समम् ‘with,’ which are used (like ‘with’ in English) even when separation or antagonism is implied;—e.g. पुत्रेण सह पिता गतः ‘the father went with his son’; मित्रेण सह चिन्तविश्वेषः ‘disagreement with a friend’; स तेन विदधि समं युद्धम् ‘he engaged in a fight with him.’ This sense is also applied—

a. to express the accompanying circumstances or the manner in which an action is performed;—e.g. तौ दंपती महता स्नेहेन वसतः ‘that pair lives in great affection’; महता सुखेन ‘with great pleasure.’

b. with the passive of verbs which have the sense of accompanying, joining, endowing, possessing, and the opposite;—e.g. त्वया सहितः ‘accompanied by you’; धनेन संपन्नो विहीनो वा ‘possessed or destitute of wealth’; प्राणेर् वियुक्तः ‘bereft of life.’

c. with adjectives expressive of identity, equality, or likeness: सम्, समान्, सदृश्, तुत्यः;—e.g. शक्तिं समः ‘equal to Indra’; अनेन सदृशः ‘like him’; अयं न मे पादरजसापि तुत्यः ‘he is not even equal to the dust of my feet.’ The genitive is also used with these adjectives (cp. 202, 2 d).

Dative.

200. The dative case expresses either the **indirect object**, generally a person, or the **purpose** of an action.

A. The dative of the **indirect object** is used—

i. with **transitive** verbs, with or without a direct object:—

a. of giving (दा, अर्पय), telling (चत्, शंस, कथय, ख्यापय, निवेदय), promising (प्रति^० or आ-शु, प्रति-ज्ञा), showing (दर्शय);—e.g. विप्राय गां ददाति 'he gives a cow to the Brahmin'; कथयामि ते भूतार्थम् 'I tell you the truth.'

b. of sending, casting;—e.g. भोजेन दृतो रघवे विस्तृष्टः 'a messenger was sent by Bhoja to Raghu'; शूलांश्चिचिपू रामाय 'they cast (47) darts at Rāma.'

2. with intransitive verbs meaning to please (रुच), desire (नुभ, स्वृह), be angry with (असूय, क्रुप, क्रुध), injure (द्रुह);—e.g. रोचते मह्यम् 'it pleases me'; न राज्याय स्वृहये 'I do not long for the kingdom'; किंकराय कुप्यति 'he is angry with his servant.' (क्रुध and द्रुह when compounded with prepositions govern the acc.)

3. with words of salutation;—e.g. गणेशाय नमः 'salutation to Ganesa'; कुशलं ते 'health to thee'; रामाय स्वस्ति 'hail to Rāma'; स्वागतं देव्यै 'welcome to her Majesty.'

B. The dative of **purpose** expresses the end for which an action is done, and is very often equivalent to an infinitive;—e.g. मुक्तये हरि भजति 'he worships Hari for (= to obtain) salvation'; फलेभ्यो याति 'he goes for (= to obtain) fruit'; अस्मत्पुत्राणां नीतिशास्वोपदेशाय भवन्तः प्रमाणम् 'your Honour (has) full authority for the instruction of (= to instruct) my sons in the principles of morality'; युद्धाय प्रस्थितः 'he started for a fight' (= 'to fight'); पुनर्दर्शनाय 'au revoir'.

This dative is specially taken by verbs meaning—

1. 'be fit for,' 'tend or conduce to' (कृप्, सं-पद्, प्र-भू);—e.g.

महिर्ज्ञानाय कर्त्तव्ये 'piety conduces to knowledge.'

a. अस् and भू are used in the same way, but are often omitted;—e.g. लघूनामपि संशयो रक्षायै भवति 'the combination even of the weak leads to safety'; आर्तचाणाय वः शस्त्रम् 'your weapon (serves) for the protection of (= to protect) the distressed.'

2. 'be able,' 'begin,' 'strive,' 'resolve,' 'order,' 'appoint';—e.g. इयं कथा अक्षियस्याकर्षणायाशक्त 'this story was able to win over (ākarsaṇāya) the warrior'; प्रावर्तत शपथाय 'he began to (take) an oath'; तदन्वेषणाय यतिष्ठ 'I will try to find her'; तेन जीवोत्सर्गाय व्यवसितम् 'he has resolved on abandoning his life'; दुहितरम् अतिथिसत्कारायादिश्च 'having charged (ā-disya) his daughter with the reception of the guests'; रावणोच्छिन्तये देवैर्नियोचितः 'he was appointed by the gods for the destruction of (= to destroy) Rāvaṇa.'

a. The adverb अलम् 'sufficient' is used in the sense of 'be able to cope with,' 'be a match for';—e.g. देवेभ्यो हरिरलम् 'Hari (is) a match for the demons.'

Ablative.

201. The ablative primarily expresses the starting-point or source from which anything proceeds. It thus answers to the question 'whence?' and may in general be translated by 'from.'

E.g. अहम् अस्माद् वनाद् गन्तुमिच्छामि 'I wish to depart from this forest'; पापान्नाश उद्भवति 'ruin results from sin' (pāpād); निश्चयान्न चचाल सः 'he did not swerve from his purpose' (niścayād); स्वजनेभ्यः सुतविनाशं शुश्राव 'he heard of the death of his son from his relations'; तां बन्धनादिमुच्य 'releasing her from her bonds'; विरम कर्मणोऽस्मात् 'desist from this act'; पाहि मां गरकात् 'protect me from hell.'

a. The source of apprehension is put in the ablative with verbs of fearing (भी, उद्विज् ud-vij);—e.g. लुभ्यकाद् विभेषि 'you are afraid of the hunter'; संमानाद् ब्राह्मणो नित्यमुद्विजेत 'a Brahmin should always shrink from marks of honour.'

b. Verbs expressing separation 'from' naturally take the ablative;—e.g. भवद्यो वियोचितः 'parted from you'; सा पतिलोकात् हीयते 'and she is deprived of her husband's place' (such words also take the instr.: cp. 199, 2 b). Allied to this use is that of वस्थय 'to cheat of' (= so as to separate from);—e.g. वस्थितुं ब्राह्मणं क्वागलात् 'to cheat a Brahmin of his he-goat.'

c. As the abl. expresses the *terminus a quo*, it is employed with all words meaning 'far,' or designating the cardinal points;—e.g. दूरं यामात् 'far from the village'; यामात् पूर्वो गिरिः 'the mountain (is) to the east of the village.'

d. Similarly the abl. also expresses the time after which anything takes place;—e.g. बहोर्दृष्टं कालात् 'seen after a long time'; सप्ताहात् 'after a week.'

The abl. also expresses the following senses connected with its original meaning:—

1. the cause, reason, or motive = 'on account of,' 'because of,' 'through,' 'from';—e.g. लौब्याद् मांसं भवयति 'he eats the flesh through greed.' This use of the abl. is especially common, in commentaries, with abstract nouns in त्वा tva;—e.g. पर्वतोऽप्यिमान् धूमत्वात् 'the mountain is fiery because of its smokiness.' (The instr. is also employed in this sense: 199, 1 a.)

2. comparison:—

a. with comparatives (= 'than') or words with a comparative meaning;—e.g. गोविन्दाद् रामो विद्वन्तरः 'Rāma is more learned than Govinda'; कर्मणो ज्ञानम् अतिरिच्यते 'knowledge is superior to action.' In this sense it is used even with positives (= 'in comparison with');—e.g. भार्या सर्वत्रोकादपि वस्थमा भवति 'a

ati + विनि
पेत्रोक्तु
धृति.

wife is dear even in comparison with (i. e. dearer than) the whole world'; वज्रादपि कठोराणि मृदुनि कुमुमादपि चितांसि 'hearts harder even than adamant, more tender even than a flower.'

b. with words meaning 'other' or 'different' (अन्य, इतर, अपर, भिन्न);—e.g. कृष्णादन्यो गोविन्दः 'Govinda is different from Kṛṣṇa.'

c. Allied to the comparative abl. is that used with multiplicative words like 'double,' 'treble,' &c.;—e.g. मूल्यात् पञ्चगुणो दण्डः 'a fine five times (in comparison with) the value.'

Genitive.

