

# Black Holes and High Energy Astrophysics

Proceedings of the Yamada Conference XLIX on Black Holes and High Energy Astrophysics  
held on April 6-10, 1998, in Kyoto, Japan

FRONTIERS SCIENCE SERIES NO. 23

Edited by

**H. Sato**

*Department of Physics, Kyoto University*

**N. Sugiyama**

*Department of Physics, Kyoto University*

Universal Academy Press, Inc.

*Tokyo, Japan*

# Contents

<b>Preface</b>	
H. Sato and N. Sugiyama . . . . .	v
<b>Opening Address</b>	
H. Sato . . . . .	vii
<b>Welcome Address</b>	
Y. Yamada . . . . .	ix
<b>Galaxy Formation</b>	
J. Silk . . . . .	1
<b>How Smooth is the Universe on Large Scales?</b>	
O. Lahav . . . . .	19
<b>Cosmology with High Redshift “Objects” on Large Scales</b>	
L.-Z. Fang . . . . .	31
<b>Gravitational Lensing in Inhomogeneous Universes</b>	
R. M. Wald . . . . .	47
<b>Formation of Cosmic Structures From Lyman Alpha Clouds to Galaxies</b>	
S. Ikeuchi . . . . .	57
<b>‘Deconstructing’ the Cosmic Distance Scale</b>	
M. Fukugita . . . . .	65
<b>Cosmology Solved? Maybe.</b>	
M. S. Turner . . . . .	87
<b>Big Bang Nucleosynthesis as a Probe of the Early Universe</b>	
K. Sato, K. Kohri, and M. Kawasaki . . . . .	101
<b>Nonequilibrium Cosmic Neutrinos and Nucleosynthesis</b>	
A. D. Dolgov . . . . .	117
<b>Physics and Cosmology in an Inhomogeneous Universe</b>	
A. Krasinski . . . . .	133
<b>Consistency of Inhomogeneous Solutions and the Nature of the Newtonian Limit</b>	
G. F. R. Ellis and H. van Elst . . . . .	149
<b>Beyond the Critical Mass: The Dyadosphere of Black Holes</b>	
R. Ruffini . . . . .	167

<b>Black Holes and Active Galactic Nuclei</b>	
S. Tsuruta . . . . .	189
<b>Open Universes, Inflation, and the Anthropic Principle</b>	
A. Vilenkin . . . . .	205
<b>Gamma-Ray Bursts - The Second Revolution</b>	
T. Piran . . . . .	217
<b>Table-Top Model for Black Hole Electromagnetic Instabilities</b>	
W. H. Press . . . . .	235
<b>Coalescing Binary Neutron Stars /Black Holes</b>	
T. Nakamura . . . . .	249
<b>Gravitational Waves: Crossing the “zepto” Threshold</b>	
B. F. Schutz . . . . .	271
<b>Probing Black Holes with Gravitational Waves</b>	
K. S. Thorne . . . . .	291
<b>Cosmic Rays from Evaporating Black Holes</b>	
B. J. Carr . . . . .	315
<b>ASCA View of the X-Ray Sky</b>	
K. Koyama . . . . .	333
<b>Evidence for Neutrino Oscillation Observed in Super-Kamiokande</b>	
Y. Totsuka . . . . .	343
<b>Very High Energy Gamma Ray Astronomy</b>	
T. Kifune . . . . .	367
<b>“MOA” - The JAPAN-NZ Gravitational Microlensing Project</b>	
P. C. M. Yock . . . . .	375
<b>Astrophysics of Extremely High Energy Cosmic Rays: Recent AGASA Results</b>	
M. Nagano . . . . .	387
<b>Extremely High Energy Cosmic-Rays and Relativity Principle</b>	
H. Sato . . . . .	401
<b>Dumb Holes, Temperature and Entropy</b>	
W. G. Unruh . . . . .	411
<b>Black Holes, Brick Walls and Entropy</b>	
W. Israel . . . . .	417
<b>Generalized Quantum Theory and Black Hole Evaporation</b>	
J. B. Hartle . . . . .	433

<b>The Long Road to Exact Solutions</b>	
C. A. Hoenselaers . . . . .	451
<b>A Short Review of Tomimatsu-Sato Metrics: from Spinning Masses to Gravitational Waves</b>	
A. Tomimatsu . . . . .	463
<b>Thirty Years of Complex Potentials</b>	
F. J. Ernst . . . . .	477
<b>Quantum State-Reduction as a Gravitational Phenomenon; Theory and Experiment</b>	
R. Penrose . . . . .	493
Program . . . . .	495
Banquet . . . . .	497
List of Participants . . . . .	501
Author Index . . . . .	507
