Figure S1. Identification by mass spectrometry of neutrophil proteins isolated by affinity chromatography on immobilized SRCL. A portion of the gel in Fig. 2A is shown. Rectangles indicate regions of the gel excised for analysis. The top 10 matches for each numbered sample are provided in Table S1.

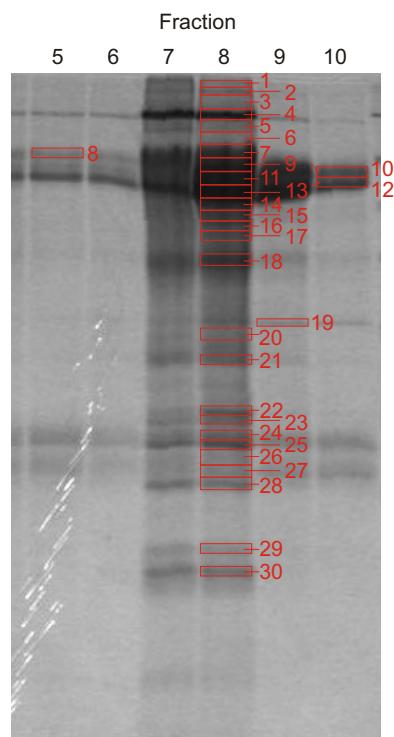

Table S1: Identification by mass spectrometry of neutrophil proteins isolated by affinity chromatography on immobilized SRCL.

Scores over 55 are significant ($p<0.05$). Significant matches which are considered to be candidate ligands for SRCL based on factors including known expression in neutrophils and presence of glycosylation are highlighted in yellow. Non-significant matches which are considered to be candidate ligands by the same criteria are highlighted in orange. Where multiple candidate ligands are indicated in a sample, these arise from largely non-overlapping sets of peptides. Significant matches highlighted in grey are not considered to be genuine because they arise largely from peptides contributing to a higher-scoring match. Significant matches highlighted in blue are not of neutrophil origin: hemoglobin from erythrocyte contamination of the granulocyte preparation and exogenous keratin introduced during sample preparation.

^a Where a Mowse score is not given, identification of the protein was based on inspection of the list of peptides not assigned to proteins for matches to known Lewis^x-containing neutrophil proteins. Observed peptide masses that support these protein identifications are indicated in footnotes.

Figure S3: Digestion of neutrophil lactoferrin N-glycans with endo- β -galactosidase.

A, MALDI-MS profile of 50% acetonitrile fraction of neutrophil lactoferrin N-glycans following endo- β -galactosidase digestion. Molecular ions resulting from endo- β -galactosidase digestion are shown in red. Putative structures are based on composition, tandem mass spectrometry and knowledge of biosynthetic pathways. Other peaks are the same as those shown in Fig. 6A and are resistant to endo- β -galactosidase cleavage. B, MALDI-MS profile of 35% acetonitrile fraction of neutrophil lactoferrin N-glycans following digestion with endo- β -galactosidase. Annotated peaks indicate fragments released from glycan antennae.

A

B

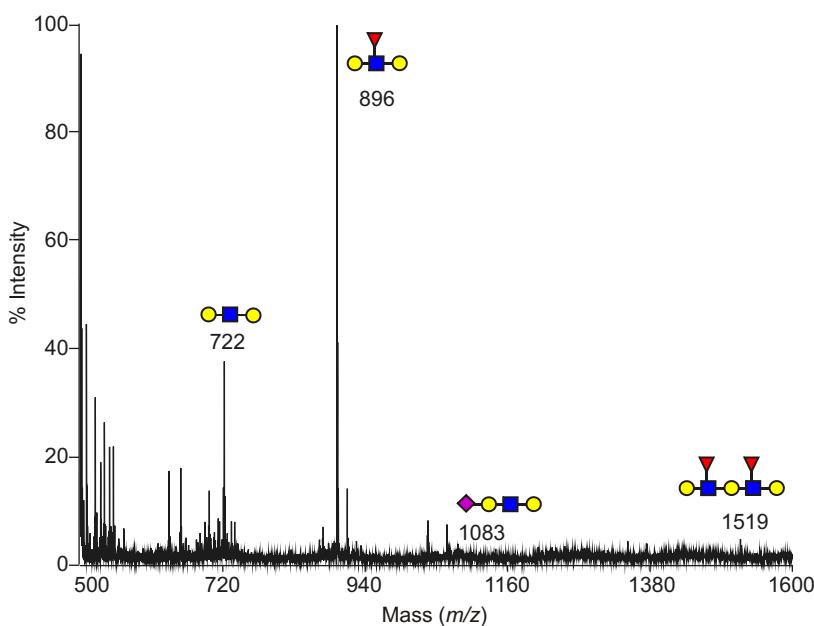

Figure S4: MALDI-MS profile of neutrophil lactoferrin N-glycans following HF treatment.
 Structures of the glycans resulting from HF treatment were deduced by MS/MS analysis. *M* denotes major components and *m* denotes minor components.