202. The primary sense of the genitive is quasi-adjectival, since its qualification of another substantive means 'belonging to' or 'connected with.' It may generally be expressed in English by the preposition 'of.' With substantives the gen. is used in a possessive, subjective, objective, or partitive sense;—e.g. राज्ञः पुरुषः 'the king's man'; राक्षसकलच्चादनं भवतः 'your concealment of Rākṣasa's wife' (i.e. 'by you'); शङ्खया तस्याः 'by the supposition of her' (i.e. 'supposing it was she'); धृयो धनवताम् 'the foremost of the wealthy.'

i. The gen. is used with a number of verbs:—

a. in the possessive sense with ईश् is, प्रभु 'be master of,' 'have power over,' and with अस्, मू 'be,' विद्यते 'exists';—e.g. आत्मनः प्रभविष्यामि 'I shall be master of myself'; मम पुस्तकं विद्यते 'I have a book.'

b. in the objective sense (concurrently with the acc.) with दय् 'have mercy,' स्मृ 'remember,' अनु-कृ 'imitate';—e.g. एते तव दयन्ताम् 'may these men have mercy on you'; स्मरति ते प्रसादानाम् 'he remembers your favours'; भीमस्यानुकर्त्यामि 'I will imitate Bhīma.'

c. in the objective sense (concurrently with the loc.) with verbs meaning 'do good or harm to' (उप-कृ, प्र-सद्, अप-कृ, अप-राध्), 'trust in' (वि-श्वस), 'forbear with' (क्षम);—e.g. मिचाणाम् उपकुर्वाणः 'benefiting his friends'; किं मया तस्या अपकृतम् 'how have I done her an injury?' क्षमस्य मे 'forbear with me.'

d. with verbs meaning 'speak of' or 'expect of';—e.g. ममादोषस्यायेवं वदति 'he speaks thus of me though I am guiltless'; सर्वमस्य मूर्खस्य संभावते 'anything may be expected of that fool.'

e. frequently (instead of the dat. of the indirect object) with verbs of giving, telling, promising, showing, sending, bowing, pleasing, being angry;—e.g. मया तस्याभयं प्रदत्तम् 'I have granted safety to him' (tasya); किं तव रोचत एषः 'does he please you?' ममानतिकुद्गो मुनिः 'the sage (is) not very angry with me' (mama).

f. sometimes (instead of the instr.) with verbs meaning 'be filled or satisfied';—e.g. नाप्रिसृथति काषानाम् 'fire is not satiated with logs.' So also the past part. पूर्ण 'full of' (gen.), or 'filled with' (instr.).

2. The gen. is frequently used with adjectives:—

a. allied to transitive verbs;—e.g. जरा विनाशिनी रूपस्य 'old age is destructive of beauty.'

b. meaning 'dependent on,' 'belonging or attached to,' 'dear to';—e.g. तवायच्चः स प्रतीकारः 'that remedy depends on you' (tava); यत् त्वयास्य सत्तं किंचिद् गृहीतमस्ति तत् समर्पय 'give up whatever you have taken belonging to him' (asya); को नाम राज्ञां प्रियः 'who, pray, is dear to kings?'

c. meaning 'acquainted with,' 'versed or skilled in,' 'accustomed to' (concurrently with the loc.: 203f);—e.g. अभिज्ञः खल्लसि लोकव्यवहाराणाम् 'you are, indeed, conversant with the ways of the world'; संयामाणाम् अकोविदः 'unskilled

Ayat a

in battle'; उचितो जनः क्लेशानाम् 'people accustomed to hardships.'

d. meaning 'like' or 'equal to' (concurrently with the instr.: 199, 2 c);—e.g. रामः कृष्णस्य तुल्यः 'Rāma is equal to Kṛṣṇa.'

3. The gen. expresses the agent with **passive participles** :—

a. past participles having a pres. sense, formed from roots meaning 'think,' 'know,' 'worship';—e.g. राज्ञां मतः ('well thought of' =) 'approved of kings'; विदितो भवान् आश्रमसदाम् इहस्यः 'you are known to the hermits to be staying here.'

b. future participles (which also take the instr.: 199);—e.g. मम (मया) सेव्यो हरिः 'Hari should be worshipped by me.'

4. The gen. is used with **adverbs** of direction in °तस् -tas (cp. 177 d);—e.g. ग्रामस्य दक्षिणतः 'to the south of the village'; sometimes also with those in °एन -ena (concurrently with the acc.);—e.g. उत्तरेणास्य 'to the north of this' (asya) place.

5. The **gen. of time** is used in the following ways:—

a. with multiplicatives (108) or other numerals similarly used it expresses how often anything is repeated within a stated period;—e.g. आङ्गं चिरब्दस्य निर्वपेत् 'he should offer the funeral sacrifice three times a year'; संवत्सरसैकमपि चरेत् व्रचं द्विजोत्तमः 'a Brahmin should perform at least one severe penance a year.'

b. Words denoting time are put in the gen. (like the abl.) in the sense of 'after';—e.g. कतिपयाहस्य (kati-paya ahasya), 'after some days'; चिरस्य कालस्य 'after a long time': चिरस्य is also used alone in this sense.

c. A noun and past part. in the gen., accompanying an expression of time, have the sense of 'since';—e.g. अद्य दशमो मासस् तात्सोपरतस्य 'to-day (is) the tenth month since our father died' (uparatasya). This construction is akin to the gen. absolute (205, 2).

6. Two genitives are employed to express an option or a difference between two things;—e.g. व्यसनस्य च मृत्योश्च व्यसनं कष्टमुच्यते ‘of vice and death, the former is called the worse’; एतावानेवायुम्भतः शतक्रतोश्च विशेषः ‘this is the only difference between you (the long-lived) and Indra.’

Locative.

203. The locative denotes either the place where an action occurs, or, with verbs of motion, the place whither an action is directed. The former sense may variously be translated by ‘in, at, on, among, by, with, near,’ the latter by ‘into, upon’; corresponding to Lat. *in* with abl. and acc. respectively.

The following are examples of the ordinary use of the loc. in the sense of ‘where?’ पक्षिणस्तस्मिन् वृक्षे निवसन्ति ‘birds live in that tree’; विदर्भैषु ‘in Vidarbha’ (193, 3c); आत्मानं तत्र द्वारि वापादयिष्यामि ‘I will kill myself at your door’; काश्माम् ‘at Kāśī’ (Benares); फलं दृष्टं द्रुमेषु ‘fruit (is) seen on the trees’; आसेदुर्गङ्गायाम् ‘they encamped on (=close to) the Ganges’; न देवेषु न यज्ञेषु ताद्यूपवती छन्दिद् मातृषेष्वपि चात्येषु दृष्टपूर्वा ‘neither among gods, nor Yaksas, or among men either, had such a beauty anywhere been seen before’; मम पात्रे ‘by my side.’

a. When the loc. means ‘among’ it is often equivalent to a partitive gen. (202);—e.g. सर्वैषु पुत्रैषु रामो मम प्रियतमः ‘among (=of) all the sons Rāma is dearest to me.’

b. The person ‘with’ whom one dwells or stays is put in the loc.;—e.g. गुरौ वसति ‘he lives with his teacher.’

c. The loc. with the verbs तिष्ठति ‘stands’ and वर्तते ‘goes on’ (=Lat. versatur) expresses ‘abides by,’ ‘complies with’;—e.g. न मे शासने तिष्ठसि ‘you do not (stand by =) obey my command’; मातुर्मते वर्तस्व ‘comply with your mother’s desire.’

d. The loc. is used to express the effect 'of' a cause;—e.g. दैवमेव नुणां वृद्धौ चये कारणम् 'fate alone (is) the cause of the prosperity or decline of men.'

e. The loc. expresses contact with verbs of seizing by (ग्रह्), fastening to (बन्ध्), clinging or adhering to (लग्, सिष्, सज्ज्), leaning on, relying on or trusting to;—e.g. केशेषु गृहीत्वा 'seizing by the hair'; पाणौ संगृह्य 'taking by the hand'; वृक्षे पाणं बबन्ध 'he fastened a noose to the tree'; असनेष्वसक्तः शूरः 'a hero not addicted to vices'; वृक्षमूलेषु संश्रिताः 'reclining on the roots of trees'; विश्वसिति शत्रुषु 'he trusts in his enemies'; आशंसन्ते सुरा अस्याधिक्ये धनुषि विजयम् 'the gods fix their hopes of victory on his bent bow.'

