UNIVERSITY OF CALIFORNIA PUBLICATIONS
DEPARTMENT OF ANTHROPOLOGY

The following publications dealing with archaeological and ethnological subjects issued under the direction of the Department of Anthropology are sent in exchange for the publications of anthropological departments and museums, and for journals devoted to general anthropology or to archaeology and ethnology. They are for sale at the prices stated, which include postage or express charges. Exchanges should be directed to The Exchange Department, University Library, Berkeley, California, U. S. A. All orders and remittances should be addressed to the University Press.

		Price
Vol. 1.	1. Life and Culture of the Hupa, by Pliny Earle Goddard. Pp. 1-88; plates 1-30. September, 1903	\$1.25
	2. Hupa Texts, by Pliny Earle Goddard. Pp. 89-368. March, 1904	3.00
Vol. 2.	1. The Exploration of the Potter Creek Cave, by William J. Sinclair. Pp. 1-27; plates 1-14. April, 190440
	2. The Languages of the Coast of California South of San Francisco, by A. L. Kroeber. Pp. 29-80, with a map. June, 190460
	3. Types of Indian Culture in California, by A. L. Kroeber. Pp. 81-103. June, 190425
	4. Basket Designs of the Indians of Northwestern California, by A. L. Kroeber. Pp. 105-164; plates 15-21. January, 190575
	5. The Yokuts Language of South Central California, by A. L. Kroeber. Pp. 165-377. January, 1907	2.25
	Index, pp. 379-393.	
Vol. 3.	The Morphology of the Hupa Language, by Pliny Earle Goddard. 344 pp. June, 1905	3.50
Vol. 4.	1. The Earliest Historical Relations between Mexico and Japan, from original documents preserved in Spain and Japan, by Zelia Nuttall. Pp. 1-47. April, 190650
	2. Contribution to the Physical Anthropology of California, based on collections in the Department of Anthropology of the University of California, and in the U. S. National Museum, by Ales Hrdlicka. Pp. 49-64, with 5 tables; plates 1-10, and map. June, 190675
	3. The Shoshonean Dialects of California, by A. L. Kroeber. Pp. 65-166. February, 1907	1.50
	4. Indian Myths from South Central California, by A. L. Kroeber. Pp. 167-250. May, 190775
	5. The Washo Language of East Central California and Nevada, by A. L. Kroeber. Pp. 251-318. September, 190775
	6. The Religion of the Indians of California, by A. L. Kroeber. Pp. 319-356. September, 190750
	Index, pp. 357-374.	
Vol. 5.	1. The Phonology of the Hupa Language; Part I, The Individual Sounds, by Pliny Earle Goddard. Pp. 1-20, plates 1-8. March, 190735
	2. Navaho Myths, Prayers and Songs, with Texts and Translations, by Washington Matthews, edited by Pliny Earle Goddard. Pp. 21-63. September, 190775
	3. Kato Texts, by Pliny Earle Goddard. Pp. 65-238, plate 9. December, 1909	2.50
	4. The Material Culture of the Klamath Lake and Modoc Indians of Northeastern California and Southern Oregon, by S. A. Barrett. Pp. 239-292, plates 10-25. June, 191075
	5. The Chimariko Indians and Language, by Roland B. Dixon. Pp. 293-380. August, 1910	1.00
	Index, pp. 381-384.	
Vol. 6.	1. The Ethno-Geography of the Pomo and Neighboring Indians, by Samuel Alfred Barrett. Pp. 1-332, maps 1-2. February, 1908	3.25
	2. The Geography and Dialects of the Miwok Indians, by Samuel Alfred Barrett. Pp. 333-368, map 3.	
	3. On the Evidence of the Occupation of Certain Regions by the Miwok Indians, by A. L. Kroeber. Pp. 369-380. Nos. 2 and 3 in one cover. February, 190850
	Index, pp. 381-400.	
Vol. 7.	1. The Emeryville Shellmound, by Max Uhle. Pp. 1-106, plates 1-12, with 38 text figures. June, 1907	1.25
	2. Recent Investigations bearing upon the Question of the Occurrence of Neocene Man in the Auriferous Gravels of California, by William J. Sinclair. Pp. 107-130, plates 13-14. February, 190835
	3. Pomo Indian Basketry, by S. A. Barrett. Pp. 133-306, plates 15-30, 231 text figures. December, 1908	1.75
	4. Shellmounds of the San Francisco Bay Region, by N. O. Nelson. Pp. 309-356, plates 32-34. December, 190950
	5. The Ellis Landing Shellmound, by N. O. Nelson. Pp. 357-426, plates 36-50. April, 191075
	Index, pp. 427-441.

INTRODUCTION.

Many years ago Father Felipe Arroyo de la Cuesta composed, and Shea in 1861 published, one of the most satisfactory treatises dealing with an Indian idiom of California, the Grammar of the Mutsun Language, subsequently classified as a Costanoan dialect. Several years ago the author added notes on another dialect, that of Monterey, and presented a grammatical sketch of the Santa Ynez idiom of the Chumash family.¹

¹ Languages of the Coast of California South of San Francisco, present series, II, 29-80, 1904.

