The quantity $|c_{\ell m}|^2$ defined in (A24) of this paper should be given by

$$|c_{\ell m}|^2 = \left[ (\lambda^2 + 2) + 4mq_1 m_1 \omega_m - 4q_1^2 m_1^2 \omega_m^2 \right] \left( \lambda^2 + 36mq_1 m_1 \omega_m - 36q_1^2 m_1^2 \omega_m^2 \right)$$

$$+ (2\lambda + 3)(96q_1^2 m_1^2 \omega_m^2 - 48mq_1 m_1 \omega_m) + 144\omega_m^2 m_1^2 (1 - q_1^2).$$

The factor $4mq_1 m_1 \omega_m$ in the first square bracketed expression is missing the factor $m$ in the published version of this paper. This equation is correctly implemented in the code used for the work reported in this paper.