f. The loc. is used (concurrently with the gen.: 202, 2 c) with adjectives meaning 'acquainted with,' 'versed or skilled in';—e.g. रामोऽच्युते निपुणः 'Rāma (is) skilled in the game of dice'; नाथे दक्षा वयम् 'we (are) expert in acting.'

g. The loc. is used figuratively to express the person or thing in which some quality or state is to be found;—e.g. सर्वे संमावया-म्यस्मिन् 'I look for everything in him' (cp. 202, 1 d); दृष्टदोषा मृगया स्वाभिनि 'hunting (is) recognized as sinful in a prince'; आर्तानामुपदेशे न दोषः 'there is no harm in (giving) advice to the afflicted.' Similarly, when the meaning of a word is explained, the loc. expresses 'in the sense of';—e.g. कलापो बहै 'kalāpa (is used) in the sense of peacock's tail.'

h. The circumstances in which an action takes place are expressed by the loc.;—e.g. आपदि 'in case of distress'; भाग्येषु 'in fortune'; विद्रेष्वनर्था बड्डीभवन्ति ('in the presence of' =) 'there being openings, misfortunes multiply.' In the last example the loc. expresses the reason; if it were accompanied by a predicative participle, it would be a loc. absolute (cp. 205, 1 a).

a. The loc. of time, expressing when an action takes place, is only a special application of the preceding sense;—e.g. वर्षासु ‘in the rainy season’; निशायाम् ‘at night’; दिने दिने ‘every day.’

b. The loc. expresses the distance at which anything takes place;—e.g. इतो वसति... अर्धर्धयोजने महर्षिः ‘the great sage lives at (a distance of) a yojana and a half from here.’

204. The loc. answering to the question ‘**whither?**’ is always used with verbs of falling and placing; concurrently with the dat., with those of throwing and sending (200 A 1 b); and, concurrently with the acc., with those of going, entering, ascending, striking, bringing, sending;—e.g. भूमौ पपात् ‘he fell on the ground’; तदैव भिक्षापात्रे निधाय ‘having put (it) in that same begging bowl’; हस्तमुरसि छत्वा ‘placing his hand on his breast’ (छत्वा ‘do,’ is frequently used in the sense of putting); अरौ बाणान् चिपति ‘he darts arrows at his enemy’; मत्थो नदां प्रविवेश ‘the fish entered the river’; समीपवर्तिनि नगरे प्रस्थितः ‘he set out for a neighbouring town’; तं शिरस्ताडयत् ‘he struck him on the head.’

since
a day ago

Secondary applications of this loc. are the following:—

a. It expresses the person or object towards which an action is directed or to which it refers= ‘towards,’ ‘about,’ ‘with regard to’;—e.g. प्राणिषु दद्यां कुर्वन्ति साधवः ‘the good show compassion towards animate beings’; भव दक्षिणा परिजने ‘be courteous to your attendants’; क्षेत्रे विवदन्ते ‘they are disputing about a field.’

dayā-

b. Concurrently with the dat. (and gen.), it expresses the indirect object with verbs of giving, telling, promising, buying, selling (cp. 200 A 1 a; 202, 1 e);—e.g. सहस्रात्रे प्रतिज्ञाय ‘having promised (it) to Indra’; शरीरं विक्रीय धनवति ‘having sold himself to a rich man’; वितरति गुरुः प्राज्ञे विद्याम् ‘a teacher imparts knowledge to an intelligent pupil.’

prājña, ‘one who’

c. Concurrently with the dat. (200 B 1, 2), it may express the aim of an action with words expressive of striving after, resolving on, wishing for, of appointing, choosing, enjoining, permitting, of being able or fit for;—e. g. सर्वस्वहरणे युक्तः शत्रुः ‘an enemy prepared for the appropriation of all property’; कर्मणि न्ययुज्ञः ‘he appointed (him) to a task’; पतित्वे वरयामास तम् ‘she chose him for her husband’; असमर्थैऽयमुदरपूरणैऽस्माकम् ‘he is incapable of supplying food for us’; त्रिलोकस्यापि प्रभुत्वं तस्मिन् युज्यते ‘the sovereignty even of the three worlds is fitting for him.’ A predicative loc. alone is capable of expressing fitness;—e. g. नयत्या- गश्चौर्यसंपन्ने पुरुषे राज्यम् ‘sovereignty befits a man who is endowed with worldly wisdom, liberality, and heroism.’ The loc. is sometimes used with verbs which do not in themselves imply an aim, to express the object gained as the result of an action;—e. g. चर्मणि हन्ति दीपिनम् ‘he kills the panther for the sake of (obtaining) his skin.’

d. Nouns expressive of desire, devotion, regard, friendship, confidence, compassion, contempt, neglect, are often connected with the loc. (as is also the gen.) of the object to which those sentiments are directed;—e. g. न खलु शकुनत्वायां ममाभिलाषः ‘my love is, indeed, not towards Sakuntalā’; न मे त्वयि विश्वासः ‘I have no faith in you’; न लघुष्वपि कर्तव्येष्वनादरः कार्यः ‘neglect of duties, howeversmall, should not be indulged in.’

e. The loc. is similarly used with adjectives or past participles meaning ‘fond of,’ ‘devoted to,’ ‘intent on,’ and their opposites;—e. g. नार्यः केवलं स्वसुखे रताः ‘women (are) intent on their own pleasure only.’

Locative and Genitive Absolute.

205. 1. The locative is the usual **absolute** case in Sanskrit, and has much the same general application as the Greek genitive

and the Lat. ablative absolute;—e.g. गच्छत्सु दिनेषु ‘as the days went by’; गोषु दुर्घासु स गतः ‘the cows having been milked, he departed’; कर्णे ददाति मयि भाषमाणे ‘she gives ear when I speak.’

a. The predicate of the absolute loc. is practically always a participle; the only exception being that the part. सत् ‘being,’ is frequently omitted;—e.g. कथं धर्मक्रियाविघ्नः सतां रचितरि त्वयि ‘how (can there be any) interference with the good in the performance of their duties, when you (are) their protector?’

b. The part. सत् ‘being’ (or its equivalents वर्तमान and स्थित) is often pleonastically added to another absolute part.;—e.g. मूर्योदयेऽन्यतां प्राप्तिपूलकेषु सत्सु ‘at sunrise, when the owls had become blind.’

c. The subject is of course always omitted when a past pass. part. is used impersonally; it is also omitted when the part. is accompanied by indeclinable words like एवम्, तथा, इत्यम्, इति;—e.g. तेनाभ्युपगते ‘when consent had been given by him’; एवं गते ‘this being the case’ (lit. ‘it having gone thus’); तथा छते सति or तथानुष्ठिते ‘this being done.’

d. The particle एव and the noun मात्र (as latter member of a compound) may be used after an absolute participle to express ‘no sooner—than,’ ‘scarcely—when’;—e.g. प्रभातायामेव रजन्याम् ‘scarcely had it dawned, when’; प्रविष्टमात्र एव तत्त्वमवति ‘no sooner had his Honour entered, than.’

2. The **gen. absolute** is much less common than the loc. and more limited in its application. It is restricted to contemporaneous actions, the subject being a person and the predicate a present participle in form or sense. Its meaning may be rendered by ‘while,’ ‘as,’ or ‘though’;—e.g. पश्यतो मे परिभ्रमन् ‘wandering about, though I was looking on’; एवं वदत्सत्यं स लुभ्यको निभृतः स्थितः ‘while he was speaking thus, the hunter

remained concealed'; इति चिन्तयतस्य तत्र तोयार्थमाययुः स्तियः 'while he was thus reflecting women came there to fetch water.'

Participles.

206. Participles are constantly used in Sanskrit to qualify the main action, supplying the place of subordinate clauses. They may, as in Latin and Greek, express a relative, temporal, causal, concessive, or hypothéctical sense. A final sense is also expressed by the future participle. All these meanings are inherent in the participle, without the aid of particles, except that अपि is usually added when the sense is concessive.