Since that time he has recorded two vocabularies, one in the Costanoan speech at Mission San Jose, the other in the Chumash dialect of Mission San Buenaventura.

A comparison of these two new sources with the material previously obtained, enables an insight into the dialectic organization of the two families. Wherever these uniformly-made records of two dialects of the same stock corroborate each other, whether by agreement or by an explainable difference, they furnish a basis of comparison by which other previously published lists may be judged, and some allowance made for their orthographic variations. In this way some half dozen diverse vocabularies in each family are made available for comparative study.

COSTANOAN.

DIALECTS AND TERRITORY.

Seven Franciscan missions were founded in territory held by Indians of Costanoan speech: Soledad, San Carlos near Monterey, San Juan Bautista, Santa Cruz, Santa Clara near the present city of San Jose in Santa Clara county, San Jose near Irvington in Alameda county, and Dolores in San Francisco. To these were brought, before the close of the Mission period, probably all the Costanoan Indians then living.

Some record has been made of the prevailing language at each mission, which was normally the dialect of the immediate district. Seven forms of Costanoan speech are therefore known to have existed.

Unfortunately it seems impossible to learn anything as to such other dialects as there may have been, as to transitional idioms connecting the "standard" languages of the missions, or of the territorial extent of each form of speech. It is almost certain that the seven published vocabularies do not comprise all varieties of the Costanoan language. Father de la Cuesta's works refer to differences of speech between the Mutsunes and the Ansaymes or Ausaimas connected with mission San Juan Bautista, but furnish only two or three illustrations.² Nothing has been published regarding the dialects of northern Alameda or Contra Costa counties. Finally, while all ethnological maps have extended the Costanoan territory eastward to the San Joaquin river, the missions are all situated in the western half of this area, between the mountains and the sea. Not a Costanoan dialect, tribe, or even name is positively known from the territory between the main watershed of the Coast range and the San Joaquin river. It appears, indeed, that contrary to former supposition at least all of the plain of the San Joaquin valley, and possibly the lower hills on its west, were not in

² Compare his *Vocabulary or Phrase Book of the Mutsun Language*, ed. Shea, New York, 1862, examples 9 and 12.

Costanoan but in Yokuts territory.³ This circumstance would account for the absolute dearth of references to Costanoan Indians in this area. Nevertheless there remain sufficiently extensive tracts which cannot well have been inhabited by any one but Costanoans, but in regard to which we are, and perhaps always will be, uninformed. Consequently the present classification may not be regarded as exhaustive; and it differs further, to its disadvantage, from such comparative studies as have been made of Yuki, Pomo, Miwok, Yokuts, and Shoshonean, in that it deals not with *areas* of speech, but with the speech of accidentally selected *points*. In the absence of fuller data, it is however necessary to operate with those available.

As is usual in California, none of the dialects seem to have had native names. Mutsun is properly only the name of the principal village near mission San Juan Bautista. Rumsen or Rumsien, used for the Costanoan Indians of Monterey, is probably also only a specific place name misused by the whites. The five "tribes" at San Francisco—Ahwastes, Olhones, Altahmos, Romonans, and Tulomos—are, if Costanoan, only rancherias. Polya, Polye, or Polaya, was given to Dr. Barrett and the author as the name of the language of San Jose mission; yet this seems to be nothing but Northeastern Miwok polaiya, ocean, and is therefore probably the term applied to the resident natives by the Miwok of the interior after their transportation to the mission.

The seven known Costanoan dialects are divisible into two groups, a northern and a southern. The northern division comprises San Francisco, San Jose, Santa Clara, and Santa Cruz, the southern San Juan Bautista, Soledad, and Monterey. The difference between the two groups may be accentuated by the fact that the four northern missions are all situated on the ocean or San Francisco bay, or within a few miles of the water; while two of the three southern locations are some distance inland. It is impossible to predict a priori whether such a topographical distinction will be reflected linguistically, in any given case, in California. Where the speech of entire areas has been ascertained, the following facts have developed. The

³ Present series of publications, VI, 350, 375, 1908.

Yokuts and Miwok correspond absolutely, in their lines of dialectic cleavage, to the division into level plain and broken hill country.⁴ The Maidu, however, in a similar situation, do not;⁵ and similarly among the Pomo several dialects each comprise parts of two or three distinct topographical areas.⁶

In the northern division, the dialects of San Jose and Santa Clara are very closely related—so much so that in view of their being recorded many years apart by observers using different orthography, it cannot be stated with certainty whether or not there is any real difference between them. San Francisco is at least as similar to these two as is Santa Cruz. Santa Cruz, geographically the nearest of the northern dialects to San Juan Bautista, also resembles it most; but the primary line of division in the family nevertheless passes between the two, for Santa Cruz is more similar to Santa Clara than to San Juan, and this in turn has closer affinities with Soledad and Monterey.

