The Use of Satellite Data In Climate Models

Proceedings of a conference
held in Alpbach, Austria
10–12 June 1985

Sponsors:

Austrian Solar & Space Agency (ASSA)
European Space Agency (ESA)

Cosponsors:

Bundesministerium für Forschung und Technologie (BMFT)
Commission of the European Communities (CEC)
European Science Foundation (ESF)
World Climate Research Programme (WCRP)

european space agency / agence spatiale européenne

8-10, rue Mario-Nikis, 75738 PARIS CEDEX 15, France

Contents

FOREWORD	vii
EXECUTIVE SUMMARY	ix
REPORT OF THE WORKING GROUP ON WIND AND WAVE DATA	xiii
REPORT OF THE WORKING GROUP ON OCEANOGRAPHIC ALTIMETRY	xvii
REPORT OF THE WORKING GROUP ON ICE MONITORING AND RESEARCH	xix
REPORT OF THE WORKING GROUP ON SEA SURFACE TEMPERATURE DATA AND THEIR APPLICATION IN CLIMATE MODELS	xxiii

Session 1 – Introduction

Chaired by: I. Tannhäuser (BMFT)

IMPACT OF SATELLITE MEASUREMENTS ON OCEANOGRAPHIC COMPONENT OF THE WCRP <i>C Wunsch (MIT, Mass., USA)</i>	3
FOUR-DIMENSIONAL DATA ASSIMILATION INTO ATMOSPHERIC GLOBAL MODELS <i>L Bengtsson (ECMWF, Reading, UK)</i>	7

Session 2 – Waves I

Chairman: J.T. Houghton (UK Meteorological Office)

INTRODUCTION TO WAVE MODELS AND ASSIMILATION OF SATELLITE DATA IN WAVE MODELS <i>G J Komen (KNMI, De Bilt, The Netherlands)</i>	21
ALGORITHMS FOR WIND SCATTEROMETER PROCESSING <i>D Offiler (Meteorological Office, Bracknell, UK)</i>	27
USE OF SCATTEROMETER ON REGIONAL SCALE SEAS AND COASTAL WATERS. THE CASE OF THE MEDITERRANEAN <i>R Frassetto (ISDGM-CNR, Venice, Italy)</i>	33
ALGORITHM FOR WINDSCATTEROMETER DATA ANALYSIS-AMBIGUITY SUPPRESSION <i>K J Schwenzfeger (Univ. of the German Armed Forces Munich, FRG)</i>	35
INTRODUCTION TO WAVE MODELS AND ASSIMILATION OF SATELLITE DATA IN WAVE MODELS <i>L Cavaleri (ISDGM-CNR, Venice, Italy)</i>	37

Session 3 – Waves II

Chairman: T D Allan (Institute of Oceanographic Sciences)

MICROWAVE MEASUREMENTS OF THE SEA SURFACE <i>W Alpers (Universität Bremen, FRG)</i>	41
ASSIMILATION OF MICROWAVE DATA IN ATMOSPHERIC AND WAVE MODELS <i>K Hasselmann (Max-Planck-Institut für Meteorologie, Hamburg, FRG)</i>	47
ASSIMILATION OF REMOTELY-SENSED SURFACE WIND AND WAVE DATA INTO GLOBAL NUMERICAL WEATHER PREDICTION AND SEA STATE MODELS <i>J P Thomas (Meteorological Office, UK)</i>	53
REMARKS ON THE USE OF WAVE SCATTEROMETER DATA IN CONJUNCTION WITH THE WIND-SCATTEROMETER <i>W Rosenthal (GKSS-Forschungszentrum, Geesthacht, FRG)</i>	55

Session 4 – Ocean Circulations

Chairman: C Wunsch (MIT)

INTRODUCTION TO OCEAN CIRCULATION MODELS <i>J Willebrand (Universität Kiel, FRG)</i>	63
DIAGNOSTIC INVERSE MODELS OF OCEAN CIRCULATION <i>D J Olbers (Max-Planck-Institut für Meteorologie, Hamburg, FRG)</i>	65
COMMENTS ON DATA REQUIREMENTS FOR OCEAN CLIMATE STUDIES <i>H Cattle (Meteorological Office, Bracknell, UK)</i>	67
ANALYSIS AND INTERPRETATION OF ALTIMETRY DATA <i>J-F Minster (Laboratoire de Physique et Chimie de l'Hydrosphère, ICG Paris, France)</i>	71
ALTIMETRIC OBSERVING SYSTEM SIMULATION STUDIES WITH AN EDDY RESOLVING OCEAN CIRCULATION MODEL <i>J Marshall (Department of Physics, Imperial College, UK)</i>	73
INTERPRETATION OF ALTIMETER DATA OVER SEA ICE <i>N F McIntyre (Mullard Space Science Laboratory, Univ. College London, UK)</i>	77

Session 5 – Sea Level & Sea Ice

Chaired by: I G Rubinstein (Ph.D. Associates)

SEA LEVEL AND CLIMATE VARIATIONS <i>J Oerlemans (University of Utrecht, The Netherlands)</i>	81
SEA ICE MODELS AND REMOTE SENSING <i>W D Hibler III (Max Planck Inst., Hamburg, FRG)</i>	87
ACCURACY OF EXISTING OCEAN TIDE MODELS <i>P L Woodworth (Institute of Oceanographic Sciences, Birkenhead, UK)</i>	95
HIGH LATITUDE DATA REQUIREMENTS FOR CLIMATE MODELS <i>P Lemke (Max-Planck-Institut für Meteorologie, Hamburg, FRG)</i>	99