E.g. खगालः कोपाविष्टस् तम् उवाच 'the jackal, being filled with anger, said to him'; निषिद्धस्वं मद्यानेकशी न शृणोषि 'though you have been frequently dissuaded by me, you do not listen to me'; अजल्यतो जानतसे शिरो यास्ति खण्डशः 'if you do not tell, though knowing it, your head will be shattered to pieces'; ताडयिष्यन् भीमं पुनरभद्रवत् 'he ran again at Bhīma in order to strike him.'

a. Bahuvrīhi compounds are very frequently employed in a participial sense, the part. सत् being omitted;—e.g. अथ शङ्खितमना अचिन्तयत् 'then being anxious he reflected.'

207. Present Participle. This participle (as well as a past with a present sense) is used with अस्ति or भवति 'is,' आसि 'sits,' तिष्ठति 'stands,' वर्तते 'goes on,' to express continuous action, like the English 'is doing';—e.g. एतदेव वनं यस्मिन्नभूम चिरमेव पुरा वसन्तः 'this is the very forest in which we formerly dwelt for a long time'; भक्षयन्नाते 'he keeps eating'; सा यद्गेन रक्ष्यमाणा तिष्ठति 'she is being carefully guarded'; परिपूर्णैऽयं घटः सकुभिर्वर्तते 'this pot is filled with porridge.'

a. The negative of verbs meaning 'to cease' is similarly construed with a present participle;—e.g. सिंहो मृगान् व्यापा-द्यन्तोपरराम 'the lion did not cease (=kept) slaying the animals.'

b. Verbs expressing an emotion such as 'to be ashamed,' 'to endure,' may be accompanied by a pres. part. indicating the cause of the emotion;—e.g. किं न लज्जस एवं ब्रुवाणः 'are you not ashamed of speaking thus?'

c. A predicative present (or past) part. accompanies the acc., or the nom. in the passive construction, with verbs of seeing, hearing, knowing, thinking, wishing (cp. 198, 1);—e.g. प्रविशन्तं न मां कश्चिदपश्यत् 'no one saw me entering'; स भूपतिरेकदा केनापि पद्ममानं स्नोकद्यं शुश्राव 'the king one day heard some one repeating a couple of slokas'; गान्धवैण विवाहेन बहूते राजर्षिकन्यकाः श्रूयन्ते परिणीताः 'many daughters of royal sages are recorded to have been wedded according to the marriage of the Gandharvas.'

208. Past Participles. The passive part. in त and its active form (161; 89, n.³) in वत् (but hardly ever the perf. act. part. in वसः; 89) are very frequently used as finite verbs (the copula being omitted);—e.g. तेनेदम् उक्तम् 'this was said by him'; स इदसुत्तवान् 'he said this.'

a. The passive of intransitive verbs is used impersonally; otherwise its past participle has an active sense;—e.g. मयाच्च चिरं स्थितम् 'I stood there for a long time'; स गङ्गां गतः 'he went to the Ganges'; स पथि मृतः 'he died on the way.'

b. Some past participles in त have both a passive and a transitive active sense;—e.g. ग्रास्त 'obtained' and 'having reached'; प्रविष्ट 'entered (by)' and 'having entered'; पीत 'imbibed' and 'having drunk'; विस्मृत 'forgotten' and 'having forgotten';

विभक्ति 'divided' and 'having divided'; प्रसूति 'begotten' and 'having borne' (f.); आरुद्ध 'ridden,' &c., and 'riding,' &c.

c. The past participles in न never seem to occur with a transitive active meaning.

209. Future Participles Passive. These (162) express necessity, obligation, fitness, probability. The construction is the same as with the past pass. part.;—e.g. मयावश्च देशान्तरं गन्तव्यम् 'I must needs go to another country'; हन्तव्योऽस्मि न ते राजन् 'you must not (= do not) kill me, O king'; तत्सेनापि शब्दः कर्तव्यः 'then he too will surely make a noise.'

a. Occasionally the fut. pass. part. has a purely future sense;—e.g. युवयोः पच्चबलेन मयापि सुखेन गन्तव्यम् 'I too shall go with ease by the strength of your wings.'

b. भवितव्यम् and भाव्यम् (from भू 'be') are used impersonally to express necessity or high probability. The adjective or substantive of the predicate agrees with the subject in the instr.;—e.g. तथा संनिहितथा भवितव्यम् 'she must be' (= is most probably) near'; तस्य प्राणिनो बलेन सुमहता भवितव्यम् 'the strength of that animal must be very great.'

210. The Indeclinable Participle (Gerund) nearly always expresses that an action is completed before another begins (rarely that it is simultaneous). Referring to the grammatical or the virtual subject of the main action, it generally agrees with the nom., or, in the passive construction, with the instr., but occasionally with other cases also;—e.g. तं प्रणम्य स गतः 'having bowed down to him, he departed'; अथ तेनात्मानं तस्योपरि प्रक्षिप्य प्राणाः परित्यक्ताः 'then he throwing himself upon him lost his life' (प्रक्षिप्य agrees with तेन); तस्य दृष्टैव वृद्धे कामस्ति चारुहासिनीम् 'his love increased as soon as he had seen the sweetly smiling maiden' (दृष्टा agrees with तस्य).

a. It may frequently be translated by 'in' or 'by' with a verbal

noun;—e.g. मां निर्धनं हत्वा किं लभेद्धम् ‘what would you gain by killing a poor man like me?’ This use represents the original sense of the form as an old instrumental of a verbal noun.

b. Having the full value of inflected participles, it may express the various logical relations of the latter, and may even be accompanied, like them, by आसे, तिष्ठति, वर्तते to express continuous action;—e.g. सर्वपौरान् अतीत्य वर्तते ‘he is the foremost of all the townsmen.’

c. A number of gerunds are equivalent in sense to prepositions (179).

d. The original instr. nature of the gerund is preserved in its employment with किम् or अलम् or with a general subject expressed by the impersonal passive construction;—e.g. किं तव गोपाचित्वा ‘what (gain accrues) to you by concealing?’ अलं ते वनं गत्वा ‘have done with going to the forest’; पशुन् हत्वा यदि स्वर्गे गम्यते ‘if one goes to heaven by killing animals.’

Infinitive.

211. This frequent form expresses the aim of an action and may in general be used wherever the dative of purpose is employed (200 B). It differs from the dative of an ordinary verbal noun solely in governing its object in the acc. instead of the gen.;—e.g. तं जितुं यतते ‘he strives to conquer him’=तस्य जयाय यतते ‘he strives for the conquering of him.’ It preserves its original acc. sense inasmuch as it is used as the direct object of verbs (e.g. स्नातुं लभते ‘he obtains a bathe’), and cannot be employed as the subject of a sentence. Verbal nouns usually supply its place as the subject;—e.g. वरं दानं न तु प्रतियहः ‘giving (= to give) is better than receiving’ (= to receive). The construction of the acc. with the infinitive is unknown to Sanskrit, its place being supplied, with verbs of saying, &c., by *oratio recta* with इति (180), or otherwise by the use of a predicative acc. (198, 1 and 207 c).

The infinitive may be used with substantives (e.g. 'time,' 'opportunity'), adjectives ('fit,' 'capable'), as well as verbs (e.g. 'be able,' 'wish,' 'begin');—e.g. नायं कालो विलम्बितुम् 'this is not the time to delay'; अवसरोऽयम् आत्मानं प्रकाशयितुम् 'this is an opportunity to show yourself'; लिखितमपि ललाटे प्रोज्ज्ञतुं कः समर्थः 'who (is) able to escape from what is written on his forehead (by fate)?' अहं त्वां प्रष्टुम् आगतः 'I have come (in order) to ask you'; कथयितुं शक्नोति 'he is able to tell'; दृश्येष सा कर्तुम् 'she wished to make.'

a. The 2. and 3. sing. ind. of अहूं 'deserve' are used with an infinitive in the sense of a polite imperative= 'please,' 'deign to';—e.g. भवान् मां ओतुमर्हति 'will your Honour please to hear me?'

b. The infinitive, after dropping its final म्, may be formed into a Bahuvrihi compound (189) with काम 'desire,' or मनस् 'mind,' in the sense of wishing or having a mind to do what the verb expresses;—e.g. द्रष्टुकामः 'desirous of seeing'; किं वक्तुमना भवान् 'what do you intend to say?'

c. There being no passive form of the infinitive in Sanskrit, verbs governing the infin. are put in the passive in order to give it a passive meaning;—e.g. कर्तुं न सुज्यते 'it is not fit to be done'; मया नीतिं ग्राहयितुं शक्यन्ते 'they can be taught morality by me'; तेन भण्डपः कारचितुम् आरब्धः 'a hut (was) begun to be erected by him.'

d. The fut. part. pass. शक्या sak-ya may either agree with the subject or be put in the neut. sing.;—e.g. न शक्यास्ते (दोषाः) समाधातुम् 'those (mischiefs) cannot be repaired'; सा न शक्यम् उपेचितुं जुपिता 'she cannot be ignored (lit. 'she is not a possible thing to ignore') when angry.' युक्त 'fitting' and न्याय्य 'suitable' may be construed in the same way;—e.g. सेयं न्याय्या मया मोचयितुं भवतः 'she should rightly be released by me from you.'