In the southern division the abundance of material on San Juan as compared with the scant 22 words known from Soledad,⁷ make comparison more difficult. It must be observed that the numerals given by de Mofras⁸ as from Soledad belong evidently to a dialect of the San Juan type, if Hale's Soledad vocabulary represents the characteristic speech of that place. The Monterey dialect is peculiar. In its stems it agrees almost invariably with San Juan, as compared with the northern group; but many of its words are evidently reduced, especially in their latter parts. Dropping of vowels is responsible for a common accumulation of final consonants, a feature confined to this one dialect.

Graphically the affinity of the Costanoan dialects can be represented thus:

⁸ II, 401.

COMPARATIVE VOCABULARIES.

The comparative Costanoan vocabulary which is appended is a collocation of previously published word lists with those secured by the author in the Monterey and San Jose dialects. The latter is corroborated by a brief vocabulary obtained by Dr. Barrett in Marin county. So far as could be judged, the orthographical peculiarities of each observer have been obliterated and all words given in uniform spelling; but only words represented in two or more dialects have been included.⁹ C represents a sound akin to English sh; x is the surd fricative in k position; q is velar k; q', k', t', p' are surd stops produced with more than usual muscular energy and accompanied by a glottal stop; γ is a voiced fricative in k or q position; X is velar x; t· is a palatal t; L, surd l, affricative; ö and ü indicate sounds similar to German ö and ü but with less rounding of the lips, and therefore less distinct quality.

⁹ The following are the sources: Monterey, the author, supplemented by A. Taylor in the *California Farmer*, XIII, 66, April 20, 1860. Soledad, H. Hale, in *Trans. Am. Ethn. Soc.*, II, 126, 1848. San Juan Bautista, de la Cuesta, *op. cit.* Santa Cruz, F. J. Comelias, in Taylor, *op. cit.*, XIII, 58, April 5, 1860, reprinted in Powers, *Tribes of California*, *Contrib. N. A. Ethn.*, III, 538, 1877. Santa Clara, F. G. Mengarini, in Powers, *ibid.* San Jose, the author. San Francisco, in Schoolcraft, II, 494, reprinted in Powers, *ibid.*

NOTES TO VOCABULARIES.

1. Old.
2. Compare Monterey ap-s, an-s, my f., my m., apa-n, ana-n, your f., your m., San Juan Bautista ap-sa, my f., with the apna-n and ana-n of Santa Cruz. These are the only suffixed pronominal elements yet found in the Costanoan languages, except for the affixes of the imperative.
3. The prefix or proclitic nik-, my, is unparalleled.
4. The ending -m, which appears repeatedly in the vocabulary of this dialect, is probably not pronominal.
5. Compare San Juan Bautista tapis, crown of head.
6. With we-per compare San Juan Bautista tut-per, lips.
7. Throat, swallower.
8. Also with the meaning of soul, spirit, person, in de la Cuesta, but liver in other dialects.
9. The original has p for t.
10. "Up."
11. "Heat of the sun."
12. Said to mean also earthquake. The initial is dental, not palatal t at Monterey.
13. = tura of other dialects, or an error for tarax, sky?
14. "Roretaon."
15. Compare stream.
16. The same as deer.
17. "Wild-dog, field-dog."
18. Either waguises = wawises, or waquises = wakises.
19. Given as wolf.
20. "Wild-deer, wild-meat."
21. Santa Clara wirak, wings.
22. Raven.
23. Compare night.
24. Compare blood.
25. Compare the Santa Clara word for green: teitko-mini.
26. Compare boy.
27. "Above."
28. Literally, good.
29. "One-hand."
30. Coast Miwok kene, osa, teleka, one, two, three.

PHONETICS.

The exceptional habit of the Monterey dialect of shortening its words is the cause of its frequent accumulations of final consonants. Such accumulations are not tolerated by the other dialects, as a glance at the vocabularies reveals. In regard to initial consonants, Monterey agrees with the other dialects in possessing only simple sounds and affricatives like tc. As a group, therefore, the Costanoan languages are to be reckoned

with the majority of California linguistic families in that they allow only single consonants before, after, or between the vowels of stems.

The vocalic system of Costanoan is reducible to the five sounds u, o, a, e, i, of which both o and e, and u and i, are open in quality, though the latter perhaps also occur with close value.

The apparatus of consonants is also simple, consisting of the stops k, t, t', p and the sounds n, m, h or x, s, c, r, l, w, y, and the affricative tc.

T is very palatal, as in Yokuts and Salinan, and its frequent orthography tr conveys a fair idea of the quality of its sound. De la Cuesta has written it thr, also ths, th, and tsh. These spellings give to his material a much more forbidding and difficult look than the actual phonetic simplicity of the Costanoan dialects warrants.

