

Coordination of book acquisition

Using Current Awareness Services and a Bibliographic Management System

Annemieke Sweere & Karin Kastens
Library
MPI for Psycholinguistics

Bibliothekstagung GSHS Hamburg, 18 nov 2008

Library MPI for Psycholinguistics

1 head librarian
2 library assistants
1 student assistant

Book acquisition: present method

- The research groups are represented in the Library Committee (LibCom).
- The LibCom members make suggestions for new book acquisitions from publisher's catalog's
- Other staff members can also make ad hoc book order requests
- All suggestions are validated at quarterly libcom meetings

--> disadvantage: no continuous acquisition policy
(workflow)

Goal new set up

- More coordinated and systematic approach
- Keep track of new and upcoming titles
- Systematic and more continuous collection development (unlike present ad hoc method)
- Reducing information overload by pre-selection

Setting up the service

1. Identifying relevant Current Awareness Service (CAS)
2. Setting up interest profile: subject topics, keywords, document types (e.g. books, conference proceedings etc.)
3. Start receiving e-mail notifications or reports
4. Organize and manage the information provided by CAS (in Zotero)
5. Pre selection and check for doubles in library catalog
6. Output: produce reports of new publications for the Libcom
7. Enter selected titles in Aleph and order them

Identifying, selecting, and customizing Current Awareness Services

- CAS are provided by publishers, booksellers
- Automated searches using the keywords specified by the user
- Setting up a profile
 - Choose subject topics, keywords
 - Choose document types
 - Use broad spectrum profile

Services and e-mail notifications

Missing link: www.newbooks.de

The screenshot shows the NewBooks website search interface. At the top, the logo reads "NEWBOOKS CATALOG WISSENSCHAFTS- UND FACHLITERATUR". A navigation bar includes links for Home, Newsletter, Kundenprofil anlegen, Hilfe, Merkzettel, and English, with the date 12.11.2008 on the right. Below this, a search bar contains the text "Schnellsuche: Volltext" and a status bar shows "Suchen | Warenkorb: 0 Artikel im Warenkorb | Zum Bestellvorgang".

The main search area is titled "Profisuche" and lists various subject categories: Suchen im Fachgebiet, Alle Fachgebiete, Geisteswissenschaften, Informatik, Interdisziplinäres, Medizin | Pharmazie, Naturwissenschaften | Mathematik, Rechtswissenschaft, Sozialwissenschaften, Technische Wissenschaften, and Wirtschaftswissenschaften.

Below the categories is a search form with the following fields and options:

Volltextsuche	<input type="text"/>	Erscheinungsjahr	<input type="text"/>	Neuerscheinungen	<input type="text"/>
Titel	<input type="text"/>	Erscheinungsjahr	<input type="text"/>	bis	<input type="text"/>
Autor/Hrsg.	<input type="text"/>	Neuzugänge der letzten	Alle		
Verlag	<input type="text"/>	Sprache	Alle		
ISBN	<input type="text"/>	Kategorie	Alle		
Suchergebnisse	Anzeigen als Detailliste		Medium	Alle	

At the bottom of the search area, there are links for "Neue Suche" and "Suchen".

On the right side of the search area, there is a "NEWBOOKS NEWSLETTER" box with the text: "Alert me - neue Fachliteratur passend zu Ihrem Themengebiet".

The footer of the page contains navigation links: Buchhandel, Verlage, Bibliotheken, Webservice Partner, Partner, Kontakt, Über uns, and Impressum. It also includes a login section with "Anmelden: E-Mail: annemieke, Passwort: *****" and buttons for "Anmelden" and "Kundenprofil anlegen". The copyright notice "© 2008 by newBooks" and the Zotero logo are also present.

Coordinated book acquisition

Organize and manage new titles in bibliographic management system

- Select titles
- Check for doubles in library catalog (Aleph)

Input into bibliographic managements systems:

- Zotero (easy, quick to learn)
- CiteULike (emphasis on journal articles)

→ We use Zotero

Import bibliographic data into Zotero Zotero ; a plug-in to firefox

Zotero is a free, easy-to-use **Firefox extension** to help you **collect, manage, and cite** your research sources. It lives right where you do your work — in the **web browser** itself.

The screenshot shows the Amazon.com website for the book "The Modularity of Mind" by Jerry A. Fodor. The URL in the browser's address bar is circled in red. A red arrow points from this circle to the Zotero interface below, which shows the book's metadata being imported into a library collection. The Zotero interface includes a list of books, a filter for tags, and a detailed view of the selected book's metadata.

Anticipating upcoming words in discourse: Evidence from ERPs and reading times (Journal Article)

Export: http://pubman.mpg.de/pubman/item/escidoc:23004:14

Author: Van Berkum, Jos [1]

Affiliations: 1: Production Group, MPI for Psycholinguistics, Max Planck Society Nijmegen, NL

Dates: Published in Print: 2005
 free keywords: en
 Rev. Method: Peer

DETAILS

Abstract: We examined whether people can use their knowledge of the wider discourse rapidly enough to anticipate specific upcoming words as a sentence is unfolding. In an ERP experiment, subjects heard Dutch stories that supported the prediction of a specific noun. To probe whether this noun was anticipated at a preceding indefinite article, stories continued with a gender-marked adjective whose suffix mismatched the upcoming noun's syntactic gender. Prediction-inconsistent adjectives elicited a differential ERP effect, which disappeared in a no-discourse control experiment. Furthermore, in self-paced reading, prediction-inconsistent adjectives slowed readers down before the noun. Our findings suggest that people can indeed predict upcoming words in fluent discourse, and, moreover, that these predicted words can immediately begin to participate in incremental parsing operations.

Contemporary Views on Architecture and Representations in Phonology

Type Book
Editor Eric Raimy
Editor Charles E. Cairns
Abstract The essays in this volume address foundational questions in phonology that cut across different schools of thought within the discipline. The theme of modularity runs through them all, however, and these essays demonstrate the benefits of the modular approach to phonology, either investigating interactions among distinct modules or developing specific aspects of representation within a particular module. Although the contributors take divergent views on a range of issues, they agree on the importance of representations and questions of modularity in phonology. Their essays address the status of phonological features, syllable theory, metrical structure, the architecture of the phonological component, and interaction among components of phonology.

Abstract

This volume explores the cognitive neuroscience of second language acquisition from the perspectives of critical/sensitive periods, maturational effects, individual differences, neural regions involved, and processing characteristics. The research methods used include functional magnetic resonance imaging (fMRI), positron emission tomography (PET), and event related potentials (ERP). * The studies in this volume provide initial answers to core questions including: which brain areas are reliably activated in second language processing? Are they the same or different from those activated in first language acquisition and use? And what are the behavioral consequences of individual differences among brains?

Coordinated book acquisition

Negative aspects

- The time required to work through the information (extra work librarian)
- Duplication of information when using more CAS methods
- Pre-selection by librarian may be not adequate enough (we try to be as broad as possible)

Conclusion

- Positive feedback by LibCom members about first report
- We try to optimize it so that the results are better and it costs less work for librarians