TENSES AND MOODS.

Present.

212. The use of this tense is much the same as in English. But the following differences should be noted:—

1. In narration the **historical** present is more commonly used than in English, especially to express the durative sense (which the Sanskrit imperfect lacks);—e.g. दमनकः पृच्छति कथमेतत् 'Damanaka asked, "How was it?"' हिरण्यको भोजनं शत्रु विले स्वपिति 'Hiranyaka, having taken his food, used to sleep in his hole.'

a. पुरा 'formerly,' is sometimes added to this present;—e.g. कस्मिंश्चिद् वृक्षे पुराहं वसामि 'I formerly used to live in a certain tree.' The particle स्म (which in the older language frequently accompanied पुरा, and thus acquired its meaning when alone) is much more frequently used thus;—e.g. कस्मिंश्चिद् अधिष्ठाने सोमिलको नाम कौलिको वसति स्म 'in a certain place a weaver named Somilaka used to live.'

b. The present is used to express the immediate past;—e.g. अयम् आगच्छामि 'here I come,' i.e. 'I have just come.'

2. The present also expresses the near future, पुरा 'soon' and यावत् 'just' (180) being sometimes added;—e.g. तर्हि मुक्ता धनुर्गच्छामि 'then leaving the bow, I am off'; तद् यावच्छनुम्नं प्रेषयामि 'therefore I will just send Satrughna.'

a. With interrogatives it implies a doubt as to future action;—e.g. किं करोमि 'what shall I do?'

b. It may express an exhortation to perform an action at once;—e.g. तर्हि गृहमेव प्रविशामः 'then we (will) enter (= let us enter) the house.'

Past Tenses.

213. All the three past tenses, imperfect, perfect, and aorist, besides the past participles in त ta and तवत् ta-vat (and the historical present), are used promiscuously to express the historical

or remote past, applying equally to facts which happened only once, or were repeated or continuous.

a. The **perfect** is properly restricted to the statement of facts of the remote past, not coming within the experience of the speaker. The 1. and 2. sing. are therefore very rare.

b. The **imperfect**, in addition to describing the historical past, states past facts of which the speaker himself has been a witness.

c. The **aorist** has (along with the participles in त and तवत्) the special sense of the present perfect, being therefore appropriate in dialogues;—e. g. अभूत्संपादितस्यादुफलो मे मनोरथः ‘my desire has obtained sweet fulfilment’; तुम्हं मया राज्यम् अदायि ‘I have bestowed the sovereignty on you’; तं दृष्टवानस्मि ‘I have seen him.’

d. The aorist (very rarely the imperfect) without the augment is used imperatively with मा (215 e and 180).

e. As there is no pluperfect in Sanskrit, its sense (to be inferred from the context) has to be expressed by the other past tenses or the gerund, or occasionally by a past participle with an auxiliary verb.

Future.

214. The simple future is a general tense, referring to any future action, while the periphrastic future, which is much less frequently employed, is restricted to the remote future. Both can therefore often be employed in describing the same action, and they frequently interchange.

a. The future is sometimes used in an imperative sense, when accompanying an imperative;—e.g. भद्रे यास्वसि मम तावद् अर्थित्वं श्रूयताम् ‘go, my dear, but first hear my request.’

Imperative.

215. Besides the ordinary injunctive or exhortative sense, this mood has some special uses.

a. The first persons, which are survivals of old subjunctive forms, may be translated by 'will' or 'let';—e.g. दीवावेत्यन्नवीद् आता 'his brother said, "Let us play"'; अहं करवाणि 'I will make.'

b. The 3. sing. pass. is commonly used as a polite imperative instead of the 2. pers. act.;—e.g. देव श्रूयताम् 'Sire, pray listen!' (cp. 211 a).

c. The imperative may be used, instead of an optative or benedictive, to express a wish or blessing;—e.g. चिरं जीव 'may you live long'; शिवास् ते पन्थानः सन्तु 'may your paths be auspicious' = 'Godspeed.'

d. It may express possibility or doubt, especially with interrogatives;—e.g. विषं भवतु मा वासु फटाटोपो भयंकरः 'whether there be poison or not, the swelling of a serpent's hood is terrifying'; प्रत्येतु कस्तद् भुवि 'who on earth would believe it?' किमधुना करवाम् 'what should we do now?'

e. The imperative with the prohibitive particle मा is somewhat rare, its place being commonly supplied by the unaugmented aor. (213 d), by the opt. with न, or अलम् and छतम् with the instr. (180).

Optative or Potential.

216. Besides its proper function this mood also expresses the various shades of meaning appropriate to the subjunctive (which has become obsolete in Sanskrit). *व्याकरण
प्रयोग*

i. In principal sentences it expresses the following meanings:—

a. a wish (often with the particle अपि added);—e.g. अपि पश्येयमिह राघवम् 'O that I could see Rāma here!'

b. possibility or doubt;—e.g. कदाचिद् गोशब्देन बुधेत 'perhaps he may be awakened by the lowing of the cows'; पश्येयुः चितिपतयश्च चारहृष्ट्या 'kings can see through the eye of their

spies'; एकं हन्यान्न वा हन्यादिषुरु मुक्तो धनुष्मता 'the arrow shot by an archer may hit an individual, or may not hit him.'

c. probability, being often equivalent to a future;—e.g. इयं कन्या नाच तिष्ठेत् 'this girl (is not likely to =) will not stay here.'

d. exhortation or precept;—e.g. त्वमेवं कुर्याः 'do you act thus'; आपदर्थं धनं रक्षेत् 'one should save wealth against calamity.'

2. The optative is used in the following kinds of **subordinate clauses** :—

a. in general relative clauses;—e.g. कालातिक्रमणं वृत्तेर् यो न कुर्वीति भूपतिः 'the king who (=every king who) does not neglect the time for the payment of salaries.'

b. in final clauses ('in order that');—e.g. आदिश मे देशं यत्र वसेयम् 'indicate to me the place where I am to live' (=that I may live there).

c. in consequential clauses ('so that');—e.g. स भारो भर्तव्यो यो नरं नावसादयेत् '(only) such a burden should be borne as may not weigh a man down.'

d. in the protasis (as well as the apodosis) of hypothetical clauses, with the sense of the Lat. present (possible condition) or imperfect (impossible condition) subjunctive (cp. 218);—e.g. यदि न स्थानं नरपतिर् विज्ञवेत् नौरित्र प्रजा 'if there were not a king, the state would founder like a ship.'

Benedictive or Precative.

217. This rare form (150), a kind of aorist optative, is properly restricted to the expression of blessings, or, in the first person, of the speaker's wish;—e.g. वीरप्रसवा भूयाः 'mayst thou give birth to a warrior'; कृतार्थो भूयासम् 'may I become successful.' The imperative is also employed in this sense (215 c). In a few rare

cases the benedictive is indistinguishable in meaning from an imperative or an ordinary optative;—e.g. इदं वचो ब्रूयात् ‘do ye proclaim this speech’; न हि प्रपश्यामि ममापनुवाद् यच्छोकम् ‘for I do not perceive what should drive away my sorrow.’

Conditional.