The four stops have been almost randomly recorded by the author, both in San Jose and Monterey, as surd or partially sonant. The perceptible difference is so slight that it seems probable that there is only one series of essentially surd sounds, which differ sufficiently from the English surd stops, in being pronounced with somewhat less breath or some degree of sonancy—possibly during the explosion—to cause them at times to assume to English ears a quality approaching that of sonant stops. Father de la Cuesta seems to have mastered the phonetics of the San Juan dialect, but his nationality and orthography are unsatisfactory for elucidating this point, as the surd explosives of Spanish are voiced during part of their formation, while the corresponding Spanish sonants are largely fricative, so that if the Costanoan stops are actually intermediate rather than surd, he would nevertheless have naturally and correctly represented them by the Spanish surd stop characters.

H and x shade into one another and are probably one sound, as in Yurok and Yana and Yuki. C, more nearly than English sh, resembles s, as in so many other American languages. R is trilled with the tip of the tongue, but without violence.

Sound equivalences between such nearly related languages as the several Costanoan dialects can not be dwelt on with much emphasis in the present state of knowledge, as some dif-

ferences may be typographical rather than phonetic. A number are however apparent.

r=l: woman, hair, foot, moon, black, large. San Francisco particularly substitutes l for r, but not always.

r=n, y, t: tobacco, wind, hair, meat.

l=n: coyote, white.

y=te, t, t: bone, blood, coyote, black.

s=k, h: beard, today.

k=x: head, ear.

k=w: house, salt, small.

Santa Clara -tc = San Jose -x = other dialects - : forehead, heart.

c=te=t: bow, thunder, small.

In San Jose, all the consonants occur initially, and all but *tc* finally. In consonant combinations in words, *r*, *p*, and *t* have not been noted as second member. Further examples may eliminate these exceptions and reveal all the consonants as available for any position. All the vowels are found in every part of words.

GRAMMATICAL NOTES.

SAN JOSE.

The personal pronouns in the dialect of San Jose show full forms similar to those of San Juan Bautista and other dialects, as contrasted with the reduced *ka*, *me*, *wa* of Monterey. As in the other known dialects they occur in two forms; one for the absolute, subjective, and possessive, the other, produced by the addition of *-c* to the first syllable of the stem, for the objective. The objective of the third person *ic* or *c*, which presents the appearance of a formation by analogy, has no known parallel in the southern dialects.

	<i>Subjective and Possessive</i>	<i>Objective</i>
1 S	kana, kanak	kie
2 S	mene, meni	mec, mic
3 S	waka, wakai	ic, c
1 P	makin, makinmak	
2 P	makam	
3 P	wakamak	

The plural of animate nouns and pronouns is formed by the usual suffix *-mak*, *-kma*, *-ma*: *tare-ma*, *men*, *aita-mak*, *women*, *muwe-kma*, *people*, *waka-mak*, *they*, *makin-mak*, *we*.

An ending -c, as in tare-c, man, miti-c, old man, is evidently the same as the Monterey and San Juan suffix of nouns -s. Compare aita-kic, woman, atsy-a-kic, girl. The -c and -kic of the words for man and woman are lost before the plural suffix.

The general Costanoan locative or inessive suffix -tka occurs: si-tka, in the water. Another locative ending is -mo, -mu, -m: no-mo, here; rini-mu ruwai, on the house, "above-on house"; mani-m watic, where are you going? Compare San Juan Bautista patre-me, at the house of the padre.

An adjective ending -wis corresponds to Monterey -st and San Juan, Santa Cruz, Santa Clara, and San Francisco -min or mini.

cirke-wis, black
locko-wis, white
pulte-wis, red
icne-wic, how is it?
kuteu-wic, small

The imperative ends in -i. Compare San Juan -ya, intransitive imperative, and -i, imperative with object of third person.

The future is indicated by -na, while -k seems to denote the past, and -c is perhaps a present: kiti-na, will see, kiti-k, saw or sees, wati-c, goes. Compare the Monterey preterite in -ki. Another ending is -kne, as in nimi-kne, struck.

SAN JUAN BAUTISTA.

The following are the grammatical elements of the Mutsun dialect, as given by de la Cuesta in Spanish orthography. They appear to constitute the entire grammatical apparatus of the language.

-mac, -ema, plural of nouns; -s-mac, plural noun agent
-se, -ne, -e, objective case-ending
-sum, -ium, -um, instrumental case-ending
-tea, -tac, locative case-ending, in, on, at
-me, case-ending, with, at the house of
-tsu, case-ending, in company with
-huas, case-ending, for, to
-tun, case-ending, from
-s, infix near the end of verbs, plural of object or repetition of action
-s, preterite
-n, preterite, more remote

- scun, -cun, preterite, remote
- gte, preterite
- si, causative
- su, to go to
- na, to go to
- ifi, to come to
- miste, to beg to
- u, when
- inicane, when
- stap, -stapse, impersonal, passive, etc.
- gnis, impersonal, passive, etc.
- gne, the same, also participial
- guit, prohibition
- csi, excellently, well, thoroughly
- mu, reciprocal
- pu, reflexive
- ya, intransitive imperative
- i, imperative with object of third person
- t, -tit, -mit, imperative with object of first person
- yuts, plural of subject in the imperative
- is, hortatory(?) imperative
- se, -s, added to first word in sentence, interrogative
- na, adverbial numerals
- huas, ordinal numerals
- si, distributive numerals

TEXTS.

