^a Healthy Control mean = 85.94; SD = 10.01 N = 15.

^b Healthy Control mean = 81.88; SD = 17.49; N = 15.

^c Correlation between 1st and 3rd person tasks in healthy control sample = .813.

* significant deficit

** significant dissociation (differential deficit) between unimpaired first person perspective taking ability and third person perspective taking deficit.