218. The conditional, as its form (an indicative past of the future) well indicates, is properly used to express a past condition, the unreality of which is implied, and is equivalent to the pluperfect (conditional) subjunctive in Latin or English, or the aorist indicative, used conditionally, in Greek. It is employed in both protasis and apodosis;—e.g. सुवृष्टिशेदभविष्यत् दुर्भिर्कं नाभविष्यत् ‘if there had been abundant rain, there would have been no famine.’ If a potential is used in the protasis, a conditional in the apodosis may acquire the sense of a hypothetical present (= imperf. subjunctive);—e.g. यदि न प्रणयेद्राजा दण्डं शूले मत्यानिवापक्ष्यन् दुर्बलान् बलवत्तराः ‘if the king did not inflict punishment, the strong would roast the weak like fish on a spit.’

APPENDIX II

METRE IN CLASSICAL SANSKRIT

The versification of classical Sanskrit differs considerably from that of the Vedic hymns, being more artificial, more subject to strict rules, and showing a far greater number of varieties of metre.

Classical Sanskrit metres are divided into—

I. those measured by the number of syllables;

II. those measured by the number of *morae* they contain.

Nearly all Sanskrit poetry is written in stanzas consisting of four metrical lines or quarter-verses (called *pāda*, 'foot' = quarter). These stanzas are regularly divided into hemistichs or half-verses.

Quantity is measured as in Latin and Greek. Vowels are long by nature or by position. Two consonants make a preceding short vowel long by position, Anusvāra and Visarga counting as full consonants. A short vowel counts as one *mora* (*mātrā*), a long vowel (by nature or position) as two.

I. Metres measured by Syllables (*Aksara-cchandah*).

These consist of—

A. two half-verses identical in structure, while the quarter-verses 1 and 3 differ from 2 and 4.

B. four quarter-verses all identical in structure.

A. The Śloka.

The Śloka ('song,' from śru, 'hear'), developed from the Vedic Anuṣṭubh, is the Epic verse, and may be considered the Indian

verse *par excellence*, occurring, as it does, far more frequently than any other metre in classical Sanskrit poetry. It consists of two half-verses of sixteen syllables or of four pādas of eight syllables.

Dividing the half-verse into four feet of four syllables, we find that only the second and the fourth foot are determined as to quantity. The fourth is necessarily iambic ($\text{˘} - \text{˘} \text{˘}$), while the second may assume four different forms. The first and the third foot are undetermined, except that $\text{˘} \text{˘} \text{˘} \text{˘}$ is always excluded from them. By far the commonest form of the second foot is $\text{˘} - - \text{˘}$ (in Nala 1442 out of 1732 half-verses).

The type of the Sloka may therefore be represented thus—

• • • • | ˘ - - ˘ | • • • • | ˘ - ˘ ˘ ||

E. g. Āśīd rājā Nālō nāmā | Vīrāśenāśūtō bālī |
 üpāpannō gūṇair iṣṭai | rūpāvān aśvākōvīdāḥ ||

It is only when the second foot has $\text{˘} - - \text{˘}$ that the first foot may assume all its admissible forms. When the second foot has any of the other three forms, the first foot is limited, as shown in the following table:—

	I.	II.	III.	IV.
1.	• • • • ˘ - - •			
2.	{ • - ˘ - ˘ ˘ ˘ •		{ • • • • ˘ - ˘ •	
3.	• - ˘ - - ˘ ˘ •			
4.	• - ˘ - -, - - •			

The first (typical) form is called Pathyā; the remaining three, called Vipulā, are in the above table arranged in order of frequency of occurrence. Out of 2579 half-verses taken from Kālidāsa (Raghu-vamśa and Kumāra-sambhava), Māgha, Bhāravi, and Bilhana, each of the four admissible forms of the Sloka in the above order claims the following share: 2289, 116, 89, 85.

In the table a dot indicates an undetermined syllable: a comma marks the *caesura*.

The end of a pāda coincides with the end of a word (sometimes only with the end of a word in a compound), and the whole Sloka contains a complete sentence. The construction does not run on into the next line. Occasionally three half-verses are found combined into a triplet.

B. All Four Pādas identical in Form.

1. Of the numerous varieties developed from the Vedic Tri-*ṣṭubh* (11 syllables to the pāda), the commonest are—

a. **Indravajrā** : — — ˘ | — — ˘ | ˘ — ˘ | — — ||

b. **Upendravajrā** : ˘ — ˘ | — — ˘ | ˘ — ˘ | — — ||

c. **Upajāti** (a mixture of the above two):

˘ — ˘ | — — ˘ | ˘ — ˘ | — ˘ ||

d. **Śālinī** : — — — | — , — ˘ | — — ˘ | — — ||

e. **Rathoddhatā** : — ˘ — | ˘ ˘ ˘ | — ˘ — | ˘ — ||

2. The commonest forms of *Jagatī* (12 syllables to the pāda) are—

a. **Vamśastha** : ˘ — ˘ | — — ˘ | ˘ — ˘ | — ˘ — ||

b. **Drutavilambita** : ˘ ˘ ˘ | — ˘ ˘ | — ˘ ˘ | — ˘ — ||

3. The commonest variety of *Sākvarī* (14 syllables to the pāda) is—

Vasantatilakā : — — ˘ | — ˘ ˘ | ˘ — ˘ | ˘ — ˘ | — ˘ ||

4. The commonest form of *Atisākvarī* (15 syllables to the pāda) is—

Mālinī : ˘ ˘ ˘ | ˘ ˘ ˘ | — — , — | ˘ — — | ˘ — ˘ ||

5. The commonest varieties of *Atyaṣṭi* (17 syllables to the pāda) are—

a. **Sikharinī** : — — — | — — — , | ˘ ˘ ˘ | ˘ ˘ — | — ˘ ˘ | ˘ — ||

b. **Harinī** : ˘ ˘ ˘ | ˘ ˘ — , | — — | — , ˘ — | ˘ ˘ — | ˘ — ||

c. Mandākrāntā :

— — — | —, ˘ ˘ | ˘ ˘ ˘ | —, — ˘ | — — ˘ | — ˘ ||

6. The commonest form of Atidhṛti (19 syllables to the pāda) is—

Sārdūlavikrīdita :

— — — | ˘ ˘ — | ˘ — ˘ | ˘ ˘ —, | — — ˘ | — — ˘ | ˘ ||

7. The commonest variety of Prakṛti (21 syllables to the pāda) is—

Sragdhārā :

— — — | — ˘ — | —, ˘ ˘ | ˘ ˘ ˘ | ˘ —, — | ˘ — — | ˘ — — ||

II. Metres measured by Morae.

A. Metres in which the sum total only of the *morae* is prescribed (Mātrā-chandah).

The **Vaitāliya** contains 30 *morae* in the half-verse, 14 in the first pāda, 16 in the second. Each pāda may be divided into three feet, the second always consisting of a choriambus, and the third of two iambics; while the first foot in the first pāda consists of a pyrrhic, in the second pāda of an anapaest. The half-verse thus contains 21 syllables. The following is the scheme of the half-verse:—

˘ ˘ | — ˘ ˘ — | ˘ — ˘ ˘ || ˘ ˘ — | — ˘ ˘ — | ˘ — ˘ ˘ ||

B. Metres in which the number of *morae* in each foot (*gāṇa*) is specified (*Gāṇa-chandah*).

Āryā or **Gāthā** has $7\frac{1}{2}$ feet to the half-verse, each foot containing 4 *morae* (= 30 *morae* altogether). The 4 *morae* may take the form ˘ ˘ ˘ ˘, — —, — ˘ ˘, or ˘ ˘ —; in the 2nd and 4th they may also become ˘ — ˘; in the 6th they appear as ˘ ˘ ˘ or ˘ — ˘. The 8th foot is always monosyllabic; the 6th of the second half-verse consists of a single short syllable. Hence the second half-verse contains only 27 *morae*.

APPENDIX III

CHIEF PECULIARITIES OF VEDIC GRAMMAR

I. As several stages can be distinguished in the development of the Vedic language, some of the following statements are strictly applicable only to the Rig-veda, the oldest and most important monument of Vedic literature.

The Alphabet.

2. The sounds are the same as in Sanskrit, with the exception of two additional letters. Cerebral ऽ् d and ऽ् dh between vowels regularly become cerebral ऽ् l and ऽ् lh;—e.g. ई॒ले॑=ई॒ले॑ idé, 'I praise'; मी॒ङ्कु॑षे॑ milhúse=मी॒ङ्कु॑षे॑ midhúse, 'to the bountiful.'