LORD'S PRAYERS.

Two Lord's Prayers in Costanoan have long been known.¹⁰ A partial translation can be made. It may be added that the text given by de Mofras from Santa Clara appears rather to resemble the San Juan Bautista dialect; and that his other, which is presented as from the Tulare Valley, in other words Yokuts, is possibly most similar to the dialects of San Jose and Santa Clara.

VALLÉE DE LOS TULARES.

Appa macquen erinigmo tasunimac emracat, jinnin eccey macquen unisínmac macquen quitti éné soteyma erinigmo: sumimac macquen hamjamú jinnan guara ayei: sunnun macquen quit ti enesunumac ayaema: aquetsem unisimtac nininti equetmini: juriná macquen equetmini em men.

¹⁰ Dufrot de Mofras, II, 392.

TRANSCRIPTION.

apa Father	maken our	erinix-mo ¹ sky-in,	tasuni-mak ² (sacred)	em ³ thy
rakat ⁴ name,	xinin ⁵ (come)	eksei (rule)	maken us	unisin-mak ⁶ will
maken us	kitiene as	sotei-ma (earth)-in	erinix-mo sky-in,	sumi-mak ⁷ give
maken us	hamxamu ⁸ food	xinan	wara aye debts	sunu-n ⁷ forgive
maken us	kitiene as	sunu-mak ⁷ forgive	aya-kma ⁹ debtors,	ake-ktsem ¹⁰ not
unisimtak ¹¹ (lead)	nininti	eket-mini ¹² bad,	xurina (deliver)	maken us
eket-mini bad,	emen amen			

NOTES.

1. Compare San Jose rini-mu, up. For the locative ending compare San Jose -mo, -mu, -m, and San Juan Bautista -me, at the house of; also, below, sotei-ma, on earth.

2. The ending -mak occurs on several of the forms that are imperative or optative:

tasuni-mak, hallowed be.
unisin-mak, thy will be done.
sumi-mak, give us.
sunu-mak, as we forgive, or, forgive us.

3. Compare im rakat in the Santa Clara prayer. Compare also San Jose em ama, are you eating? where em replaces mene, you

4. Compare San Juan Bautista "gracat."

5. Compare Monterey xin, to walk.

6. Unisin- perhaps contains the same stem as Monterey iws, ius, to like, desire.

7. Sunu-n and sunu-mak, forgive, are not the same as sumi-mak, give, through a manuscript misreading of nu for mi; but sunu recalls Coast Miwok sulí, pardon, pity, while sumi is paralleled by San Juan Bautista xumi, give.

8. Compare San Jose and San Juan Bautista ama, to eat, Monterey amxai, food.

9. Contains the common Costanoan plural ending -kma, -mak, -ma, usually confined to animate nouns.

10. The negative is akwe in San Jose, kwe, kue, at Monterey, ekwe at San Juan Bautista, etc.

11. The ending agrees with the locative case-suffix -tka, -tak, which appears to be common to all Costanoan dialects, but is of course used only with nouns. The word may be corrupt. Except for a difference of two letters, it is identical with unisin-mak above. Possibly -tak should be read -mak.

12. In San Juan Bautista ekwe is no, not, ekwet., bad, evil. The adjective ending -mini, -min is known from San Juan Bautista, Santa Cruz, Santa Clara, and San Francisco.

MISSION SANTA CLARA.

Appa macréne mé saura saraahtiga elecpuhmen imragat, sacan macréne mensaraah assueiy nouman ourun macari pireca numa ban saraahtiga poluma macréne souhai naltis anat macréne neéna, ia annanit macréne nieena, ia annanit macréne macrec équetr maccari noumabaú macre annan, nou maroté jassemper macréne in eekoué tamouniri innam tattahné, icatrarca oniet macréne equets naccaritkoun och á Jésus.

Jesus					
Jesus					

NOTES.

1. San Juan Bautista tsahora = tsaura, to exist, be locally, used with animate nouns; Monterey tcawar.

2. -men seems to be the suffix -min, -mini.

3. San Juan Bautista numan, who, which, that, ille qui, relative, not interrogative. The same stem appears in numaban, as, below.

4. For San Juan Bautista regular pire-tka.

5. Monterey, pulum, acorn-bread.

6. As in the preceding prayer, the words give (bread) and forgive (sins) are similar. Give, in San Juan Bautista, is ara or xumi, here ana. The San Juan ending for the imperative of the second person with object of the first, is -t, -mit, -tit; compare ana-nit and onie-t below.

7. The repetition in the printed text of the four words beginning with macrene is a copyist's error.

8. See the preceding text for a note on the use of this stem with the meanings of not and bad in San Juan Bautista.

9. Monterey and San Juan Bautista nu-pe, that, those, San Jose nu-xu, there.

10. San Jose mat-o, who. San Juan has ate for who, and Monterey amp. Compare however the stem rote, to be somewhere, in these two dialects: Monterey anrot, where is it?

