
First Edoardo Amaldi Conference
on
Gravitational Wave Experiments

Villa Tuscolana, Frascati (Rome), 14-17 June, 1994

This conference is intended to honour Edoardo Amaldi for his role in promoting and actively participating in gravitational wave research. Its purpose of this conference is to bring together scientists engaged in research both with gravitational wave antennas and with neutrino telescopes, with special emphasis on recent developments in resonant cryogenic antennas.

The topics to be covered are:

Gravitational wave experiments with resonant mass,
interferometers and space detectors

Neutrino telescopes

Astrophysical sources

Coincidences among different detectors

The deadline for registration and room reservation is April 15, 1994.