Sandhi.

3. A. Vowels. Hiatus is not avoided either within a word, or between the members of a compound, or between the words of a sentence; and, in particular, initial a after e and o (21 a) is only occasionally elided;—e. g. *súriasya*, ‘of the sun’; *su-ásviam*, ‘wealth in horses’; *Várunasya Agneḥ*, ‘of Varuna (and) Agni’; *abhi eti*, ‘he goes towards’; *vípro aksarat*, ‘the priest poured out.’

a. The *e* of the pronominal forms (dat., loc.) *tvé*, 'to or in thee,' *asmé*, 'to or in us,' *yusmé*, 'to or in you,' remains unchanged before vowels; as does the final *o* produced by the coalescence of *a* with the particle *u*, as in *átho* (*átha u*), *mó* (*má u*), *nó* (*ná u*).

B. Consonants. The final syllables *ān*, *īn*, *ūn*, *ṛn* are treated as if they were *āṁḥ*, *īṁḥ*, *ūṁḥ*, *ṛṁḥ* (cp. 36 B 1, and 45, 1);

i. e. ān becomes āṁ (except in the 3. pl. subjunctive, where it represents an original ānt), while īn, ūn, ḫn become īṁr, ūṁr, ḫṁr;—e. g. mahāṁ asi, ‘thou art great’ (but á gacchān úttarā yugāni, ‘later ages will come’); raśmīṁr iva, ‘like reins.’

a. Sometimes rules which in Sanskrit apply internally only, are extended to the initials of words;—e. g. sahō śū nah (cp. 67).

Declension.

4. A. Endings. Singular. **a. Instr.** ā is sometimes added to stems in a, less commonly to feminines in ā;—e. g. yajñā, m. ‘sacrifice,’ instr. yajñēna and yajñā; manīṣā, f. ‘wisdom,’ instr. manīṣyā and manīṣā. The a of ena is also often lengthened.

Stems in -man sometimes do not syncopate the vowel of the suffix, while when they do, the m or the n is occasionally dropped;—e. g. bhū-mánā and bhū-n-ā for bhū-mn-ā; drāgh-m-ā for drāgh-mán-ā.

b. Loc. Stems in i take ā, though less commonly than au;—e. g. agnī, m. ‘fire,’ loc. agnāu and agnā.

Stems in -an usually drop the i;—e. g. bráhmaṇi and bráhman. They never syncopate the a of the suffix;—e. g. rājani only (cp. 90).

c. Voc. Stems in -mat, -vat, -vas, -yas regularly form their vocative in -as;—e. g. nom. bhānumānः voc. bhānumas; hárivānः hárivas; cakr̄vānः cákṛvas; kánīyānः kánīyas.

Dual. **a.** The nom. acc. voc. take ā more usually than au;—e. g. ásvinā, ‘the two Aśvins’; dvárā, f. ‘the two doors’; nadīā, ‘the two rivers.’ Feminines in derivative ī remain unchanged;—e. g. devī, ‘the two goddesses.’

b. The personal pronouns of the 1. and 2. pers. distinguish five cases;—e. g. N. yuvám; A. yuvám; I. yuvábhyām or yuvábhyām; Ab. yuvád; L. yuvós.

Plural. Nom. *a.* Masculine stems in -a often (feminines in -ā rarely) take āsas beside ās;—e.g. mártvāsah, ‘mortals.’

b. Feminine stems in derivative ī take s only;—e.g. devīḥ, ‘goddesses.’

c. Neuters take ā, ī, ū (sometimes shortened to ā, ī, ū) as well as āni, īni, ūni;—e.g. yugā, ‘yokes’ (cp. Lat. juga, Gk. ζυγά).

Instr. Stems in -a take ebhis nearly as often as ais;—e.g. devēbhiḥ and devāiḥ.

B. Inflectional Type. The main difference in type of declension is in the polysyllabic stems (mostly feminines, with a few masculines) in ī and ū, a considerable number of which are inflected like the monosyllabic stems dhī and bhū (100), excepting the gen. pl., where they take nām. (Stems in derivative ī otherwise for the most part follow nadī and vadhu as in Sanskrit: 100.)

E.g. rathī, m. ‘charioteer’; nadī, f. ‘river’; tanū, f. ‘body.’

Sing. N.	rathī-s	nadī-s	tanū-s
A.	rathī-am	nadīam	tanūam
I.	rathīā	nadīā	tanūā
D.	rathīe	nadīe	tanūe
Ab. G.	rathīas	nadīas	tanūas
L.	—	—	tanūi
V.	rāthī	—	tānu
Du.	N.A.V. rathīā	nadīā	tanūā
I.	rathībhyaṁ	nadībhyaṁ	tanūbhyaṁ
G.L.	rathīos	nadīos	tanūos
Pl.	N.A. rathīas	nadīas	tanūas
G.	rathī-n-ām	nadī-n-ām	tanū-n-ām
L.	rathīṣu	nadīṣu	tanūṣu

Conjugation.

5. Augment. *a.* This prefix is in some cases permanently long, in others metrically;—e. g. á-var, 3. sg. aorist of vr̥, ‘he has covered’; á-raik, 3. sg. aorist of ric, ‘she has given up.’

b. The augment can always be dropped without changing the meaning. Unaugmented forms are, however, often used as injunctives: this use has survived in Sanskrit with the prohibitive particle mā (128 *a*).

6. Verbal Prefixes. These generally precede, but sometimes follow the verb. They can be separated from it by particles and other words;—e. g. á tvā viśantu, ‘let them enter thee’; gámad vājebhir á sá nah, ‘may he come to us with riches.’

7. Endings. *a.* The primary termination of the 1. pers. pl. active, -masi, is much commoner than -mas;—e. g. i-mási and i-más, ‘we go.’

b. In the 2. pl. -thana and -tana often occur beside -tha and -ta;—e. g. yā-thá and yā-thána, ‘ye go’; yā-tá and yā-tána, ‘do ye go.’

c. The 2. sg. impv. has a not uncommon alternative ending in -tāt (added to the weak stem), which expresses an injunction to be carried out in the future; rākṣa-tāt, ‘protect’; brū-tāt, ‘say’; dhat-tāt, ‘place’ (cp. Gk. φερέτω, Lat. lege-tōd). It is sometimes used for the 2. du. and pl., or 1. and 3. sg.

d. The 3. pers. sg. pres. middle (like the perf. middle, 136) is not uncommonly identical with the 1.;—e. g. sáy-e, ‘he lies’ (=séte).

8. Reduplication. Many roots reduplicate with a long vowel in the perfect;—e. g. dhr̥, ‘support’: dādhár-a; vas, ‘clothe’: vā-vas-e; tu, ‘thrive’: tū-tāv-a.

9. Tenses. *a.* There is a pluperfect, which does not, however, occur often. It is formed from the perfect stem by prefixing the

augment, and adding the secondary terminations;—e. g. from cit, ‘appear,’ 1. sg. á-ciket-am, 3. á-ciket.

b. The periphrastic future does not exist; the periphrastic perfect is not known to the Rig-veda.

*comes
padus
veru*

10. Moods. **a.** There is a subjunctive, which is much commoner than the optative. Its meaning is imperative or final; it is also often equivalent to a future indicative. Its stem is formed by adding -a to the tense stem. In the a-conjugation it therefore ends in ā;—e. g. bhávā. In the second conjugation -a is added to the strong stem, which remains throughout;—e. g. from kr̥, ‘do’: kr̥náv-a. The endings are partly primary, partly secondary. Thus the subjunctive of bhū, ‘be,’ and su, ‘press out,’ are formed as follows:—

Par.	1. bhávā-ni	bhávā-va	bhávā-ma
	2. bhávā-si, bhávā-s	bhávā-thas	bhávā-tha
	3. bhávā-ti, bhávā-t	bhávā-tas	bhávā-n
Ātm.	1. bháv-ai	bhávā-vahai	bhávā-mahai
	2. bhávā-se	bháv-aithe	bhávā-dhvai
	3. bhávā-te	bháv-aite	(bháv-anta)
Par.	1. sunáv-ā-ni	sunáv-ā-va	sunáv-ā-ma
	2. sunáv-a-s	sunáv-a-thas	sunáv-a-tha
	3. sunáv-a-t	sunáv-a-tas	sunáv-a-n
Ātm.	1. sunáv-ai	sunáv-ā-vahai	sunáv-ā-mahai
	2. sunáv-a-se	sunáv-aithe	sunáv-a-dhvai
	3. sunáv-a-te	sunáv-aite	sunáv-anta

b. Not only the present, but the **perfect and aorist** as well, have all the **three moods**, subjunctive, optative, and imperative.