MONTEREY. ORIGIN OF THE WORLD.¹¹

tan	murka'tuyi ¹²	pi'ri	ne'ku	u'uwin	ci'irx

MONTEREY SONGS.¹⁸

- 19⁽¹⁾.¹⁹ A dance song:
 uxar-at kai pire, on-cliff dancing (of-the-)world
- 19⁽²⁾. A dance song:²⁰
 panantonakoi, jealous
 urin puncipin tot-nin, deer
- 20⁽¹⁾. Song of a blind man:²¹
 piina watena tot-i, there goes meat

¹⁷ The people complain that the acorns are bitter. Coyote replies to leach them, but the informant had forgotten the native word.

¹⁸ For a song from a coyote myth, see present series IV, 202, 1907.

¹⁹ Numbers refer to catalogued phonograph records in the Anthropological Museum of the University.

²⁰ A woman sees a successful hunter with the deer he has killed, and although he is already married, she wishes him for a husband. Deer is tot.

²¹ Played by him on his flute. A girl was attracted, came to him, and became his wife.

- 20⁽²⁾. Dancing song:
comak kaenep lupaki²²
- 21⁽¹⁾. A woman's love song:
hayeno, come!
ha-me ka rut.ano, you I mean,
ha-purps teokolate, hat chocolate-colored.²³
- 25⁽³⁾. Song:²⁴
ara patcaxiyee xawan, now hits wife
was yeyexem, her pelican
- Hunting song:²⁵
kuniixt wa-wuus wat isxeno, stopped its-nose . . .
(with-)estafiate-plant
- 16⁽²⁾. Dance song:²⁶
ka istun xaluyaxe, I dream jump
ka mas ictunine, I you dream-of
werenakai, rabbit
teicakai, jackrabbit
eksenakai, quail

RELATIONSHIP OF MIWOK AND COSTANOAN.

In 1856 Latham²⁷ tentatively separated certain of the dialects subsequently classified as Costanoan and Miwok. In the earliest linguistic map of California, in Powers' Tribes of California in 1877, Powell still grouped together as Mutsun the languages then known. Fourteen years later, however, in his *Indian Linguistic Families*, Powell divided the same dialects into two families, which he designated Moquelumnan and Costanoan. This separation has been generally accepted, though only with reserve on the part of some students, inasmuch as there are several obvious lexical resemblances between the two groups of languages, as in the words for two, I, and you.

²² The words, which were given by the informant as mak enep lupak, which perhaps coincides with their usual spoken form, are said to refer to a woman's white face-paint.

²³ The words are given as sung. When spoken, hame ka rut.ano would be mee ka rut.in or me ka rut. Hayeno may mean to come—compare the vocabulary,—but sounds like a meaningless refrain.

²⁴ A charm to bring a man home. Fog was away, and to cause him to return he was told that the pelican was beating his wife.

²⁵ The hunter sings this in order that the deer's nostrils may be unable to smell him.

²⁶ Sung by the rat to the three animals mentioned, who danced. The ending -akai seems to be expletive.

²⁷ *Trans. Philol. Soc. London*, 81, 1856.

Since the structure of the Miwok dialects has recently begun to be ascertained, and as Dr. Barrett's studies have systematized our lexical knowledge of them, more reliable comparisons than heretofore are now possible with Costanoan.

Some fifty resemblances have been determined between Miwok and Costanoan, these being in part lexical and in part grammatical. As the number of stem-words available for comparison is less than two hundred in each family, and as the structure of neither is very thoroughly known, this series of similarities is fairly significant.

	<i>Miwok</i>	<i>Costanoan</i>

The greatest obstacle to a final answer to the problem as to whether or not this material is sufficient to establish kinship between the two groups, is the difficulty of making a distinction between elements that one language has borrowed from the other, and those that they hold in common as the heirloom of original unity. As Dr. R. B. Dixon has said,³⁰ when confronted by a similar problem between Chimariko and Shasta, the general status and extent of borrowing between the *unrelated* families in California must be better understood before even a considerable body of similar words can be either accepted or rejected as positive evidence of relationship. It is obvious that words have been transmitted in many directions, but it is not known how extensive the process has been.³¹

³⁰ Present series, V, 337, 1910.

³¹ A somewhat similar case is provided by a series of similarities between Yokuts and Maidu, in which the terms of cardinal direction, the numerals from one to three, and the words for head, mouth, breast, person, sun, dance, and probably others, are almost alike. These resemblances may be due to borrowing, particularly if any considerable proportion of them prove to extend to other families.

In favor of relationship is the equivalence of k and s in a number of words, and l and r, or l and n, in others. On the other hand even such correspondences are of course not proof of kinship, as a language lacking r or a certain type of k might well alter these sounds to l and s in borrowing words from another stock of speech.