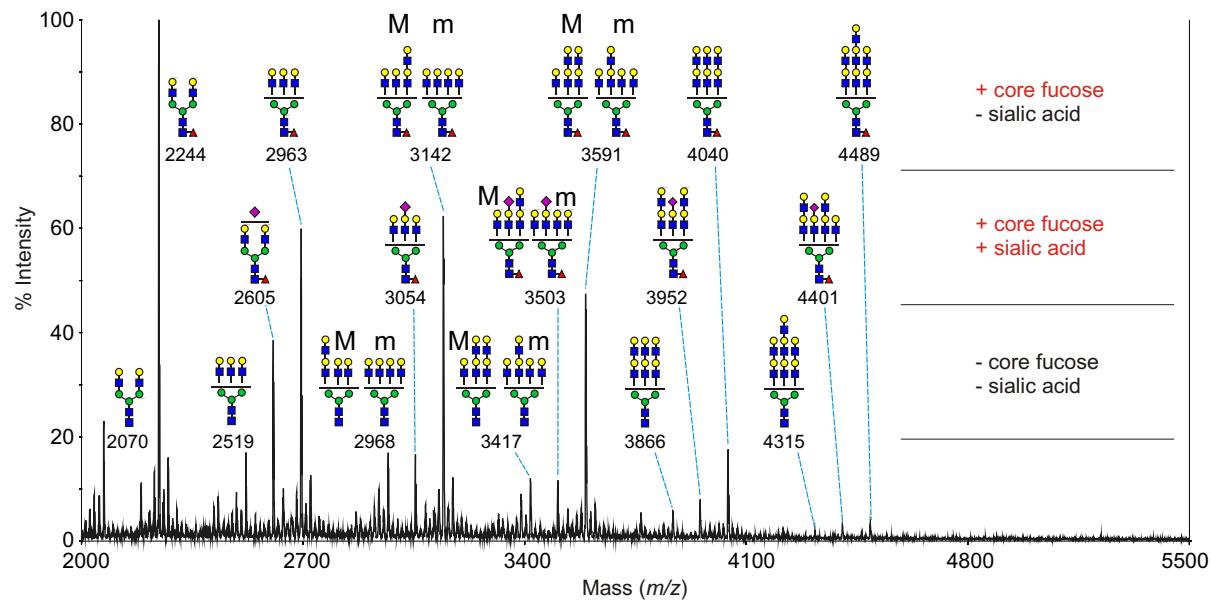

Table S6: Monosaccharide compositions of neutrophil lactoferrin N-glycans following HF treatment.

3765.6	HexNAc ₇ Hex ₈ Fuc ₂
3940.0	HexNAc ₇ Hex ₈ Fuc ₃

Table S10: Monosaccharide compositions of N-glycans from SRCL binding fraction of neutrophil lactoferrin.

<i>m/z</i> values observed	Glycan composition
2244.0	HexNAc ₄ Hex ₅ Fuc ₁
2418.1	HexNAc ₄ Hex ₅ Fuc ₂
2592.3	HexNAc ₄ Hex ₅ Fuc ₃
2693.3	HexNAc ₅ Hex ₆ Fuc ₁
2779.4	HexNAc ₄ Hex ₅ Fuc ₂ NeuAc ₁
2867.4	HexNAc ₅ Hex ₆ Fuc ₂
3041.5	HexNAc ₅ Hex ₆ Fuc ₃
3215.4	HexNAc ₅ Hex ₆ Fuc ₄
3230.4	HexNAc ₅ Hex ₆ Fuc ₂ NeuAc ₁
3316.6	HexNAc ₆ Hex ₇ Fuc ₂
3402.7	HexNAc ₅ Hex ₆ Fuc ₃ NeuAc ₁
3490.7	HexNAc ₆ Hex ₇ Fuc ₃
3664.8	HexNAc ₆ Hex ₇ Fuc ₄
3765.9	HexNAc ₇ Hex ₈ Fuc ₂
3851.9	HexNAc ₆ Hex ₇ Fuc ₃ NeuAc ₁
3940.0	HexNAc ₇ Hex ₈ Fuc ₃
4114.0	HexNAc ₇ Hex ₈ Fuc ₄
4288.1	HexNAc ₇ Hex ₈ Fuc ₅
4301.1	HexNAc ₇ Hex ₈ Fuc ₃ NeuAc ₁
4389.1	HexNAc ₈ Hex ₉ Fuc ₃
4476.2	HexNAc ₇ Hex ₈ Fuc ₄ NeuAc ₁
4563.2	HexNAc ₈ Hex ₉ Fuc ₄
4737.3	HexNAc ₈ Hex ₉ Fuc ₅

Table S11: Human tissue array.

Core	Age	Sex	Organ	Core	Age	Sex	Organ
1	60	F	Skin	31	77	M	Small bowel
2	43	F	Skin	32	56	M	Small bowel
3	49	F	Subcutis	33	72	F	Appendix
4	53	F	Breast	34	72	F	Colon
5	43	F	Breast	35	71	M	Colon
6	63	M	Spleen	36	49	F	Rectum
7	53	F	Spleen	37	34	M	Kidney cortex
8	49	M	Lymph node	38	44	F	Kidney cortex
9	46	M	Lymph node	39	34	M	Kidney medulla
10	61	M	Skeletal muscle	40	53	M	Urinary bladder
11	25	M	Nasal musosa	41	47	M	Prostate
12	55	M	Lung	42	59	M	Prostate
13	42	F	Lung	43	59	M	Seminal vesicle
14	69	F	Bronchus	44	72	M	Testis
15	58	M	Heart	45	42	F	Endometrium, proliferative
16	50	M	Salivary gland	46	41	F	Endometrium, secretory
17	56	M	Liver	47	53	F	Myometrium
18	53	F	Liver	48	42	F	Uterine cervix
19	42	F	Liver	49	53	F	Salpinx
20	64	M	Gallbladder	50	39	F	Ovary
21	63	M	Pancreas	51	30	F	Placenta
22	62	M	Pancreas	52	?	F	Placenta
23	33	F	Tonsil	53	30	F	Umbilical cord
24	54	M	Esophagus	54	59	M	Adrenal gland
25	74	M	Esophagus	55	39	M	Thyroid
26	42	M	Stomach, body	56	20	F	Thymus
27	49	F	Stomach, body	57	0	F	Brain, white matter
28	40	M	Stomach, antrum	58	0	F	Brain, grey matter
29	36	M	Stomach, smooth muscle	59	0	F	Cerebellum
30	57	F	Duodenum