E. g. pf. subj. of stu, ‘praise’: tu-ṣṭáv-a-t; opt. of vṛt, ‘turn’: va-vṛt-yāt; impv. of muc, ‘release’: mu-mug-dhī; of bhū, ‘be’: ba-bhū-tu; Ātm. 2. sg. of vṛt: va-vṛt-sva.

Aor. subj. nī, 'lead': 3. sg. nēṣ-a-ti or nēṣ-a-t; budh, 'wake': bódhiṣ-a-t; vid, 'find': vid-á-t; kr̄, 'do': kár-a-ti or kár-a-t. Opt. of vid: vid-ét; ás, 'reach': ás-yát; bhaj, 'share': bhaksīṣṭā. Impv. of av, 'favour': 2. sg. avid-dhí, du. avis-ṭám, pl. avis-ṭána; 3. sg. avis-ṭu; sad, 'sit down': 3. sg. sada-tu, du. sada-tám, pl. sada-ntu; śru, 'hear': 2. śru-dhí, śru-tám, śru-tá; 3. śró-tu, śru-tám, śruv-antu.

II. Participles. In addition to those surviving in Sanskrit the Veda has an **aorist** participle, both active and middle;—e. g. Par., from kr̄, 'do': kr-ánt; gam, 'go': gm-ánt; sthā, 'stand': sthánt; Ātm., kr̄: kr-āñá; budh: budh-āñá.

a. The part. in -ta-vat is not known to the Rig-veda.

12. Gerunds. In addition to the gerund in -tvá, there is a commoner one in -tví, and a very rare one in -tváya. The vowel of the forms used with prefixes, -ya and -tya, is generally lengthened.

13. Infinitives. About a dozen kinds of infinitives can be distinguished, having the form of an acc., dat., abl., gen., or loc. The last three cases are rare. The vast majority are dat. infinitives, these being about twelve times as common as the acc.

a. The **acc.** inf. is formed either from the root or from a verbal noun in -tu (the latter being very rare in the Rig-veda);—e. g. sam-ídh-am, 'to kindle'; prati-dhá-m, 'to place upon'; pra-tír-am, 'to lengthen out'; kár-tu-m, 'to make'; dā-tu-m, 'to give.'

b. The **dat.** inf. is formed from the root or from verbal nouns in -as, -man, -van, -tu, or -dhi;—e. g. dr̄s-é, 'to see'; śrad-dhé, 'to believe' (cp. *εἰδεσθαι*); jūv-ás-e, 'to live'; vid-mán-e (*ιδομέναι*), 'to know'; dā-ván-e (*δοῦναι* from *δοφεναι*), dā-tav-e, 'to give'; kár-tav-ái (with double accent), 'to do'; gamá-dhyai, 'to go.'

c. Examples of the other cases are: ava-pád-as, 'to fall down'; dā-tos, 'to give'; nēṣ-áñ-i, 'to lead'; dhartár-i, 'to support.'

Prepositions.

14. The genuine prepositions are used only with the acc., loc., and abl. (apart from a few isolated instances of the instr.).

a. With **acc.** áti, 'beyond'; ádhi, 'on to'; ánu, 'after'; antár, 'between'; áccha, abhí, á, úpa, práti, 'towards'; pári, 'round'; tirás, 'across'; purás, 'before.'

b. With **loc.** ádhi, 'on'; antár, 'within'; ápi, á, and úpa, 'near'; purás, 'before.'

c. With **abl.** ádhi, 'from upon'; antár, 'from within'; á, 'away from' or 'up.to'; pári, 'from (around)'; purás, 'before.'

Accent.

15. The accent is marked in all the texts of the four Vedas, as well as in two Bráhmaṇas. Of the four different systems of marking it, that of the Rig-veda is the most important. Here the chief accent, the acute (**udātta**, 'raised'), or rising tone, is not marked at all, probably because it comes midway between the grave or low tone (**an-udātta**) which precedes, and the **svarita**, or falling tone, which follows it and marks the transition from an accented to a toneless syllable. The anudātta preceding the acute is marked with a horizontal stroke below, and the svarita following it, with a vertical stroke above;—e.g. अग्निना॑ ag-ní-nā. The so-called independent svarita (originally also preceded by an acute, which disappears by removal of hiatus in the written text, but has often to be restored in pronunciation) is marked like the enclitic one;—e.g. कु॒ kvà (=kúà); the anudātta being also indicated under the preceding syllable;—e.g. वीर्यम्॑ viryàm (=vírýam).

If an independent svarita precedes an udātta it is marked with the numeral १ (1) when the syllable is short, with ३ (3) when it is long, the figure bearing both the svarita sign and the anudātta which precedes the udātta; अप्सु॑ वृत्तर् apsv àntár (=apsú antár);

below
sign
under
marked
again

रायोऽवनिः: rāyò 'vániḥ (=rāyó avániḥ). An accented syllable at the beginning of a line remains unmarked; all grave syllables at the beginning of a sentence preceding an acute must be marked; and all graves following a svarita are left unmarked till the one preceding an acute or svarita;—e.g. नमौ युजानम् námò yujānám; करिष्यसि karisyásì.

- 16. Enclitics.** *a.* The particles u, cid, svid, iva, gha, ha, ca, sma, vā. *b.* Certain monosyllabic pers. pronouns, me, te, &c. (109a). *c.* The demonstrative pron. ena, and im, sīm. *d.* The indefinite pronouns tva, 'another'; sama, 'some.'

- 17. Unaccented Forms.** *a.* The demonstrative pron. a, when unemphatic as replacing a noun;—e.g. asya jánimāni, 'his (Agni's) births'; but asyā usásah, 'of that Dawn.'

- b.* The **vocative** loses its accent, unless it begins the sentence, whatever the length of the vocative expression;—e.g. ā rājānā maha ṛtasya gopā, 'hither, ye two sovereign guardians of great order.'

- 18.** The employment of the **accent** in declension and conjugation may be gathered from the paradigms given in the preceding grammar; but the following peculiarities of its use **in the sentence** should be noted.

- a.* The **vocative** is invariably emphasized on the first syllable only, all the other syllables of a complex expression losing their accents;—e.g. hótar yavishtha sukrato, 'O most youthful wise sacrificer'; úrjo napāt sahasāvan (nom. Úrjó nápāt sáhasāvā).

- b.* The **finite verb** of a principal clause is unaccented, unless it begins the sentence;—e.g. Agním īle, 'I praise Agni.' Since a voc. does not count in a sentence, a verb following it is accented;—e.g. áśrut-karṇa, śrudhí hávam, 'O thou of listening ears, hear our call.' A sentence being regarded as capable of having only one verb, all verbs syntactically connected with the same subject

as the first are accented as beginning new sentences;—e.g. taráñir
fj jayati, kséti, púsyati, 'successful he conquers, rules, thrives.'

c. In subordinate clauses (introduced by the relative or its derivatives, and the particles hí, 'for,' ca and ced, 'if,' néd, 'lest,' kuvíd, 'whether') the verb is always accented;—e.g. yám yajñám
paribhúr ási, 'what sacrifice thou protectest.' When two principal clauses are in a relation of antithesis, the first is often treated as subordinate, and its verb accented.

d. In principal clauses the verbal prefix is separated from the verb and accented; in subordinate clauses it is compounded with the verb and loses its accent;—e.g. á gacchati, 'he comes,' but yá
ágacchati, 'he who comes.'

SANSKRIT INDEX

This index contains all Sanskrit words and affixes occurring in the grammar, except the numerals (104-108), unless declined, and the verbs in Appendix I. The former can be found at once owing to their numerical, the latter owing to their alphabetical order. Indifferent words occurring in examples of Sandhi or of Syntax, as well as in Appendix III, are excluded.

The figures refer to paragraphs unless pages are specified.