Probably the strongest evidence in favor of kinship is furnished by the grammatical elements enumerated, and by the general structural resemblance between the two groups of languages. They agree in possessing a closely similar phonetic basis; a prohibition of combinations of consonants in stems, or initially in words; a paucity of reduplication; a similar number and kind of suffixes of case and number in nouns and pronouns; the complete absence, so far as known, of instrumental, spatial, and adverbial affixes from verbs; and a general lack of prefixes.

The most important difference between the languages is in the grammatical usage of the pronominal elements. Costanoan is almost entirely analytic in this regard, while the majority of Miwok dialects are elaborately synthetic, both in noun and verb. What is more, the affixed pronominal forms of Miwok are for the most part entirely different from the independent pronouns that are common to Miwok and Costanoan. But the gap is bridged by the coast dialects of Miwok, which lack nearly all the synthetic pronominal series that are so conspicuous in the interior dialects, and affix the pronominal elements so loosely that they are more properly proclitics, as in Costanoan. If Miwok and Costanoan constitute but one family, the interior Miwok languages therefore probably represent a more primitive stage of synthetic structure, which has already largely broken down in the coast Miwok dialects, and has been replaced by an almost entirely analytic one in Costanoan.

A definite answer as to the genetic relationship of the two groups can therefore perhaps not yet be given, though the evidence will probably make a favorable rather than a negative impression. The most appropriate designation for the new and larger family, if it be recognized as a true unit, appears to be Miwok, which alone, of the names already in usage, is a native term denoting human beings. Mutsun and Moquelumnan

signify specific localities, and Costanoan labors under the double disadvantage of being Spanish—corrupted at that—and of geographic inappropriateness for a group extending to the Sierra Nevada.

In any event, even if the fact of a larger family is accepted, the Miwok and Costanoan groups must continue to be regarded as the primary divisions of this family. The most diverse Miwok dialects appear to be more similar to one another lexically than to any Costanoan idiom, and vice versa. This circumstance should have historical bearing because the Costanoan territory is on the whole situated between the coast and interior Miwok divisions.

CHUMASH.

DIALECTS AND TERRITORY.

The Chumash languages are more difficult than the Costanoan, and it is less feasible in this family to reconstruct forms given in an imperfect or inconsistent orthography. Five missions were founded in Chumash territory: San Buenaventura, Santa Barbara, Santa Ynez, La Purisima, and San Luis Obispo, the first two being on the coast, the three western ones a short distance inland. Data are available on the dialects of all of these missions except La Purisima. In addition there were the dialects of the northern Santa Barbara islands (represented by a vocabulary from Santa Cruz), which not only were Chumash but have given this name to the family. The islanders received no missions of their own, but were brought to the mainland.

The known Chumash dialects fall clearly into three divisions. One group comprises the district of San Luis Obispo. Another embraces the islands, so far as these were Chumash and not Shoshonean. All the remaining territory within the limits of the family was included in what may be called the principal or central group. Within this division San Buenaventura, Santa Barbara, and Santa Ynez show variation. Other dialects³² very likely existed also, but have not been recorded. The Santa Barbara idiom is more similar to Santa Ynez than to San Buenaventura; where one of the three differs from the other, San Buenaventura is exceptional three times out of four. The island dialect, assuming it to have been comparatively uniform, so that the Santa Cruz material may be taken as representative of all the islands, shows no special affinity to any one of the dialects of the Central division. The same seems true of San Luis Obispo, but this idiom would seem to be more specialized than the island dialect. Graphically the relations may be represented thus:

³² See, for instance, present series, IV, 138, 1907.

COMPARATIVE VOCABULARIES.

The table is derived from the following sources: San Luis Obispo, Hale,³³ Santa Ynez, the author and Taylor,³⁴ Santa Barbara, Hale,³³ Loew,³⁵ and Portola,³⁶ San Buenaventura, the author; Santa Cruz Island, Timmeno.³⁷

Eleven	tiwapa	telu	telu
Stone	t-Xöp	Xöp	wa
Water	t-o	o	mihi
Bow	t-axa	ax	twopau
Sky	tixis	alapa	nawoni
Father	sapi	qoqo	seske

GRAMMATICAL NOTES.

The brief San Luis Obispo vocabulary shows one consistent peculiarity. All its terms except four or five, besides the numerals and body-part words with possessive prefix, begin with *t-* or *te-*. Thus *t-awa*, moon, in other dialects *awai*; *t-o*, water, as compared with *o*; *ts-limi*, stream, versus *ulam*. Even adjectives are not excluded: *ts-owis*, bad, *ts-exu*, much, elsewhere *uhu*. It would appear that this prefix is a proclitic article, such as *ma* is in the Santa Ynez dialect.³⁸ The Salinan language, to which the San Luis Obispo dialect was adjacent, though so far as known unrelated, presents the almost identical circumstance that the majority of nouns commence with *t-*, *te-*, or *s-*.³⁹

The pronominal forms, which are identical whether subjective or possessive, but quite distinct and suffixed instead of prefixed when objective, appear as follows:

³⁸ Present series of publications, II, 36, 1904.