DISCUSSION REMARK	101
<i>R Kuittinen (Technical Research Centre of Finland) & M Hallikainen (Helsinki University of Technology, Finland)</i>	

DERIVING SEA ICE INFORMATION FROM RADAR ALTIMETRY WITH RELATION TO MODELLING	103
<i>M R Drinkwater (Scott Polar Research Institute, Cambridge, UK)</i>	

Session 6 – Ice & Snow

Chairman: L Bengtsson (ECMWF)

APPLICATION OF SAR AND OTHER REMOTE SENSING DATA IN STUDIES OF THE ATMOSPHERE-OCEAN-ICE INTERACTION	107
<i>P Gudmandsen (TU of Denmark, Lyngby, Denmark)</i>	

SCIENTIFIC APPLICATION OF SAR DATA TO SEA STUDIES. SEA ICE MODELS	113
<i>J C Gascard (Laboratoire d'Océanographie Physique, France)</i>	

APPLICATION OF SAR DATA TO SEA ICE AND ICE SHELF STUDIES IN THE WEDDELL SEA REGION	115
<i>E Augstein (Bremerhaven, FRG)</i>	

SCIENTIFIC APPLICATION OF PASSIVE MICROWAVE SATELLITE DATA FOR ICE MONITORING AND RESEARCH	117
<i>I G Rubinstein (Ph.D. Associates Inc., Canada) & R O Ramseier (Atmospheric Environment Service, Ottawa, Canada)</i>	

FUTURE PASSIVE MICROWAVE SATELLITE DATA FOR SEA-ICE RESEARCH	125
<i>D L Croom (Rutherford Appleton Laboratory, Didcot, Oxon, UK)</i>	

MONITORING THE SEASONAL DEVELOPMENT OF LARGE-SCALE PATTERNS OF SNOW AND SEA ICE BY COMBINING ACTIVE AND PASSIVE MICROWAVE DATA	129
<i>C Mätzler (University of Berne, Switzerland)</i>	

MAPPING OF SNOW BY PASSIVE AND ACTIVE MICROWAVE SENSORS	131
<i>M Hallikainen (Helsinki Univ. of Technology, Finland) & R Kuittinen (Tech. Res. Centre of Finland)</i>	

MONITORING OF SNOW AND LAND ICE PARAMETERS: POSSIBILITIES AND CONSTRAINTS OF SAR AND MICROWAVE IMAGING SYSTEMS	133
<i>H Rott (University of Innsbruck, Austria)</i>	

Session 7 – Sea Surface Temperature

Chairman: R Frassetto (CNR/IDGM)

PRECISE SST DATA FROM SATELLITES	139
<i>D T Llewellyn-Jones (Rutherford Appleton Laboratory, Didcot, Oxon, UK)</i>	

REMOTE SENSING OF SEA SURFACE TEMPERATURE	143
<i>G Dalu & A Viola (Istituto di Fisica dell'Atmosfera, Rome, Italy)</i>	

SEA SURFACE TEMPERATURES AS THE KEY PARAMETER FOR SURFACE ENERGY BUDGET	147
<i>H Graßl (GKSS-Forschungszentrum, Geesthacht, FRG)</i>	

POST LAUNCH CALIBRATION AND VALIDATION OF THE ALONG TRACK SCANNING RADIOMETER (ATSR)	149
<i>I M Mason (Mullard Space Science Laboratory, Dorking, UK)</i>	
4 DIMENSIONAL DATA ASSIMILATION IN TOGA MODELS	151
<i>D L T Anderson & A M Moore (Department of Atmospheric Physics, Oxford, UK)</i>	
THE USE OF AIRBORNE MICROWAVE INSTRUMENTS TO GATHER DATA FOR THE VALIDATION OF ERS-1 WIND AND WAVE PRODUCTS	155
<i>R J Powell (Rutherford Appleton Laboratory, Didcot, Oxon, UK)</i>	
WINDS FOR CLIMATE RESEARCH FROM THE ERS-1 AND N-ROSS SCATTEROMETERS	157
<i>T H Guymier (Inst. of Oceanographic Sciences, Wormley, UK)</i>	
Session 8 – ESA Programme & National Data Centres	
<i>Chairman: J-F Minster (Institut de Physique du Globe)</i>	
REVIEW OF SCIENTIFIC AND TECHNICAL WORK REQUIRED BEFORE THE LAUNCH OF ERS-1: THE VIEW OF ESA	163
<i>G Duchossois & al (European Space Agency)</i>	
WIND DIRECTION AMBIGUITY SUPPRESSION ALGORITHMS	175
<i>D Offiler (Meteorological Office, Bracknell, UK)</i>	
THE UK ERS DATA CENTRE	177
<i>C G Rapley (Mullard Space Science Laboratory, Dorking, Surrey, UK)</i>	
CERSAT/AVISO/ALGOS: THE FRENCH PROGRAM FOR A COHERENT OCEANOGRAPHIC DATA BASE	181
<i>B Nutten (CNES, France)</i>	
LIST OF PARTICIPANTS	187