³⁹ *Ibid.*, 46.

	S Y	S Ba	S Bv	Id	S L O
1 S	k-	k-		k-	
2 S	p-	p-	p-	p-, pas-, pate-	p-
3 S	s-	s-	ts-	ic-, tea-, tc-	
1 D	kis-		kis-		
2 D	pis-				
3 D	sis-				
1 P	ki-		ki-		
2 P	pi-				
3 P	si-				

The San Buenaventura dual and plural forms occur in *kisiskom*, we two, and *ki-masóx*, we three.

The objective suffixes determined in Santa Ynez are *-it*, *-lit*, *me*, *-in*, *-lin*, *-win*, *you*, *-u*, *us*, and *-un*, *-wun*, *them*. The only parallels are in the prayer below.

A past suffix *-wac* or *-woc* is shared at least by Santa Barbara with Santa Ynez.

The plural of nouns is regularly formed by reduplication in Santa Ynez, Santa Barbara, and Santa Cruz Island. The process may be assumed to be characteristic of all dialects of the family.

A noun-forming prefix *al-* appears in Santa Barbara *al-kean*, dead; in San Buenaventura *al-owo*, white, *al-cocoi*, black, *al-ukstai*, red, and possibly in *alaxüwül*, coyote; in Santa Cruz Island *ala-pupu*, white, *alo-kopok*, dead; perhaps in *la-stepin*, black, and *al-apamai*, body; and in *al-amün*, man—compare Santa Ynez *amun*, body. San Luis Obispo *lmono*, man, has perhaps the same composition.

A number of Island verbs are given with the prefix *na-*.

It seems that the Chumash dialects are comparatively uniform in grammar in spite of their considerable lexical divergences.

TEXTS.

Textual material is almost wanting except for a Lord's Prayer given by Dufnot de Mofras⁴⁰ as in the language of Santa Ynez. This reappears with but slight variations in Ca-

⁴⁰ II, 393.

balleria y Collell's History of the City of Santa Barbara,⁴¹ where it is given in connection with notes on the language of Siujtu, Yuctu, or Yuctu village near that town. Both texts leave much to be desired, showing obvious misreadings and words arbitrarily connected and divided; but a partial translation is possible.

DUFLOT DE MOFRAS.

Dios caquicoco upalequen alapa quiaenicho opte: paquininigug quique eccuet upalacs huatahuc itimisshup caneche alapa. Ulamahu ilahulalisahue. Piciyug equepe ginsucutaniyug uquiyagmagin canechequique quisagin sucutanagun utiyagmayiyug peuxhoyug quie utic lex ulechop santequing ilautechop. Amen.

CABALLERIA.

(deliver)-us	from-evil.				

⁴¹ Santa Barbara, 1892.

NOTES.

1. lülükon, in.
2. -ug or -gug appears throughout this text for the first person plural objective. Spanish *g* is a voiced fricative, and Chumash possesses such a sound in *k* or *q* position.
3. Caballeria y Collell gives, for Santa Barbara, a "dative" preposition *il*, a "genetive" or "ablative" *ul*. Compare *il-autetcop*.
4. -sa- is perhaps the future. Compare Gatschet in Wheeler Survey VII, 485, *k-caa cuun*, I shall eat, *ke k-caa cian*, I shall not buy.
5. Possibly *pwö*, not, though *ini-* is the negative element of verbs.
6. Either *kie*, for *kike*, *kiku*, *us*, or *kia*, *this*.

Caballeria also gives the Acts of Faith, Hope, and Charity.

The late Mr. L. G. Yates included in his valuable paper on Charmstones⁴² the words and translation of a Chumash song in the dialect of San Buenaventura:

kayuwawille	lelenimustu	mesipposh	sumusil
I shall tell;	uneasy	heart	charmstone
kateushwen	laliolio	lwennew	
I have not	sad	?	

Another Chumash song occurs in a Yokuts myth:⁴³

kapix, you(?) came
 tata, mother's brother
 caxcaniwac, you will die (*sic*; probably: have died)
 salialama, perhaps refrain, compare laliolio in the last song.

Transmitted March 29, 1910.

⁴² Ann. Rep. Smiths. Inst. for 1886, 296, 1889.

⁴³ Present series, IV, 242, 1907. The dialect represented is most likely to be that of the mountains to the north of San Buenaventura. If so, it does not differ greatly from the idiom of San Buenaventura, Santa Barbara, and Santa Ynez. The tradition is localized in Chumash territory, and may be of Chumash origin.

UNIVERSITY OF CALIFORNIA PUBLICATIONS—(CONTINUED)

Note.—The University of California Publications are offered in exchange for the publications of learned societies and institutions, universities and libraries. Complete lists of all the publications of the University will be sent upon request. For sample copies, lists of publications or other information, address the Manager of the University Press, Berkeley, California, U. S. A. All matter sent in exchange should be addressed to The Exchange Department, University Library, Berkeley, California, U. S. A.
